Introduction

The National Highway Traffic Safety Administration has collected motor vehicle traffic crash data since the early 1970s to support its mission to reduce motor vehicle traffic crashes, injuries, and deaths on our Nation's trafficways. The two data systems included in this Coding and Validation Manual are the **Fatality Analysis Reporting System (FARS)** and the **Crash Report Sampling System (CRSS)**.

FARS

FARS contains data derived from a census of fatal motor vehicle traffic crashes in the 50 States, the District of Columbia, and Puerto Rico. To be included in FARS, a crash must involve a motor vehicle traveling on a trafficway customarily open to the public and must result in the death of at least one person (occupant of a vehicle or a non-motorist) within 30 days of the crash. FARS was conceived, designed, and developed by NHTSA's National Center for Statistics and Analysis (NCSA) in 1975 to provide an overall measure of highway safety, to help identify traffic safety problems, to suggest solutions, and to help provide an objective basis to evaluate the effectiveness of motor vehicle safety standards and highway safety programs.

CRSS

CRSS builds on the retiring, long-running National Automotive Sampling System General Estimates System (NASS GES). CRSS is a sample of police-reported motor vehicle traffic crashes involving all types of motor vehicles, pedestrians, and cyclists, ranging from property-damage-only crashes to those that result in fatalities. CRSS is used to estimate the overall crash picture, identify highway safety problem areas, measure trends, drive consumer information initiatives, and form the basis for cost and benefit analyses of highway safety initiatives and regulations. The target population of the CRSS is all police-reported traffic crashes of motor vehicles (motorcycles, passenger cars, SUVs, vans, light trucks, medium or heavy-duty trucks, buses, etc.). The CRSS target population is the same as the previous NASS GES target population.

Crash Versus Accident

NHTSA has adopted the policy to use the term *crash*. Accordingly, the term *crash* is used throughout this manual.

As used in this manual, *crash* shall always refer to a “**Motor Vehicle Traffic Accident**” as rigorously defined in the [American National Standard Institute \(ANSI\) D16.1 – Manual on Classification of Motor Vehicle Traffic Accidents \(2007\)](#). Incidents or scenarios involving collision events, and those involving non-collision events, as defined in ANSI D16.1, are included.

Collision events include those involving motor vehicles and fixed objects (poles, walls, buildings, barriers, bridge supports, etc.) and those involving motor vehicles and non-fixed objects (pedestrians, animals, pedal cyclists, other motor vehicles, etc.).

Beside a scenario involving a collision, a crash also shall include a non-collision scenario such as the following.

- A single motor vehicle on a roadway catches fire
- A motor vehicle runs off of a trafficway and is immersed in a body of water
- An occupant of a motor vehicle is injured by falling from that vehicle while it is in motion or on a roadway
- An occupant of a motor vehicle is injured by shifting cargo or flying objects within that vehicle during emergency handling/braking
- A vehicle suffers damage from a pavement irregularity (loose plate, high manhole, pot hole, etc.)
- And others

Consult ANSI D16.1, Manual on Classification of Motor Vehicle Traffic Accidents (the ANSI Manual) for a more precise and complete presentation of these concepts. As a minimum, the following ANSI D16.1 terms should be well understood to properly select and classify cases for FARS and CRSS. The paragraph reference numbers from the ANSI Manual are provided to aid look-up.

- 2.2.1 Trafficway
- 2.4.1 Harmful Event
- 2.4.2 Deliberate Intent
- 2.4.3 Legal Intervention
- 2.4.4 Unstabilized Situation
- 2.4.5 Cataclysm
- 2.4.6 Accident
- 2.4.9 Transport Accident
- 2.4.12 Motor Vehicle Accident
- 2.4.17 Road Vehicle Accident
- 2.4.18 Traffic Accident
- 2.4.19 Non-traffic Accident
- 2.4.22 Motor Vehicle Traffic Accident

2018 FARS/CRSS Manual Changes Summary

Below is a list of elements that have substantial changes for 2018. These changes, as well as others, are highlighted throughout the manual by ***bold/italic*** type.

IT IS RECOMMENDED THAT YOU REVIEW THE ENTIRE MANUAL FOR ALL CHANGES

Intro Changes

ELEMENT #	ELEMENT NAME	NEW/ REVISED VALUES	NEW/ REVISED REMARKS	COMMENTS
100	<u>FARS Submission Instructions</u>		X	<ul style="list-style-type: none"> • New remarks regarding Witness Statements

2018 FARS/CRSS Element Definitions

Crash Level Elements

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definitions
<u>C1</u>	<u>State Number</u>	FARS Only	This element identifies the State in which the crash occurred.
<u>C2</u>	<u>Consecutive Number</u>	FARS Only	This element identifies the unique case number assigned by the data entry system.
<u>C3</u>	<u>Number of Forms Submitted for Persons Not in MV</u>	Case Structure	This element records the number of Person Level (Not a Motor Vehicle Occupant) forms that are applicable to this case.
<u>C4</u>	<u>Number of Vehicle Forms Submitted</u>	Case Structure	This element records all contact motor vehicles that the officer has reported on the police crash report as a unit involved in the crash.
<u>C5</u>	<u>Number of Person Forms Submitted</u>	Case Structure	This element records the number of Person Level (Motor Vehicle Occupant) forms that are applicable to this case.
<u>C6</u>	<u>County</u>	FARS Only	This element refers to the location of the unstabilized event with regard to the County.
<u>C7</u>	<u>City</u>	FARS Only	This element refers to the location of the unstabilized event with regard to the City.
<u>C8</u>	<u>Crash Date</u>	FARS/CRSS	This element identifies the date on which the crash occurred.
<u>C9</u>	<u>Crash Time</u>	FARS/CRSS	This element identifies the time at which the crash occurred.
<u>C10</u>	<u>Trafficway Identifier</u>	FARS Only	This element captures the identity (name) of the trafficway on which the crash occurred.
<u>C11</u>	<u>Route Signing</u>	FARS Only	This element identifies the route signing of the trafficway on which the crash occurred.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definitions
<u>C12 (a/b)</u>	<u>Land Use and Functional System</u>	FARS Only	<ul style="list-style-type: none"> • Land Use: The classification of the segment of the trafficway on which the crash occurred based on FHWA-approved adjusted Census boundaries of small urban and urbanized areas. • Functional System: This element identifies the functional classification of the segment of the trafficway on which the crash occurred.
<u>C13</u>	<u>Ownership</u>	FARS Only	This element identifies the entity that has legal ownership of the segment of the trafficway on which the crash occurred.
<u>C14</u>	<u>National Highway System</u>	FARS Only	This element identifies whether or not this crash occurred on a trafficway that is part of the National Highway System.
<u>C15</u>	<u>Special Jurisdiction</u>	FARS Only	This element identifies if the location on the trafficway where the crash occurred qualifies as a Special Jurisdiction even though it may be patrolled by state, county, or local police (e.g., all State highways running through Indian reservations are under the jurisdiction of the Indian reservation).
<u>C16</u>	<u>Milepoint</u>	FARS Only	This element identifies the milepoint nearest to the location where the crash occurred.
<u>C17</u>	<u>Global Position</u>	FARS/CRSS	This element identifies the location of the crash using Global Position coordinates.
<u>C18</u>	<u>Crash Events</u>	FARS/CRSS	The Crash Events table records in chronological sequence, the set of events resulting from an unstabilized situation that constitutes a motor vehicle traffic crash.
<u>C19</u>	<u>First Harmful Event</u>	FARS/CRSS	The First Harmful Event is defined as the first injury or damage producing event of the crash.
<u>C20</u>	<u>Manner of Collision</u>	FARS/CRSS	This element identifies the orientation of two motor vehicles in-transport when they are involved in the First Harmful Event of a collision crash. If the First Harmful Event is not a collision between two motor vehicles in-transport it is classified as such.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definitions
<u>C21 (a/b)</u>	<u>Relation to Junction</u>	FARS/CRSS	The coding of this data element is done in two subfields and based on the location of the first harmful event of the crash. It identifies the crash's location with respect to presence in an interchange area and the crash's location with respect to presence in or proximity to components typically in junction or interchange areas.
<u>C22</u>	<u>Type of Intersection</u>	FARS/CRSS	This element identifies and allows separation of various intersection types.
<u>C23</u>	<u>Relation to Trafficway</u>	FARS/CRSS	This element identifies the location of the crash as it relates to its position within or outside the trafficway based on the First Harmful Event.
<u>C24</u>	<u>Work Zone</u>	FARS/CRSS	This data element captures that this was a "Work Zone Accident" as defined in <u>ANSI D16.1, 7th Edition</u> . If the crash qualifies as a "Work Zone Accident" then the type of work activity is identified.
<u>C25</u>	<u>Light Condition</u>	FARS/CRSS	This element records the type/level of light that existed at the time of the crash as reported in the case materials.
<u>C26</u>	<u>Atmospheric Condition</u>	FARS/CRSS	This element identifies the prevailing atmospheric conditions that existed at the time of the crash as recorded on the police crash report.
<u>C27</u>	<u>School Bus Related</u>	FARS/CRSS	This data element indicates if a school bus, or motor vehicle functioning as a school bus, is related to the crash.
<u>C28</u>	<u>Rail Grade Crossing Identifier</u>	FARS Only	This element identifies if the crash occurred in or near a Rail Grade Crossing.
<u>C29</u>	<u>Notification Time EMS</u>	FARS Only	Notification Time EMS is the time emergency medical service was notified.
<u>C30</u>	<u>Arrival Time EMS</u>	FARS Only	Arrival Time EMS is the time emergency medical service arrived on the crash scene.
<u>C31</u>	<u>EMS Time at Hospital</u>	FARS Only	EMS Time at Hospital is the time emergency medical service arrived at the treatment facility to which it was transporting victims of the crash.
<u>C32</u>	<u>Related Factors - Crash Level</u>	FARS/CRSS	This element identifies factors related to the crash expressed by the investigating officer.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definitions
C33	Interstate Highway	CRSS Only	This element identifies whether or not the crash occurred on an interstate highway. Interstate highway is a Federal Highway Administration classification.
C34	Stratum	CRSS Only	The CRSS stratum applicable to this police crash report.
C35	Police Jurisdiction	CRSS Only	The number (range 1 through 120) of the police jurisdiction from which the police crash report was originally sampled.

Vehicle Level Elements

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
V1	State Number	FARS Only	This element identifies the State in which the crash occurred.
V2	Consecutive Number	FARS Only	This element identifies the unique case number assigned by the data entry system.
V3	Vehicle Number	Case Structure FARS/CRSS	This element identifies the number assigned to this vehicle in the crash.
V4	Number of Occupants	FARS/CRSS	This element identifies the number of occupants in each vehicle.
V5	Unit Type	FARS/CRSS	This element identifies the type of unit that applies to this motor vehicle at the time it became an involved vehicle in the crash and was reported as a unit on the police crash report.
V6	Hit-And-Run	FARS/CRSS	This element refers to cases where a vehicle is a contact vehicle in the crash and does not stop to render aid (this can include drivers who flee the scene on foot).
V7	Registration State	FARS/CRSS	This element identifies the State in which this vehicle was registered.
V8	Registered Vehicle Owner	FARS Only	This element is used to determine the type of registered owner of the vehicle.
V9	Vehicle Make	FARS/CRSS	This element identifies the make (manufacturer) of this vehicle.
V10	Vehicle Model	FARS/CRSS	This element identifies the model of this vehicle within a given make.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
<u>V11</u>	<u>Body Type</u>	FARS/CRSS	This element identifies a classification of this vehicle based on its general body configuration, size, shape, doors, etc.
<u>V12</u>	<u>Vehicle Model Year</u>	FARS/CRSS	This element identifies the manufacturer's model year of this vehicle.
<u>V13</u>	<u>Vehicle Identification Number</u>	FARS/CRSS	This element records the vehicle identification number (VIN) or alphanumeric identifier in the case materials of a single vehicle or the power unit of a combination vehicle.
<u>V14</u>	<u>Vehicle Trailing</u>	FARS/CRSS	This element identifies whether or not this vehicle had any attached trailing units or was towing another motor vehicle.
<u>V15</u>	<u>Trailer Vehicle Identification Numer</u>	FARS/CRSS	This element records the vehicle identification number (VIN) or alphanumeric identifier in the case materials of any trailing units of a combination vehicle.
<u>V16</u>	<u>Jackknife</u>	FARS/CRSS	This element identifies if this vehicle experienced a "jackknife" anytime during the unstabilized situation.
<u>V17</u>	<u>Motor Carrier Identification Number</u>	FARS/CRSS	This element records the issuing authority and motor carrier identification number if applicable to this vehicle.
<u>V18</u>	<u>GVWR/GCWR</u>	FARS/CRSS	This element identifies the gross vehicle weight rating of this vehicle when applicable.
<u>V19</u>	<u>Vehicle Configuration</u>	FARS/CRSS	This element identifies the general configuration of this vehicle when applicable.
<u>V20</u>	<u>Cargo Body Type</u>	FARS/CRSS	This element identifies the primary cargo carrying capability of this vehicle when applicable.
<u>V21</u>	<u>Hazardous Material Involvement/Placard</u>	FARS/CRSS	This element identifies the presence of hazardous cargo for this vehicle and records information about the hazardous cargo when present.
<u>V21 (1)</u>	<u>Hazardous Material Involvement/Placard - HM1</u>	FARS/CRSS	This element indicates whether the vehicle was carrying hazardous materials - involvement.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
<u>V21 (2)</u>	<u>Hazardous Material Involvement/Placard - HM2</u>	FARS/CRSS	This element indicates the presence of hazardous materials and whether the vehicle displayed a hazardous materials placard.
<u>V21 (3)</u>	<u>Hazardous Material Involvement/Placard - HM3</u>	FARS/CRSS	This element indicates the 4-digit identification number.
<u>V21 (4)</u>	<u>Hazardous Material Involvement/Placard - HM4</u>	FARS/CRSS	This element indicates the single-digit hazardous material class number for the vehicle.
<u>V21 (5)</u>	<u>Hazardous Material Involvement/Placard - HM5</u>	FARS/CRSS	This element indicates whether or not any hazardous cargo was released from the cargo tank or compartment.
<u>V22</u>	<u>Bus Use</u>	FARS/CRSS	This data element describes the common type of bus service this vehicle was being used for at the time of the crash or the primary use for the bus if not in service at the time of the crash.
<u>V23</u>	<u>Special Use</u>	FARS/CRSS	This data element identifies if a special use is applicable to this vehicle at the time it was involved in the crash.
<u>V24</u>	<u>Emergency Motor Vehicle Use</u>	FARS/CRSS	Emergency Motor Vehicle Use indicates operation of any motor vehicle that is legally authorized by a government authority to respond to emergencies with or without the use of emergency warning equipment, such as a police vehicle, fire truck, or ambulance while actually engaged in such response.
<u>V25</u>	<u>Travel Speed</u>	FARS/CRSS	This element records the speed the vehicle was traveling prior to the occurrence of the crash as reported by the investigating officer.
<u>V26</u>	<u>Underride/Override</u>	FARS Only	This element indicates whether an underride or override occurred during the crash involving this vehicle.
<u>V27</u>	<u>Rollover</u>	FARS/CRSS	This element identifies whether a rollover or overturn occurred during the crash involving this vehicle.
<u>V28</u>	<u>Location of Rollover</u>	FARS/CRSS	This element identifies the location of the trip point or start of the vehicle's roll.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
<u>V29</u>	<u>Areas of Impact - Initial Contact Point</u>	FARS/CRSS	This subfield identifies the area on this vehicle that produced the first instance of injury to non-motorists or occupants of this vehicle, or that resulted in the first instance of damage to other property or to this vehicle.
<u>V29</u>	<u>Areas of Impact - Damaged Areas</u>	FARS/CRSS	This subfield identifies all the areas on this vehicle that were damaged in the crash as reflected in the case materials.
<u>V30</u>	<u>Extent of Damage</u>	FARS/CRSS	This element indicates the amount of damage sustained by this vehicle in this crash as indicated in the case materials based on an operational damage scale.
<u>V31</u>	<u>Vehicle Removal</u>	FARS/CRSS	This data element describes the mode in which the vehicle left the scene of the crash.
<u>V32</u>	<u>Sequence of Events</u>	FARS/CRSS	The events in sequence related to this motor vehicle, regardless of injury and/or property damage. Code each event for this vehicle in the order in which they occur, time wise, from the police crash report narrative and diagram.
<u>V33</u>	<u>Most Harmful Event</u>	FARS/CRSS	This element identifies the event that resulted in the most severe injury or, if no injury, the greatest property damage involving this motor vehicle.
<u>V34</u>	<u>Related Factors - Vehicle Level</u>	FARS/CRSS	This element identifies factors related to this vehicle expressed by the investigating officer.
<u>V35</u>	<u>Fire Occurrence</u>	FARS/CRSS	This element identifies whether or not a fire in any way related to the crash occurred in this vehicle.
<u>V36</u>	<u>Vehicle License Plate Number</u>	CRSS Only	This element captures the license plate number of this vehicle.

Driver Level Elements

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
<u>D1</u>	<u>State Number</u>	FARS Only	This element identifies the State in which the crash occurred.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
<u>D2</u>	<u>Consecutive Number</u>	FARS Only	This element identifies the unique case number assigned by the data entry system.
<u>D3</u>	<u>Vehicle Number - Driver Level</u>	Case Structure	This element identifies the vehicle number associated with this driver.
<u>D4</u>	<u>Driver Presence</u>	FARS/CRSS	This element identifies whether or not a driver was present in this vehicle at the onset of the unstabilized situation.
<u>D5</u>	<u>Driver's License State</u>	FARS/CRSS	This element identifies the State of issue for the license held by this driver.
<u>D6</u>	<u>Driver's ZIP Code</u>	FARS/CRSS	This element identifies the ZIP Code of this driver's area of residence.
<u>D7</u>	<u>Non-CDL License Type/Status</u>	FARS Only	This element identifies in two subfields the type of license held by this driver and the status of the license at the time of the crash.
<u>D8</u>	<u>Commercial Motor Vehicle License Status</u>	FARS Only	This element indicates the status for a driver's Commercial Driver's License (CDL) if applicable.
<u>D9</u>	<u>Compliance with License Endorsements</u>	FARS Only	This element indicates whether the vehicle driven at the time of the crash requires endorsements on a Commercial Driver's License (CDL) and whether this driver is complying with the CDL endorsements.
<u>D10</u>	<u>License Compliance with Class of Vehicle</u>	FARS Only	This element refers to the type of license possessed or not possessed by the driver for the class of vehicle being driven at the time of the crash.
<u>D11</u>	<u>Compliance with License Restrictions</u>	FARS Only	This element identifies if a driver was compliant with restrictions on their license.
<u>D12</u>	<u>Driver Height</u>	FARS Only	This element identifies a driver's height.
<u>D13</u>	<u>Driver Weight</u>	FARS Only	This element identifies a driver's weight.
<u>D14</u>	<u>Previous Recorded Crashes</u>	FARS Only	This element records any previous crashes for this driver. Count only the events occurring within five years from the crash date.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
<u>D15 (1)</u>	Previous Recorded Suspensions, Revocations, and Withdrawals Subfield 1: Previous Underage Administrative Per Se for BAC	FARS Only	<i>This subfield records any underage pre-conviction administrative license suspension, revocation, or withdrawal in the previous five years including those for zero tolerance alcohol violations while driving or refusing to submit to chemical testing. This subfield is only for administrative actions associated with alcohol. These are NOT BAC CONVICTIONS.</i>
<u>D15 (2)</u>	Previous Recorded Suspensions, Revocations, and Withdrawals Subfield 2: Previous Administrative Per Se for BAC (Not Underage)	FARS Only	<i>This subfield records the count of previous pre-conviction administratively imposed suspensions, revocations, or withdrawals within the previous five years for driving with a BAC above a specified limit or refusing to submit to chemical testing. This subfield is only for administrative actions associated with alcohol. These are NOT BAC CONVICTIONS.</i>
<u>D15 (3)</u>	Previous Recorded Suspensions, Revocations, and Withdrawals Subfield 3: Previous Recorded Other Suspensions, Revocations, or Withdrawals	FARS Only	This subfield records any previous license suspensions, revocations, or withdrawals for this driver other than Administrative action for BAC violations . This subfield would include administrative actions associated with drugged driving. Count only the events occurring within five years from the crash date. If it can be identified on the driving record, do not include in this count recorded actions resulting from non-traffic related issues or offenses (e.g., failure to pay child support, failure to appear in court for a non-driving offense, a suspension imposed for a drug-related offense not involving the operation of a motor vehicle). Also note that “cancellation” of a CDL license is not counted here. If a driver has been DISQUALIFIED for a CDL, record this here.
<u>D16</u>	<u>Previous DWI Convictions</u>	FARS Only	This element records any previous DWI convictions for this driver. Count only the events occurring within five years from the crash date.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
<u>D17</u>	<u>Previous Speeding Convictions</u>	FARS Only	This element records any previous Speeding convictions for this driver. Count only the events occurring within five years from the crash date.
<u>D18</u>	<u>Previous Other Moving Violation Convictions</u>	FARS Only	This element records any other previous moving violations or convictions for this driver. Count only the events occurring within five years from the crash date.
<u>D19</u>	<u>Date of FIRST Crash, Suspension, Conviction</u>	FARS Only	This element identifies the date of the first crash, suspension, or conviction recorded in elements D14 through D18. Count only dates of events occurring within five years from the crash date.
<u>D20</u>	<u>Date of LAST Crash, Suspension, Conviction</u>	FARS Only	This element identifies the date of the last crash, suspension, or conviction recorded in elements D14 through D18. Count only dates of events occurring within five years from the crash date.
<u>D21</u>	<u>Violations Charged</u>	FARS/CRSS	This element identifies all violations, citations, and infractions noted as charged to this driver in this crash.
<u>D22</u>	<u>Speeding Related</u>	FARS/CRSS	This element identifies if the driver's speed was related to the crash as identified by law enforcement.
<u>D23</u>	<u>Condition (Impairment) at Time of Crash</u>	FARS/CRSS	This element identifies physical impairments to this driver or non-motorist which may have contributed to the cause of the crash as identified by law enforcement.
<u>D24</u>	<u>Related Factors - Driver Level</u>	FARS/CRSS	This element identifies factors related to this driver expressed by the investigating officer.

Precrash Level Elements

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
<u>PC1</u>	<u>State Number</u>	FARS Only	This element identifies the State in which the crash occurred.
<u>PC2</u>	<u>Consecutive Number</u>	FARS Only	This element identifies the unique case number assigned by the data entry system.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
<u>PC3</u>	<u>Vehicle Number - Precrash Level</u>	Case Structure	This element identifies the number assigned to this vehicle in the crash.
<u>PC4</u>	<u>Contributing Circumstances, Motor Vehicle</u>	FARS/CRSS	This element describes the possible pre-existing motor vehicle defects or maintenance conditions that may have contributed to the crash.
<u>PC5</u>	<u>Trafficway Description</u>	FARS/CRSS	This element identifies the value indicated in the case materials that best describes the trafficway flow just prior to this vehicle's critical precrash event.
<u>PC6</u>	<u>Total Lanes in Roadway</u>	FARS/CRSS	This element identifies the value indicated in the case materials that best describes the number of roadway lanes just prior to this vehicle's critical precrash event.
<u>PC7</u>	<u>Speed Limit</u>	FARS/CRSS	This element identifies the value indicated in the case materials that best represents the speed limit just prior to this vehicle's critical precrash event.
<u>PC8</u>	<u>Roadway Alignment</u>	FARS/CRSS	This element identifies the value indicated in the case materials that best represents the roadway alignment prior to this vehicle's critical precrash event.
<u>PC9</u>	<u>Roadway Grade</u>	FARS/CRSS	This element identifies the value indicated in the case materials that best represents the roadway grade prior to this vehicle's critical precrash event.
<u>PC10</u>	<u>Roadway Surface Type</u>	FARS Only	This element identifies the value indicated in the case materials that best represents the roadway surface type prior to this vehicle's critical precrash event.
<u>PC11</u>	<u>Roadway Surface Conditions</u>	FARS/CRSS	This element identifies the value indicated in the case materials that best represents the roadway surface condition prior to this vehicle's critical precrash event.
<u>PC12</u>	<u>Traffic Control Device</u>	FARS/CRSS	This element identifies the sign or signal indicated in the case materials that best describes the traffic controls in the vehicle's environment just prior to this vehicle's critical precrash event.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
PC13	Device Functioning	FARS/CRSS	This element identifies the functionality of the traffic control device recorded for this vehicle in the element Traffic Control Device.
PC14	Driver's Vision Obscured By	FARS/CRSS	This data element records impediments to a driver's visual field that were noted in the case materials.
PC15	Driver Maneuvered to Avoid	FARS/CRSS	This data element identifies the things the driver attempted to avoid while the vehicle was on the road portion of the trafficway, just prior to the First Harmful Event for this vehicle.
PC16	Driver Distracted By	FARS/CRSS	This element identifies the attributes that best describe this driver's attention to driving prior to the driver's realization of an impending critical event or just prior to impact if realization of an impending critical event does not occur. Distraction from the primary task of driving occurs when drivers divert their attention from the driving task to some other activity. Also, driving while daydreaming or lost in thought is identified as distracted driving by NHTSA. Physical conditions/ impairments (fatigue, alcohol, medical condition, etc.) or psychological states (anger, emotional, depressed, etc.) are not identified as distractions by NHTSA.
PC17	Pre-Event Movement (Prior to Recognition of Critical Event)	FARS/CRSS	This element identifies the attribute that best describes this vehicle's activity prior to the driver's realization of an impending critical event or just prior to impact if the driver took no action or had no time to attempt any evasive maneuvers.
PC18	Critical Event - Precrash (Category)	FARS/CRSS	This element identifies the category of the event that was critical to this vehicle being involved in the crash.
PC19	Critical Event - Precrash (Event)	FARS/CRSS	This element identifies the critical event that made the crash imminent (i.e., something occurred that made the collision possible).

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
PC20	Attempted Avoidance Maneuver	FARS/CRSS	This element identifies movements/actions taken by the driver, within a critical crash envelope, in response to a Critical Precrash Event .
PC21	Pre-Impact Stability	FARS/CRSS	This element assesses the stability of the vehicle after the critical event, but before the impact.
PC22	Pre-Impact Location	FARS/CRSS	This element assesses the location of the vehicle after the critical event, but before the First Harmful Event for this vehicle.
PC23	Crash Type	FARS/CRSS	This element describes the type of crash this in-transport vehicle was involved in based on the First Harmful Event and the precrash circumstances.

Person (Motor Vehicle Occupant) Level Elements

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
P1	State Number	FARS Only	This element identifies the State in which the crash occurred.
P2	Consecutive Number	FARS Only	This element identifies the unique case number assigned by the data entry system.
P3	Vehicle Number - Person Level	Case Structure	This element identifies the vehicle number associated with this motor vehicle occupant.
P4	Person Number	Case Structure	This element identifies a number for the motor vehicle occupant in consecutive order for the vehicle they occupied.
P5	Age	FARS/CRSS	This element identifies the person's age, in years, with respect to the person's last birthday.
P6	Sex	FARS/CRSS	This element identifies the sex of the person involved in the crash.
P7	Person Type	FARS/CRSS	This element describes the role of this person involved in the crash.
P8	Injury Severity	FARS/CRSS	This element describes the severity of the injury to this person in the crash.
P9	Seating Position	FARS/CRSS	This element identifies the location of this person in or on the vehicle.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
P10	Restraint System/Helmet Use	FARS/CRSS	This element records the restraint equipment in use by the occupant, or the helmet in use by a motorcyclist, at the time of the crash.
P11	Any Indication of Mis-Use of Restraint System/ Helmet Use	FARS/CRSS	This element indicates any mis-use of the restraint system or helmet used by this person.
P12	Air Bag Deployed	FARS/CRSS	This element is used to record air bag deployment for this person as reported in the case materials.
P13	Ejection	FARS/CRSS	This element describes the ejection status and degree of ejection for this person, excluding motorcycle occupants.
P14	Ejection Path	FARS Only	This element identifies the path by which this person was ejected from the vehicle.
P15	Extrication	FARS Only	This element identifies if equipment or other force was used to remove this person from the vehicle.
P16	Police Reported Alcohol Involvement	FARS/CRSS	This data element reflects only the judgment of law enforcement as to whether alcohol was involved or not for this person.
P17	Method of Alcohol Determination (By Police)	FARS Only	This element describes the method by which the police made the determination as to whether alcohol was involved or not for this person.
P18 (1)	Alcohol Test Status	FARS/CRSS	This element identifies if an alcohol (ethanol) test was given to this person.
P18 (2)	Alcohol Test Type	FARS/CRSS	This element identifies the type of the alcohol (ethanol) test that was used for this person.
P18 (3)	Alcohol Test Result	FARS/CRSS	This element identifies the alcohol (ethanol) test result for this person.
P19	Police Reported Drug Involvement	FARS/CRSS	This data element reflects only the judgment of law enforcement as to whether drugs were involved or not for this person.
P20	Method of Drug Determination (By Police)	FARS Only	This element identifies the method by which the police made the determination as to whether drugs were involved or not for this person.
P21 (1)	Drug Test Status	FARS Only	This element identifies if a chemical test for the presence of drugs was given to this person.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
P21 (2)	Drug Specimen	FARS Only	This element identifies the bodily tissue or fluid used to perform a chemical test for the presence of drugs in this person.
P21 (3)	Drug Test Result	FARS Only	This element records the result of a chemical test for the presence of drugs in this person.
P22	Transported to First Medical Facility By	FARS/CRSS	This element identifies the method of transportation this person was provided to receive treatment at the first hospital or medical facility.
P23	Died at Scene/En route	FARS Only	This element identifies if this person died at the scene of the crash or en route to a hospital or treatment facility.
P24	Death Date	FARS Only	This element records the month, day, and year of this person's death.
P25	Death Time	FARS Only	This element identifies the hour and minute of this person's death using the 24-hour clock format.
P26	Related Factors - Person (MV Occupant) Level	FARS/CRSS	This element identifies factors related to motor vehicle occupants other than drivers expressed by the investigating officer.
SP1	Death Certificate Number	FARS Only	This element identifies the four-digit GSA code for the city where the death occurred, the two-digit State number and the six-digit sequence number from the death certificate as assigned by the State Vital Statistics or Vital Records Department.
SP2	Fatal Injury at Work	FARS Only	This element indicates if the death certificate identified this person as being "at work" at the time of the crash.
SP3	Race/Hispanic Origin	FARS Only	This element indicates the race and Hispanic origin of this person from the death certificate.

Person (Not A Motor Vehicle Occupant) Level Elements

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
NM1	State Number	FARS Only	This element identifies the State in which the crash occurred.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
<u>NM2</u>	<u>Consecutive Number</u>	FARS Only	This element identifies the unique case number assigned by the data entry system.
<u>NM3</u>	<u>Person Number</u>	Case Structure	This element identifies a number for persons that are not in a motor vehicle in consecutive order.
<u>NM4</u>	<u>Vehicle Number of Motor Vehicle Striking Non-Motorist</u>	FARS/CRSS	This data element captures the in-transport vehicle that made contact with this non-motorist.
<u>NM5</u>	<u>Age</u>	FARS/CRSS	This element identifies the person's age, in years, with respect to the person's last birthday.
<u>NM6</u>	<u>Sex</u>	FARS/CRSS	This element identifies the sex of the person involved in the crash
<u>NM7</u>	<u>Person Type</u>	FARS/CRSS	This element describes the role of this person involved in the crash.
<u>NM8</u>	<u>Injury Severity</u>	FARS/CRSS	This element describes the severity of the injury to this person in the crash.
<u>NM9</u>	<u>Pedestrian/Bike Typing</u>	FARS/CRSS	This element describes the precrash actions leading to crashes between motor vehicles and pedestrians or bicyclists.
NM9 - PB27	Marked Crosswalk Present – Pedestrian (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element identifies if a marked crosswalk was present at the crash site.
NM9 - PB27	Marked Crosswalk Present – Bicyclist (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element identifies if a marked crosswalk was present at the crash site.
NM9 - PB28	Sidewalk Present – Pedestrian (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element identifies if a sidewalk was present at the crash site.
NM9 - PB28	Side Walk Present – Bicyclist (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element identifies if a sidewalk was present at the crash site.
NM9 - PB29	School Zone – Pedestrian (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element identifies if the crash occurred in a school zone.
NM9 - PB29	School Zone – Bicyclist (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element identifies if the crash occurred in a school zone.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
NM9 - PB30	Crash Type – Pedestrian (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element summarizes the circumstances of the crash for this pedestrian.
NM9 - PB30B	Crash Type – Bicyclist (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element summarizes the circumstances of the crash for this bicyclist.
NM9 - PB31	Crash Location – Pedestrian (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element summarizes the circumstances of the crash for this pedestrian.
NM9 - PB31B	Crash Location – Bicyclist (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element identifies if the crash location with respect to an intersection.
NM9 - PB32	Pedestrian Position (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element identifies the location of the pedestrian with respect to the trafficway when contacted.
NM9 - PB32B	Bicyclist Position (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element identifies the location of the bicyclist with respect to the trafficway when contacted.
NM9 - PB33	Pedestrian Initial Direction (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element identifies the compass direction of travel of the pedestrian prior to being contacted.
NM9 - PB33B	Bicyclist Direction (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element identifies the travel direction of the bicyclist with respect to the flow of traffic prior to being contacted.
NM9 - PB34	Motorist Initial Direction (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element identifies the compass direction of travel of the motorist prior to being involved in the crash.
NM9 - PB35	Motorist Maneuver (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element identifies if the motorist was engaged in a turning maneuver at an intersection prior to being involved in the crash.
NM9 - PB36	Intersection Leg (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element identifies on which leg of an intersection the crash occurred.
NM9 - PB37	Pedestrian Scenario (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element summarizes the movements of the pedestrian and motorist in an intersection area.
NM9 - PB38	Crash Group – Pedestrian (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element provides general groupings of the more specific individual Crash Types - Pedestrian.
NM9 - PB38B	Crash Group – Bicyclist (See the companion Pedestrian/Bicyclist Manual)	FARS/CRSS	This element provides general groupings of the more specific individual Crash Types - Bicyclist.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
<u>NM10</u>	<u>Non-Motorist Location at Time of Crash</u>	FARS/CRSS	This element identifies the location of the non-motorist with respect to the roadway at the time of the crash.
<u>NM11</u>	<u>Non-Motorist Action/Circumstances</u>	FARS/CRSS	This element describes the actions of the non-motorist at the time of their involvement in the crash.
<u>NM12</u>	<u>Non-Motorist Contributing Circumstances</u>	FARS/CRSS	This element describes the action and/or circumstances of the non-motorist that law enforcement indicated may have contributed to the crash.
<u>NM13</u>	<u>Non-Motorist Safety Equipment</u>	FARS/CRSS	This element identifies the safety equipment that was used and not used by this non-motorist as reflected in the case materials.
<u>NM14</u>	<u>Condition (Impairment) at Time of Crash</u>	FARS/CRSS	This element attempts to identify any physical impairment to this non-motorist that may have contributed to the cause of the crash.
<u>NM15</u>	<u>Police Reported Alcohol Involvement</u>	FARS/CRSS	This data element reflects only the judgment of law enforcement as to whether alcohol was involved or not for this person.
<u>NM16</u>	<u>Method of Alcohol Determination (By Police)</u>	FARS Only	This element describes the method by which the police made the determination as to whether alcohol was involved or not for this person.
<u>NM17 (1)</u>	<u>Alcohol Test Status</u>	FARS/CRSS	This element identifies if an alcohol (ethanol) test was given to this person.
<u>NM17 (2)</u>	<u>Alcohol Test Type</u>	FARS/CRSS	This element identifies the type of the alcohol (ethanol) test that was used for this person.
<u>NM17 (3)</u>	<u>Alcohol Test Result</u>	FARS/CRSS	This element identifies the alcohol (ethanol) test result for this person.
<u>NM18</u>	<u>Police Reported Drug Involvement</u>	FARS/CRSS	This data element reflects only the judgment of law enforcement as to whether drugs were involved or not for this person.
<u>NM19</u>	<u>Method of Drug Determination (By Police)</u>	FARS Only	This element identifies the method by which the police made the determination as to whether drugs were involved or not for this person.
<u>NM20 (1)</u>	<u>Drug Test Status</u>	FARS Only	This element identifies if a chemical test for the presence of drugs was given to this person.

2018 FARS/CRSS Element Definitions

2018 Element Number	Element Name	FARS, CRSS, Case Structure	Definition
<u>NM20 (2)</u>	<u>Drug Specimen</u>	FARS Only	This element identifies the bodily tissue or fluid used to perform a chemical test for the presence of drugs in this person.
<u>NM20 (3)</u>	<u>Drug Test Result</u>	FARS Only	This element records the result of a chemical test for the presence of drugs in this person.
<u>NM21</u>	<u>Transported to First Medical Facility By</u>	FARS/CRSS	This element identifies the method of transportation this person was provided to receive treatment at the first hospital or medical facility.
<u>NM22</u>	<u>Died at Scene/En route</u>	FARS Only	This element identifies if this person died at the scene of the crash or en route to a hospital or treatment facility.
<u>NM23</u>	<u>Death Date</u>	FARS Only	This element records the month, day, and year of this person's death.
<u>NM24</u>	<u>Death Time</u>	FARS Only	This element identifies the hour and minute of this person's death using the 24-hour clock format.
<u>NM25</u>	<u>Related Factors - Person (Not a MV Occupant) Level</u>	FARS/CRSS	This element identifies factors related to persons not in a motor vehicle expressed by the investigating officer.
<u>SP1</u>	<u>Death Certificate Number</u>	FARS Only	This element identifies the four-digit GSA code for the city where the death occurred, the two-digit State number and the six-digit sequence number from the death certificate as assigned by the State Vital Statistics or Vital Records Department.
<u>SP2</u>	<u>Fatal Injury at Work</u>	FARS Only	This element indicates if the death certificate identified this person as being "at work" at the time of the crash.
<u>SP3</u>	<u>Race/Hispanic Origin</u>	FARS Only	This element indicates the race and Hispanic origin of this person from the death certificate.

100. FARS Submission Instructions

101. How to Submit

Each case must have at least one Person Level form with [INJURY SEVERITY](#) attribute Fatal Injury

- **2018 Data**

Enter data directly using procedures described in the FARS Microcomputer Data Entry Manual (MDE Manual).

102. When to Submit

Make submissions at any time during the week via the MDE

103. Data Sources

1. Use the [ANSI D16.1 Manual on Classification of Motor Vehicle Traffic Accidents](#) for definitions in coding the FARS forms.
2. Obtain information from death certificates for persons who die as a result of injuries sustained in a motor vehicle crash.
3. Use the State Driver Licensing Files, Vehicle Registration Files, Highway Department Files, Crash Reports, and Vital Statistics Reports.
4. See the FARS MDE manual for instructions on obtaining data and responding to requests for data on vehicles and drivers not registered or licensed in your State.
5. The message system should be used to obtain data on involved Out-of-State drivers and vehicles.
6. Hierarchy for Case Materials:
 - a. An Early Notification Report can get corrected/replaced/ clarified by
 - b. A police crash report can get corrected/replaced/ clarified by
 - c. A Supplemental police crash report can get corrected/ replaced/clarified by
 - d. A Reconstruction Report
7. Hierarchy for police reported information on the police crash report:
 - a. If information provided in the narrative directly contradicts a coded box, the narrative detail takes precedence over the checkbox.
8. *When coding elements: Statements by witnesses in narratives, including those from vehicle passengers or pedestrians, may be used to provide information when police sources are unavailable. The officer's assessment on the police crash report will take precedence over items reported by witnesses in all cases. The officer's assessment includes any statements from a witness included by the officer as part of the police crash report narrative. In absence of clarification by the officer in the police crash report, information that is contradictory from witness statements should not be used.*

200. Form Coding Instructions

201. General Instructions

201.1 Codes

- 201.1.1 All codes are numeric except [Trafficway Identifier](#), [Additional State Information](#), [Rail Grade Crossing Identifier](#), [Vehicle Identification Number](#), [Trailer Vehicle Identification Number](#), and [Motor Carrier Identification Number](#).
- 201.1.2 All codes are on the forms except: [Ownership](#), [Global Position](#), [Crash Events](#), [First Harmful Event](#), [Rail Grade Crossing Identifier](#), [Related Factors \(Crash, Vehicle, Driver, Person – Occupant, and Person – Not An Occupant\)](#), [Vehicle Make](#), [Vehicle Model](#), [Body Type](#), [Motor Carrier Identification Number](#), [Sequence of Events](#), [Most Harmful Event](#), [Violations Charged](#), [Traffic Control Device](#), [Critical Event – Precrash \(Event\)](#), [Crash Type](#), [Non-Motorist Location at Time of Crash](#), [Pedestrian/Bike Typing](#), [Death Certificate Number](#), [Fatal Injury at Work](#) and [Race/Hispanic Origin](#). See the appropriate data element pages for these codes.
- 201.1.3 The code for attribute **Unknown** is always nine. **Unknown** should only be used when all sources for obtaining information on an element have been searched and the information is missing or stated unknown. In an element that includes the attribute **Not Reported**, **Unknown** is only used for stated unknowns.
- 201.1.4 The code for attribute **Not Applicable** or its equivalent is always zero, except for data elements C29-C31 where **Not Applicable (Not Notified)** is 8888, P13 where **Not Applicable** is 8, P24/NM23 where **Not Applicable (non-fatal)** is 88888888, P25/NM24 where **Not Applicable (non-fatal)** is 8888, and SP2 where **Not Applicable (not a fatality)** is 8.
- 201.1.5 The code for attribute **None** is always zero except for [Alcohol Test Result](#), [Motor Carrier Identification Number](#), [Restraint System/Helmet Use](#), and [Non-Motorist Safety Equipment](#).

201.2 Coding Forms

- 201.2.1 Blanks are used only in fields to be later updated with four exceptions:
- 201.2.1.1 If [Driver Presence](#) is coded "0" or "9" all other driver information except [Related Factors-Driver Level](#) must be blank.
- 201.2.1.2 If [VIN](#) is less than 17 characters, do not zero-fill, leave remaining characters blank. If a State is not allowed to code the entire VIN, code the partial VIN and zero-fill the characters that cannot be completed.
- 201.2.1.3 If [Trafficway Identifier](#) is less than 30 characters, do not zero-fill or 9-fill. Leave remaining characters blank. The second [Trafficway Identifier](#) field is also left blank for non-junction crashes.
- 201.2.1.4 If [Motor Carrier Identification Number](#) is less than 9 characters, do not zero-fill or 9-fill. Leave remaining characters blank.
- 201.2.2 All codes are right-justified except [VIN](#), [Trafficway Identifier](#) and [Motor Carrier Identification Number](#).

200. Form Coding Instructions

- 201.3 **Vehicle, Driver, Precrash and both Person Level Forms. These forms are automatically numbered by the system.**
- 201.3.1 Vehicles are numbered consecutively beginning with "001."
- 201.3.2 For each vehicle, persons are numbered consecutively beginning with "001." Order is not important. The driver does not have to be "001."
- 201.3.3 Persons not in motor vehicles are numbered consecutively beginning with "01." Order is not important.
- 201.4 **Miscellaneous**
- 201.4.1 The number of changes per case is not limited.
- 201.4.2 Request of other States for information should always follow the format of the MDE systems Out-Of-State Data Request whether the MDE System itself or the mail is used.
- 201.4.3 Refer all coding questions through the CDAN Helpdesk.
- 201.4.4 Copies of all cases or other actions submitted must be retained for 3 years after the data collection year.
- 201.4.5 If a State will not allow transmittal of complete VIN, send a memorandum to the COTR informing her/him of this fact.
- 201.5 **Special Case - Coding Fatal Traffic Crashes for which there is only a death certificate.**
- 201.5.1 Be sure the death occurred within 30 days of the crash. If you don't know, do not submit the case. If it occurred after 30 days, do not submit.
- 201.5.2 For the cases you do submit, you must complete Forms HS-214, HS-214A, HS-214B, HS-214C, HS-214D, HS-214E unless you have been granted an exemption.
- 201.6 **Code the required elements as follows:**
- The following elements must be coded. If any of these elements are left blank or if an edit check is violated that involves the coding of one of these elements, you will not have a usable FARS case.
- Crash Level (Form HS-214)**
- Crash Date - Appropriate Day, Month and Year
Crash Time - Appropriate hour and minute if known, 9999 if not known
Number of Forms Submitted for Persons Not in Motor Vehicles - 00-99
Number of Vehicle Forms Submitted - 001-999
Number of Motor Vehicle Occupant Forms Submitted - 000-999
Crash Events - Table completed in MDE
First Harmful Event - Appropriate attribute derived from table, 99 if not known
- Vehicle Level (Form HS-214A)**
- Vehicle Number - 001-999
Number of Occupants - 01-98 if known, 99 if unknown
Unit Type - 1-4
- Driver Level (Forms HS-214B)**
- Vehicle Number - 001-999

200. Form Coding Instructions

Driver Presence - Appropriate attribute if known, 9 if unknown

Precrash Form (Form HS-214C)

Vehicle Number - 001-999 if occupant

Crash Type - 01-99

Person Level (Motor Vehicle Occupant) (Form HS-214D)

Vehicle Number - 001-999 if occupant

Person Number - 001-999

Person Type - 01-03, 09 for occupants

Person Level (Not a Motor Vehicle Occupant) (Form HS-214E)

Person Number - 001-999

Vehicle Number of Motor Vehicle Striking Non-Motorist - 001-999

Person Type - 04-08, 10, 19 for non-occupants

201.6.1 Code all other elements with the proper attribute if information is known. If no information is known, code the items **Unknown** or **Not Reported**. There are three exceptions to this, Rollover, Emergency Motor Vehicle Use and Fire Occurrence should all use the attribute "0" (**No Rollover**, **Not Applicable**, and **No or Not Reported**, respectively).

202. Deletion Instructions

See FARS Microcomputer Data Entry (MDE) Manual for instructions on how to delete a case.

203. Request for Case Listing Instructions

See FARS MDE Manual for instructions on how to list a case.

204. How to Structure a Case

When creating an MDE case structure, it is important to understand and correctly enter the proper number of Persons Not in Motor Vehicles, Vehicles, and Motor Vehicle Occupants. This initial structuring of the case is important for dependent data elements once your case is created. The following instructions are intended to assist in the proper structuring of your case.

Step 1: Number of Persons Not in Motor Vehicles

Enter the number of persons involved in this crash who are not in motor vehicles. This includes:

- Occupants of Non-Motor Vehicle Transport Devices (i.e., persons riding in an animal-drawn conveyance, on an animal, or injured occupants of a railway train or a road vehicle on rails)
- Pedestrians
- Bicyclists
- Other Cyclists
- Persons on Personal Conveyances
- Persons In/On Buildings
- Unknown Types of Non-Motorists

For detailed explanations and examples of each, please see [\(NM7\) Person Type](#).

Important things to consider:

- Do not include non-contact persons. For example, if the case materials identify three pedestrians and only one of them was contacted by a vehicle or something set into motion by a vehicle, you do not include the two who were not contacted.

200. Form Coding Instructions

- Do not include witnesses or other persons not directly involved in the crash.
- Do not include uninjured occupants of railway trains or road vehicles on rails.

Step 2: Number of Vehicles (in-transport, parked/stopped off roadway)

Enter the number of vehicles involved in this crash. This includes:

- Motor Vehicles In-Transport (Inside or Outside the Trafficway)
- Motor Vehicles Not In-Transport Within the Trafficway
- Motor Vehicles Not In-Transport Outside the Trafficway
- Working Motor Vehicles (Highway Construction, Maintenance, Utility only)

For detailed explanations and examples of each, please see [\(V5\) Unit Type](#).

Important things to consider:

- You must have at least one motor vehicle “In-Transport” involved in the crash to be considered a FARS or CRSS case.
- Do not include Phantom or Non-Contact Vehicles (i.e., a vehicle that did not directly contact another vehicle and has no harmful event in the crash).
- It is possible to have a case where one vehicle sets something into motion, and then the thing set into motion hits another vehicle. In this case, even though the two vehicles never made direct contact with each other, both vehicles would be considered contact vehicles and should be entered because they both had harmful events. For more information about set-in-motion cases, please see [\(C32\) Related Factors – Crash Level](#), and [\(V29\) Areas of Impact](#).
- A vehicle that sets something into motion, striking a person or property, and causes injury or damage, is a contact vehicle and should be included in this count

Step 3: Number of Person Forms for a Vehicle

Enter the number of occupants in the vehicle. An occupant is any person who is part of a motor vehicle (i.e., in it, on it, or attached to it).

For special handling of uninjured occupants for which there is NO Person Level data in the case materials, see “[Created Records](#)” below.

There are three special rules for counting occupants when structuring a case:

- Buses: For vehicle [body types 50-52, 55, 58, and 59](#) you will enter ONLY the Driver (regardless of injury) and injured passengers when you are structuring the case. Do not include uninjured passengers. The total [number of occupants](#) (including uninjured occupants) will be added later on the Vehicle Form once your case has been created.
- Unknown: If the actual number of motor vehicle occupants is unknown, include the driver, if there is one, plus all other known occupants in the count (even if there is no information in the case materials).
- Uninjured Passengers with no information in the case materials: See [Created Records](#) below.

Important things to consider:

Persons ejected or who fall from a motor vehicle in-transport are still considered occupants of that vehicle for the duration of the unstabilized situation

Step 4: Injury Severity

Enter the injury severity for each of the Person Forms you entered in Steps 1 and 3. For detailed explanations and examples, please see [P8/NM8 Injury Severity](#).

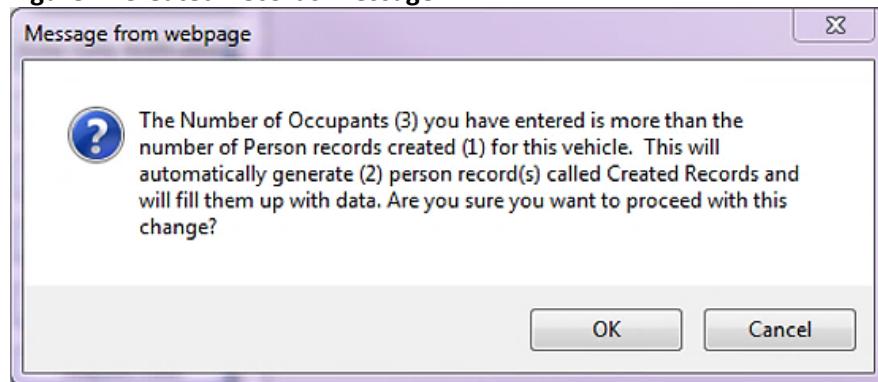

200. Form Coding Instructions

Created Records

This is intended to streamline data entry and only applies when information is not available for some or all uninjured passengers, as is the case in some States that do not require information to be collected for uninjured passengers. In these situations, the system automatically generates a created record with a set of standard values. A Created Record is generated when the total [number of occupants](#) (entered on the Vehicle form) is greater than this [Number of Person Forms](#) for a vehicle entered when structuring the case and the body type is not a bus ([Body Types 50, 51, 52, 55, 58, or 59](#) [large buses]).

If there are uninjured passengers of an in-transport motor vehicle (other than Body Types 50, 51, 52, 55, 58, or 59 [large buses]), the MDE will automatically populate all of the data elements on the “Created” Person Level (MV Occupant) Form generated by MDE. Because this is a shortcut to auto-fill data, and this data cannot be edited, ensure the values that would apply to each occupant exactly match the values shown [in the table below](#). You will be prompted in MDE to confirm your acceptance of created records (see [Figure 1](#)).

Figure 1: Created Records Message

Case Structuring Inducing Created Records:

1. When structuring a case, enter the [Number of Occupants](#) excluding uninjured passengers for which you have no data anywhere in the case materials.
2. On the Vehicle form, code the [Number of Occupants](#) data element with the total number of occupants (both injured and uninjured) in the vehicle, as indicated in the case material.
3. Once the [Body Type](#) has been entered, and it is not a large bus, the system will generate “Created” Person Level (MV Occupant) forms for the additional occupants (i.e., forms for the uninjured passengers excluded when structuring in “1” above.). A confirmation message will appear (see [Figure 1](#) above). Once confirmed, the system then fills in the form with the data shown [in the Table below](#).

In the following situations people must be counted when structuring a case in Number of Person Forms for a Vehicle:

1. If the vehicle is a large Bus ([Body Types 50-52, 55, 58, 59](#)), only the driver and injured bus passengers are to be entered into the system for these vehicles, and additional Person forms will not be automatically created.
2. Any driver or injured passenger of a motor vehicle in transport
3. Any occupant of a motor vehicle not in transport
4. Any uninjured passenger in a motor vehicle in-transport if the information for that passenger is in any way different than [the table below](#). This is because if the information is different from

200. Form Coding Instructions

below, then you must have additional information on that occupant. A Created Record cannot be edited and is populated with the following values:

Created Records Standard Set of Values

Element Name	Code	Attribute
Age	998	Not Reported
Sex	8	Not Reported
Person Type	2	Passenger of a Motor Vehicle in Transport
Injury Severity	0	No Apparent Injury (O)
Seating Position	98	Not Reported
Restraint System/Helmet Use	98	Not Reported
Any Indication of Mis-Use of Restraint System/Helmet Use	0	No
Air Bag Deployed	98	Not Reported
Ejection	7	Not Reported
*Ejection Path	0	Ejection Path Not Applicable

Person Related Factor (2)	00	None
Person Related Factor (3)	00	None
*Death Certificate Number	0s	Not Applicable
*Fatal Injury At Work	8	Not Applicable
*Race	00	Not Applicable
*Hispanic Origin	00	Not Applicable

*FARS Only Elements

Special Instructions for Hit-and-Run Vehicles:

For uninjured passengers of hit-and-run vehicles, the Created Records are editable and each of the values in the table above can be edited as appropriate. The standard edit checks are activated.

300. Data Element Coding Instructions

301. Section Organization

301.1 For each element on the FARS forms, an instruction page follows in the order of the elements on the forms. In an element that is duplicated on more than one form, the instructions are provided in the first occurrence of the element with reference to the second occurrence.

301.1.1 The letters in the upper right hand corner refer to the forms:

- “C” – Crash Level Form
- “V” – Vehicle Level Form
- “D” – Driver Level Form
- “PC” – Precrash Level (Vehicle/Driver) Form
- “P” – Person Level (MV Occupant) Form
- “NM” – Person Level (Not a MV Occupant) Form

301.1.2 The Format section gives the type element and whether it must be coded for an original case or whether it can be changed.

301.1.3 The Element Value section lists the attributes for the element and their associated codes.

301.1.4 The Remarks section contains coding instructions, special instructions, etc., for the element.

Definition: This element identifies the State in which the crash occurred.

Remarks: None.

Consistency Checks:

Check	IF	THEN
(200P)	CITY is greater than 0000 and less than 9997, and COUNTY is greater than 000 and less than 997,	COUNTY and CITY must be valid codes for the STATE.
(220P)	LIGHT CONDITION equals 4, and STATE is not equal to 02,	CRASH TIME must equal 0300-0900, 9999.

Check	IF	THEN
(2300)	LIGHT CONDITION equals 5, and STATE is not equal to 02,	CRASH TIME must equal 1600-2200, 9999.
(A010)	STATE equals 02, and LIGHT CONDITION equals 4,	CRASH TIME should equal 0300-1000, 9999.
(A020)	STATE equals 02, and LIGHT CONDITION equals 5,	CRASH TIME should equal 1500-2359, 9999.
(A940)	STATE NUMBER equals 11,	maximum SPEED LIMIT (not including 98 or 99) should equal 55.
(A945)	STATE NUMBER equals 15,	maximum SPEED LIMIT (not including 98 or 99) should equal 60.
(A950)	STATE NUMBER equals 02, 09, 10, 25, 34, 36, 41, 43, 44, 50,	maximum SPEED LIMIT (not including 98 or 99) should equal 65.
(A955)	STATE NUMBER equals 01, 05, 06, 12, 13, 17, 18, 19, 21, 24, 26, 27, 28, 29, 33, 37, 39, 42, 45, 47, 51, 53, 54, 55,	maximum SPEED LIMIT (not including 98 or 99) should equal 70.
(A960)	STATE NUMBER equals 04, 08, 20, 22, 23, 31, 35, 38, 40, 48,	maximum SPEED LIMIT (not including 98 or 99) should equal 75.
(A961)	STATE NUMBER equals 16, 30, 32, 46, 49, 56	maximum SPEED LIMIT (not including 98 or 99) should equal 80.
(G01P)	STATE is ___, and GLOBAL POSITION - LATITUDE (degrees) is not equal to 77, 88, 99,	LATITUDE (degrees) must be equal to, or greater than (1d), and LATITUDE (degrees) must not be greater than (2d).
(G02P)	STATE is ___, and GLOBAL POSITION LATITUDE (degrees) equals (1d),	LATITUDE (minutes) must be equal to, or greater than (1s).
(G03P)	STATE is ___, and GLOBAL POSITION LATITUDE (degrees) equals (2d),	LATITUDE (minutes) must not be greater than (2s).
(G04P)	STATE is ___, and GLOBAL POSITION LONGITUDE (degrees) is not equal to 777, 888, 999,	LONGITUDE (degrees) must be equal to, or greater than (3d), and LONGITUDE (degrees) must not be greater than (4d).
(G05P)	STATE is ___, and GLOBAL POSITION LONGITUDE (degrees) equals (3d),	LONGITUDE (minutes) must be equal to, or greater than (3s).
(G06P)	STATE is ___, and GLOBAL POSITION LONGITUDE (degrees) equals (4d),	LONGITUDE (minutes) must not be greater than (4s).
(U370)	UNLIKELY: EXTENT OF DAMAGE equals 8 if STATE NUMBER does not equal 17, 34, 48, 49, or 53.	--
(V983)	VEHICLE TRAILING equals 3,	STATE should equal 04, 08, 16, 18, 20, 30-32, 38-41, 46, 49.
(V984)	STATE does not equal 04, 08, 16, 18, 20, 30-32, 38-41, 46, 49,	VEHICLE TRAILING should not equal 3.

Consecutive Number - FARS Only

FORMAT: 4 numeric

SAS NAME: Accident.ST_CASE

ELEMENT VALUES:

- 0001-9999 Assigned Number

Definition: This element identifies the unique case number assigned by the data entry system.

Remarks: Please complete FARS forms with the MDE assigned case number.

C3 - Number of Forms Submitted for Persons Not in Motor Vehicles

FORMAT: 2 numeric

SAS NAME: Accident.PEDS

ELEMENT VALUES:

Codes	Attributes
00-99	Actual Number

Definition: This element records the number of Person Level (Not a Motor Vehicle Occupant) forms that are applicable to this case.

Remarks: This count will match exactly the persons counted in the case structure field “Number of Persons Not in Motor Vehicles” (formerly called “Number of Non-Motorist Forms Submitted”).

Occupants of any motor vehicle in-transport, parked/stopped off roadway motor vehicles, working motor vehicles, or motor vehicles in motion outside the trafficway will **not** be counted in this field.

The count for this field includes:

1. Occupants of a Non-Motor Vehicle Transport Device (persons riding in an animal-drawn conveyance, on an animal, injured occupants of railway trains) - [Person Type \(NM7\)](#) attribute **04 (Occupant of a Non-Motor Vehicle Transport Device)**.
2. Pedestrians, Bicyclists and Other Cyclists - [Person Type \(NM7\)](#) attributes: “05, 06, and 07.”
3. Other Persons on Personal Conveyances (i.e., skaters, wheel chair occupants) – Person Level (Not a Motor Vehicle Occupant) form [Person Type](#) attribute **08 (Person on Personal Conveyances)**.
4. Any injured persons **outside** the trafficway that are not in a motor vehicle (in buildings) - Person Level (Not a Motor Vehicle Occupant) form [Person Type](#) attribute **10 (Persons In/On Buildings)**.

Consistency Checks:

Check	IF	THEN
(5Y0F)	FIRST HARMFUL EVENT equals 08, 09, 15,	NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES must not equal 00.
(CSI4)	NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES must equal the actual number of persons not in motor vehicles in this case.	--
(PB34)	NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES equals 01, and FIRST HARMFUL EVENT equals 08, and RELATION TO JUNCTION (b) equals 02,	PEDESTRIAN/BIKE TYPING -CRASH TYPE - PEDESTRIAN must not equal 320, 330, 360, 680, 830, 890, 900, or 910.
(PB35)	NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES equals 01, and FIRST HARMFUL EVENT equals 08, and RELATION TO JUNCTION (b) equals 02,	PEDESTRIAN/BIKE TYPING -CRASH LOCATION - PEDESTRIAN must equal 1.

C4 - Number of Vehicle Forms Submitted

FORMAT: 3 numeric

SAS NAME: Accident.VE_TOTAL

ELEMENT VALUES:

Codes	Attributes
001-999	Actual Number

Definition: This element records all contact motor vehicles that the officer has reported on the police crash report as a unit involved in the crash.

Remarks: Included are: in-transport vehicles, not in-transport vehicles (parked/stopped off roadway/working motor vehicles), or vehicles located outside the trafficway boundaries.

When identifying contact vehicles for this count:

1. Remember all vehicles that are part of the unstabilized situation are part of the crash. Therefore, when recording the number of vehicles involved, the vehicles need not make contact with one another. They need only have a harmful event as part of the unstabilized situation. For example, two vehicles are traveling through an intersection when a pedestrian steps into the roadway. The first vehicle strikes the pedestrian and the second vehicle swerves to avoid the first, loses control, and overturns. Both vehicles in this situation are “contact” vehicles; therefore, this is a two-vehicle crash.
2. Even though there are no injuries in the vehicle, or the amount of damage sustained is below the State threshold, if the vehicle is involved in a harmful event it is still a contact vehicle within the entire crash and should be included in this count even if the vehicle information section is not completed on the police crash report.

IMPORTANT:

Remember, you must have **at least one motor vehicle “In-Transport”** involved in the crash for this to be a reportable case.

Consistency Checks:

Check	IF	THEN
(050P)	PERSON TYPE equals 04-08, 19, and NUMBER OF VEHICLE FORMS SUBMITTED equals 001,	VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST must equal 001.
(1A0P)	RELATED FACTORS-CRASH LEVEL equals 14,	NUMBER OF VEHICLE FORMS SUBMITTED must be greater than 001.
(2Z0F)	any SEQUENCE OF EVENTS equals 12, 14, 45, 54, 55,	NUMBER OF VEHICLE FORMS SUBMITTED must be greater than 001.
(428P)	CRASH TYPE equals 20-91,	NUMBER OF VEHICLE FORMS SUBMITTED must be greater than 001.
(429P)	NUMBER OF VEHICLE FORMS SUBMITTED equals 001,	CRASH TYPE must equal 00, 01-16, 92, 98, 99.

Check	IF	THEN
(42AP)	NUMBER OF MOTOR VEHICLES FORMS SUBMITTED equals 001, and RELATION TO TRAFFICWAY equals 02, 04, 06-08, 12 , and ATTEMPTED AVOIDANCE MANEUVER equals 00 or 01,	CRITICAL EVENT – PRECRASH (EVENT) should equal 01-06, 08-14, or 19.
(670F)	FIRST HARMFUL EVENT equals 12, 14, 45, 54, 55,	NUMBER OF VEHICLE FORMS SUBMITTED must be greater than 001.
(A080)	DRIVER PRESENCE equals 0, and FIRST HARMFUL EVENT equals 12, and NUMBER OF VEHICLE FORMS SUBMITTED equals 002,	one RELATED FACTORS-DRIVER LEVEL should equal 20.
(A090)	NUMBER OF VEHICLE FORMS SUBMITTED is greater than 001,	there should be at least one vehicle with TRAVEL SPEED of 001-151, 997-999, or blanks.
(AZDQ)	DRIVER MANEUVERED TO AVOID equals 04,	NUMBER OF VEHICLE FORMS SUBMITTED must be greater than 001.
(CSI1)	NUMBER OF VEHICLE FORMS must equal the actual number of Vehicle Level forms for this case.	--
(CSI2)	There must be exactly one Driver Level form corresponding to each Vehicle Level form.	--

Consistency Checks (FARS Only):

Check	IF	THEN
(431P)	NUMBER OF VEHICLE FORMS SUBMITTED equals 002, and UNDERRIDE/OVERRIDE equals 1-8, 9 for one vehicle,	UNDERRIDE/OVERRIDE for the other vehicle must equal 0.
(432P)	NUMBER OF VEHICLE FORMS SUBMITTED equals 001,	UNDERRIDE/OVERRIDE must equal 0.

C5 - Number of Motor Vehicle Occupant Forms Submitted

FORMAT: 3 numeric

SAS NAME: Accident.PERSONS

ELEMENT VALUES:

Codes	Attributes
000-999	Actual Number

Definition: This element records the number of Person Level (Motor Vehicle Occupant) forms that are applicable to this case.

Remarks: This element is derived when structuring the case. See [204. How to Structure a Case](#) section for remarks.

Consistency Check:

Check	Language
(CSI3)	NUMBER OF MOTOR VEHICLE OCCUPANT FORMS SUBMITTED must equal the actual number of Person Level (Motor Vehicle Occupant) forms for this case.

C6 - County/C7 City - FARS Only

FORMAT: one set 3 numeric, one set 4 numeric

SAS NAME: Accident.COUNTY, Person.COUNTY, Accident.CITY

ELEMENT VALUES:

County:		City:	
Codes	Attributes	Codes	Attributes
000	Not Applicable	0000	Not Applicable
001-996	GSA Codes	0001-9996	GSA Codes
997	Other	9997	Other
998	Not Reported	9898	Not Reported
999	Unknown	9999	Unknown

Definition: This element refers to the location of the unstabilized event with regard to the County/City.

Remarks: COUNTY and CITY are considered one field. Both must be submitted at the same time.

If COUNTY only is known, CITY may be **9999 (Unknown)**.

Code CITY as **0000 (Not Applicable)** if the crash does not occur within city limits.

Code CITY as **9997 (Other)** if CITY is other than those given by the GSA Codes.

Code CITY as **9999 (Unknown)** if crash location is unknown.

Code COUNTY as **997 (Other)** if COUNTY is other than those given by the GSA Codes.

Code COUNTY as **999 (Unknown)** if location is unknown.

In general, **Not Applicable** should be used when there is no GSA code for the crash location.

Other should be used when the analyst knows there is a GSA code for the location, but the attribute does not appear on the master GSA code list provided by NHTSA Headquarters. Both situations should be reported to NHTSA Headquarters.

Not Reported

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **Not Reported** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

Consistency Checks:

Check	IF	THEN
(200P)	CITY is greater than 0000 and less than 9997, and COUNTY is greater than 000 and less than 997,	COUNTY and CITY must be valid codes for the STATE.
(210P)	CITY is greater than 0000 and less than 9997,	COUNTY must not equal 999.

C8 - Crash Date

FORMAT: 2 sets of 2 numeric and 1 set of 4 numeric

SAS NAME: Accident.DAY, Vehicle.DAY, Person.DAY, parkwork.PDAY, Accident.MONTH, Accident.DAY_WEEK, Accident.YEAR; Vehicle.MONTH; Person.MONTH; parkwork.PMONTH

ELEMENT VALUES:

Codes	Attributes
01-12	Month
01-31	Day
Current (pre-printed)	Year

Definition: This element identifies the date on which the crash occurred.

Remarks: If the police crash report indicates that the crash (usually a hit-and-run) occurred between some PM and AM time (e.g., 8:00 PM and 6:00 AM) on either a preceding or following day, code the crash as occurring on the following day. If a range of days is indicated (e.g., between Sunday and Friday), code the last date of the range (e.g., Friday).

FARS SPECIAL INSTRUCTION:

In cases where the crash date is reported as Unknown on the police crash report, refer to the death certificate for the death date to establish the crash date.

CRSS SPECIAL INSTRUCTION:

The date of the crash is rolled up from CRSS sampling program.

If the date of the crash is unknown, use the date the crash was reported. If the time of the crash is unknown, record the time as 9999.

If the month cannot be determined from the police crash report, enter the month of the Ending Contact Date from the Inventory Record.

If the crash date on the police crash report does not match the crash date shown on the data entry screen and it is determined that the crash date on the police crash report is correct, the crash date is corrected.

Consistency Checks:

Check	IF	THEN
(1COP)	the VEHICLE MODEL YEAR is not equal to 9998 or 9999,	the VEHICLE MODEL YEAR must not be greater than CRASH YEAR plus ONE.
(921P)	MAKE is not 97, 98, 99, and equals __, and MODEL equals __,	MODEL YEAR must equal __, or CRASH YEAR plus 1.
(A030)	CRASH MONTH equals 05-09,	ATMOSPHERIC CONDITIONS should not equal 03, 04, 11, 12.
(A040)	CRASH MONTH equals 05-09,	ROADWAY SURFACE CONDITIONS should not equal 03, 04, 10.
(FP4F)	CRASH DATE is blank, case status is flawed.	--

Check	IF	THEN
(V620)	CRASH MONTH is between January and March,	the VEHICLE MODEL YEAR should NOT be greater than the CRASH YEAR unless it equals 9998 or 9999 (contact Coding Assistance through the CDAN Helpdesk.).

Consistency Check (FARS Only)

Check	IF	THEN
(3K0P)	DATE OF LAST CRASH, SUSPENSION, CONVICTION must be less than or equal to CRASH DATE.	--
(3U0P)	DEATH DATE equals CRASH DATE, and CRASH TIME is not equal to 9999,	DEATH TIME must not be less than CRASH TIME.
(4V1F)	INJURY SEVERITY equals 4,	DEATH DATE and DEATH TIME for this person must be within 720 hours of the CRASH DATE and CRASH TIME.
(4V2F)	CRASH MONTH equals 12, and DEATH MONTH equals 01,	DEATH YEAR must equal CRASH YEAR plus 1.
(4V3F)	CRASH MONTH equals 12,	DEATH MONTH must equal 01, 12, 88, 99.
(4V4F)	CRASH MONTH equals 02-11, and DEATH MONTH is not equal to 88 or 99,	DEATH MONTH must equal CRASH MONTH or CRASH MONTH plus 1.
(4V5F)	CRASH MONTH equals 01, and DEATH MONTH is not equal to 88 or 99,	DEATH MONTH must equal CRASH MONTH or CRASH MONTH plus 1 or CRASH MONTH plus 2.
(5K0P)	The Year of DATE OF FIRST CRASH, SUSPENSION, CONVICTION must be within five years of the Year of CRASH DATE.	--
(6V0P)	DEATH DATE must not be less than CRASH DATE.	--
(7V0F)	DEATH YEAR equals 9999,	CRASH MONTH must not be 01-11.
(P520)	CRASH DATE and DEATH DATE are the same, and CRASH TIME and DEATH TIME are the same,	TRANSPORTED TO FIRST MEDICAL FACILITY BY should equal 0, and DIED AT SCENE/EN ROUTE should equal 7.

C9 - Crash Time

FORMAT: 4 numeric

SAS NAME: Accident.Hour, Accident.Minute; Vehicle.HOUR, Vehicle.MINUTE, Person.HOUR, Person.MINUTE, parkwork.PHOUR, parkwork.PMINUTE

ELEMENT VALUES:

Codes	Attributes
0000-2359	Valid military time (Code midnight as "0000")
9999	Unknown

Definition: This element identifies the time at which the crash occurred.

Remarks: Enter the time at which the crash occurred as shown on the police crash report. This is the preferred time in all cases. If the crash time is not reported, unknown, or known to be in error, then all available information in the case materials should be used to determine Crash Time. If the hour cannot be determined, then enter **9999 (Unknown)**.

If the police crash report indicates the crash occurred during some time interval of greater than one hour (e.g., 8:00 PM to 6:00 AM, or 8:00 AM to 5:00 PM), enter **9999 (Unknown)**. However, if the interval is one hour or less, code the midpoint of the interval.

Examples:

- 8:00 PM to 9:00 PM, enter **2030**
- 8:30 PM to 9:30 PM, enter **2100**
- 8:50 PM to 9:30 PM, enter **2110**

When the time is available but AM versus PM is not shown on the police crash report, base the time on [Light Condition](#) (e.g., time is 10:00, LIGHT CONDITION is **2 (Dark - Not Lighted)**; code as **2200**).

Midnight or 12 AM is coded as **0000** in military time and is the start of a new day. One minute after midnight is 12:01 and is coded as **0001**.

AM - Starts at 00:00 Midnight

PM - Starts at 12:00 Noon

If the case materials state the crash occurred at the beginning or early moments of the day, midnight is coded as **0000**.

FARS SPECIAL INSTRUCTION:

If the day of the crash and the day of EMS Notification do not have the same date, then be sure to use attribute [**18 \(Date of Accident and Date of EMS Notification Were Not the Same Day\)**](#) in RELATED FACTORS - CRASH LEVEL.

How to Code Midnight:

In general, code midnight as **0000**. However, there may be confusion over which day midnight falls into. CRASH TIME is recorded between 00:00-23:59. Midnight is coded as **0000** to represent the beginning of a new day. This may not be the practice followed in your sources. Therefore, you have to determine which part of the day is being considered in your sources.

End of Day:

If your data sources give you a [Crash Date](#) and are consistent in talking about the end of that day, when they give the time of the crash as midnight, 12:00-midnight, 24:00, or 00:00, then you should code Crash Time as **2359**.

Beginning of Day:

If your sources give a [Crash Date](#) and are consistent in referring to the beginning or early moments of that day when they give a crash time, code midnight as **0000**.

See remarks - [Notification/Arrival Time EMS](#), [EMS Arrival At Hospital](#).

CRSS SPECIAL INSTRUCTION:

The time of the crash is rolled up from CRSS sampling program. If the time of the crash is unknown, record the time as **9999 (Unknown)**.

If the time of the crash on the police crash report does not match the crash time shown on the data entry screen and it is determined that the crash time on the police crash report is correct, then the crash time should be changed to reflect the time listed on the police crash report.

Consistency Checks:

Check	IF	THEN
(220P)	LIGHT CONDITION equals 4, and STATE is not equal to 02,	CRASH TIME must equal 0300-0900, 9999.
(2300)	LIGHT CONDITION equals 5, and STATE is not equal to 02,	CRASH TIME must equal 1600-2200, 9999.
(A010)	STATE equals 02, and LIGHT CONDITION equals 4,	CRASH TIME should equal 0300-1000, 9999.
(A020)	STATE equals 02, and LIGHT CONDITION equals 5,	CRASH TIME should equal 1500-2359, 9999.
(A041)	CRASH MONTH equals 05-09,	SEQUENCE OF EVENTS, FIRST HARMFUL EVENT, MOST HARMFUL EVENT should not equal 48.
(A050)	CRASH TIME equals 0900-1600,	LIGHT CONDITION should not equal 2-6.
(A060)	CRASH TIME equals 2300-0400,	LIGHT CONDITION should not equal 1, 4, 5, 9.
(FP5F)	CRASH TIME is blank, case status is flawed.	--

Consistency Checks (FARS Only):

Check	IF	THEN
(3UOP)	DEATH DATE equals CRASH DATE, and CRASH TIME is not equal to 9999,	DEATH TIME must not be less than CRASH TIME.
(4V1F)	INJURY SEVERITY equals 4,	DEATH DATE and DEATH TIME for this person must be within 720 hours of the CRASH DATE and CRASH TIME.

Check	IF	THEN
(A070)	NOTIFICATION TIME EMS is not 8888, 9998, or 9999,	NOTIFICATION TIME EMS should not be more than 120 minutes later than CRASH TIME.
(P520)	CRASH DATE and DEATH DATE are the same, and CRASH TIME and DEATH TIME are the same,	TRANSPORTED TO FIRST MEDICAL FACILITY BY should equal 0, and DIED AT SCENE/EN ROUTE should equal 7.
(P56P)	DIED AT SCENE/EN ROUTE equals 7,	DEATH TIME should be within 30 minutes of the CRASH TIME.

C10 - Trafficway Identifier - FARS Only

FORMAT: 2 sets, 30 alphanumeric

SAS NAME: Accident.TWAY_ID; Accident.TWAY_ID2

ELEMENT VALUES:

Codes	Attributes
--	Actual Posted Number, Assigned Number, or Common Name (if no posted or assigned number except:
9s	Unknown

Definition: This element captures the identity (name) of the trafficway on which the crash occurred.

Remarks:

For Non-Junction Crashes:

Code the trafficway identifier from the police crash report or highway department in the top row. Leave the bottom row blank.

For Intersection Crashes (Not Within an Interchange Area):

Code the trafficway identifier for the trafficway with the highest function class in the top row. Code the second trafficway identifier at the intersection, if provided by the police, in the bottom row. If the vehicles are traveling on different roadways of equal class, assign the crash to the roadway on which the motor vehicle precipitating the crash is traveling and record this roadway in the top row.

For Intersection-Related Crashes (Not Within an Interchange Area):

Code the trafficway identifier for the trafficway provided by the police in the top row. This does not necessarily have to be the highest functional class. In all cases, this will be the trafficway where the first harmful event occurred or the Unstabilized Situation began. Code the second trafficway identifier at the intersection, if provided by the police, in the bottom row.

For Intersection Crashes Within an Interchange Area:

If the [First Harmful Event](#) occurs within the intersection of a ramp and the surface roadway:

- Code the trafficway identifier provided on the police report or highway log in the top row (this does not necessarily have to be the highest function class).
- Code [Route Signing](#) for the trafficway in the top row.
- It is important to code the [Land Use and Functional System](#), [Ownership](#), and [National Highway System](#) for the highest class of trafficway at this intersection.
- Use the bottom row to record the second trafficway identifier provided by the police for this intersection.

For Intersection-Related Crashes Within an Interchange Area:

Code the trafficway identifier for the trafficway provided by the police in the top row. In many cases, this will be the trafficway where the first harmful event occurred or the Unstabilized Situation began. Code the second trafficway identifier at the intersection, if provided by the police, in the bottom row.

For Ramp Crashes:

If the crash occurs on the ramp or is related to the ramp, include the word “RAMP” and/or the ramp ID number after the trafficway’s identifier (e.g., I-10 RAMP).

General Guidelines for Coding Trafficway Identifier:

This data is obtained from the State highway department, or if same as that used by the State highway department, from the police crash report. Enter all alphabetic characters with **CAPITAL LETTERS**. If less than 30 characters, left-justify and do not zero-fill.

- Use [standard USPS abbreviations](#) for the street name suffix (ex. AVE, BLVD, CT, FWY). Do not include punctuation at the end of the suffix abbreviation.
- Do not enter the street address where the crash occurred. For example, 245 Elm St. would be entered as ELM ST in MDE.
- Do not enter milepoints here following the trafficway even if provided on the report. Milepoints are entered in the element [Milepoint](#).
- Do not enter a cross street referenced by the investigating officer for a **non-junction** crash. For example, if the report states: “the crash occurred on Main Street, 0.6 miles south of Girard Avenue,” Girard Avenue does not go in Trafficway Identifier 2. Trafficway Identifier 2 is reserved for intersection and intersection-related crashes.
- If a trafficway is known to have both a route identifier and a common name record the route identifier first followed by the common name (Example: State Route 3 is also Indian Head Highway and would be coded as SR-3 INDIAN HEAD HWY).

Obtained from the State highway department, or if same as that used by the State highway department, from the police crash report.

- If [Route Signing](#) is **1 (Interstate)**, you must enter “I-” in the first two spaces of Trafficway Identifier.
- If [Route Signing](#) is **2 (US Highway)**, you must enter “US-” in the first three spaces of Trafficway Identifier.
- If [Route Signing](#) is **3 (State Highway)**, you must enter “SR-” in the first three spaces of Trafficway Identifier.
- If [Route Signing](#) is **4 (County Road)**, you must enter “CR-” in the first three spaces of Trafficway Identifier followed by the route number OR name if there is no number.

Immediately after the route designation (I-, US-, or SR-), you should enter the corresponding highway number. For example, Interstate 70 should be coded as “I-70” and U.S. 66 should be coded as “US-66.” You must use a dash in the highway designation between the capital letters and the number.

If one trafficway is both, a State Highway and an Interstate Highway, [Route Signing](#) must always be coded “1- Interstate.” You should always try to obtain the route number and milepoint that correspond to the Route Signing (Interstate).

- a) If the Trafficway Identifier and [Milepoint](#) are available for only the State Highway then code [Route Signing](#) as **1 (Interstate)**, enter “I-” in the first two spaces of Trafficway Identifier followed by the full State Highway Identifier as normal (including any letters.) Code the State Highway Milepoint under the element [Milepoint](#).
Example:
If California business loop (CA215) is also Interstate 15, then code “I-SR215” or “I-CA215.”
- b) If the Trafficway Identifier and [Milepoint](#) are available for both the State Highway and the Interstate Highway, enter “I-” in the first two spaces of Trafficway Identifier followed by the Interstate number. You may then also enter the State Highway Identifier anywhere after the Interstate route number. Code the Interstate Milepoint under the element [Milepoint](#).
Example:
“I-15” (SR215) or “I-15” (CA215)

Similarly, if a State Highway is also a U.S. Highway, [Route Signing](#) must always be coded “2-US Highway.” You should always try to obtain the route number and milepoint that correspond to the Route Signing (US Highway).

- a) If the Trafficway Identifier and Milepoint are available only for the State Highway, then code [Route Signing as 2 \(US Highway\)](#), enter “US-” in the first three spaces of Trafficway Identifier followed by the full State Highway Identifier as normal (including any letters). Code the State Highway Milepoint under the element [Milepoint](#).

Example:

If Florida Route 25 is also U.S. Route 27, then code “US-SR25” or “US-FL25.”

- b) If the Trafficway Identifier and Milepoint are available for both the U.S. Highway and the State Highway, enter “US-” in the first three spaces of Trafficway Identifier followed by the U.S. route number. You may then also enter the State Highway Identifier anywhere after the U.S. route number. Code the U.S. Route Milepoint under the element [Milepoint](#).

Example:

“US-27” (SR25) or “US-27” (FL25).

Overlapping Roadways of Equal Function Class

For situations where you are presented with a roadway with two equal functional class identifiers for the same roadway, such as a stretch of roadway that is both US-10 and US-25, record both trafficways in Trafficway Identifier #1 using the “slash” format. The lower number trafficway should appear before the slash (e.g., “US-10/25”). This would also apply to Interstates, State and County roadways with two designations of equal class.

Other Land Ways

Crashes that occur on parking lot ways or other privately owned land ways open to the public for transportation will likely not be named in the State highway department inventory. If the police provide a name for this trafficway, use that name. If however, you are provided a street address OR the name of the adjacent trafficway (i.e. not the location where the crash occurred) OR the location information is blank enter “NONE.”

Consistency Checks:

Check	IF	THEN
(1F1P)	RELATION TO JUNCTION (b) does not equal 02, 03,	the second TRAFFICWAY IDENTIFIER should be blank.
(340P)	ROUTE SIGNING equals 1,	the first position of TRAFFICWAY IDENTIFIER #1 must be “I” and the second position must be “-”.
(341P)	the first position of TRAFFICWAY IDENTIFIER No. 1 equals “I” and the second position equals “-”,	ROUTE SIGNING must equal 1 or 7.
(350P)	ROUTE SIGNING is 2,	the first two positions of TRAFFICWAY IDENTIFIER No. 1 must be “US” and the third position must be “-”.
(351P)	the first two positions of TRAFFICWAY IDENTIFIER #1 equals “US” and third position equals “-”,	ROUTE SIGNING must equal 2 or 7.
(360P)	ROUTE SIGNING equals 3,	the first two positions of TRAFFICWAY IDENTIFIER No. 1 must be “SR” and the third position must be “-”.

Check	IF	THEN
(361P)	the first two positions of TRAFFICWAY IDENTIFIER #1 equals “SR” and third position equals “-”,	ROUTE SIGNING must equal 3 or 7.
(362P)	ROUTE SIGNING equals 4,	the first two positions of TRAFFIC-WAY IDENTIFIER #1 must be “CR” and the third position must be “-”.
(781P)	TYPE OF INTERSECTION equals 02-07, 10,	TRAFFICWAY IDENTIFIER (b) should not be blank.
(AC0A)	RELATION TO JUNCTION (b) equals 02, 03,	the second TRAFFICWAY IDENTIFIER should not be all blank.

C11 - Route Signing - FARS Only

FORMAT: 1 numeric

SAS NAME: Accident.ROUTE

ELEMENT VALUES:

Codes	Attributes
1	Interstate
2	U.S. Highway
3	State Highway
4	County Road
5	Local Street – Township
6	Local Street – Municipality
7	Local Street - Frontage Road
8	Other
9	Unknown

Definition: This element identifies the route signing of the trafficway on which the crash occurred.

Remarks: Before coding this element, be certain of which trafficway is to be coded. This element is coded with respect to the trafficway in the top row of [Trafficway Identifier](#). If there is any question, refer to the remarks section of Trafficway Identifier for a hierarchy for selecting the appropriate trafficway to be coded.

CODING FRONTAGE ROADS

If the crash occurs on a frontage road that is part of a larger, higher order trafficway (such as Interstate, U.S. Highway, or State Route), use the following guideline to code the highway elements:

- Code [Trafficway Identifier](#) and [Land Use and Functional System](#) (b) for the **01 (Interstate)**, **02 (Principal Arterial - Other Freeways and Expressways)**, or **04 (Minor Arterial)**.
- Code Route Signing **7 (Local Street - Frontage Road)**.

Make sure to include the highway designation in Trafficway Identifier when using **7 (Local Street - Frontage Road)**. See [Trafficway Identifier](#).

If the **Frontage Road** is a separate trafficway, code all highway elements for that trafficway. **Frontage Road** is not used.

8 (Other) includes “Other Limited Access” and “Other Major Artery.”

Federal Highway Administration classification obtainable from the State highway department must be used. No other classification source is acceptable. Refer problems in obtaining the FHWA classification to Regional State Assignee.

Consistency Checks:

Check	IF	THEN
(260P)	ROUTE SIGNING equals 1,	NATIONAL HIGHWAY SYSTEM must equal 1.
(320P)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01, and ROUTE SIGNING does not equal 7,	NATIONAL HIGHWAY SYSTEM must equal 1.
(330P)	NATIONAL HIGHWAY SYSTEM equals 0, 9,	ROUTE SIGNING must not equal 1.
(340P)	ROUTE SIGNING equals 1,	the first position of TRAFFICWAY IDENTIFIER #1 must be "I" and the second position must be "-".
(341P)	the first position of TRAFFICWAY IDENTIFIER No. 1 equals "I" and the second position equals "-",	ROUTE SIGNING must equal 1 or 7.
(350P)	ROUTE SIGNING is 2,	the first two positions of TRAFFICWAY IDENTIFIER No. 1 must be "US" and the third position must be "-".
(351P)	the first two positions of TRAFFICWAY IDENTIFIER #1 equals "US" and third position equals "-",	ROUTE SIGNING must equal 2 or 7.
(360P)	ROUTE SIGNING equals 3,	the first two positions of TRAFFICWAY IDENTIFIER No. 1 must be "SR" and the third position must be "-".
(361P)	the first two positions of TRAFFICWAY IDENTIFIER #1 equals "SR" and third position equals "-",	ROUTE SIGNING must equal 3 or 7.
(362P)	ROUTE SIGNING equals 4,	the first two positions of TRAFFIC-WAY IDENTIFIER #1 must be "CR" and the third position must be "-".
(A280)	ROUTE SIGNING equals 1,	SPECIAL JURISDICTION should not equal 1-5, 8, 9.
(A290)	ROUTE SIGNING equals 1, and RELATION TO JUNCTION (a) equals 0,	RELATION TO JUNCTION (b) should not equal 02-04, 06, 08, 16.
(A291)	RELATION TO JUNCTION (b) equals 07,	ROUTE SIGNING should not equal 5, 6.
(A300)	ROUTE SIGNING equals 1,	TRAFFICWAY DESCRIPTION should equal 2, 3, 6 for at least one vehicle.
(A310)	ROUTE SIGNING equals 1, and RELATION TO JUNCTION (a) equals 0,	TOTAL LANES IN ROADWAY should not equal 1 for any vehicle.
(A320)	ROUTE SIGNING equals 1, and RELATION TO JUNCTION (a) equals 0,	SPEED LIMIT should not equal 05-40 for any vehicle.
(A330)	ROUTE SIGNING equals 1, 2,	ROADWAY SURFACE TYPE should equal 1, 2, 8 for at least one vehicle.
(A350)	ROUTE SIGNING equals 1,	FIRST HARMFUL EVENT should not equal 10.
(A360)	RELATION TO JUNCTION(b) equals 07,	ROUTE SIGNING should not equal 4.
(A700)	SPEED LIMIT is greater than 65 for every vehicle,	ROUTE SIGNING should equal 1-4.

Check	IF	THEN
(A820)	FIRST HARMFUL EVENT equals 46, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) does not equal 02, 03, 05,	ROUTE SIGNING should not equal 1.
(A840)	ROUTE SIGNING equals 7,	LAND USE AND FUNCTIONAL SYSTEM (b) should equal 01-03.
(A850)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 02, and ROUTE SIGNING equals 2,	NATIONAL HIGHWAY SYSTEM should equal 1.
(A882)	RELATION TO TRAFFICWAY equals 07,	ROUTE SIGNING should not equal 1.
(A920)	NATIONAL HIGHWAY SYSTEM equals 0, 9,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 02, and ROUTE SIGNING should not equal 2.

C12 - Land Use and Functional System - FARS Only

FORMAT: 1 numeric occurring 1 time, 2 numeric occurring 1 time

SAS NAME: RUR_URB; FUNC_SYS

ELEMENT VALUES:

C12a: Land Use

Codes	Attributes
1	Rural
2	Urban
6	Trafficway Not in State Inventory
8	Not Reported
9	Unknown

C12b: Functional System

Codes	Attributes
01	Interstate
02	Principal Arterial – Other Freeways and Expressways
03	Principal Arterial – Other
04	Minor Arterial
05	Major Collector
06	Minor Collector
07	Local
96	Trafficway Not in State Inventory
98	Not Reported
99	Unknown

Definition (Land Use): The classification of the segment of the trafficway on which the crash occurred based on the Federal Highway Administration (FHWA) approved adjusted Census boundaries of small urban and urbanized areas.

Definition (Functional System): This element identifies the functional classification of the segment of the trafficway on which the crash occurred.

Remarks: Before coding this element, be certain of which trafficway is to be coded. This element is coded with respect to the trafficway selected in [NATIONAL HIGHWAY SYSTEM](#), [OWNERSHIP](#), [ROUTE SIGNING](#), and in the top row of [TRAFFICWAY IDENTIFIER](#). The exception would be an intersection crash in an interchange. Please see the remarks below and in TRAFFICWAY IDENTIFIER for a hierarchy for selecting the appropriate trafficway to be coded.

Code the value that represents the FHWA approved Land Use and Functional System. FHWA classification obtainable from the State highway department must be used.

No other classification source is acceptable. Refer problems in obtaining the FHWA classification to the State DOT planning office.

Land Use:

6 (Trafficway Not in State Inventory) is used when a qualifying motor vehicle traffic crash occurs on a trafficway that is not included in the State highway inventory. Examples include crashes that occur on parking lot ways or other privately owned landways open to the public for transportation.

8 (Not Reported) is used when the crash occurred on a reportable trafficway but the information to record LAND USE is missing or unavailable.

9 (Unknown) is used when the crash occurred on a reportable trafficway, but it is unknown if the crash location is within the boundaries of an urban area. If LAND USE is unknown, FUNCTIONAL SYSTEM, OWNERSHIP and NATIONAL HIGHWAY SYSTEM can still be coded with known values. For example, it may be known that the crash occurred somewhere along on an interstate. Thus the trafficway is owned by the State and is part of the NHS. However, it may not be known if the location was within urban boundaries or not.

Functional System:

96 (Trafficway Not in State Inventory) is used when a qualifying motor vehicle traffic crash occurs on a trafficway that is not included in the State highway inventory. Examples include crashes that occur on parking lot ways or other privately owned landways open to the public for transportation.

98 (Not Reported) is used when the crash occurred on a reportable trafficway but the information to record FUNCTIONAL SYSTEM is missing or unavailable.

99 (Unknown) is used when the crash occurred on a reportable trafficway, but the functional classification of the segment of the trafficway on which the crash occurred can't be determined or the applicable segment can't be determined. If FUNCTIONAL SYSTEM is unknown, LAND USE, OWNERSHIP and NATIONAL HIGHWAY SYSTEM can still be coded with a known value. For example, it may be known that the crash occurred within or outside urban boundaries (LAND USE). However, the trafficway may change classification along its length and the segment of the trafficway on which the crash occurred may not be known.

NON-JUNCTION CRASHES

Assign the crash to the trafficway on which the first harmful event occurred. If the first harmful event occurred on private property, assign the crash to the trafficway on which the vehicle was traveling when the Unstabilized Situation began.

INTERSECTION CRASHES (Not Within an Interchange)

In an at-intersection crash, assign the crash to the highest function class of trafficway at the intersection.

If the vehicles are traveling on different roadways of equal class, assign the crash to the roadway on which the motor vehicle precipitating the crash is traveling.

INTERSECTION CRASHES (Within an Interchange)

Interchange crashes that occur in an intersection of a ramp that connects a higher and a lower class trafficway should be assigned to the highest-class trafficway. For example: vehicle #1 strikes vehicle #2 in the intersection of the I-270 ramp and US-10. Code FUNCTIONAL SYSTEM as 01 (Interstate).

Ramps are part of the highest class of trafficway to which they connect. Therefore, if a crash occurs on a ramp, including in the merge/diverge lanes, and it is not an Intersection crash, it is assigned to the highest class of trafficway to which the ramp connects. Example: vehicle #1 overturns on the ramp of I-270 and US-10. Code

FUNCTIONAL SYSTEM 01 (Interstate). This includes intersection-related and entrance/exit ramp related crashes for [RELATION TO JUNCTION](#).

OTHER CRASHES (Within an Interchange)

For other crashes that occur within an interchange, other than intersection crashes, code Functional System for the trafficway on which the vehicles were traveling. Example, vehicle #1 strikes vehicle #2 on US-10 bridge within the I-270 interchange (not in the intersection of any ramp, or on any ramp). Code FUNCTIONAL SYSTEM for US-10 and not I-270.

QUESTIONABLE CASES

In any questionable case, the higher function class takes precedence.

Consistency Checks:

Check	IF	THEN
(1TOP)	SPEED LIMIT for every vehicle is greater than 55, and not equal to 98 or 99,	LAND USE AND FUNCTIONAL SYSTEM (a) should not equal 2 or 6, and LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 06, 07, or 96.
(300P)	NATIONAL HIGHWAY SYSTEM equals 0, 9,	LAND USE AND FUNCTIONAL SYSTEM (b) must not equal 01.
(320P)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01, and ROUTE SIGNING does not equal 7,	NATIONAL HIGHWAY SYSTEM must equal 1.
(A110)	FIRST HARMFUL EVENT equals 10,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 01-03.
(A11A)	FUNCTIONAL SYSTEM (b) equals 01,	OWNERSHIP must equal 01 or 31.
(A12A)	either FUNCTIONAL SYSTEM (b) or OWNERSHIP equals 96,	both must equal 96.
(A13A)	LAND USE (a) equals 6,	FUNCTIONAL SYSTEM (b) must equal 96.
(A14A)	FUNCTIONAL SYSTEM (b) equals 96,	LAND USE a must equal 6.
(A15A)	FUNCTIONAL SYSTEM (b) equals 99,	LAND USE (a) should equal 9, OWNERSHIP should equal 99, and NATIONAL HIGHWAY SYSTEM should equal 9.
(A150)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01, 02, and RELATION TO JUNCTION (a) equals 0,	RELATION TO JUNCTION (b) should not equal 02-04, 06, 08.
(A160)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01-06,	ROADWAY SURFACE TYPE should equal 1, 2, 8, or 9 for at least one vehicle.
(A170)	ROADWAY SURFACE TYPE equals 3-5 for every vehicle,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 01-06.
(A180)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01,	SPECIAL JURISDICTION should not equal 1-5, 8, 9.
(A190)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 02,	SPECIAL JURISDICTION should not equal 4.
(A200)	RELATION TO JUNCTION (b) equals 07,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 06, 07, or 96.

Check	IF	THEN
(A210)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01, 02, and RELATION TO JUNCTION (a) equals 0,	TRAFFIC CONTROL DEVICE should not equal 01-04, 07, 20, 23, 40, 50, 65.
(A220)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01, 02, and RELATION TO JUNCTION (a) equals 0,	SPEED LIMIT should not equal 05-40 for any vehicle.
(A230)	SEQUENCE OF EVENTS equals 10,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 01-03.
(A240)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01, and RELATION TO JUNCTION (a) equals 0,	TRAVEL SPEED should not equal 005-040 for any vehicle.
(A250)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01-03, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) does not equal 03, 05, 20,	TOTAL LANES IN ROADWAY should not equal 1 for the vehicles involved in the FIRST HARMFUL EVENT.
(A720)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01, 02,	TRAFFICWAY DESCRIPTION should equal 2, 3, 6 for at least one vehicle.
(A810)	FIRST HARMFUL EVENT equals 46, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) does not equal 02, 03, 05,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 01.
(A840)	ROUTE SIGNING equals 7,	LAND USE AND FUNCTIONAL SYSTEM (b) should equal 01-03.
(A850)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 02, and ROUTE SIGNING equals 2,	NATIONAL HIGHWAY SYSTEM should equal 1.
(A860)	NATIONAL HIGHWAY SYSTEM equals 1,	LAND USE AND FUNCTIONAL SYSTEM (b) should equal 01-03.
(A883)	RELATION TO TRAFFICWAY equals 07,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 01.
(A900)	SPEED LIMIT equals 60, 65 for every vehicle,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 04-07 or 96.
(A910)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 04-07 or 96,	NATIONAL HIGHWAY SYSTEM should equal 0, 9.
(A920)	NATIONAL HIGHWAY SYSTEM equals 0, 9,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 02, and ROUTE SIGNING should not equal 2.
(U684)	UNLIKELY: LAND USE (a) equals 8.	--
(U685)	UNLIKELY: FUNCTIONAL SYSTEM (b) equals 98.	--
(U686)	UNLIKELY: LAND USE and FUNCTIONAL SYSTEM (a/b) equals 9, 99.	--

C13 - Ownership - FARS Only

FORMAT: 2 numeric

SAS NAME: RD_OWNER

ELEMENT VALUES:

Codes	Attributes
01	State Highway Agency
02	County Highway Agency
03	Town or Township Highway Agency
04	City or Municipal Highway Agency
11	State Park, Forest, or Reservation Agency
12	Local Park, Forest, or Reservation Agency
21	Other State Agency
25	Other Local Agency
26	Private (other than Railroad)
27	Railroad
31	State Toll Road
32	Local Toll Authority
40	Other Public Instrumentality (i.e., Airport)
50	Indian Tribe Nation
60	Other Federal Agency
62	Bureau of Indian Affairs
63	Bureau of Fish and Wildlife
64	U.S. Forest Service
66	National Park Service
67	Tennessee Valley Authority
68	Bureau of Land Management
69	Bureau of Reclamation
70	Corps of Engineers
72	Air Force
74	Navy/Marines
80	Army
96	<u>Trafficway Not in State Inventory</u>
98	<u>Not Reported</u>
99	<u>Unknown</u>

Definition: This element identifies the entity that has legal ownership of the segment of the trafficway on which the crash occurred.

Remarks: Before coding this element, be certain of which trafficway is to be coded. This element is coded with respect to the trafficway selected in [NATIONAL HIGHWAY SYSTEM, LAND USE AND FUNCTIONAL SYSTEM, ROUTE SIGNING](#), and in the top row of [TRAFFICWAY IDENTIFIER](#). The exception would be an intersection crash in an interchange. Please see the remarks section of TRAFFICWAY IDENTIFIER for a hierarchy for selecting the appropriate trafficway to be coded.

Code the level of government that best represents the highway owner irrespective of whether agreements exist for maintenance or other purposes.

- “State” means owned by one of the 50 States, the District of Columbia, or the Commonwealth of Puerto Rico including quasi-official State commissions or organizations;
- “County, local, municipal, town, or township” means owned by one of the officially recognized governments established under State authority;
- “Federal” means owned by one of the branches of the U.S. Government or independent establishments, government corporations, quasi-official agencies, organizations, or instrumentalities;
- “Other” means any other group not already described above or nongovernmental organizations with the authority to build, operate, or maintain toll or free highway facilities.
- Only private roads that are open to public travel (e.g., toll bridges) are to be reported in HPMS.

96 (Trafficway Not in State Inventory) is used when a qualifying motor vehicle traffic crash occurs on a trafficway that is not included in the State highway inventory. Examples include crashes that occur on parking lot ways or other privately owned landways open to the public for transportation.

98 (Not Reported) is used when the crash occurred on a reportable trafficway but the information to record Ownership is missing or unavailable.

99 (Unknown) is used when the crash occurred on a reportable trafficway, but it can't be determined which entity has legal ownership of the segment of the trafficway on which the crash occurred or the applicable segment can't be determined. If OWNERSHIP is unknown, [LAND USE and FUNCTIONAL SYSTEM](#) and [NATIONAL HIGHWAY SYSTEM](#) can still be coded with known values. For example, it may be known that the crash occurred in an urban area on a minor collector that is not part of the NHS. However, the location detail may not be sufficient to determine ownership (e.g., **03 (Town or Township Highway Agency)** or **04 (City or Municipal Highway Agency)**).

Federal Highway Administration classification obtainable from the State highway department must be used.

No other classification source is acceptable. Refer problems in obtaining the FHWA classification to the State DOT planning office.

Consistency Checks:

Check	IF	THEN
(A11A)	FUNCTIONAL SYSTEM (b) equals 01,	OWNERSHIP must equal 01 or 31.
(A12A)	either FUNCTIONAL SYSTEM (b) or OWNERSHIP equals 96,	both must equal 96.
(A15A)	FUNCTIONAL SYSTEM (b) equals 99,	LAND USE (a) should equal 9, OWNERSHIP should equal 99, and NATIONAL HIGHWAY SYSTEM should equal 9.
(U683)	UNLIKELY: OWNERSHIP equals 98 or 99.	--

C14 - National Highway System - FARS Only

FORMAT: 1 numeric

SAS NAME: Accident.NHS

ELEMENT VALUES:

Codes	Attributes
0	This section IS NOT on the NHS
1	This section IS ON the NHS
9	Unknown if this section is on the NHS

Definition: This element identifies whether or not this crash occurred on a trafficway that is part of the National Highway System.

Remarks: The National Highway System includes the Interstate System, and consists of principal arterial system routes and some Strategic Highway Network connectors functionally classified below principal arterial.

Federal Highway Administration classification obtainable from the State highway department must be used. No other classification source is acceptable. Refer problems in obtaining the FHWA classification to Regional State Assignee.

Consistency Checks:

Check	IF	THEN
(260P)	ROUTE SIGNING equals 1,	NATIONAL HIGHWAY SYSTEM must equal 1.
(300P)	NATIONAL HIGHWAY SYSTEM equals 0, 9,	LAND USE AND FUNCTIONAL SYSTEM (b) must not equal 01.
(320P)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01, and ROUTE SIGNING does not equal 7,	NATIONAL HIGHWAY SYSTEM must equal 1.
(330P)	NATIONAL HIGHWAY SYSTEM equals 0, 9,	ROUTE SIGNING must not equal 1.
(A15A)	FUNCTIONAL SYSTEM (b) equals 99,	LAND USE (a) should equal 9, OWNERSHIP should equal 99, and NATIONAL HIGHWAY SYSTEM should equal 9.
(A850)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 02, and ROUTE SIGNING equals 2,	NATIONAL HIGHWAY SYSTEM should equal 1.
(A860)	NATIONAL HIGHWAY SYSTEM equals 1,	LAND USE AND FUNCTIONAL SYSTEM (b) should equal 01-03.
(A910)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 04-07 or 96,	NATIONAL HIGHWAY SYSTEM should equal 0, 9.
(A920)	NATIONAL HIGHWAY SYSTEM equals 0, 9,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 02, and ROUTE SIGNING should not equal 2.

C15 - Special Jurisdiction - FARS Only

FORMAT: 1 numeric

SAS NAME: Accident.SP_JUR

ELEMENT VALUES:

Codes	Attributes
0	No Special Jurisdiction
1	National Park Service
2	Military
3	Indian Reservation
4	College/University Campus*
5	Other Federal Properties*
8	Other
9	Unknown

Definition: This element identifies if the location on the trafficway where the crash occurred qualifies as a Special Jurisdiction even though it may be patrolled by State, county, or local police (e.g., all State highways running through Indian reservations are under the jurisdiction of the Indian reservation).

Remarks: Road must be under the regulation of Special Jurisdiction, although it may be patrolled by State, county, or local police forces.

There is a difference between a National Park and National Forest. Only areas described as National Parks should be **1 (National Park Service)**. State parks should be coded as **8 (Other)**, and National Forests should be coded as **0 (No Special Jurisdiction)**.

State highways running through Indian Reservations must be coded as **3 (Indian Reservation)**.

* These values are unlikely occurrences and will raise an error flag.

Consistency Checks:

Check	IF	THEN
(A180)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01,	SPECIAL JURISDICTION should not equal 1-5, 8, 9.
(A190)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 02,	SPECIAL JURISDICTION should not equal 4.
(A280)	ROUTE SIGNING equals 1,	SPECIAL JURISDICTION should not equal 1-5, 8, 9.
(U010)	UNLIKELY: SPECIAL JURISDICTION equals 4 or 5.	--

C16 - Milepoint - FARS Only

FORMAT: 5 numeric

SAS NAME: Accident.MILEPT

ELEMENT VALUES:

Codes	Attributes
0000.0	None
--	Actual to Nearest Tenth Mile
9999.8	Not Reported
9999.9	Unknown

Definition: This element identifies the milepoint nearest to the location where the crash occurred.

Remarks: Refer to the remarks section under [LAND USE AND FUNCTIONAL SYSTEM](#) for the hierarchy of selecting the trafficway to be coded.

Code the MILEPOINT for the respective [TRAFFICWAY IDENTIFIER](#). For crashes that occur on entrance or exit ramps use the milepoint associated with the ramp location with respect to the trafficway to which it belongs. When transitioning between two trafficways of equal functional class choose the milepoint of the exiting trafficway.

Obtained from the State highway department. Code the actual Milepoint to the nearest .1 mile with decimal. Right justify if less than 5 digits. For example, if Milepoint is 10, you must code “0010.0.”

The Difference Between Mile POINTS and Mile POSTS:

Mile POINTS make up the length of a road. They are part of a State's official Linear Referencing System (LRS). Mile points are measurements of the road and are expressed in decimal format. This LRS is used for the State's official Trafficway Asset Management. This information can come ONLY from a State's DOT out of their official Roadway Inventory, Roadlog, or other Roadway information collection system; because, the physical mile POST may or may not align with the LRS mile POINT.

The Mile POST (sometimes called Mile Markers or Mile Post Markers) is the physical, numerical marker located on the roadside. This is typically the information located on police crash reports, as law enforcement frequently refer to the mile posts or mile markers when describing the location of an incident. **DO NOT CODE THE MILE POST.**

9999.8 (Not Reported) is used when the information to record MILEPOINT is not applicable, missing, or unavailable.

C17 - Global Position

FORMAT: 8 numeric, 9 numeric

SAS NAME: Accident.Latitude/Accident.Longitud

ELEMENT VALUES:

Codes	Attributes
--	Latitude (dd.mm.ss.ss) (degrees/minutes/seconds)
--	Longitude (ddd.mm.ss.ss) (degrees/minutes/seconds)
7s	Not Reported
8s	Not Available
9s	Reported as Unknown

Definition: This element identifies the location of the crash using Global Position coordinates.

Remarks: “Global Position” refers to the geographic location of the crash. It is expressed in Degrees, Minutes, and Seconds of **Latitude**; and Degrees, Minutes, and Seconds of **Longitude**:

Latitude: dd mm ss.ss (Degrees/Minutes/Seconds)

Longitude: ddd mm ss.ss (Degrees/Minutes/Seconds)

In some instances, your source documents may display Longitude as a negative (-) number. You may disregard the minus (-) sign.

Right-Justify Degrees and Minutes:

Note that **Longitude** Degrees can be up to three digits. Code Degrees less than three digits in the right-most positions and “0s” to the left. Code **Latitude** or **Longitude** Minutes less than two digits in the right-most position with “0s” to the left. Examples: Longitude “77 degrees – 7 minutes - no seconds” is coded 077 07 00.00; Longitude “80 degrees - no minutes - no seconds” is coded 080 00 00.00; Latitude “30 degrees - one minute - 30 seconds” is coded 30 01 30.00.

Latitude and Longitude Seconds:

Code the value of **Latitude** or **Longitude** Seconds to two significant places after the decimal. If the **Latitude** or **Longitude** Seconds precision is less than two decimal positions, enter “0s” in the right-most positions of Seconds. Always right-justify any data before the decimal point with added “0s” to the left (e.g., 5.1 seconds is 05.10 with no spaces before the decimal point).

7s (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **7s (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

9s (Reported as Unknown) is selected if the investigating officer reported that the global position of the crash was not known.

FARS SPECIAL INSTRUCTION:

The police crash report may include the geographic location in a format compatible with this element, or the State highway department may be able to provide it from a State's Geographic Information System (GIS) or Global Positioning System (GPS).

A Geo-locator tool is available on the FARS microcomputer (MDE) to assist generating latitude and longitude when they are not available through State sources.

If data is unknown, code all "9s." For example, if you are in a State that does record geographic location coordinates, but you don't have those coordinates, and the Geo-locator tool cannot provide the coordinates, the data is unknown.

Code the complete valid **Latitude** and **Longitude**, if available, if not blank and if not unknown. You must code valid **Latitude** or **Longitude** minutes and seconds when coding a valid value for **Latitude** or **Longitude** degrees. (For example: Latitude - 38 99 99.99 is invalid.)

CRSS SPECIAL INSTRUCTION:

This data element is only coded if it is present on the police crash report and in Lat/Long format, otherwise code as **Not Reported**.

Consistency Checks:

Check	IF	THEN
(G01P)	STATE is ____ and GLOBAL POSITION - LATITUDE (degrees) is not equal to 77, 88, 99,	LATITUDE (degrees) must be equal to, or greater than (1d), and LATITUDE (degrees) must not be greater than (2d).
(G02P)	STATE is ____, and GLOBAL POSITION - LATITUDE (degrees) equals (1d),	LATITUDE (minutes) must be equal to, or greater than (1s).
(G03P)	STATE is ____, and GLOBAL POSITION - LATITUDE (degrees) equals (2d),	LATITUDE (minutes) must not be greater than (2s).
(G04P)	STATE is ____ and GLOBAL POSITION - LONGITUDE (degrees) is not equal to 777, 888, 999,	LONGITUDE (degrees) must be equal to, or greater than (3d), and LONGITUDE (degrees) must not be greater than (4d).
(G05P)	STATE is ____, and GLOBAL POSITION - LONGITUDE (degrees) equals (3d),	LONGITUDE (minutes) must be equal to, or greater than (3s).
(G06P)	STATE is ____, and GLOBAL POSITION - LONGITUDE (degrees) equals (4d),	LONGITUDE (minutes) must not be greater than (4s).
(G07P)	any part of GLOBAL POSITION - LATITUDE (degrees, minutes, or seconds) is all 8s,	all parts of LATITUDE must be all 8s.
(G08P)	any part of GLOBAL POSITION - LONGITUDE (degrees, minutes, or seconds) is all 8s,	all parts of LONGITUDE must be all 8s.
(G09P)	any part of GLOBAL POSITION - LATITUDE (degrees, minutes, or seconds) is all 9s,	all parts of LATITUDE must be all 9s.
(G10P)	any part of GLOBAL POSITION - LONGITUDE (degrees, minutes, or seconds) is all 9s,	all parts of LONGITUDE must be all 9s.
(G11P)	any part of GLOBAL POSITION - LATITUDE (degrees, minutes, or seconds) is blank,	all parts of LATITUDE must be blank.

Check	IF	THEN
(G12P)	any part of GLOBAL POSITION - LONGITUDE (degrees, minutes, or seconds) is blank,	all parts of LONGITUDE must be blank.
(G0AP)	any part of GLOBAL POSITION - LONGITUDE (degrees, minutes, or seconds) is all 7s,	all parts of LONGITUDE must be all 7s.
(G0BP)	any part of GLOBAL POSITION - LATITUDE (degrees, minutes, or seconds) is all 7s,	all parts of LATITUDE must be all 7s.

C18 - Crash Events

FORMAT: (Completed in MDE)

SAS NAME: (See Below)

Definition: The Crash Events table records in chronological sequence, the set of events resulting from an unstabilized situation that constitutes a motor vehicle traffic crash.

Remarks: The “crash” is concluded in time when all events that originate from the unstabilized situation are stabilized. The Crash Events table is designed to provide a coded description of all qualifying events that occurred in the crash.

With this coded chronological sequence of qualified crash events, traffic safety analysts can review the entire series of events involving in-transport motor vehicles. Various areas of concern to the highway safety community can be easily assessed using this data. For instance, the injury severity in crashes can be assessed relative to the number and type of impacts involved. Likewise, certain collision configurations that may create a greater hazardous condition for the occupants can be identified. Other possible areas of analysis would be the mix of vehicles sizes or the types of objects the different classes of vehicles impact.

To complete the Crash Events table, each event for each vehicle is recorded in the order in which they occur, time-wise, based on the description of the crash from the crash report narrative, diagram, or other relevant case materials. Crash Events includes both harmful and non-harmful events that occur in the crash. Recording of Crash Events ends at the last harmful event of the entire crash. Therefore, a non-harmful event (e.g., Crossing the Centerline) that occurs following the last harmful event of the crash will not be included.

The Crash Events table is completed based on the actions of the in-transport motor vehicle in the case. Consequently, other involved traffic units (parked motor vehicle, pedestrian, etc.) are only identified in the events for the in-transport motor vehicle that contacted it. If the crash report includes an event that involves only not in-transport motor vehicles and/or non-motorists, that specific event is not entered as an event in the coded crash sequence.

Examples Include:

- Not in-transport vehicle strikes pedestrian, other not in-transport vehicle, or fixed object.
- Pedestrian or pedalcyclist strikes an object, a not in-transport vehicle, other non-motorist.

***Note: Data recorded in the Crash Events table is used to derive the following data elements:**

1. [First Harmful Event \(FHE\)](#) – the first injury or damage producing event in each crash.
2. [Areas of Impact/Initial \(AOI/Initial\)](#) – the first Areas of Impact value for each vehicle.
3. [Sequence of Events \(SOE\)](#) – all events (harmful and non-harmful) associated with each in-transport motor vehicle in the table.

For items identified in a “damaged property” section on the report, include all items listed associated with the applicable vehicle in the best order that can be determined. If the actual order cannot be determined, use the listed order of items. In a multi-vehicle crash, if it cannot be determined which vehicle is associated with the damaged property listed; assign these items to the vehicle most likely to be associated with this property. If this cannot be established, omit these events.

C18 Crash Events Table Columns

Vehicle Number (This Vehicle)	Areas of Impact (This Vehicle)	Sequence of Events (SOE)	Vehicle Number (Other Vehicle)	Areas of Impact (Other Vehicle)
----------------------------------	-----------------------------------	-----------------------------	-----------------------------------	------------------------------------

Event Number**FORMAT:** (Completed in MDE)**SAS NAME:** Cevent.EVENTNUM; Vevent.EVENTNUM**ELEMENT VALUES:**

Codes	Attributes
001-999	Actual Number

Remarks: This is a computer assigned number beginning with 001. The event number shows the chronological sequence of the qualifying harmful and non-harmful events in the crash. Qualifying events are those that involve an in-transport motor vehicle or an object set-in-motion by an in-transport motor vehicle.

In the MDE system this will be the row position and not displayed as a column in the entry table.

Vehicle Number (This Vehicle)**FORMAT:** (Completed in MDE)**SAS NAME:** Cevent.VNUMBER1; Vevent.VNUMBER1**ELEMENT VALUES:**

Codes	Attributes
001-999	Actual Number

Remarks: Enter the number of the in-transport motor vehicle associated with the event in the Sequence of Events column of the Crash Events Table. Vehicles are assigned the police crash report's vehicle number unless a vehicle number from the police crash report is not used in the case (e.g., non-contact vehicle).

Areas of Impact (This Vehicle)**FORMAT:** (Completed in MDE)**SAS NAME:** Cevent.AOI1; Vevent.AOI1**ELEMENT VALUES:** *

Codes	Attributes
00	Non-Collision
01-12	Clock Points
13	Top
14	Undercarriage
61	Left
62	Left-Front Side
63	Left-Back Side
81	Right
82	Right-Front Side
83	Right-Back Side
18	Cargo/Vehicle Parts Set-In-Motion

Codes	Attributes
19	Other Objects Set-In-Motion
20	Object Set in Motion, Unknown if Cargo/Vehicle Parts or Other
98	Not Reported
99	Reported as Unknown

Remarks: Identifies the contact point (if applicable) for the vehicle coded in Vehicle Number (This Vehicle) associated with this event. If the event is a Collision event, code the value that identifies the impact area or indicates this vehicle set an object in motion. If the event is a Non-Collision event, use the attribute [00 \(Non-Collision\)](#). If the event is a [Non-Harmful event](#), then skip entry of an Areas of Impact (This Vehicle) value for that event.

This field uses the same values and Remarks as the Vehicle Level data element [Areas of Impact – Initial Contact Point](#). The Vehicle Level data element Areas of Impact - Initial Contact Point is derived from the Crash Events Table and will always be the first recorded areas of impact value for each vehicle in the table.

Sequence of Events

FORMAT: (Completed in MDE)

SAS NAME: Cevent.SOE; Eevent.SOE

ELEMENT VALUES:

Non-Harmful Events:

Codes	Attributes
61	Equipment Failure (blown tire, brake failure, etc.)
62	Separation of Units
63	Ran Off Roadway-Right
64	Ran Off Roadway-Left
79	Ran off Roadway - Direction Unknown
71	End Departure
65	Cross Median
68	Cross Centerline
66	Downhill Runaway
67	Vehicle Went Airborne
69	Re-entering Roadway
70	Non-harmful, Swaying Trailer/Jackknife
60	Cargo/Equipment Loss or Shift (non-harmful)

Non-Collision Harmful Events:

Codes	Attributes
01	Rollover/Overtur
02	Fire/Explosion
03	Immersion or Partial Immersion
04	Gas Inhalation
51	Jackknife (harmful to this vehicle)
06	Injured in Vehicle (Non-Collision)
44	Pavement Surface Irregularity (Ruts, Potholes, Grates, etc.)
07	Other Non-Collision

Codes	Attributes
72	Cargo/Equipment Loss, Shift, or Damage (harmful)
16	Thrown or Falling Object
05	Fell/Jumped from Vehicle

Collision with Motor Vehicle In-Transport:

Codes	Attributes
12	Motor Vehicle In-Transport
54	Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport
55	Motor Vehicle in Motion Outside the Trafficway

Collision with Object Not Fixed:

Codes	Attributes
08	Pedestrian
09	Pedalcyclist
10	Railway Vehicle
74	Road Vehicle on Rails
11	Live Animal
49	Ridden Animal or Animal-Drawn Conveyance
18	Other Object (Not Fixed)
15	Non-Motorist on Personal Conveyance
14	Parked Motor Vehicle
45	Working Motor Vehicle
73	Object That Had Fallen from Motor Vehicle In-Transport
91	Unknown Object Not Fixed

Collision with Fixed Object:

Codes	Attributes
17	Boulder
19	Building
58	Ground
20	Impact Attenuator/Crash Cushion
50	Bridge Overhead Structure
21	Bridge Pier or Support
23	Bridge Rail (Includes Parapet)
24	Guardrail Face
52	Guardrail End
25	Concrete Traffic Barrier
57	Cable Barrier
26	Other Traffic Barrier
59	Traffic Sign Support
46	Traffic Signal Support
30	Utility Pole/Light Support
31	Other Post, Other Pole, or Other Supports
32	Culvert
33	Curb

Codes	Attributes
34	Ditch
35	Embankment
38	Fence
39	Wall
40	Fire Hydrant
41	Shrubbery
42	Tree (Standing Only)
48	Snow Bank
53	Mail Box
43	Other Fixed Object
93	Unknown Fixed Object

Unknown

Codes	Attributes
99	Reported as Unknown

Remarks: This data element is derived from the Crash Events Table. Recording of Crash Events ends at the last harmful event of the entire crash. Therefore, a [non-harmful event](#) (e.g., Crossing the Centerline) that occurs following the last harmful event of the crash will not be included. Correction to the Sequence Events order must be made by revision to the Crash Events Table. This field uses the same values and Remarks as the Vehicle Level data element [Sequence of Events](#).

Consistency Checks:

Check	IF	THEN
(A042)	CRASH EVENTS-SEQUENCE OF EVENTS equals 17, 19-21, 23-26, 30-35, 38-43, 52, 53, 57,93, for a vehicle,	at least one previous CRASH EVENTS-SEQUENCE OF EVENTS should equal 63, 64, 71, or 79 for that vehicle.
(A612)	PERSON TYPE equals 04, and VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST equals _____,	at least one SEQUENCE OF EVENTS must equal 10 or 49 for that vehicle number in the CRASH EVENTS table.
(A619)	the total count of persons with PERSON TYPE equal to 05 that have the same VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is _____,	the number of events equal to 08 for that vehicle in the CRASH EVENTS table should equal _____.
(A61A)	the total count of PERSON TYPES is equal to 08 for the vehicle in VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is _____,	the number of events equal to 15 in the CRASH EVENTS table should equal _____ for that vehicle.
(A61B)	the total count of PERSON TYPES is equal to 10 for the vehicle in VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is _____,	the number of events equal to 08 in the CRASH EVENTS table should equal _____ for that vehicle.

Vehicle Number (Other Vehicle)

FORMAT: (Completed in MDE)

SAS NAME: Cevent.VNUMBER2; Vevent.VNUMBER2

ELEMENT VALUES:

Codes	Attributes
001-999	Actual Number

Remarks: This identifies the vehicle number of the vehicle contacted by the motor vehicle in-transport recorded in “Vehicle Number (This Vehicle).” This field is applicable only when the event is a collision between two motor vehicles (i.e., Sequence of Events codes 12, 54, 55, 14, or 45). If the event is **not** a collision between two motor vehicles, then Vehicle Number (Other Vehicle) is not applicable and left blank.

Areas of Impact (Other Vehicle)

FORMAT: (Completed in MDE)

SAS NAME: Cevent.AOI2; Vevent.AOI2

ELEMENT VALUES:

Codes	Attributes
00	Non-Collision
01-12	Clock Points
13	Top
14	Undercarriage
61	Left
62	Left-Front Side
63	Left-Back Side
81	Right
82	Right-Front Side
83	Right-Back Side
18	Cargo/Vehicle Parts Set-In-Motion
19	Other Objects Set-In-Motion
20	Object Set in Motion, Unknown if Cargo/Vehicle Parts or Other
98	Not Reported
99	Reported as Unknown

Remarks: Identifies the contact point (if applicable) for the vehicle coded in Vehicle Number (This Vehicle) associated with this event. If the event is a Collision event, code the value that identifies the impact area or indicates this vehicle set an object in motion. If the event is a Non-Collision event, use the attribute [00 \(Non-Collision\)](#). If the event is a [Non-Harmful event](#), then skip entry of an Areas of Impact (This Vehicle) value for that event.

This field uses the same values as the Vehicle Level data element [Areas of Impact – Initial Contact Point](#). The Vehicle Level data element Areas of Impact - Initial Contact Point is derived from the Crash Events Table and will always be the first recorded areas of impact value for each vehicle in the table.

C19 - First Harmful Event

FORMAT: 2 numeric

SAS NAME: Accident.HARM_EV; Vehicle.HARM_EV; Person.HARM_EV; parkwork.PHARM_EV

ELEMENT VALUES:

Non-Collision Harmful Events:

Codes	Attributes
01	Rollover/Overtur
02	Fire/Explosion
03	Immersion or Partial Immersion
04	Gas Inhalation
51	Jackknife (harmful to this vehicle)
06	Injured in Vehicle (Non-Collision)
44	Pavement Surface Irregularity (Ruts, Potholes, Grates, etc.)
07	Other Non-Collision
16	Thrown or Falling Object
72	Cargo/Equipment Loss, Shift, or Damage (harmful)
05	Fell/Jumped from Vehicle

Collision with Motor Vehicle In-Transport:

Codes	Attributes
12	Motor Vehicle In-Transport
54	Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport
55	Motor Vehicle in Motion Outside the Trafficway

Collision with Object Not Fixed:

Codes	Attributes
08	Pedestrian
09	Pedalcyclist
10	Railway Vehicle
74	Road Vehicle on Rails
11	Live Animal
49	Ridden Animal or Animal Drawn Conveyance
18	Other Object (Not Fixed)
15	Non-Motorist on Personal Conveyance
14	Parked Motor Vehicle
45	Working Motor Vehicle
73	Object That Had Fallen from Motor Vehicle In-Transport
91	Unknown Object Not Fixed

Collision with Fixed Object:

Codes	Attributes
17	Boulder
19	Building
58	Ground
20	Impact Attenuator/Crash Cushion
50	Bridge Overhead Structure
21	Bridge Pier or Support
23	Bridge Rail (Includes Parapet)
24	Guardrail Face
52	Guardrail End
25	Concrete Traffic Barrier
57	Cable Barrier
26	Other Traffic Barrier
59	Traffic Sign Support
46	Traffic Signal Support
30	Utility Pole/Light Support
31	Other Post, Other Pole, or Other Supports
32	Culvert
33	Curb
34	Ditch

41	Shrubbery
42	Tree (Standing Only)
48	Snow Bank
53	Mail Box
43	Other Fixed Object
93	Unknown Fixed Object

Unknown

Codes	Attributes
99	Reported as Unknown

Definition: The First Harmful Event is defined as the first injury- or damage-producing event of the crash.

Remarks: on following page.

Non-Collision Harmful Events

Non-Collision events involving motorcycles and vehicles with a “load”:

Non-Collision events may occur before or after a collision event. They should not be coded as a separate event if they occur as part of a collision event.

Examples:

- A motorcycle strikes a deer, overturns and the rider becomes separated from the vehicle. Code the collision event, not the non-collision “Rollover/Overturn” and “Fell/Jumped from Vehicle” that occur as part of the collision event.
- One tractor/trailer rear-ends another tractor/trailer. The impact pushes the lead vehicle’s load into the back of the tractor cab with part falling onto the roadway. Code the collision event, not the non-collision “cargo-loss or shift” that occurred as part of the collision event.

01 (Rollover/Overturn) is used when a motor vehicle rotates (rollover) at least one quarter turn onto its side or end. For motorcycles, laying the motorcycle down on its side is sufficient to code **01 (Rollover/Overturn)** as a harmful event if damage or injury is produced, even though the data element **ROLLOVER** is not applicable to motorcycles.

If there is a **01 (Rollover/Overturn)** that begins in another location but involves a ditch or embankment in the case (e.g., “rolled through the ditch,” “rolled down the embankment,” “came to rest against the embankment”), then the rule applies where if there is no damage associated with an impact with the fixed object during the rollover, it is not included in the Crash Events. If there is indication that damage resulted from an impact with the fixed object, it is included in the Crash Events. This follows the same logic as striking a tree or another vehicle during an overturn.

Note: For medium/heavy trucks with attached trailers by fixed linkage, when either the power unit or the trailer rolls over, the entire vehicle will be considered a rollover.

02 (Fire/Explosion) is used for a vehicle fire or explosion that occurs during the crash sequence or as a result of the crash.

As it pertains to the occurrence of **02 (Fire/Explosion)**, the crash circumstances are not considered stabilized until the threat of damage to this vehicle, or injury consequences to this vehicle's occupants, has ceased. Therefore, the crash sequence is not considered stabilized until all occupants have exited the vehicle and the scene has been declared safe by police or other authority. Fires that occur at a later time to vehicles abandoned at the scene (e.g., in open fields, on hillsides, etc.) or to vehicles removed from the scene to another location (tow yard, curbside, etc.) are not considered part of the crash sequence.

03 (Immersion or Partial Immersion) is used when an in-transport motor vehicle enters a body of water and results in injury or damage. This code would also be used if the vehicle came to rest in water and the depth cannot be ascertained from case materials. **NOTE:** In immersion fatalities the injury to the person may be noted as “drowning.”

04 (Gas Inhalation) includes injury or death as a result of toxic fumes, such as carbon monoxide fumes leaking from a motor vehicle in-transport.

51 (Jackknife [harmful to this vehicle]) applies to a condition that occurs to an articulated vehicle, (any vehicle with a trailing unit(s) connected by a hitch; e.g., truck tractor or single-unit truck with one or more trailers, articulated bus, car pulling a boat on a trailer, etc.) while in motion. The condition reflects a loss of control of the vehicle by the driver in which the trailer(s) yaws from its normal straight-line path behind the power unit, striking the power unit, causing damage to the power unit or trailer. Jackknife should only be coded as a harmful event if there is clear indication of damage to the jackknifed vehicle or injury to its occupants caused by the jackknife.

06 (Injured in Vehicle [non-collision]) is used when an occupant is injured during an unstabilized situation without a collision, excluding cargo/equipment loss or shift. Examples: Driver slams on brake, causing an unrestrained passenger to be injured. Driver makes a sharp turn causing driver to strike head on side window, knocking driver unconscious.

44 (Pavement Surface Irregularity [ruts, potholes, grates, etc.]) is used when the pavement surface irregularity is on a paved surface. Other examples include indication of contact with a dip, depression, low spot, trough, etc.) If the impact is with a surface irregularity (e.g., ruts, potholes) not on a paved surface use the [58 \(Ground\)](#). For a vehicle that “bottoms out” on the paved surface (causing damage) due to speed but not because of a pavement surface irregularity, use attribute **07 (Other Non-Collision)**.

07 (Other Non-Collision). Non-collision not captured in the listed non-collision attributes.

Examples:

- Damage to the vehicle produced by its own dislodged vehicle parts (including hood flying up and contacting the windshield).
- A vehicle “bottoms out” on the roadway (causing damage) due to speed but not because of a pavement surface irregularity. For impacts on the roadway due to pavement surface irregularities should be coded **44 (Pavement Surface Irregularity [ruts, potholes, grates, etc.])**.

16 (Thrown or Falling Object) is used when any object (1) is thrown (intentionally or unintentionally) and strikes an in-transport vehicle, or (2) falls onto, into, or in the path of an in-transport motor vehicle. If a tree limb falls from a tree and is contacted by a car, enter **16 (Thrown or Falling Object)**. If a person maliciously throws an object off an overpass into traffic below, enter **16 (Thrown or Falling Object)**. This excludes contacts made by loads or objects set in-motion by a motor vehicle (see [54 \(Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport\)](#)).

72 (Cargo/Equipment Loss, Shift, or Damage [harmful]) refers specifically to the loss or shift of items carried on or in a motor vehicle or its trailing unit, *causing damage and/or injury* to the vehicle, *its occupants*, its parts, trailing unit, *or the cargo* itself. *Harm can be measured in loss of monetary value from unrecoverable cargo loss as well as physical damage.* This attribute should never be used to refer to a “collision” event (see [54 \(Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport\)](#)).

Examples:

- A pickup truck brakes rapidly to avoid a collision. This causes a piece of lumber in the pickup bed to smash through the rear window.
- *Unsecured cargo shifts inside a box truck and bursts through the wall of the trailer.*
- *Pallets of beehives on a flatbed truck fall off the truck on a sharp curve causing the hives to open and the bees to fly away.*
- *A tanker truck overturns ([01 Rollover/Overturn](#)) followed by the loss of 5000 gallons of milk (72 Cargo/Equipment Loss, Shift, or Damage [harmful]).*

Notes:

In situations when a cargo shift is part of a collision event, the cargo shift is not coded separately. See [Non-Collision events involving motorcycles and vehicles with a "load."](#)

- Unsecured cargo shifts inside a box truck causing a loss of control. The driver overcorrects, driving off the road. This would be a [60 \(Cargo/Equipment Loss or Shift \[non-harmful\]\)](#) in the Sequence of Events.
- Use [07 \(Other Non-Collision\)](#) in a situation where a motor vehicle in transport is towing another unit (e.g., motor vehicle, trailer, etc.) and the second unit collides into the back of the power unit (not a Jackknife or part of a collision event).

05 (Fell/Jumped from Vehicle) is used when an occupant of this vehicle falls or jumps (not suicide) from the vehicle causing injury. For example, an occupant of a motor vehicle in-transport leans against the car door, it opens and the occupant falls out; or a person riding on a vehicle's exterior (hood, roof, running board, etc.) falls or jumps, and is injured by the fall. If an occupant falls or jumps from a vehicle and is struck by that vehicle, use this attribute.

Collision with a Motor Vehicle In-Transport

12 (Motor Vehicle In-Transport) is used when the injury- or damage-producing event is two motor vehicles in-transport making contact within the trafficway boundaries. In-transport means that the motor vehicle is in-motion or on the roadway portion of a trafficway.

54 (Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport) is used when the injury- or damage-producing event is two motor vehicles in-transport making contact by something set-in-motion by one or both of the vehicles.

In crashes involving harmful events caused by objects set-in-motion by a Motor Vehicle in-transport, remember that a vehicle's load is considered part of the vehicle.

Examples:

- If cargo falls from a truck (in-transport) and strikes another motor vehicle in-transport, this is treated as a two-vehicle crash. Therefore, the proper code for both vehicles is **54 (Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in- Motion from/by Another Motor Vehicle In-Transport)** and the [Area Of Impact \(This Vehicle\)](#) column is coded [18 \(Cargo/Vehicle Parts Set-In-Motion\)](#).
- If an in-transport vehicle strikes an at-rest object in the roadway that was previously cargo or part of another motor vehicle in-transport, the SEQUENCE OF EVENTS for that event is [73 \(Object That Had Fallen from Motor Vehicle In-Transport\)](#). If that object is then propelled into another motor vehicle in-transport, the proper SEQUENCE OF EVENTS attribute for this next event is **54 (Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport)** and the [Area Of Impact \(This Vehicle\)](#) column is coded [19 \(Other Objects Set-In-Motion\)](#).
- If an in-transport vehicle strikes an at-rest object in the roadway that was not cargo or part of another motor vehicle in-transport, the SEQUENCE OF EVENTS for that event is [18 \(Other Object \[Not Fixed\]\)](#). If that object is then propelled into another motor vehicle in-transport, the proper SEQUENCE OF EVENTS code for this next event is **54 (Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport)** and the [Area Of Impact \(This Vehicle\)](#) column is coded [19 \(Other Objects Set-In-Motion\)](#).

This attribute does not apply when the cargo, persons, or objects set-in-motion by an in-transport motor vehicle strikes something other than another in-transport motor vehicle. In this case, use the applicable “collision with non-fixed object,” or “collision with fixed object” code for the thing struck by the cargo, person, or object set-in-motion.

Examples:

- If cargo falls from a truck (in-transport) and strikes another vehicle that is not in-transport, the proper SEQUENCE OF EVENTS attribute is [14 \(Parked Motor Vehicle\)](#) or [45 \(Working Motor Vehicle\)](#) depending on which type of not in-transport vehicle was contacted by the load and the [Area Of Impact \(This Vehicle\)](#) column is coded [18 \(Cargo/Vehicle Parts Set-In-Motion\)](#).
- If cargo falls from a truck (in-transport) and strikes a pedestrian, the proper SEQUENCE OF EVENT attribute would be [08 \(Pedestrian\)](#) and the [Area Of Impact \(This Vehicle\)](#) column is coded [18 \(Cargo/Vehicle Parts Set-In-Motion\)](#).
- If a pedestrian is struck by an at-rest object propelled by an in-transport vehicle (e.g., parked motor vehicle, stop sign, etc.), the proper SEQUENCE OF EVENTS attribute for this harmful event is [08 \(Pedestrian\)](#) and the [Area Of Impact \(This Vehicle\)](#) column is coded [19 \(Other Objects Set-In-Motion\)](#).

55 (Motor Vehicle in Motion Outside the Trafficway) is used when the injury- or damage-producing event is two motor vehicles in-transport making contact outside the trafficway boundaries in a motor vehicle traffic crash.

Example:

A vehicle loses control attempting to turn into a gas station and strikes another vehicle pulling away from the pump in the station lot.

Collision with Object Not Fixed

08 (Pedestrian) is used for all those not on a personal conveyance. A person pushing a vehicle should be coded **08 (Pedestrian)**. A person being carried by another person should also be considered a **08 (Pedestrian)**.

09 (Pedalcyclist) is used for any person on a non-motorized other road vehicle propelled by pedaling. Examples include a bicycle, tricycle, unicycle, or pedal car.

If a non-motorist is hit as a result of a vehicle-to-vehicle collision and you cannot reasonably determine which vehicle struck the non-motorist, use the lowest vehicle number of the MVIT(s) involved in the vehicle-to-vehicle event that resulted in the pedestrian or pedalcyclist collision. In the element [NM25 RELATED FACTORS – PERSON \(NOT A MOTOR VEHICLE OCCUPANT\) LEVEL](#) code [31 Default Code Used for Vehicle Numbering](#).

10 (Railway Vehicle) is any land vehicle that is (1) designed primarily for, or in use for, moving persons or property from one place to another on rails and (2) not in use on a land way other than a railway.

- Inclusions: Railway Trains, Street car/trolley on private way.
- Exclusions: Street car/trolley operating on trafficway.

74 (Road Vehicle on Rails) is any land vehicle on rails operating in a trafficway.

- Inclusions: Street car/trolley operating on trafficway.
- Exclusions: Railway Trains, Street car/trolley on private way, Street car/trolley or electric bus operating on tires.

11 (Live Animal) is used for collisions with live animals (domesticated or wild) that are not themselves being used as transportation or to draw a wagon, cart, or other transport device (see [ANSI D16.1](#)). Default to **11 (Live Animal)** if it cannot be determined if the struck animal is alive, dead, or if it was being ridden or drawing a transport device.

49 (Ridden Animal or Animal-Drawn Conveyance) is used for ridden animals and animals drawing transport devices. See **18 (Other Object [Not Fixed])** for an animal carcass.

18 (Other Object [Not Fixed]) is used when a motor vehicle in-transport strikes a non-fixed object that is known NOT to have been the cargo or part of another motor vehicle in-transport or when it is UNKNOWN whether the object was the cargo or part of another motor vehicle in-transport (i.e., refers to objects such as a dead body, animal carcass, construction cones or barrels, an unattached trailer, a bicycle without a rider, downed tree limbs or power lines, or debris from a prior crash). For objects that have become separated from a motor vehicle in-transport not as a result of a prior crash, use attribute [73 \(Object That Had Fallen from Motor Vehicle In-Transport\)](#).

15 (Non-Motorist on Personal Conveyance) is used for pedestrians using personal conveyances. A personal conveyance is a device, other than a transport device, used by a pedestrian for personal mobility assistance or recreation. These devices can be motorized or human powered, but not propelled by pedaling.

Inclusions:

1. Rideable toys
 - a. Roller Skates, in-line skates
 - b. Skateboards
 - c. Skates
 - d. Baby carriage
 - e. Scooters
 - f. Toy Wagons
2. Motorized rideable toys
 - a. Motorized skateboard
 - b. Motorized toy car
3. Devices for personal mobility assistance
 - a. Segway-style devices
 - b. Motorized and non-motorized wheelchair
 - c. Handicapped scooters

Exclusions:

1. Golf cart
2. Low Speed Vehicles (LSVs)
3. Go-carts
4. Minibike
5. "Pocket" motorcycles
6. Motor scooters
7. Moped

14 (Parked Motor Vehicle) is used when the impact occurred between a motor vehicle in-transport and a motor vehicle neither on a roadway nor in motion. A vehicle stopped off the roadway, its door open over a roadway, is not in-transport.

45 (Working Motor Vehicle) is used to indicate the motor vehicle contacted was in the act of performing construction, maintenance, or utility work related to the trafficway when it became an involved unit. This "work" may be located within open or closed portions of the trafficway and motor vehicles performing these activities can be within or outside the trafficway boundaries. This code does not include private construction/maintenance vehicles, or vehicles such as garbage trucks, delivery trucks, taxis, emergency vehicles, tow trucks, etc.

Examples:

1. Asphalt/steam roller working in a highway construction zone paving the roadway or flattening dirt.
2. State highway maintenance crew painting lane lines on the road, mowing grass on the roadside or median, repairing potholes, removing debris from the roadway, etc.
3. Utility truck or a "cherry picker," performing maintenance on power lines along the roadway or maintaining a traffic signal.
4. A private excavating company contracted by the State digging the foundation for a new overpass.
5. A State, county, or privately owned snow plow, plowing ice/snow as part of a highway maintenance activity.
6. Street sweeper sweeping the street.
7. A vehicle in a mobile work convoy displaying arrow boards or other signaling devices warning motorists of the work activity.
8. A law enforcement vehicle that is participating strictly in a stationary construction or mobile maintenance activity as a traffic slowing, control, signaling, or calming influence.

NOTE: Code "45" excludes working activities other than highway construction, maintenance, or utility vehicles (garbage truck picking up trash, mail/delivery trucks while making deliveries, personal vehicles plowing snow, etc. These are considered motor vehicles in-transport). Use Related Factors-Vehicle Level [42 \(Other Working Vehicle \[Not Construction, Maintenance, Utility, Police, Fire, or EMS Vehicle\]\)](#) to identify these vehicles.

A question may arise when a police, fire, or emergency medical vehicle is struck on the roadway while at the scene of a crash, at a traffic stop, or as traffic control. The question becomes, "has its function changed from being a motor vehicle in-transport to a working vehicle?" The answer is "no." Treat these situations as a motor vehicle in-transport striking another motor vehicle in-transport. Use Related Factors-Vehicle Level [41 \(Police, Fire, or EMS Vehicle Working at the Scene of an Emergency or Performing Other Traffic Control Activities\)](#) to identify that this vehicle was struck while performing these work activities.

73 (Object That Had Fallen from Motor Vehicle In-Transport) is used when a motor vehicle in-transport strikes a non-fixed object at rest that is known to have been the cargo or part of another motor vehicle in-transport. Do not use this attribute for debris from a prior crash. This attribute does not include vehicle occupants that are ejected or fall from a motor vehicle in-transport. (Example: Motorcycle operator falling from a motorcycle.) For people falling from a motor vehicle see non-collision event [05 \(Fell/Jumped From Vehicle\)](#). For impacts involving two motor vehicles in transport resulting from cargo, persons, or objects set in motion see [54 \(Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by another Motor Vehicle In-Transport\)](#).

For example, if cargo that fell from a vehicle and was at rest in the roadway is struck, this attribute would apply. If the cargo was at rest in the roadway as a result of a prior accident, use attribute [18 \(Other Object \[Not Fixed\]\)](#).

91 (Unknown Object Not Fixed) is used when the event involves an object that is known to be not fixed but the case materials do not identify the specific object.

Collision with Fixed Object

The attributes [58 \(Ground\)](#), [33 \(Curb\)](#), [34 \(Ditch\)](#), and [35 \(Embankment\)](#) are grouped under the Collision with Fixed Object subset because they are intended to be harmful events in the crash (i.e. – they are associated with an impact that produces injury or damage).

When coding these events there must be fields on the police crash report or verbiage in the narrative such as “struck,” “hit,” “impacted,” etc. that identify these as harmful.

For cases where the indication of the harmful event came from the narrative, there may not be a corresponding indication of damage in any police crash report field. In these instances, code the harmful event as stated in the narrative and include the corresponding attribute under Areas of Impact.

If there is no indication of damage from contact with the fixed object in fields on the police crash report and the narrative language does not identify it as a harmful event (e.g., “came to rest on the embankment,” “drove through” or “drove across” the ditch and/or the embankment, or “drove over” the curb) do not code [33 \(Curb\)](#), [34 \(Ditch\)](#), or [35 \(Embankment\)](#) in the Sequence of Events.

17 (Boulder) is a rock of sufficient mass that when struck by a motor vehicle moves very little and remains basically intact. It may be considered as a fixed object.

19 (Building) is used when the vehicle strikes a roofed and walled structure built for permanent use. The type of construction material used is not of interest, nor is the use of the building.

58 (Ground) is used when the impact is with an earthen or paved surface off of the roadway. **58 (Ground)** is not to be entered when the harmful event is [01 \(Rollover/Overtake\)](#).

Indication of furrowing, gouging, or digging in of the tires/wheels is not sufficient to code the collision event **58 (Ground)**. For example, if the police crash report narrative states; “the trucks tires dug into the turf causing the vehicle to roll over,” the harmful event should be [01 \(Rollover/Overtake\)](#).

20 (Impact Attenuator/Crash Cushion) is a device for controlling the absorption of energy released during vehicle collision (crash cushion). Its most common application involves the protection of fixed roadside objects such as bridge piers, elevated gores at exit ramps, etc. Examples include barrels filled with water or sand, and plastic collapsible structures.

50 (Bridge Overhead Structure) is used when striking the bottom of a bridge while traveling on a trafficway underneath it. See [Figure 19](#) for a diagram of Bridge Components.

21 (Bridge Pier or Support) is a square or round column of stone, concrete, brick, steel, or wood for supporting a bridge between abutments. This attribute includes the bridge abutments that are supporting the ends of a bridge. Abutments are generally designed for retaining or supporting the embankment under bridge ends and composed of stone, concrete, brick, or wood (includes the wing-walls). See [Figure 19](#) for a diagram of Bridge Components.

23 (Bridge Rail [Includes Parapet]) is a wooden, brick, stone, concrete, or metal fence-like structure that runs along the outer most edge of the roadway or sidewalk on the bridge or a rail constructed along the top of a parapet. Balustrade is often used synonymously with parapet. See [Figure 19](#) for a diagram of Bridge Components.

- Bridges do not need to support another roadway. It may be an overpass for a train or even for a viaduct (water conduit).

24 (Guardrail Face) is a low barrier that has the primary longitudinal structure composed of metal (plates, mesh, box beam, etc.). A guardrail is differentiated from **25 (Concrete Traffic Barrier)** by the material making up the greatest part of the longitudinal portion of the structure. In the case of guardrails, this is metal whereas in concrete barriers this is concrete (including concrete rails). If the crash report does not differentiate between guardrail face and end, default to guardrail face.

Guardrails that serve as bridge rails should be coded as **23 (Bridge Rails [includes Parapet])**.

52 (Guardrail End) is used if a vehicle strikes the end of a guardrail. Guardrails can have a separate flat or rounded piece of metal attached to the end of an expanse of guardrail face.

25 (Concrete Traffic Barrier) refers to the longitudinal traffic barriers constructed of concrete. This includes all temporary concrete barriers regardless of location (i.e., temporary Jersey Barrier on a bridge being used to control traffic during bridge repair/construction). Concrete walls (vertical side surfaces) do not apply here; see **39 (Wall)**.

57 (Cable Barrier) refers to a flexible barrier system that uses several cables typically supported by steel posts. These barriers are designed to help lessen impact or keep vehicles within the confines of the road.

26 (Other Traffic Barrier) is used for all other longitudinal barriers such as wood or rock.

59 (Traffic Sign Support) is used when the post supporting a traffic sign, or the sign itself, is hit by a motor vehicle in-transport. This includes mile marker posts and signs above the trafficway.

46 (Traffic Signal Support) is used when the post supporting a traffic signal, or the signal itself, is hit by a motor vehicle in-transport.

30 (Utility Pole/Light Support) refers to supports for highway lighting systems, not including other private lighting systems (e.g., parking lot lights). **30 (Utility Pole/Light Support)** is used for electrical, telephone, cable & other utility pole-type supports.

31 (Other Post, Other Pole, or Other Supports) is used for posts other than highway signs, utility poles, or light supports. (e.g., reflectors on poles alongside of roadway, parking meters, flag poles, etc.). For mail box posts, use **53 (Mail Box)**. For fence posts, use **38 (Fence)**.

32 (Culvert) is a man-made drain or channel crossing under a road, sidewalk, etc.

33 (Curb) is a concrete or asphalt structure that borders the paved surface. It provides drainage control and pavement edge delineation. The face of the curb may be sloped or vertical. Ensure that the case materials provide some indication that damage has occurred when a vehicle strikes a curb. This attribute includes collisions with curbing that forms raised islands, medians, or separators. For example, if the report identifies the vehicle struck/collided with a traffic island, channelizing island, raised median, or separator use **33 (Curb)** not **43 (Other Fixed Object)**.

34 (Ditch) includes any man-made structure for drainage purposes. A ditch ends where a culvert begins and resumes on the opposite side of the culvert. Reference to a "ditchbank," "embankment of the ditch," or "ditch embankment" should be coded under **34 (Ditch)**.

35 (Embankment) is a raised structure to hold back water, to carry a roadway, or the result of excavation or washout (including erosion) that may be faced with earth (or rock, stone, or concrete). A **35 (Embankment)** can usually be differentiated from a [39 \(Wall\)](#) by its incline, whereas a wall is usually vertical. However, there are exceptions to this; such as a retaining wall that may be inclined or a vertical embankment that is caused by a natural event such as a washout.

In crashes involving a field approach or driveway crossing, use attribute **35 (Embankment)** when no specific components (e.g., culverts or ditches) are identified.

38 (Fence) includes the fence posts. A Fence can be made of wood, chain link, stone, etc.

39 (Wall) is a primarily vertical structure composed of concrete, metal, timber, or stone that is not part of a building or a fence but typically is used for retaining earth, abating noise, and separating areas (but not for containment as in the primary function of a fence). Also included as **39 (Wall)** is headwalls (or endwalls) that are sometimes provided on culvert ends principally to protect the sides of the embankment around the culvert opening against erosion. This does not include wing-walls, which are attached to ends of bridge abutments and extend back at an angle from the roadway. Wingwalls should be coded as [21 \(Bridge Pier or Support\)](#).

40 (Fire Hydrant) refers to the roadside device used by fire departments to provide water for fighting fires. Usually made of steel, these devices are also referred to as fire plugs or fire stand pipes in some areas.

41 (Shrubbery) refers to vegetation that is usually of a woody multi-stemmed variety and in most instances is low growing rather than tall. May also be called bushes. Some common examples are boxwood, hawthorn, and mountain laurel.

42 (Tree [Standing Only]) is used when a vehicle strikes a standing tree. This includes impacts from overhanging branches, tree stumps, or large cactus (Saguaro). If a vehicle strikes a fallen tree, use [18 \(Other Object \[Not Fixed\]\)](#). If a tree falls on a vehicle as it is passing by, use [16 \(Thrown or Falling Object\)](#).

48 (Snow Bank) is used when snowfall and/or road plowing creates essentially fixed barriers of snow/ice that are not snow-covered earth or rock embankments.

53 (Mail Box) refers to a private residence mail/newspaper box including the post. A cluster of private mailboxes is included in this attribute. This element does not include U.S. Mailbox, which are typically blue and are for general public use. Code a U.S. Mailbox as [43 \(Other Fixed Object\)](#).

43 (Other Fixed Object) is used when the object is fixed (considered a permanent structure) and is not described by any of the other fixed object attributes. This attribute excludes collisions with curbing that forms raised islands, medians, or separators (See also [33 \(Curb\)](#).)

Examples:

- Bus shelters
- Pedestrian walkways
- Toll booths
- Guy wires supporting utility poles
- U. S. Mailbox for public use

Other examples would include property damage to standing crops, yards, and other vegetation (excluding: [41 \(Shrubbery\)](#), [42 \(Tree \[Standing Only\]\)](#), and [58 \(Ground\)](#)) if noted on the crash report.

When the case materials identify a non-specific object impact, apply the following guidelines. If the case materials only identify the harmful event as:

- “Fixed Object,” then use 43 (Other Fixed Object)
- “Sign,” then use [59 \(Traffic Sign Support\)](#)
- “Post,” then use [31 \(Other Post, Other Pole, or Other Supports\)](#)
- “Sign Post,” then use [59 \(Traffic Sign Support\)](#)
- “Bridge,” then use [23 \(Bridge Rail \[Includes Parapet\]\)](#) when the vehicle is on top of the bridge, when the vehicle is going under the bridge, then use [21 \(Bridge Pier or Support\)](#)
- “Barrier,” then use [26 \(Other Traffic Barrier\)](#)

93 (Unknown Fixed Object) is used when the event involves an object that is known to be fixed but the case materials do not identify the specific object.

Unknown

99 (Reported as Unknown) is used when police indicate unknown.

Consistency Checks:

Check	IF	THEN
(42CP)	there are two vehicles involved in the FIRST HARMFUL EVENT,	those two vehicles' CRASH TYPES must belong to the same CRASH TYPE Configuration.
(440F)	FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 01,	there must be at least one Person Level (Not a MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 01-03, 09-11, 13, 16, 23, 98, or 99.
(450F)	FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 07,	there must be at least one Person Level (Not a MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 14.
(460F)	FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 02,	there must be at least one Person Level (Not a MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 02, 20.
(470F)	FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 03, 08, 10, 12 ,	there must be at least one Person Level (Not a MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 20, 22, 28, 98, 99.
(480F)	FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 04, 06,	there must be at least one Person Level (Not a MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 09, 16, 20, 21, 24, 25, 28, 98, 99.
(490F)	FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 05,	there must be at least one Person Level (Not a MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 24, 25.
(500F)	FIRST HARMFUL EVENT equals 01-11, 14-21, 23-26, 30-35, 44-53, 57-59, 72, 73,	MANNER OF COLLISION must not equal 01, 02, 06-11, 98, 99.
(510F)	FIRST HARMFUL EVENT equals 12, 54, 55,	MANNER OF COLLISION must not equal 00.
(520F)	FIRST HARMFUL EVENT equals 10,	TRAFFIC CONTROL DEVICE must not equal 01-04, 07-09, 20-50, 98 for the vehicle involved in the first harmful event.

Check	IF	THEN
(530F)	FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 99,	there must be at least one Person Level (Not a MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 09, 98, 99.
(531F)	FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 11,	there must be at least one Person Level (Not a MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 11.
(540F)	FIRST HARMFUL EVENT equals 02,	the vehicle involved in the FIRST HARMFUL EVENT must have FIRE OCCURRENCE equal to 1.
(550F)	FIRST HARMFUL EVENT equals 08,	at least one person must have PERSON TYPE equal 05, 10.
(560F)	FIRST HARMFUL EVENT equals 09,	at least one person must have PERSON TYPE equal to 06, 07.
(570F)	FIRST HARMFUL EVENT equals 05, 06,	at least one PERSON TYPE equal to 01-03, 09 must have INJURY SEVERITY equal to 1-5 or blank.
(580F)	FIRST HARMFUL EVENT equals 14, and RELATED FACTORS - PERSON (MV OCCUPANT) LEVEL does not equal 32, 89 for at least one occupant in the not in-transport motor vehicle involved in the FIRST HARMFUL EVENT,	RELATION TO TRAFFICWAY should not equal 01.
(590F)	FIRST HARMFUL EVENT equals 15,	at least one Person Level form must have a PERSON TYPE code of 08.
(5Y0F)	FIRST HARMFUL EVENT equals 08, 09, 15,	NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES must not equal 00.
(670F)	FIRST HARMFUL EVENT equals 12, 14, 45, 54, 55,	NUMBER OF VEHICLE FORMS SUBMITTED must be greater than 001.
(9COP)	FIRST HARMFUL EVENT equals 55,	there must be at least one vehicle with UNIT TYPE equal to 1.
(A041)	CRASH MONTH equals 05-09,	SEQUENCE OF EVENTS, FIRST HARMFUL EVENT, MOST HARMFUL EVENT should not equal 48.
(A080)	DRIVER PRESENCE equals 0, and FIRST HARMFUL EVENT equals 12, and NUMBER OF VEHICLE FORMS SUBMITTED equals 002,	one RELATED FACTORS-DRIVER LEVEL should equal 20.
(A100)	FIRST HARMFUL EVENT is not equal to 02, 04, 05, 10, 16,	there should be one vehicle with TRAVEL SPEED of 001-151, 997-999, or blanks.
(A370)	FIRST HARMFUL EVENT equals 99,	MANNER OF COLLISION should not equal 00, 01-11.
(A380)	FIRST HARMFUL EVENT equals 01 and this vehicle is involved in the FIRST HARMFUL EVENT, and BODY TYPE does not equal 80, 81, 83, 84, 88, 89, for this vehicle, and RELATION TO TRAFFICWAY equals _____,	LOCATION OF ROLLOVER should equal _____ respectively.
(A390)	FIRST HARMFUL EVENT equals 17, 19-21, 23-26, 30-35, 38-43, 52, 53, 57, 93,	RELATION TO TRAFFICWAY should not equal 01, 02, 07, 11.

Check	IF	THEN
(A3C0)	FIRST HARMFUL EVENT equals 02-07,16, 44, 51, 72,	CRASH TYPE must equal 00 for the vehicle involved in the FIRST HARMFUL EVENT.
(A3D0)	FIRST HARMFUL EVENT equals 01-07, 16, 44, 51, 72,	CRASH TYPE must not equal 20-91.
(A3E0)	CRASH TYPE equals 13,	FIRST HARMFUL EVENT must equal 08, 09, 11, 15, or 49.
(A41A)	FIRST HARMFUL EVENT equals 02, 04, 07, 16, 44, or 54,	CRITICAL EVENT - PRECRASH (EVENT) should equal 98 for the vehicles involved in the FIRST HARMFUL EVENT.
(A420)	FIRST HARMFUL EVENT equals 10,	RELATION TO JUNCTION (b) should equal 06.
(A421)	FIRST HARMFUL EVENT equals 24, 25, 30, 33, 34, 35, 40, 46, 52, 57, 59,	RELATION TO TRAFFICWAY should equal 03, 04, 08, 10, or 12 .
(A480)	CRASH TYPE equals 00,	FIRST HARMFUL EVENT must equal 02-07, 16, 44, 51, 72.
(A4A0)	CRASH TYPE equals 01-16,	FIRST HARMFUL EVENT must not equal 12.
(A4BP)	FIRST HARMFUL EVENT equals 54 or 55,	CRASH TYPE must equal 98 for the vehicles involved in the FIRST HARMFUL EVENT.
(A4DP)	CRASH TYPE equals 20-91,	FIRST HARMFUL EVENT must equal 12.
(A4EP)	CRASH TYPE equals 11,	FIRST HARMFUL EVENT must equal 14.
(A60F)	FIRST HARMFUL EVENT equals 14,	CRASH TYPE should equal 01-11, 14, 15, 92, 98, 99.
(A61F)	FIRST HARMFUL EVENT equals 08, 09, 11, 15, 49, and RELATION TO TRAFFICWAY equals 01, 02, 07, 11, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) is not equal to 00, 13 for the vehicle involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 13 for the vehicle involved in the FIRST HARMFUL EVENT.
(A61G)	the FIRST HARMFUL EVENT equals 08, and PERSON TYPE equals 05, and NON-MOTORIST LOCATION AT THE TIME OF CRASH equals 21, 22, 24, 25, 28, and the VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is involved in the FIRST HARMFUL EVENT,	CRASH TYPE should not equal 13 for this vehicle.
(A61H)	the FIRST HARMFUL EVENT equals 09, and PERSON TYPE equals 06, 07, and NON-MOTORIST LOCATION AT THE TIME OF CRASH equals 21, 22, 24, 25, 28, and the VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is involved in the FIRST HARMFUL EVENT,	CRASH TYPE should not equal 13 for this vehicle.
(A61J)	the FIRST HARMFUL EVENT equals 15, and PERSON TYPE equals 08, and NON-MOTORIST LOCATION AT THE TIME OF CRASH equals 21, 22, 24, 25, 28, and the VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is involved in the FIRST HARMFUL EVENT,	CRASH TYPE should not equal 13 for this vehicle.

Check	IF	THEN
(A61K)	the FIRST HARMFUL EVENT equals 49, and PERSON TYPE equals 04, and NON-MOTORIST LOCATION AT THE TIME OF CRASH equals 21, 22, 24, 25, 28, and the VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is involved in the FIRST HARMFUL EVENT,	CRASH TYPE should not equal 13 for this vehicle.
(A62F)	FIRST HARMFUL EVENT equals 18, 43, 73, 91, or 93, and RELATION TO TRAFFICWAY equals 01 or 11,	CRASH TYPE should equal 12 or 15 for the vehicle involved in the FIRST HARMFUL EVENT.
(A63F)	FIRST HARMFUL EVENT equals 01,	CRASH TYPE should equal 01-10, 98, 99 for the vehicle involved in the FIRST HARMFUL EVENT.
(A65F)	FIRST HARMFUL EVENT equals 14, and RELATED FACTORS - PERSON (MV OCCUPANT) LEVEL equals 32 or 89 for an occupant of the parked vehicle involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 15, 92, or 98 for the in-transport vehicle involved in the FIRST HARMFUL EVENT.
(A66F)	FIRST HARMFUL EVENT equals 14, and CRASH TYPE equals 01-10 or 14,	RELATED FACTORS - PERSON (MV OCCUPANT) LEVEL must not equal 32 or 89 for any occupant of the parked vehicle involved in the FIRST HARMFUL EVENT.
(A770)	FIRST HARMFUL EVENT equals 46,	TRAFFIC CONTROL DEVICE should equal 01-04 for the vehicle involved in the FIRST HARMFUL EVENT.
(A780)	FIRST HARMFUL EVENT equals 46,	TRAFFIC CONTROL DEVICE should not equal 00 for the vehicle involved in the FIRST HARMFUL EVENT.
(A790)	FIRST HARMFUL EVENT equals 46,	RELATION TO JUNCTION (b) should not equal 01, 07.
(A800)	FIRST HARMFUL EVENT equals 46,	RELATION TO TRAFFICWAY should not equal 01, 02, 05, 07, 11.
(A801)	FIRST HARMFUL EVENT equals 12,	RELATION TO TRAFFICWAY must not equal 5.
(A830)	FIRST HARMFUL EVENT equals 46,	SPEED LIMIT should be less than 55 for the vehicle involved in the FIRST HARMFUL EVENT.
(AC1A)	FIRST HARMFUL EVENT equals 54,	MANNER OF COLLISION should equal 11.
(AM1P)	FIRST HARMFUL EVENT equals 54, or SEQUENCE OF EVENTS equals 54 for any vehicle,	one RELATED FACTORS-CRASH LEVEL must equal 14.
(AZ2P)	FIRST HARMFUL EVENT does not equal 02-07, 16, 44, 51, 72, and CRITICAL EVENT-PRECRASH (EVENT) equals 14, and ATTEMPTED AVOIDANCE MANEUVER equals 01,	CRASH TYPE must equal 14 for the vehicle involved in the FIRST HARMFUL EVENT.
(FA0F)	FIRST HARMFUL EVENT equals blank, case status is flawed.	--

Check	IF	THEN
(PB34)	NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES equals 01, and FIRST HARMFUL EVENT equals 08, and RELATION TO JUNCTION (b) equals 02,	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN must not equal 320, 330, 360, 680, 830, 890, 900, or 910.
(PB35)	NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES equals 01, and FIRST HARMFUL EVENT equals 08, and RELATION TO JUNCTION (b) equals 02,	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION - PEDESTRIAN must equal 1.
(U020)	UNLIKELY: FIRST HARMFUL EVENT equals 02, 04, 06, 51, 72.	--
(U030)	UNLIKELY: FIRST HARMFUL EVENT equals 12, 55, and MANNER OF COLLISION equals 10, 11.	--
(U640)	UNLIKELY: FIRST HARMFUL EVENT equals 99	--
(V79P)	ROLLOVER equals 2, and FIRST HARMFUL EVENT equals 01,	CRASH TYPE must equal 01-10, 14, 15, or 98 for the vehicle involved in the FIRST HARMFUL EVENT.

Consistency Check (CRSS Only):

Check	IF	THEN
(A3K0)	FIRST HARMFUL EVENT equals 10,	INTERSTATE HIGHWAY should not equal 1.

Consistency Check (FARS Only):

Check	IF	THEN
(A110)	FIRST HARMFUL EVENT equals 10,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 01-03.
(A350)	ROUTE SIGNING equals 1,	FIRST HARMFUL EVENT should not equal 10.
(A810)	FIRST HARMFUL EVENT equals 46, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) does not equal 02, 03, 05,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 01.
(A820)	FIRST HARMFUL EVENT equals 46, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) does not equal 02, 03, 05,	ROUTE SIGNING should not equal 1.
(V750)	UNDERRIDE/OVERRIDE equals 1-3,	FIRST HARMFUL EVENT or at least one SEQUENCE OF EVENTS (for this vehicle) should equal 12, 55.
(V760)	UNDERRIDE/OVERRIDE equals 4-6,	FIRST HARMFUL EVENT or at least one SEQUENCE OF EVENTS (for this vehicle) should equal 14, 45.

C20 - Manner of Collision

FORMAT: 2 numeric

SAS NAME: Accident.MAN_COLL; Vehicle.MAN_COLL; Person.MAN_COLL; parkwork.PMAN_COLL

ELEMENT VALUES:

Codes	Attributes
00	Not a Collision with a Motor Vehicle In-Transport
01	Front-to-Rear
02	Front-to-Front
06	Angle
07	Sideswipe-Same Direction
08	Sideswipe-Opposite Direction
09	Rear-to-Side
10	Rear-to-Rear
11	Other
98	Not Reported
99	Reported as Unknown

Definition: This element identifies the orientation of two motor vehicles in-transport when they are involved in the [First Harmful Event](#) of a collision crash. If the First Harmful Event is not a collision between two motor vehicles in-transport it is classified as such.

Remarks:

00 (Not a Collision with a Motor Vehicle In-Transport) is used when the [First Harmful Event](#) is not an impact between two in-transport motor vehicles.

01 (Front-to-Rear) is used when a collision occurs between the rear of one vehicle and the front of another vehicle. If this attribute is selected, the points of impact for the vehicles involved in the [First Harmful Event](#) must be front to back.

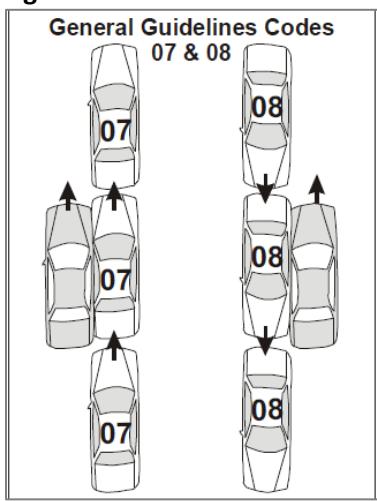

02 (Front-to-Front) is used when a collision occurs between the front end of one vehicle and the front end of another vehicle. If this attribute is selected, the points of impact for the vehicles involved in the [First Harmful Event](#) must both be front.

06 (Angle) is a crash where two motor vehicles impact at an angle. For example, the front of one motor vehicle strikes the side of another motor vehicle. If this attribute is selected, the points of impact for the vehicles involved in the [First Harmful Event](#) must not be front to front, front to back, back to back, or back to side.

07 (Sideswipe - Same Direction) is used when the case materials report that a sideswipe occurred while the two vehicles were traveling in the same direction. (See [Figure 2](#).)

Clarification for coding sideswipe attributes 07 and 08:

Sideswipe codes are used for both vehicles when the initial engagement has no significant involvement of the front or rear surface areas where the impact swipes along the side surfaces of the vehicles parallel to their direction of travel. If it is unclear if the collision was an angle or a sideswipe, then code it **06 (Angle)**. Endswipes and side-to-side angle impacts are coded as **11 (Other)**. (See [Figure 2](#).)

Figure 2: General Guidelines for Sideswipe Codes 07 & 08

08 (Sideswipe - Opposite Direction) is used when the case materials report that a sideswipe occurred while the two vehicles were traveling in opposite directions. (See [Figure 2](#).)

09 (Rear-To-Side) is used when a collision occurs between the rear of one vehicle and the side of another vehicle. If this attribute is selected, the points of impact for the vehicles involved in the [First Harmful Event](#) must back for one and side for the other.

10 (Rear-To-Rear) is used when a collision occurs between the rear of one vehicle and the rear of another vehicle. If this attribute is selected, the points of impact for the vehicles involved in the [First Harmful Event](#) must both be back.

11 (Other) should be used for any collision between two motor vehicles in-transport where the collision is not described by attributes "01-10," including set-in-motion situations.

Examples include:

- One vehicle “end” swipes (endswipe) another vehicle instead of their “sides” swiping.
- One vehicle slides into another vehicle at an angle such that they impact side-to-side.
- One vehicle is airborne and makes contact with its front or undercarriage to the other vehicle’s hood or top.
- Cargo or other load on one motor vehicle in-transport shifts and lands or is thrown into/onto another vehicle.
- The tire of one motor vehicle in-transport throws a stone through the windshield of another vehicle.
- A vehicle occupant or motorcyclist falls or is thrown from a vehicle striking or is struck by another vehicle.

If a police crash report data element is coded with the attribute “Other” but the officer does not specify what this refers to:

1. Code **11 (Other)** if the police crash report attribute choices can be matched to or include all the attributes in FARS/CRSS.
2. Code **98 (Not Reported)** if the police crash report choices cannot be matched to or include all the attributes in FARS/CRSS.

98 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered **“Not Reported.”**

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials)
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown) is used when police indicate unknown.

Consistency Checks:

Check	IF	THEN
(420P)	MANNER OF COLLISION equals 07, 08,	there must be at least two vehicle forms with AREAS OF IMPACT-INITIAL CONTACT POINT equal to 01-05, 07-11, 61-63, 81-83, 98, 99.
(421P)	MANNER OF COLLISION equals 01,	AREAS OF IMPACT-INITIAL CONTACT POINT for one vehicle in the first harmful event must equal 12, and AREAS OF IMPACT-INITIAL CONTACT POINT for the other vehicle in the first harmful event must equal 06.
(422P)	MANNER OF COLLISION equals 02,	AREAS OF IMPACT-INITIAL CONTACT POINT for one vehicle in the first harmful event must equal 12, and AREAS OF IMPACT-INITIAL CONTACT POINT for the other vehicle in the first harmful event must equal 12.
(423P)	MANNER OF COLLISION equals 06,	AREAS OF IMPACT-INITIAL CONTACT POINT for one vehicle in the first harmful event must equal 01, 11, 12, 98, 99, and AREAS OF IMPACT-INITIAL CONTACT POINT for the other vehicle in the first harmful event must equal 01-05, 07-11, 61-63, 81-83 98, 99.
(424P)	MANNER OF COLLISION equals 09,	AREAS OF IMPACT-INITIAL CONTACT POINT for one vehicle in the first harmful event should equal 06, and AREAS OF IMPACT-INITIAL CONTACT POINT for the other vehicle in the first harmful event should equal 01-05, 07-11, 61-63, 81-83, 98, 99.
(425P)	MANNER OF COLLISION equals 10,	AREAS OF IMPACT-INITIAL CONTACT POINT for one vehicle in the first harmful event should equal 06, and AREAS OF IMPACT-INITIAL CONTACT POINT for the other vehicle in the first harmful event should equal 06, 98, 99.
(426P)	MANNER OF COLLISION equals 02,	CRASH TYPE must not equal 64-67 for the vehicles involved in the FIRST HARMFUL EVENT.
(427P)	MANNER OF COLLISION equals 06,	CRASH TYPE must not equal 20-43 or 50-53 for the vehicles involved in the FIRST HARMFUL EVENT.

Check	IF	THEN
(500F)	FIRST HARMFUL EVENT equals 01-11, 14-21, 23-26, 30-35, 44-53, 57-59, 72, 73,	MANNER OF COLLISION must not equal 01, 02, 06-11, 98, 99.
(510F)	FIRST HARMFUL EVENT equals 12, 54, 55,	MANNER OF COLLISION must not equal 00.
(9BAP)	MANNER OF COLLISION equals 07, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 10 or 11 for neither one of the vehicles involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 44-49, 98, 99 for the vehicles involved in the FIRST HARMFUL EVENT.
(9BCP)	MANNER OF COLLISION equals 08, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 10 or 11 for neither one of the vehicles involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 64-67, 98, 99 for the vehicles involved in the FIRST HARMFUL EVENT.
(9BDP)	MANNER OF COLLISION equals 01,	CRASH TYPE should not equal 44-49 for the vehicles involved in the FIRST HARMFUL EVENT.
(A370)	FIRST HARMFUL EVENT equals 99,	MANNER OF COLLISION should not equal 00, 01-11.
(AC1A)	FIRST HARMFUL EVENT equals 54,	MANNER OF COLLISION should equal 11.
(BZ80)	MANNER OF COLLISION equals 00,	CRASH TYPE must equal 00, 01-16, 92, 98, 99 for the vehicle in the FIRST HARMFUL EVENT.
(U030)	UNLIKELY: FIRST HARMFUL EVENT equals 12, 55, and MANNER OF COLLISION equals 10, 11.	--

C21 - Relation to Junction

FORMAT: 1 numeric occurring 1 time, 2 numeric occurring 1 time

SAS NAME: Accident.RelJct1, Accident.RelJct2

ELEMENT VALUES:

C21a: Within Interchange Area?

Codes	Attributes
0	No
1	Yes
8	Not Reported
9	Reported as Unknown

C21b: Specific Location

Codes	Attributes
01	Non-Junction
02	Intersection
03	Intersection-Related
05	Entrance/Exit Ramp Related
20	Entrance/Exit Ramp
06	Railway Grade Crossing
07	Crossover-Related
04	Driveway Access
08	Driveway Access Related
16	Shared-Use Path Crossing
17	Acceleration/Deceleration Lane
18	Through Roadway
19	Other location within interchange area
98	Not Reported
99	Reported as Unknown

Definition: The coding of this data element is done in two subfields and based on the location of the first harmful event of the crash. It identifies the crash's location with respect to presence in an interchange area and the crash's location with respect to presence in or proximity to components typically in junction or interchange areas.

Remarks:

Subfield 1 (C21a): Within Interchange Area?

Interchange: An interchange is a system of interconnecting roadways in conjunction with one or more grade separations, providing for the movement of traffic between two or more roadways on different levels.

0 (No) is used if the first harmful event of the crash occurs outside of the boundaries of an interchange.

1 (Yes) is used if the location of the first harmful event of the crash is within an interchange area.

8 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **8 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

9 (Reported as Unknown) is used when police indicate unknown.

Subfield 2 (C21b): Specific Location

01 (Non-Junction) is used for crashes where the first harmful event occurs **outside** an interchange area and does not occur in or related to a junction, ramp, rail grade crossing, crossover, or shared-use path or trail. This attribute includes crashes that occur on a parking lot way (access road) at the connection of a parking aisle. (See [Figure 4](#).)

02 (Intersection) is used when the first harmful event occurs in an area that: (1) contains a crossing or connection of two or more roadways not classified as a driveway access, and (2) is embraced within the prolongation of the lateral curb lines or, if none, the lateral boundary lines of the roadways. Where the distance along a roadway between two areas meeting these criteria is less than 10 meters, the two areas and the roadway connecting them are considered to be parts of a single intersection.

FARS SPECIAL INSTRUCTION:

In an Intersection, within Interchange Area: if the first harmful event occurs within the intersection of a ramp and the surface roadway: It is important to always code [National Highway System](#) and [Land Use and Functional System](#) for the highest class of trafficway at this intersection.

03 (Intersection-Related) means that the first harmful event: (1) occurs on an approach to or exit from an intersection and (2) results from an activity, behavior, or control related to the movement of traffic units through the intersection.

Note:

- For crashes where the first harmful event occurs in a crosswalk at an intersection area, use **03 (Intersection-Related)**.
- For Traffic Circles and Roundabouts, enter [02 \(Intersection\)](#) when the first harmful event occurs within the area formed by the prolongation of curb or edge lines of the approach legs of the intersection, regardless of whether or not the collision was in any way related to an intersection. Use **03 (Intersection-Related)** if the first harmful event occurs in the central island or any directional island that serves the rotary intersection.

05 (Entrance/Exit Ramp Related) is used when the first harmful event occurs off the entrance/exit ramp roadway, but is related to the use of or entry onto the ramp. (See [Figure 3](#))

Note: If the first harmful event occurs in the intersection of a ramp, then use [02 \(Intersection\)](#). If the first harmful event occurs on the ramp outside of an intersection of the ramp and the surface roadway and is related to the movement of traffic through the intersection, then use [03 \(Intersection-Related\)](#).

20 (Entrance/Exit Ramp) is used when the first harmful event occurs **on** an entrance or exit ramp roadway and is not the result of an activity, behavior, or control related to the movement of traffic units through an intersection. This would include all the areas between the gore and entrance/exit ramp intersection. (See [Figure 3](#))

06 (Railway Grade Crossing) is used when the first harmful event occurred in the area formed by the at-grade connection of a railroad bed and a roadway. Crashes occurring outside a railway grade crossing due to traffic congestion associated with a railway grade crossing are considered non-junction.

07 (Crossover-Related) is used when the first harmful event occurs in a crossover or on approach to or exit from a crossover and related to the use of the crossover.

Note: A crossover is the area of the median of a divided trafficway where motor vehicles are permitted to cross the opposing lane or traffic or execute a U-turn.

04 (Driveway Access) is used when the first harmful event occurs:

1. on a driveway access ([See ANSI D16.1 Manual 2.5.9](#)) (See [Figure 5](#))
2. or involves a road vehicle entering or leaving by way of a driveway access where at least one traffic unit (vehicle, pedalcyclist, or pedestrian) is physically on the driveway access within the trafficway.

This attribute includes crashes occurring on sidewalks within the driveway access.

Examples:

- A car turning into a private residence driveway strikes a bicyclist riding on the sidewalk that crosses over the driveway access.
- A tractor trailer backing out of a business entrance onto the trafficway, while partially on the driveway access, is struck by a car on the roadway.

08 (Driveway Access Related) is used when the first harmful event:

1. occurs on the trafficway,
2. does not occur on a **04 (Driveway Access)**, but
3. results from an activity, behavior, or control related to the movement of traffic units onto or out of a driveway ([See ANSI D16.1 Manual 2.5.9.1](#)). (See [Figure 5](#))

Examples:

- A vehicle attempting to turn left into a driveway from the eastbound lanes is struck broadside by another vehicle traveling in the westbound lanes,
- A vehicle that has just entered the trafficway from a driveway is struck in the rear before it can gain speed.

Note: When a driveway access junction is within an intersection and the crash would meet the criteria of driveway access or driveway access related, enter **02 (Intersection)** if the first harmful event was within the boundaries of the intersection or **03 (Intersection-Related)** if it was not, but related to the intersection.

Note: If there is not sufficient detail available to differentiate between driveway access and driveway access related, but it is known that the vehicle was coming out of (or going into) a driveway, default to 08 (Driveway Access Related). (See [Figure 5](#).)

16 (Shared-Use Path Crossing) is used when the first harmful event occurs at the crossing of a roadway and a shared-use path (see Note below for the definition of a shared use path). At least one non-motorist has to be physically in the crossing of the roadway and the shared-use path and the crash has to be related to the use of it. If the crossing of a roadway and a shared-use path overlaps/coincides with a crosswalk in a non-intersection area (e.g., mid-block), then select **16 (Shared-Use Path Crossing)**.

Note: A shared-use path is a bikeway **physically separated** from motorized vehicular traffic by an open space or barrier and either within the highway right of way or an independent right of way. Shared-use paths will also be used by pedestrians, skaters, wheelchairs, joggers and other non-motorist users. A shared-use path is not a sidewalk and where a shared-use path crosses another land way is similar to, but not a crosswalk. A shared-use path crossing may overlap/coincide with a crosswalk.

17 (Acceleration/Deceleration Lane) is used when the first harmful event occurs on the roadway in an interchange area on an auxiliary or speed-change lane that allows vehicles to accelerate to highway speeds before entering the through roadway or decelerate to safe speeds to negotiate a ramp without interrupting traffic flow on the through roadway exited. (See [Figure 3](#))

18 (Through Roadway) (See [Figure 3](#)) is used when the first harmful event occurs on the roadway within an interchange area but **does not** occur:

- In an intersection or related to an intersection - [02 \(Intersection\)](#) or [03 \(Intersection - Related\)](#).
- On a [20 \(Entrance/Exit Ramp\)](#) or related to the use of the ramp - [05 \(Entrance/Exit Ramp Related\)](#)
- In a [17 \(Acceleration/Deceleration Lane\)](#)

19 (Other location within interchange area) is used when the first harmful event occurs within an Interchange, off of the roadway (e.g., median, shoulder, roadside) and is not related to the use of or the entry onto a ramp. (See [Figure 3](#))

Examples:

- A vehicle on the [18 \(Through Roadway\)](#) portion of the interchange departs the roadway and overturns in the median.
- A vehicle leaves the [18 \(Through Roadway\)](#) portion of the interchange and strikes a vehicle parked on the shoulder.

98 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown) is used when police indicate unknown.

Valid Combinations for Subfield 1 and Subfield 2

If Subfield TWO is coded:	Subfield ONE may only be coded as:
01 Non-Junction	0 No
02 Intersection	0 No, 1 Yes, 8 Not Reported, 9 <i>Reported as Unknown</i>
03 Intersection-Related	0 No, 1 Yes, 8 Not Reported, 9 <i>Reported as Unknown</i>
04 Driveway Access	0 No, 1 Yes, 8 Not Reported, 9 <i>Reported as Unknown</i>
05 Entrance/Exit Ramp Related	0 No, 1 Yes, 8 Not Reported, 9 <i>Reported as Unknown</i>
06 Railway Grade Crossing	0 No
07 Crossover Related	0 No, 1 Yes, 8 Not Reported, 9 <i>Reported as Unknown</i>
08 Driveway Access Related	0 No, 1 Yes, 8 Not Reported, 9 <i>Reported as Unknown</i>
16 Shared-Use Path or Trail	0 No, 1 Yes, 8 Not Reported, 9 <i>Reported as Unknown</i>
17 Acceleration/Deceleration Lane	1 Yes
18 Through Roadway	1 Yes
19 Other Location Within Interchange Area	1 Yes
20 Entrance/Exit Ramp	0 No, 1 Yes, 8 Not Reported, 9 <i>Reported as Unknown</i>
98 Not Reported	0 No, 1 Yes, 8 Not Reported, 9 <i>Reported as Unknown</i>
99 <i>Reported as Unknown</i>	0 No, 1 Yes, 8 Not Reported, 9 <i>Reported as Unknown</i>

[Figure 3](#) below will help identify Relation to Junction codes [05 \(Entrance/Exit Ramp Related\)](#), [17 \(Acceleration/Deceleration Lane\)](#), [18 \(Through Roadway\)](#), [19 \(Other Location Within Interchange Area\)](#), and [20 \(Entrance/Exit Ramp\)](#).

Figure 3: Interchange Area
(See ANSI D16.1 - 2007, 7th Edition)

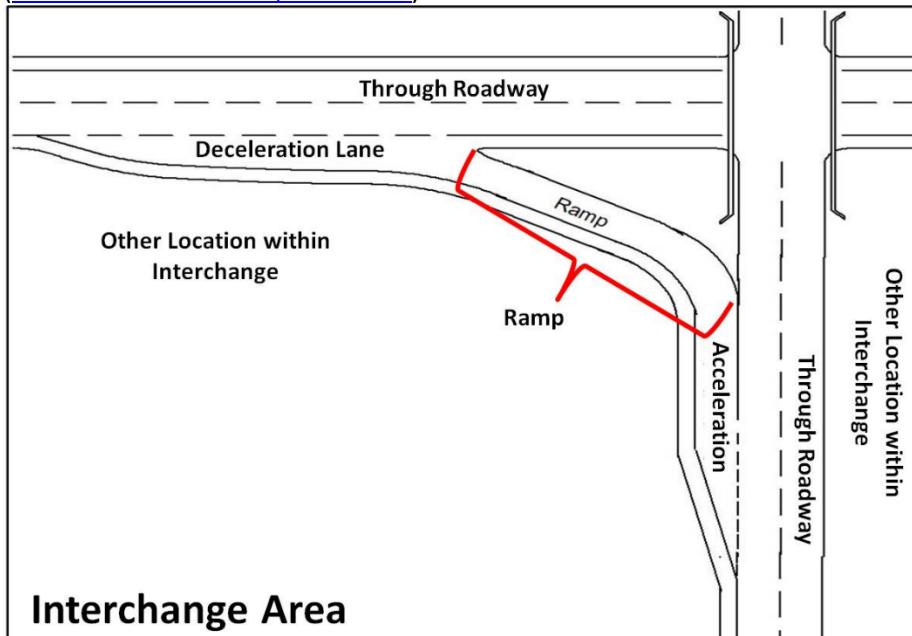

Figure 4: Example Parking Lot Area
(01 – Non-junction, 02 – Intersection)

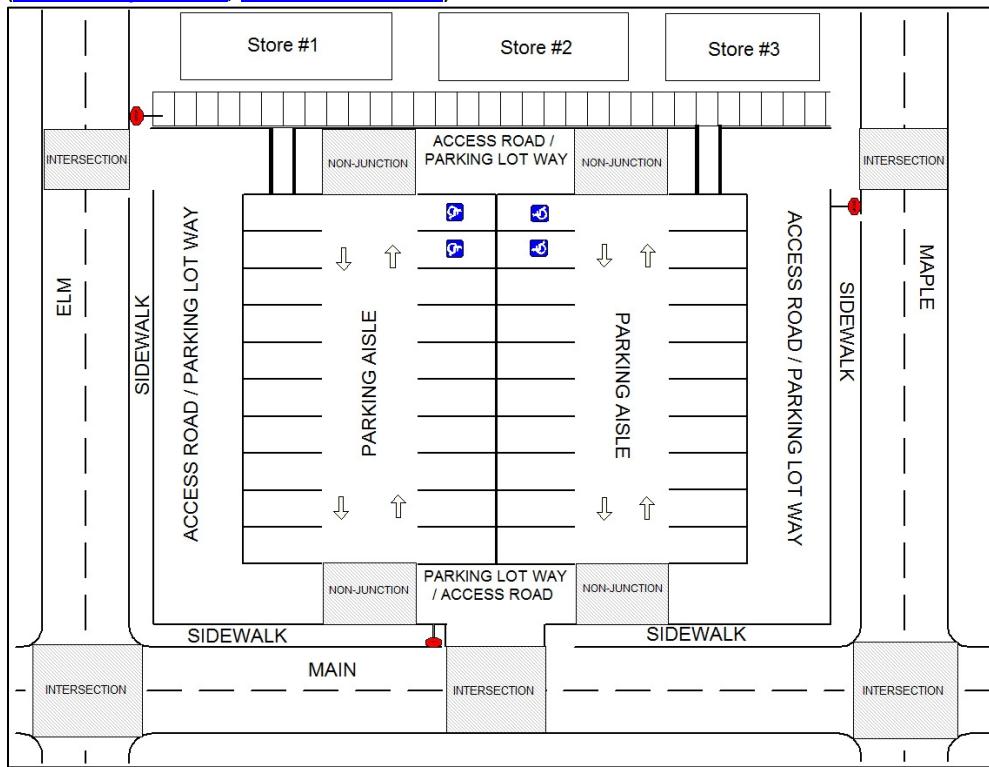

Figure 5: Driveway Access
(See ANSI D16.1 - 2007, 7th Edition)

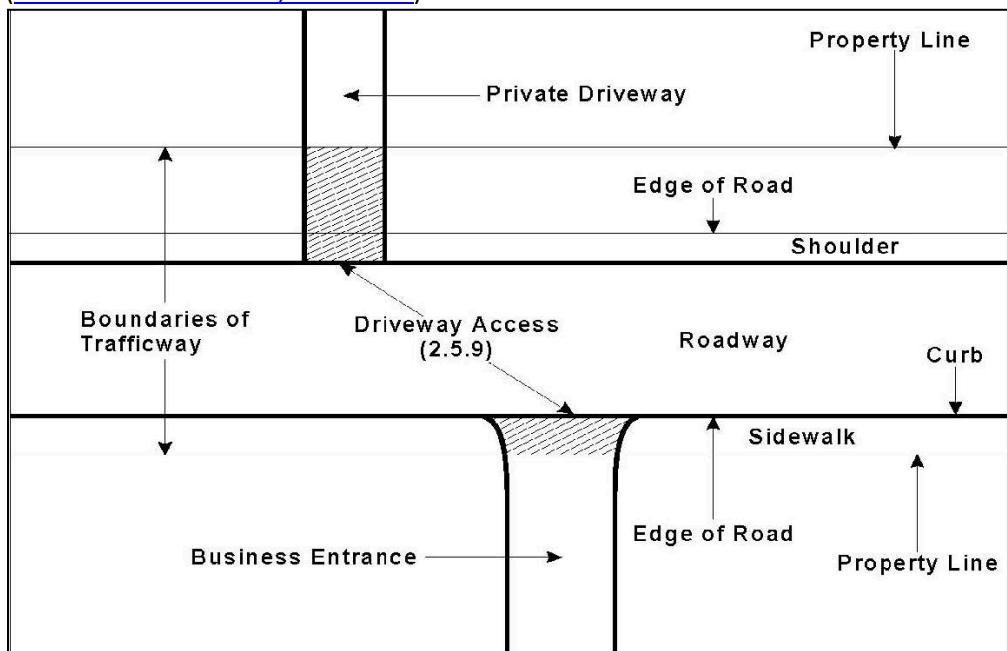

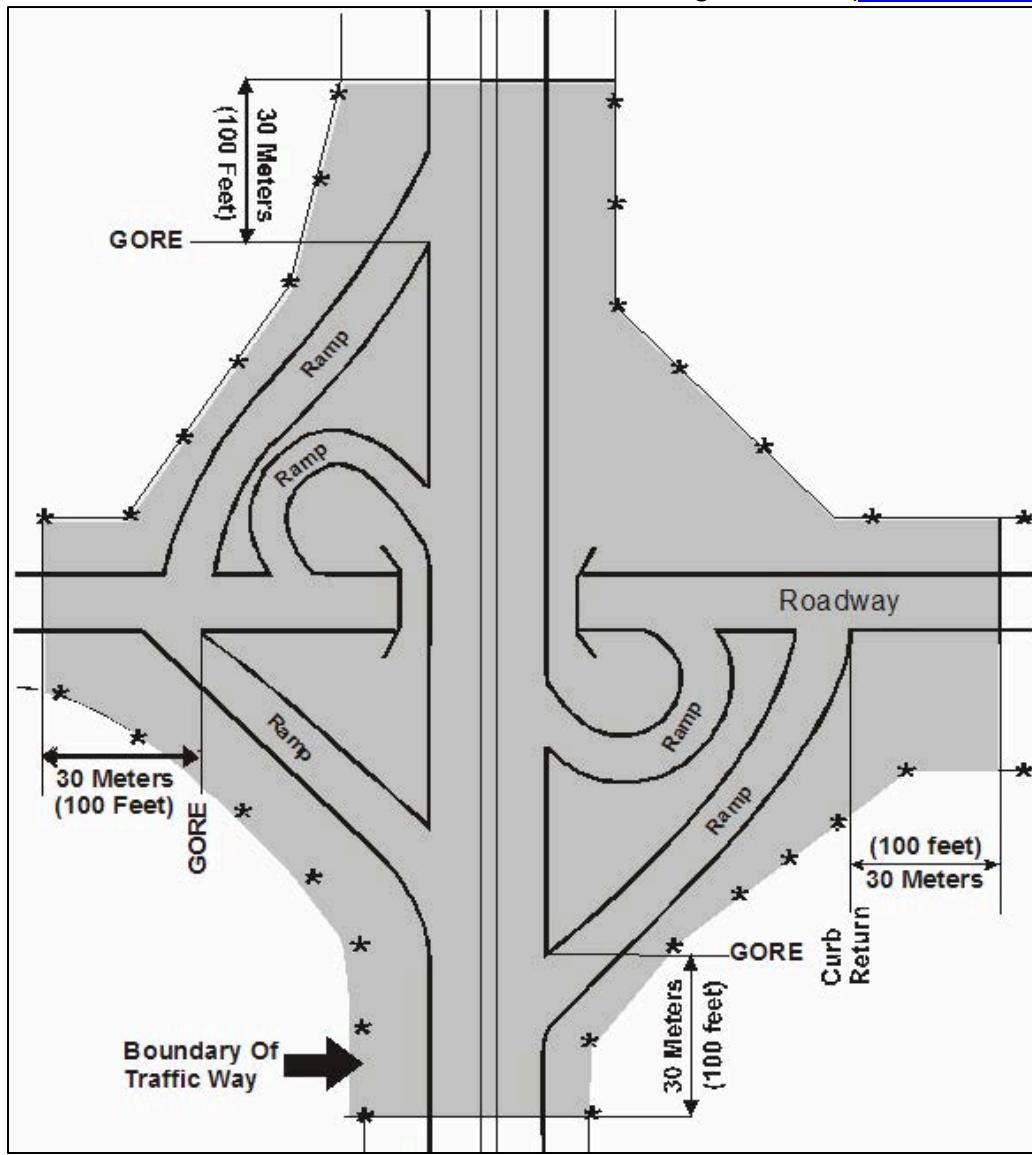

Figure 6 below will help identify if the crash occurred within an Interchange Area for Relation to Junction (C21a) – Within Interchange Area

Figure 6: Interchange Accidents

Accidents that occur within the shaded area are interchange accidents ([See ANSI D16.1 - 2007, 7th Edition](#))

Consistency Checks:

Check	IF	THEN
(250P)	RELATION TO JUNCTION (b) equals 01, 02, 04, 06, 07, 16-19, 98, 99, and RELATION TO TRAFFICWAY equals 03,	TRAFFICWAY DESCRIPTION should equal 2, 3 for at least one vehicle involved in the first harmful event.
(254P)	RELATION TO TRAFFICWAY equals 01, and RELATION TO JUNCTION (b) equals 20,	TRAFFICWAY DESCRIPTION must equal 6 for at least one vehicle involved in the FIRST HARMFUL EVENT.
(3E00)	CRITICAL EVENT – PRECRASH (EVENT) equals 65-68 or 70-73 for a vehicle involved in the first harmful event,	RELATION TO JUNCTION (b) should not equal 01 or 18.
(740P)	RELATION TO JUNCTION (b) equals 07,	TRAFFICWAY DESCRIPTION must equal 2, 3 for at least one vehicle.
(770P)	RELATION TO TRAFFICWAY equals 07,	RELATION TO JUNCTION (b) must equal 01, 03, 08, 19, 98, 99.
(772P)	RELATION TO TRAFFICWAY equals 07,	RELATION TO JUNCTION (a) must not equal 1.
(773P)	RELATION TO JUNCTION (b) equals 01,	RELATION TO JUNCTION (a) must equal 0.
(773Q)	RELATION TO JUNCTION(b) equals 04, 06, 07, or 16,	RELATION TO JUNCTION (a) should not equal 1.

(783P)	RELATION TO JUNCTION (b) equals 98, 99,	TYPE OF INTERSECTION should equal 01, 98, 99.
(784P)	TYPE OF INTERSECTION equals 01,	RELATION TO JUNCTION (b) must not equal 02, 03.
(A131)	RELATION TO JUNCTION (b) equals 02, 04, 06, 16, 17, or 20,	RELATION TO TRAFFICWAY must equal 01.
(A141)	RELATION TO JUNCTION (b) equals 18,	RELATION TO TRAFFICWAY must equal 01 or 11.
(A1B0)	TRAFFIC CONTROL DEVICE equals 20, 21 for a vehicle involved in the FIRST HARMFUL EVENT,	RELATION TO JUNCTION (b) should not equal 01, 18.
(A1E0)	RELATION TO JUNCTION (b) equals 19,	RELATION TO TRAFFICWAY must not equal 01, 05, 11, 98, 99.
(A1E1)	RELATION TO JUNCTION (b) equals 20,	RELATION TO TRAFFICWAY must equal 01.
(A293)	WORK ZONE equals 1-3, and RELATION TO JUNCTION (b) equals 02, 03,	TRAFFIC CONTROL DEVICE should equal 01-03, 20, 40, 97, or 98 for the vehicle(s) involved in the FIRST HARMFUL EVENT.

Check	IF	THEN
(A294)	WORK ZONE equals 1-3, and RELATION TO JUNCTION (b) equals 01, 04, 05, 08, 17-19,	TRAFFIC CONTROL DEVICE should equal 00, 21, 28, 40, 50, 97, or 98 for the vehicle(s) involved in the FIRST HARMFUL EVENT.
(A420)	FIRST HARMFUL EVENT equals 10,	RELATION TO JUNCTION (b) should equal 06.
(A430)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 10-11 for a vehicle involved in the FIRST HARMFUL EVENT,	RELATION TO JUNCTION (b) should not equal 01, 18.
(A440)	RELATION TO JUNCTION (b) equals 06,	TRAFFIC CONTROL DEVICE should equal 65 for any vehicle involved in the FIRST HARMFUL EVENT.
(A481)	TRAFFICWAY DESCRIPTION equals 6, and RELATION TO JUNCTION (b) does not equal 02, 03,	TOTAL LANES IN ROADWAY should equal 1, 2, 8, 9.
(A4C0)	RELATION TO JUNCTION (b) equals 04,	at least one PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) for the vehicles involved in the FIRST HARMFUL EVENT should equal 10, 11, 13, or 98.
(A610)	RELATION TO TRAFFICWAY equals 01, and RELATION TO JUNCTION (b) equals 05,	TRAFFICWAY DESCRIPTION should equal 6 for at least one vehicle involved in the FIRST HARMFUL EVENT.
(A611)	TRAFFICWAY DESCRIPTION equals 6 for at least one vehicle involved in the FIRST HARMFUL EVENT,	RELATION TO JUNCTION (b) should equal 02, 03, 05, 17-20.
(A790)	FIRST HARMFUL EVENT equals 46,	RELATION TO JUNCTION (b) should not equal 01, 07.
(A890)	RELATION TO JUNCTION (b) equals 01,	TRAFFIC CONTROL DEVICE should not equal 01-03 for any vehicle involved in the FIRST HARMFUL EVENT.
(AZ5P)	CRITICAL EVENT-PRECRASH (EVENT) equals 70-73 for a vehicle involved in the FIRST HARMFUL EVENT,	RELATION TO JUNCTION (b) should equal 04 or 08.
(D530)	any VIOLATIONS CHARGED equals 36 for a vehicle involved in the FIRST HARMFUL EVENT,	RELATION TO JUNCTION (b) should equal 06.
(PB04)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN for a person involved in the FIRST HARMFUL EVENT equals 211, 212, 461, 465, 680, 830, 890, 900, or 910,	RELATION TO JUNCTION (b) must not equal 02. Note: this edit is restricted to vehicles that are involved in only one event with pedestrian(s).
(PB07)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE for a person involved in the FIRST HARMFUL EVENT equals 311, 312, 313, 321, 322, or 323,	RELATION TO JUNCTION (b) must equal 04 or 08. Note: this edit is restricted to vehicles that are involved in only one event with bicyclist(s).

Check	IF	THEN
(PB08)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE for a person involved in the FIRST HARMFUL EVENT equals 141-144, 147, 151-157, or 159,	RELATION TO JUNCTION (b) must equal 02 or 03. Note: this edit is restricted to vehicles that are involved in only one event with bicyclist(s).
(PB34)	NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES equals 01, and FIRST HARMFUL EVENT equals 08, and RELATION TO JUNCTION (b) equals 02,	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN must not equal 320, 330, 360, 680, 830, 890, 900, or 910.
(PB35)	NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES equals 01, and FIRST HARMFUL EVENT equals 08, and RELATION TO JUNCTION (b) equals 02,	PEDESTRIAN/BIKE TYPING - CRASH LOCATION - PEDESTRIAN must equal 1.
(PC30)	PRE-IMPACT LOCATION for a vehicle involved in the first harmful event equals 4, 5, and RELATION TO JUNCTION (b) does not equal 04, 05,	RELATION TO TRAFFICWAY should not equal 01 or 11.

Consistency Checks (CRSS Only):

Check	IF	THEN
(A3G0)	INTERSTATE HIGHWAY equals 1, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) is not equal to 03 or 05 or 20,	TOTAL LANES IN ROADWAY should not equal 1 for at least one vehicle involved in the FIRST HARMFUL EVENT.
(A3H0)	INTERSTATE HIGHWAY equals 1, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) is not equal to 03 or 05 or 20,	TRAFFICWAY DESCRIPTION should not equal 4 for at least one vehicle involved in the FIRST HARMFUL EVENT.
(A3I0)	INTERSTATE HIGHWAY equals 1,	RELATION TO JUNCTION (b) should not equal 02, 04, 06, 08, or 16.
(A3J0)	INTERSTATE HIGHWAY equals 1, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) is not equal to 03 or 05 or 20,	SPEED LIMIT should not equal 01-40 for at least one vehicle involved in the FIRST HARMFUL EVENT.
(A930)	INTERSTATE HIGHWAY equals 1, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) is not equal to 03 or 05 or 20,	TRAFFIC CONTROL DEVICE should not equal 01-03, 20, 23, or 65 for at least one vehicle involved in the FIRST HARMFUL EVENT.

Consistency Checks (FARS Only)

Check	IF	THEN
(1F1P)	RELATION TO JUNCTION (b) does not equal 02, 03,	the second TRAFFICWAY IDENTIFIER should be blank.
(1Y0P)	RELATION TO JUNCTION (b) equals 06,	RAIL GRADE CROSSING IDENTIFIER must not equal 0000000.
(750P)	RELATION TO JUNCTION (b) equals 07,	RAIL GRADE CROSSING IDENTIFIER must equal 0000000.

Check	IF	THEN
(A150)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01, 02, and RELATION TO JUNCTION (a) equals 0,	RELATION TO JUNCTION (b) should not equal 02-04, 06, 08.
(A200)	RELATION TO JUNCTION (b) equals 07,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 06, 07, or 96.
(A210)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01, 02, and RELATION TO JUNCTION (a) equals 0,	TRAFFIC CONTROL DEVICE should not equal 01-04, 07, 20, 23, 40, 50, 65.
(A220)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01, 02, and RELATION TO JUNCTION (a) equals 0,	SPEED LIMIT should not equal 05-40 for any vehicle.
(A240)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01, and RELATION TO JUNCTION (a) equals 0,	TRAVEL SPEED should not equal 005-040 for any vehicle.
(A250)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01-03, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) does not equal 03, 05, 20,	TOTAL LANES IN ROADWAY should not equal 1 for the vehicles involved in the FIRST HARMFUL EVENT.
(A290)	ROUTE SIGNING equals 1, and RELATION TO JUNCTION (a) equals 0,	RELATION TO JUNCTION (b) should not equal 02-04, 06, 08 16.
(A291)	RELATION TO JUNCTION (b) equals 07,	ROUTE SIGNING should not equal 5, 6.
(A310)	ROUTE SIGNING equals 1, and RELATION TO JUNCTION (a) equals 0,	TOTAL LANES IN ROADWAY should not equal 1 for any vehicle.
(A320)	ROUTE SIGNING equals 1, and RELATION TO JUNCTION (a) equals 0,	SPEED LIMIT should not equal 05-40 for any vehicle.
(A360)	RELATION TO JUNCTION (b) equals 07,	ROUTE SIGNING should not equal 4.
(A810)	FIRST HARMFUL EVENT equals 46, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) does not equal 02, 03, 05,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 01.
(A820)	FIRST HARMFUL EVENT equals 46, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) does not equal 02, 03, 05,	ROUTE SIGNING should not equal 1.
(AC0A)	RELATION TO JUNCTION (b) equals 02, 03,	the second TRAFFICWAY IDENTIFIER should not be all blank.

C22 - Type of Intersection

FORMAT: 2 numeric

SAS NAME: Accident.Typ_Int

ELEMENT VALUES:

Codes	Attributes
01	Not an Intersection
02	Four-Way Intersection
03	T-Intersection
04	Y-Intersection
05	Traffic Circle
06	Roundabout
07	Five-Point, or More
10	L-Intersection
98	Not Reported
99	Reported as Unknown

Definition: This element identifies and allows separation of various intersection types.

Remarks: The data element value selected should be based on the location of the first harmful event and is only applicable to intersection or intersection-related crashes. If it is known that a rotary type of intersection was involved but it is not known if it was a traffic circle or a roundabout, default to a traffic circle.

Intersection refers to an area that 1) contains a crossing or connection of two or more roadways not classified as driveway access and 2) is embraced within the prolongation of the lateral curb lines, or, if none, the lateral boundary lines of the roadways. Where the distance along a roadway between two areas meeting these criteria is less than 33 feet, the two areas and the roadway connecting them are considered to be parts of a single intersection. (See [ANSI D.16 - 2.5.10](#))

01 (Not an Intersection) identifies that this crash was not intersection or intersection-related.

02 (Four-Way Intersection) refers to two roadways that cross or connect.

03 (T-Intersection) refers to an intersection where two roadways connect and one roadway does not continue across the other roadway. The roadways form a "T."

04 (Y-Intersection) refers to an intersection where three roadways connect and none of the roadways continue across the other roadways. The roadways form a "Y."

05 (Traffic Circle) refers to an intersection of roads where motor vehicles must travel around a circle to continue on the same road or leave on any intersecting road.

A **05 (Traffic Circle)** must meet the following criteria:

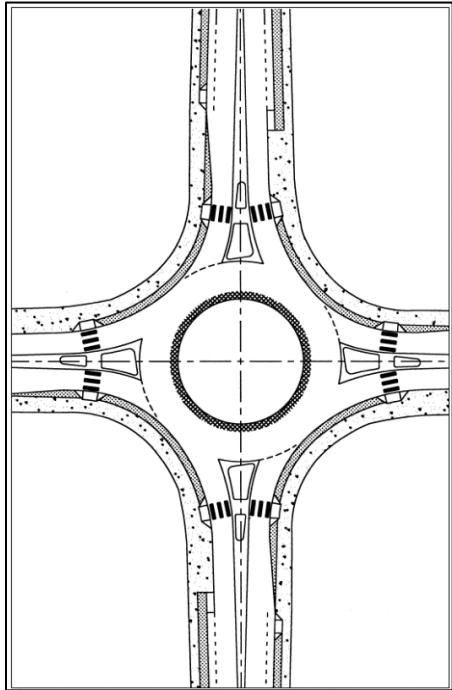

- Entering traffic is controlled by a stop sign, traffic signal, or by no traffic control
- Parking is allowed within the circle
- Pedestrians are allowed access to the central island
- Circle traffic can be required to yield to entering traffic

06 (Roundabout) refers to an intersection of roads where motor vehicles must travel around a circle to continue on the same road or leave on any intersecting road. (See [Figure 7](#) below.) A **06 (Roundabout)** must meet the following criteria:

- Entering traffic is controlled by a yield sign only
- Circulating traffic has the right of way
- Pedestrian access is allowed behind the yield sign line
- No parking is allowed in the circle

Figure 7: Example of a Typical Single-Lane Roundabout

(See [Roundabouts: An Informational Guide – FHWA](#))

07 (Five-Point, or More) refers to an intersection where more than two roadways cross or connect.

10 (L-Intersection) refers to a two-armed intersection in which one roadway intersects with another roadway but neither roadway extends beyond the other roadway. (Note: this should be configured as an intersection where the arms consist of two different named trafficways.)

98 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown) is used when police indicate unknown.

Consistency Checks:

Check	IF	THEN
(251P)	RELATION TO TRAFFICWAY equals 98, 99,	TYPE OF INTERSECTION should equal 98, 99.
(778P)	RELATION TO JUNCTION (b) equals 01, 04-08, 16-20,	TYPE OF INTERSECTION must equal 01.
(782P)	TYPE OF INTERSECTION equals 02-07, 10,	RELATION TO JUNCTION (b) must equal 02, 03.
(783P)	RELATION TO JUNCTION (b) equals 98, 99,	TYPE OF INTERSECTION should equal 01, 98, 99.
(784P)	TYPE OF INTERSECTION equals 01,	RELATION TO JUNCTION (b) must not equal 02, 03.

Consistency Checks (FARS Only):

Check	IF	THEN
(781P)	TYPE OF INTERSECTION equals 02-07, 10,	TRAFFICWAY IDENTIFIER (b) should not be blank.

C23 - Relation to Trafficway

FORMAT: 2 numeric

SAS NAME: Accident.REL_ROAD

ELEMENT VALUES:

Codes	Attributes
01	On Roadway
02	On Shoulder
03	On Median
04	On Roadside
05	Outside Trafficway
06	Off Roadway – Location Unknown
07	In Parking Lane/Zone
08	Gore
10	Separator
11	Continuous Left-Turn Lane
12	Pedestrian Refuge Island or Traffic Island
98	Not Reported
99	Reported as Unknown

Definition: This element identifies the location of the crash as it relates to its position within or outside the trafficway based on the [First Harmful Event](#).

Remarks:

01 (On Roadway) - The roadway is that part of a trafficway designed, improved, and ordinarily used for motor vehicle travel or, where various classes of motor vehicles are segregated, that part of a trafficway used by a particular class. Separate roadways may be provided for northbound and southbound traffic or for trucks and automobiles. Roadway may be noted as the “travel lanes” and, if present, includes the area between the painted “fog lines.” Additionally, a driveway access area is considered part of the roadway of the trafficway to which it connects. This attribute may also be used for cases involving a parked vehicle opening a door into moving traffic, extended mirrors into the travel lane. If a bike lane is immediately adjacent to the curb/edge of the road, code [04 \(On Roadside\)](#); if the bike lane is between lanes of travel or a lane and the parking lane, code [01\(On Roadway\)](#).

02 (On Shoulder) (if present) is that part of a trafficway contiguous with the roadway for emergency use, for accommodation of stopped vehicles, and for lateral support of the roadway structure. A shoulder should be improved or maintained for these purposes. Not all roadways have shoulders.

03 (On Median) is defined as that area of a divided trafficway between parallel roads separating travel in opposite directions. The principal functions of a median are to provide the desired freedom from interference of opposing traffic, to provide a recovery area for out-of-control vehicles, to provide a stopping area in case of emergencies, and to minimize headlight glare. Medians may be depressed, raised, or flush. Flush medians can be as little as 4-feet wide between roadway edge lines. Painted roadway edge lines four (4) or more feet wide denote medians. Medians of lesser width must have a barrier to be considered a median. Continuous Left-turn Lanes are **not** considered Medians (see [11 \(Continuous Left-Turn Lane\)](#)).

04 (On Roadside) refers to a location off the roadway, but inside the right-of-way. It is the outermost part of the trafficway that lay between the outer property line or other barrier and the edge of the first road encountered in the trafficway. Bicycle lanes and shared use path or trails contiguous with the roadway and sidewalks are also included. For cases involving a vehicle that goes off the roadway into a “tree line,” “wood line,” “brush line,” etc. that is adjacent to the roadway, code as **04 (On Roadside)** unless there is specific information available in the case materials that identify the First Harmful Event was beyond the boundaries of the trafficway (e.g., a “tree line” in a homeowner’s front **yard**). **If** a bike lane is immediately adjacent to the curb/edge of the road, code **04 (On Roadside)**; if the bike lane is between lanes of travel or a lane and the parking lane, code **01 (On Roadway)**.

05 (Outside Trafficway) is used for areas not open to the public as a matter of right or custom for moving persons or property. This includes property beyond the roadside outside the boundaries of the trafficway. Also, a portion of the trafficway closed for construction is not a trafficway and would be considered **05 (Outside Trafficway)**.

06 (Off Roadway - Location Unknown) refers to a location off the roadway, but its relationship to the trafficway boundaries/right-of-way is not known. This should only be used when no reasonable assessment can be made as to the location of the FHE because the information in the case is too ambiguous.

07 (In Parking Lane/Zone) refers to an area on the roadway, or next to the roadway, on which parking is permitted in marked or unmarked spaces. This includes curbside and edge of-roadway parking (for example, legal residential parking, city-street parking, etc.). Sometimes a strip of roadway can be designated for parking at certain hours of the day (parking lane) and for regular travel at other hours (travel lane). This code should NOT be used during hours when parking is NOT permitted (see **01 (On Roadway)**).

08 (Gore) is an area of land where two roadways diverge or converge. The area is bounded on two sides by the edges of the roadway, which join at the point of divergence or convergence. The direction of traffic must be the same on both of these roadways. The area includes shoulders or marked pavement if any, between the roadways. The third side is 60 meters (approximately 200 feet) from the point of divergence or convergence or, if any other road is within 70 meters (230 feet) of that point, a line 10 meters (33 feet) from the nearest edge of such road. (See **Figure 10**)

Gore Inclusions:

- Areas at rest area or exit ramps
- Areas at truck weight station entry or exit ramps
- Areas where two main roadways diverge or converge
- Areas where a ramp and another roadway, or two ramps, diverge or converge
- Areas where a frontage road and another roadway or two frontage roads diverge or converge

Gore Exclusions:

- Islands for channelizing of vehicle movements. **Code these as 12 (Pedestrian Refuge Island or Traffic Island)**.
- Islands for pedestrian refuge. **Code these as 12 (Pedestrian Refuge Island or Traffic Island)**.

10 (Separator) is the area of a trafficway between parallel roads separating travel in the same direction or separating a frontage road from other roads. A **10 (Separator)** may be a physical barrier or a depressed, raised, flush, or vegetated area between roads.

11 (Continuous Left-Turn Lane) is a two-way left turn lane positioned between opposing straight-through travel lanes.

12 (Pedestrian Refuge Island or Traffic Island) is coded when case materials indicate the first harmful event occurred on a Pedestrian Refuge Island or Traffic Island.

Examples include areas:

- between roadways of a trafficway meant to allow for a non-motorist to pause while traveling from one side of a trafficway to the other side,
- for channelizing the flow of traffic at an intersection,
- in the center of a traffic circle or roundabout,
- dividing the entrance and exit in a driveway access.

98 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown) is used when police indicate unknown.

Additional Guidance for Relation to Trafficway

For collision events when the vehicle is overlapping adjacent areas:

- For fixed object collisions ([FHE](#)), base “Relation to Trafficway” on the location of the object struck.
- Fixed objects that are associated with the trafficway such as curbs, ditches, guardrails, sign supports, utility poles, etc. are not located in the travel lanes or on the shoulder. Therefore, when these fixed objects are contacted in the FHE, Relation to Trafficway should be coded as [**04 \(On Roadside\)**](#), regardless of the location of the entire vehicle.
- Non-fixed object collisions (e.g., striking a vehicle on the shoulder or pedestrian on the sidewalk) when the striking vehicle is overlapping two locations (e.g., roadway and shoulder) are also coded with respect to the object contacted, not the striking vehicle.

For Rollover/Overtake crashes when the vehicle is overlapping two locations (e.g., roadway and shoulder) when the roll begins:

- When a vehicle begins an overturn and is overlapping two locations at the onset of the overturn, use the LAST area the vehicle entered as the location. For example, Roadside would be correct for a case where the documentation identifies a vehicle runs off the roadway, partially through the shoulder, and the front wheels enter the roadside.

Default rules for the location of Ditches, Culverts, Embankments, and Fences:

- Unless there is clear reason to believe otherwise in the case materials, ditches, culverts and embankments are design features common to trafficways. Therefore, if included as the FHE the appropriate Relation to Trafficway is [**04 \(On Roadside\)**](#).
- All fences are considered [**05 \(Outside Trafficway\)**](#) unless, the case materials specifically identify the fence is within the trafficway property lines (e.g., a snow fence in the median, or fence identified as government property delineating the right of way and/or property line).

Consistency Checks:

Check	IF	THEN
(250P)	RELATION TO JUNCTION (b) equals 01, 02, 04, 06, 07, 16-19, 98, 99, and RELATION TO TRAFFICWAY equals 03,	TRAFFICWAY DESCRIPTION should equal 2, 3 for at least one vehicle involved in the first harmful event.
(251P)	RELATION TO TRAFFICWAY equals 98, 99,	TYPE OF INTERSECTION should equal 98, 99.
(252P)	RELATION TO TRAFFICWAY equals 01, 02, 03, 04, 07, 08, 10, 11, 12 , 98, or 99,	UNIT TYPE for VEHICLE NUMBER (OTHER VEHICLE) involved in the FIRST HARMFUL EVENT must not equal 3.
(253P)	RELATION TO TRAFFICWAY equals 03,	CRASH TYPE should equal 06-10, 98, or 99 for the in-transport vehicles involved in the FIRST HARMFUL EVENT.
(254P)	RELATION TO TRAFFICWAY equals 01, and RELATION TO JUNCTION (b) equals 20,	TRAFFICWAY DESCRIPTION must equal 6 for at least one vehicle involved in the FIRST HARMFUL EVENT.
(255P)	RELATION TO TRAFFICWAY equals 01 or 11,	UNIT TYPE for VEHICLE NUMBER (THIS VEHICLE) involved in the FIRST HARMFUL EVENT must equal 1.
(256P)	RELATION TO TRAFFICWAY equals 01 or 11,	UNIT TYPE for VEHICLE NUMBER (OTHER VEHICLE) involved in the FIRST HARMFUL EVENT should equal 1 or 4.
(257P)	RELATION TO TRAFFICWAY equals 05,	UNIT TYPE for VEHICLE NUMBER (OTHER VEHICLE) involved in the FIRST HARMFUL EVENT must equal 1, 3, or 4.
(42AP)	NUMBER OF MOTOR VEHICLE FORMS SUBMITTED equals 001, and RELATION TO TRAFFICWAY equals 02, 04, 06-08, 12 , and ATTEMPTED AVOIDANCE MANEUVER equals 00 or 01,	CRITICAL EVENT – PRECRASH (EVENT) should equal 01-06, 08-14, or 19.
(440F)	FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 01,	there must be at least one Person Level (Not a MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 01-03, 09-11, 13, 16, 23, 98, or 99.
(450F)	FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 07,	there must be at least one Person Level (Not a MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 14.
(460F)	FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 02,	there must be at least one Person Level (Not a MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 02, 20.
(470F)	FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 03, 08, 10, 12 ,	there must be at least one Person Level (Not a MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 20, 22, 28, 98, 99.
(480F)	FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 04, 06,	there must be at least one Person Level (Not a MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 09, 16, 20, 21, 24, 25, 28, 98, 99.
(490F)	FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 05,	there must be at least one Person Level (Not a MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 24, 25.

Check	IF	THEN
(4A0F)	RELATION TO TRAFFICWAY is 12,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 22 or 28.
(530F)	FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 99,	there must be at least one Person Level (Not a MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 09, 98, 99.
(531F)	FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 11,	there must be at least one Person Level (Not a MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 11.
(580F)	FIRST HARMFUL EVENT equals 14, and RELATED FACTORS - PERSON (MV OCCUPANT) LEVEL does not equal 32, 89 for at least one occupant in the not in-transport motor vehicle involved in the FIRST HARMFUL EVENT,	RELATION TO TRAFFICWAY should not equal 01.
(770P)	RELATION TO TRAFFICWAY equals 07,	RELATION TO JUNCTION (b) must equal 01, 03, 08, 19, 98, 99.
(772P)	RELATION TO TRAFFICWAY equals 07,	RELATION TO JUNCTION (a) must not equal 1.
(77DP)	RELATION TO TRAFFICWAY equals 07, and RELATION TO JUNCTION (a) equals 1,	RELATION TO JUNCTION (b) should not equal 03, 08.
(780P)	RELATION TO TRAFFICWAY equals 10,	RELATION TO JUNCTION (b) must not equal 02, 04, 08.
(A1E0)	RELATION TO JUNCTION (b) equals 19,	RELATION TO TRAFFICWAY must not equal 01, 05, 11, 98, 99.
(A1E1)	RELATION TO JUNCTION (b) equals 20,	RELATION TO TRAFFICWAY must equal 01.
(A131)	RELATION TO JUNCTION (b) equals 02, 04, 06, 16, 17, or 20,	RELATION TO TRAFFICWAY must equal 01.
(A141)	RELATION TO JUNCTION (b) equals 18,	RELATION TO TRAFFICWAY must equal 01 or 11.
(A380)	FIRST HARMFUL EVENT equals 01 and this vehicle is involved in the FIRST HARMFUL EVENT, and BODY TYPE does not equal 80, 81, 83, 84, 88, 89, for this vehicle, and RELATION TO TRAFFICWAY equals _____,	LOCATION OF ROLLOVER should equal _____ respectively.
(A390)	FIRST HARMFUL EVENT equals 17, 19-21, 23-26, 30-35, 38-43, 52, 53, 57, 93,	RELATION TO TRAFFICWAY should not equal 01, 02, 07, 11.
(A421)	FIRST HARMFUL EVENT equals 24, 25, 30, 33, 34, 35, 40, 46, 52, 57, 59,	RELATION TO TRAFFICWAY should equal 03, 04, 08, 10, or 12 .
(A4B0)	CRASH TYPE equals 01-10 or 14,	RELATION TO TRAFFICWAY must not equal 01, 02, 07, or 11. If the first harmful event occurs on a different road than the road it departed, see 98 (Other Crash Type) .
(A4B2)	CRASH TYPE equals 11,	RELATION TO TRAFFICWAY must not equal 01, 03, 04, 05, 08, 10, 11, or 12 .
(A4B3)	CRASH TYPE equals 12 or 13,	RELATION TO TRAFFICWAY must not equal 03, 05, 08, 10, or 12 .
(A4B4)	CRASH TYPE equals 12 or 13,	RELATION TO TRAFFICWAY should not equal 4 unless the FIRST HARMFUL EVENT occurs in a bicycle lane.

Check	IF	THEN
(A610)	RELATION TO TRAFFICWAY equals 01, and RELATION TO JUNCTION (b) equals 05,	TRAFFICWAY DESCRIPTION should equal 6 for at least one vehicle involved in the FIRST HARMFUL EVENT.
(A61F)	FIRST HARMFUL EVENT equals 08, 09, 11, 15, 49, and RELATION TO TRAFFICWAY equals 01, 02, 07, 11, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) is not equal to 00, 13 for the vehicle involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 13 for the vehicle involved in the FIRST HARMFUL EVENT.
(A620)	CRASH TYPE equals 06-10, and TRAFFICWAY DESCRIPTION equals 3,	RELATION TO TRAFFICWAY should equal 03 or 12 .
(A62F)	FIRST HARMFUL EVENT equals 18, 43, 73, 91, or 93, and RELATION TO TRAFFICWAY equals 01 or 11,	CRASH TYPE should equal 12 or 15 for the vehicle involved in the FIRST HARMFUL EVENT.
(A800)	FIRST HARMFUL EVENT equals 46,	RELATION TO TRAFFICWAY should not equal 01, 02, 05, 07, 11.
(A801)	FIRST HARMFUL EVENT equals 12,	RELATION TO TRAFFICWAY must not equal 5.
(A881)	RELATION TO TRAFFICWAY equals 11,	TRAFFICWAY DESCRIPTION should equal 5 for at least one vehicle.
(PB05)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN for a person involved in the FIRST HARMFUL EVENT equals 311, 312, or 313,	RELATION TO TRAFFICWAY must equal 01 or 11. Note: this edit is restricted to vehicles that are involved in only one event with pedestrian(s).
(PB12)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN for a person involved in the FIRST HARMFUL EVENT equals 510, 520, or 590,	RELATION TO TRAFFICWAY must not equal 01 or 11. Note: this edit is restricted to vehicles that are involved in only one event with pedestrian(s).
(PC20)	RELATION TO TRAFFICWAY equals 02-08, 10, or 12 ,	PRE-IMPACT LOCATION of the vehicle(s) involved in the FIRST HARMFUL EVENT should equal 0, 4, 5, or 9.
(PC30)	PRE-IMPACT LOCATION for a vehicle involved in the FIRST HARMFUL EVENT equals 4, 5, and RELATION TO JUNCTION (b) does not equal 04, 05,	RELATION TO TRAFFICWAY should not equal 01 or 11.
(PC40)	PRE-IMPACT LOCATION for a vehicle involved in the FIRST HARMFUL EVENT equals 1-3, 6,	RELATION TO TRAFFICWAY should equal 01 or 11.

Consistency Checks (FARS Only):

Check	IF	THEN
(A882)	RELATION TO TRAFFICWAY equals 07,	ROUTE SIGNING should not equal 1.
(A883)	RELATION TO TRAFFICWAY equals 07,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 01.

Figure 8: Trafficway with Frontage Road
(See ANSI D16.1 - 2007, 7th Edition)

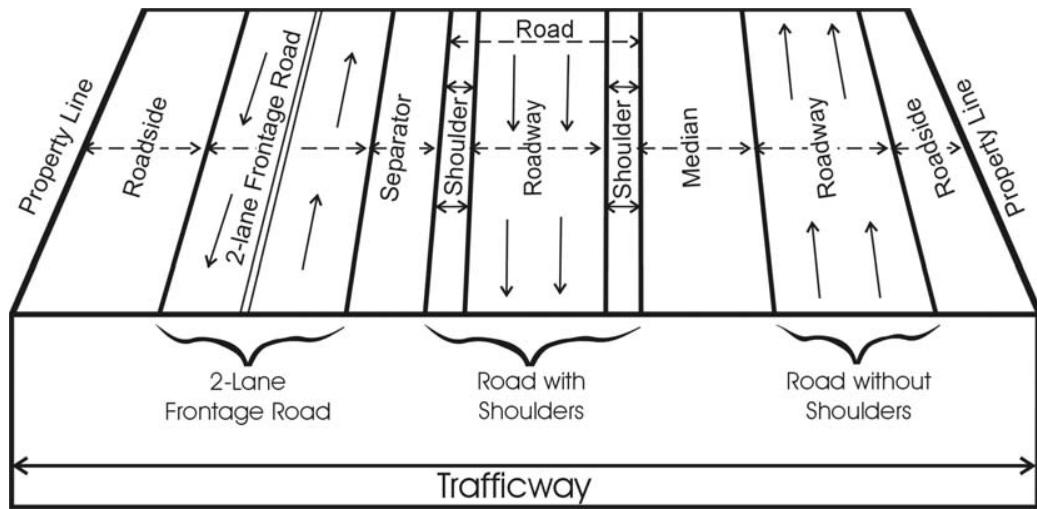

Figure 9: Trafficway with Multiple Roadways in the Same Direction
(See ANSI D16.1 – 2007, 7th Edition)

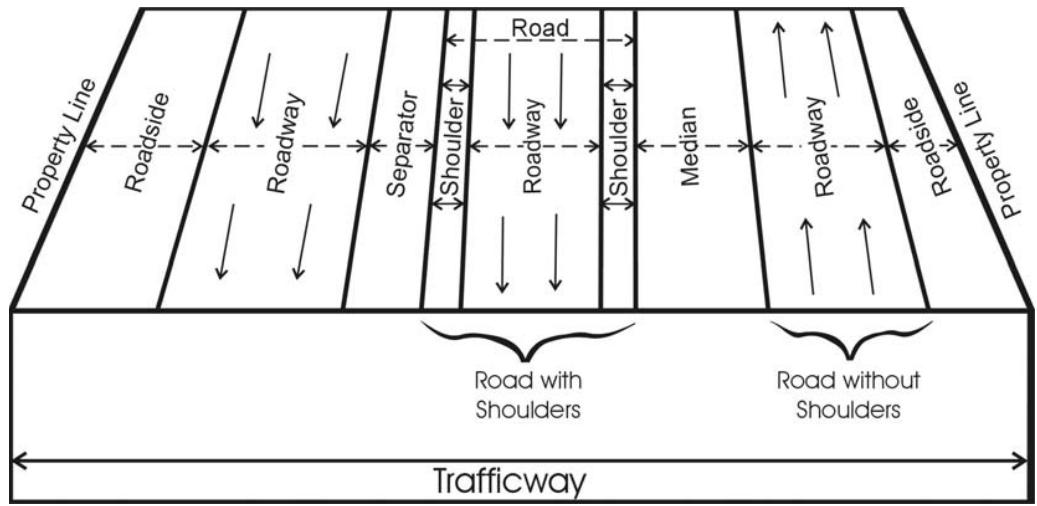

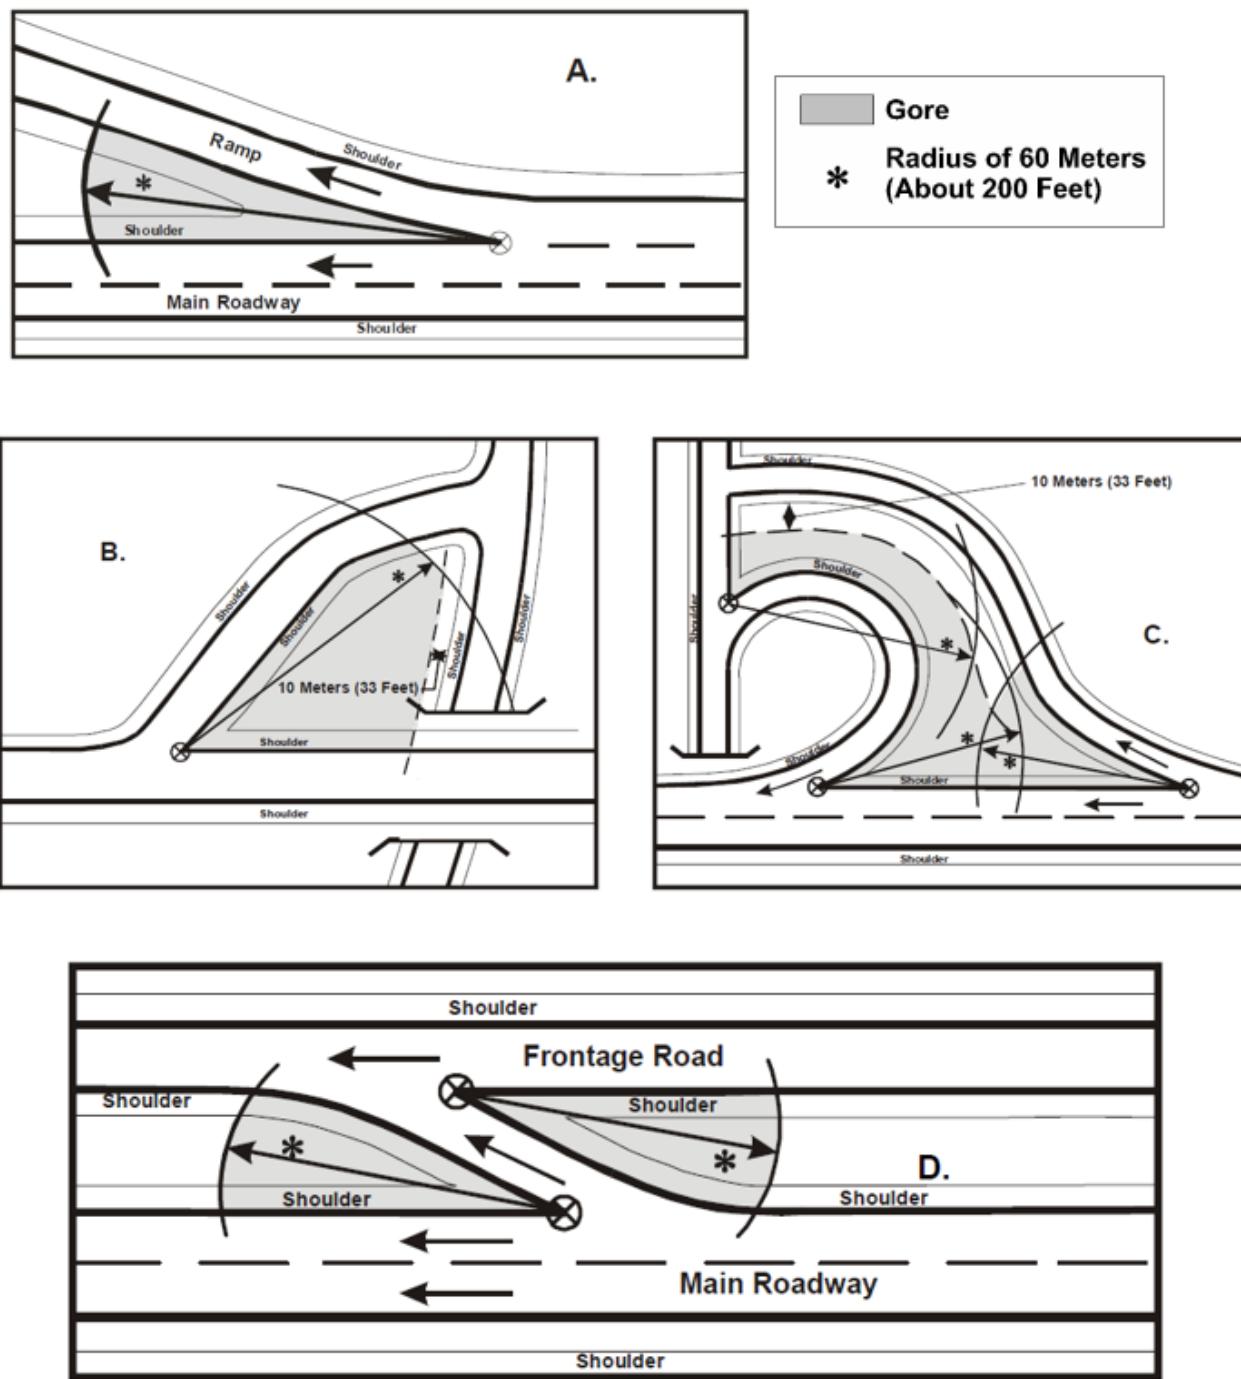

Figure 10: Four Examples of Gores
 (See ANSI D16.1 – 2007, 7th Edition)

C24 - Work Zone

FORMAT: 1 numeric

SAS NAME: Accident.Wrk_Zone

ELEMENT VALUES:

Codes	Attributes
0	None
1	Construction
2	Maintenance
3	Utility
4	Work Zone, Type Unknown

Definition: This data element captures that this was a “Work Zone Accident” as defined in [ANSI D16.1, 7th Edition](#). If the crash qualifies as a “Work Zone Accident” then the type of work activity is identified.

Remarks: If the crash is a work zone crash, work zone type must be clearly distinguished within the case materials; otherwise [4 \(Work Zone, Type Unknown\)](#) should be used.

The use of these codes does not imply that the crash was caused by the construction, maintenance, or utility activity.

Work Zone:

A work zone is defined as an area of a trafficway where construction, maintenance, or utility work activities are identified by warning signs/signals/ indicators, including those on transport devices (e.g., signs, flashing lights, channelizing devices, barriers, pavement markings, flagmen, warning signs, and arrow boards mounted on the vehicles in a mobile maintenance activity) that mark the beginning and end of a construction, maintenance, or utility work activity. It extends from the first warning sign, signal, or flashing lights to the END ROAD WORK sign or the last traffic control device pertinent for that work activity. Work zones also include roadway sections where there is ongoing, moving (mobile) work activity such as lane line painting or roadside mowing only if the beginning of the ongoing, moving (mobile) work activity is designated by warning signs or signals.

Work Zone Crash:

A work zone crash is a motor vehicle traffic crash in which the first harmful event occurs within the boundaries of a work zone or on an approach to or exit from a work zone, resulting from an activity, behavior, or control related to the movement of the traffic units through the work zone.

See the [7th Edition of ANSI D16.1](#) definitions of “Work Zone” and “Work Zone Accident” for inclusions and exclusions.

To determine which attribute is appropriate, the duration of the work must be considered. If the work is short-term (i.e., takes less than one period of daylight and is not performed during hours of darkness), 2 (Maintenance) or 3 (Utility) are applicable. If the maintenance or utility work is long-term, 1 (Construction) must be used.

0 (None) is used when there is no indication that the crash is a work zone crash as defined above.

1 (Construction) is used when the available information indicates that there is long-term stationary construction such as building a new bridge, adding travel lanes to the roadway, extending an existing trafficway, etc. Highway construction includes construction of appurtenances such as guardrails or ditches, surveying activity, installation of utilities within the right-of-way, etc.

2 (Maintenance) is used when the available information indicates that there are work activities, including moving work activities, such as striping the roadway, median and roadside grass mowing/landscaping, pothole repair, snowplowing, etc., where there are warning signs or signals marking the beginning of the moving work area.

3 (Utility) is used when the available information indicates that there is short-term stationary work such as repairing/maintaining electric, gas, water lines, or traffic signals. The utility company must perform the work.

4 (Work Zone, Type Unknown) is used when there is insufficient information to distinguish between [1 \(Construction\)](#), [2 \(Maintenance\)](#), or [3 \(Utility\)](#).

Consistency Checks:

Check	IF	THEN
(A293)	WORK ZONE equals 1-3, and RELATION TO JUNCTION (b) equals 02, 03,	TRAFFIC CONTROL DEVICE should equal 01-03, 20, 40, 97, or 98 for the vehicle(s) involved in the FIRST HARMFUL EVENT.
(A294)	WORK ZONE equals 1-3, and RELATION TO JUNCTION (b) equals 01, 04, 05, 08, 17-19,	TRAFFIC CONTROL DEVICE should equal 00, 21, 28, 40, 50, 97, or 98 for the vehicle(s) involved in the FIRST HARMFUL EVENT.
(A470)	WORK ZONE equals 0, and TRAFFICWAY DESCRIPTION equals 1-3, 5,	TOTAL LANES IN ROADWAY should not equal 1.
(AL2P)	SEQUENCE OF EVENTS equals 45,	WORK ZONE should equal 1-4.

C25 - Light Condition

FORMAT: 1 numeric

SAS NAME: Accident.LGT_COND

ELEMENT VALUES:

Codes	Attributes
1	Daylight
2	Dark - Not Lighted
3	Dark - Lighted
6	Dark - Unknown Lighting
4	Dawn
5	Dusk
7	Other
8	Not Reported
9	Reported as Unknown

Definition: This element records the type/level of light that existed at the time of the crash as reported in the case materials.

Remarks:

1 (Daylight) is used when the available information describes the crash conditions occurring while natural light is the main source of lighting and it is not [4 \(Dawn\)](#) or [5 \(Dusk\)](#). If the crash occurs within a tunnel, code the lighting described for the tunnel.

2 (Dark - Not Lighted) is used when the available information describes a condition where no “natural” light exists and no overhead “man-made” lighting is present on the roadway where the crash occurs.

3 (Dark - Lighted) is used when the available information describes a condition where no “natural” light exists but there is overhead “man-made” lighting on the roadway where the crash occurs. Lighted areas will generally include streets within cities or towns and some interchange areas. This does not include lighting from store fronts, houses, parking lots, etc.

6 (Dark - Unknown Lighting) is used if it cannot be determined if [2 \(Dark - Not Lighted\)](#) or [3 \(Dark - Lighted\)](#) applies.

Sometimes the case materials will have conflicting information because more than one light condition is indicated in the coded boxes and/or the narrative **or the coded box is blank**. If necessary, use the crash time to aid in determining the “best” attribute.

4 (Dawn) describes the transition period going from “dark of night” to a daylight condition. This is typically the 30-minute period before the sun rises.

5 (Dusk) describes the transition period going from a daylight condition to the “dark of night.” This is typically the 30-minute period after the sun sets.

Rules for determining applicable attribute:

1. If **4 (Dawn)** or **5 (Dusk)** are marked then use the crash time to select either [4 \(Dawn\)](#) or [5 \(Dusk\)](#).
2. If **3 (Dark - Lighted)** and **4 (Dawn)** are marked then use [4 \(Dawn\)](#).

3. If **3 (Dark - Lighted)** and **5 (Dusk)** are marked then use [**5 \(Dusk\)**](#).
4. If **Dark** and **5 (Dusk)** are marked then use [**5 \(Dusk\)**](#).
5. If **Dark** and **4 (Dawn)** are marked then use [**4 \(Dawn\)**](#).
6. If more than 2 attributes are checked then use [**8 \(Not Reported\)**](#).

7 (Other) is used when the conditions above do not apply.

If a police crash report data element is coded with the attribute “Other” but the officer does not specify what this refers to:

1. Code **7 (Other)** if the police crash report attribute choices can be matched to or include all the attributes in FARS/CRSS.
2. Code **8 (Not Reported)** if the police crash report choices cannot be matched to or include all the attributes in FARS/CRSS.

8 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks is NOT considered “**Not Reported**.”

Code **8 (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

9 (Reported as Unknown) is used when the investigating officer indicates that the lighting condition was unknown.

Consistency Checks:

Check	IF	THEN
(220P)	LIGHT CONDITION equals 4, and STATE is not equal to 02,	CRASH TIME must equal 0300-0900, 9999.
(2300)	LIGHT CONDITION equals 5, and STATE is not equal to 02,	CRASH TIME must equal 1600-2200, 9999.
(A010)	STATE equals 02, and LIGHT CONDITION equals 4,	CRASH TIME should equal 0300-1000, 9999.
(A020)	STATE equals 02, and LIGHT CONDITION equals 5,	CRASH TIME should equal 1500-2359, 9999.
(A050)	CRASH TIME equals 0900-1600,	LIGHT CONDITION should not equal 2-6.
(A060)	CRASH TIME equals 2300-0400,	LIGHT CONDITION should not equal 1, 4, 5, 9.
(U390)	UNLIKELY: LIGHT CONDITION equals 8.	--

C26 - Atmospheric Conditions

FORMAT: 2 numeric - occurring 2 times.

SAS NAME: Accident.Weather; Accident.Weather1; Accident.Weather2

ELEMENT VALUES:

Codes	Attributes
00	No Additional Atmospheric Conditions
01	Clear
10	Cloudy
02	Rain
03	Sleet or Hail
12	Freezing Rain or Drizzle
04	Snow
11	Blowing Snow
05	Fog, Smog, Smoke
06	Severe Crosswinds
07	Blowing Sand, Soil, Dirt
08	Other
98	Not Reported
99	Reported as Unknown

Definition: This element identifies the prevailing atmospheric conditions that existed at the time of the crash as recorded on the police crash report.

Remarks: If the case materials indicate more than two atmospheric conditions, select the two conditions that most affect visibility. If the case material attributes are a combination of the above attributes (e.g., Clear/Cloudy, Clear or Cloudy, Sleet/Hail/Freezing Rain, Snow/Sleet/Hail), and you cannot determine which was the prevalent weather condition, then code [98 \(Not Reported\)](#).

Temperature is not an atmospheric condition for the purposes of this element.

When coding this element, do not interpret indication of Rain, Sleet, or Snow as also Cloudy. Cloudy must be explicitly stated in the case materials.

00 (No Additional Atmospheric Conditions) should only be used for the second Atmospheric Condition subfield, when there is no second Atmospheric Condition listed on your case materials.

01 (Clear) includes partial cloudiness if sunlight is not diminished. If your case materials provide the attribute "no adverse condition," use [98 \(Not Reported\)](#) unless there is sufficient detail to establish that **01 (Clear)** or **10 (Cloudy)** applies.

10 (Cloudy) usually refers to "overcast" but may include partial cloudiness if light is diminished.

02 (Rain) refers to precipitation other than snow, hail, or sleet. Mist should be coded as **02 (Rain)**.

03 (Sleet or Hail) would apply to conditions where precipitation is falling as ice (sleet or hail)

12 (Freezing Rain or Drizzle) would apply when precipitation is falling as liquid (rain) and then freezing on the roadway.

04 (Snow) is used when precipitation is falling as frozen flakes at the time of the crash.

11 (Blowing Snow) applies to snow that is falling and/or to snow that has fallen to the ground and is set aloft by wind.

05 (Fog, Smog, Smoke) refers to a natural or man-made condition that causes reduced visibility.

06 (Severe Crosswinds) refers to winds traveling at an angle with respect to the travel lanes at velocities significant enough to create a risk that vehicles could be diverted from their path or high profile vehicles could be blown over. These are winds that are strong enough to affect vehicle stability.

07 (Blowing Sand, Soil, Dirt) refers to particulate matter set aloft by winds creating a condition of reduced visibility that constitutes a hazard for vehicles operating in the area. This attribute should be used for “dust storms.” This attribute should not be used in conjunction with **06 (Severe Crosswinds)** unless the winds are affecting vehicle stability in addition to reducing visibility.

08 (Other) atmospheric conditions not described above.

If a police crash report data element is coded with the attribute “Other” but the officer does not specify what this refers to:

1. Code **08 (Other)** if the police crash report attribute choices can be matched to or include all the attributes in FARS/CRSS.
2. Code **98 (Not Reported)** if the police crash report choices cannot be matched to or include all the attributes in FARS/CRSS.

98 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown) is used when police indicate unknown.

Consistency Checks:

Check	IF	THEN
(A030)	CRASH MONTH equals 05-09,	ATMOSPHERIC CONDITIONS should not equal 03, 04, 11, 12.
(A1A0)	ROADWAY SURFACE CONDITIONS equals 01 for a vehicle involved in the FIRST HARMFUL EVENT,	ATMOSPHERIC CONDITIONS should not equal 02-04, 11, 12.
(A510)	any ATMOSPHERIC CONDITIONS equals 02-04, 11, 12,	ROADWAY SURFACE CONDITIONS should not equal 01, 07, 08, 99 for any vehicle.
(AT00)	An ATMOSPHERIC CONDITIONS 01-08, 10-12, 98, 99 can be used only once per crash.	--

Check	IF	THEN
(AT10)	the first ATMOSPHERIC CONDITIONS equals 99,	the second ATMOSPHERIC CONDITIONS must equal 00.
(AT20)	the first ATMOSPHERIC CONDITIONS equals 01-08, 10-12, 99,	the second ATMOSPHERIC CONDITIONS must not equal 99.
(AT30)	First ATMOSPHERIC CONDITIONS must not equal 00.	--
(AT40)	the first ATMOSPHERIC CONDITIONS equals 01,	the second ATMOSPHERIC CONDITIONS must equal 00.
(AT50)	the second ATMOSPHERIC CONDITIONS must not equal 01.	--

C27 - School Bus Related

FORMAT: 1 numeric

SAS NAME: Accident.SCH_BUS, Person.SCH_BUS

ELEMENT VALUES:

Codes	Attributes
0	No
1	Yes

Definition: This data element indicates if a school bus, or motor vehicle functioning as a school bus, is related to the crash.

Remarks:

The “school bus” can be:

- with or without a passenger State in which on board,
- involved as a contact motor vehicle, or
- indirectly involved as a non-contact motor vehicle.

A school bus is a motor vehicle used for the transportation of any school pupil at or below the 12th-grade level to or from a public or private school or school-related activity. A motor vehicle is not a school bus while on trips that involve the transportation exclusively of other passengers or exclusively for other purposes.

A motor vehicle is a school bus only if it is externally identifiable by the following characteristics:

1. Its color is yellow
2. The words “school bus” appear on the front and rear
3. Flashing red lights are located on the front and rear
4. Lettering on both sides identifies the school or school district served, or the company operating the bus

0 (No) is used when there is no indication of a school bus, or motor vehicle functioning as a school bus, being involved in the crash.

1 (Yes) is used when there is any indication that a school bus, or vehicle functioning as a school bus, is involved in any component of the crash.

For directly involved or contacted vehicles, **1 (Yes)** must be selected if the [Special Use](#) data element equals **02 (Vehicle Used for School Transport)**.

To capture those instances where the vehicle is involved indirectly (non-contact vehicle) the following rules apply:

- If the case materials indicate “School Bus” the assumption is that the Law Enforcement agency conformed to the definition of school bus, thus **1 (Yes)** School Bus Related.
- If there is no indication that a school bus was indirectly involved **0 (No)** must be selected.

Examples of School Bus Related (indirectly):

1. A police reported “school bus” stops on the roadway. Subsequently an approaching motor vehicle swerves to avoid the stopped bus and contacts another motor vehicle head-on.
2. A police report indicates that a “child” exited a “school bus” and was crossing in front of the stopped bus when a vehicle passed the bus on the left side and struck the child.

3. A line of cars is stopped for a school bus that is discharging passengers. A motor vehicle approaches and is unable to stop in time and strikes the last stopped motor vehicle in the line.

Examples of NOT School Bus Related:

1. An empty school bus, having completed its route, is parked alongside the road. A motor vehicle approaching from the rear loses control and strikes the bus.
2. A "Bus" is reported as stopped in traffic and a vehicle swerves to avoid the bus and contacts another vehicle. In this example, there is no positive indication of a "school bus" being involved.

Consistency Checks:

Check	IF	THEN
(3DOP)	SPECIAL USE for any vehicle equals 02,	SCHOOL BUS RELATED must equal 1.
(PB22)	SCHOOL BUS RELATED equals 1, and PERSON TYPE equals 05 or 08,	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN should equal 342.
(PB23)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 342, and PERSON TYPE equals 05 or 08,	SCHOOL BUS RELATED should equal 1.
(V330)	SCHOOL BUS RELATED equals 1,	BODY TYPE of at least one of the involved vehicles should equal 50 (School Bus), or SPECIAL USE for at least one involved vehicle should equal 02 - Vehicle Used as School Bus, or BUS USE for at least one vehicle should equal 01.
(V440)	BODY TYPE equals 50,	SCHOOL BUS RELATED should equal 1.

C28 - Rail Grade Crossing Identifier - FARS Only

FORMAT: 6 numeric followed by 1 alphabetic

SAS NAME: Accident.RAIL

ELEMENT VALUES:

Codes	Attributes
0000000	Not Applicable
nnnnnnA	Six Numeric, Followed by One Alphabetic Valid F.R.A. Codes
9999999	Unknown

Definition: This element identifies if the crash occurred in or near a Rail Grade Crossing.

Remarks: Code complete identifier. The format must always be six numbers followed by a letter. (Two exceptions: **0000000 (Not Applicable)** and **9999999 (Unknown)**.)

Identifiers are obtainable from your Federal Railroad Administration representative or by accessing the [Federal Railroad Administration Office of Safety Analysis](#).

0000000 (Not Applicable) is used for crashes that do not involve a rail grade crossing.

Code when any part of the crash occurs at a rail grade crossing. Include crashes in which a vehicle is waiting at a rail grade crossing but does not necessarily travel over the tracks.

Inform NHTSA if you have any problems obtaining identifiers.

Consistency Checks:

Check	IF	THEN
(1Y0P)	RELATION TO JUNCTION(b) equals 06,	RAIL GRADE CROSSING IDENTIFIER must not equal 0000000.
(650P)	TRAFFIC CONTROL DEVICE equals 65 for any vehicle,	RAIL GRADE CROSSING IDENTIFIER must not equal 0000000.
(651P)	RAIL GRADE CROSSING IDENTIFIER must equal BLANKS, 0000000, 9999999, or nnnnnnA; where n is a numeric character and A is an uppercase alphabetic character.	--
(750P)	RELATION TO JUNCTION(b) equals 07,	RAIL GRADE CROSSING IDENTIFIER must equal 0000000.

C29 - Notification Time EMS - FARS Only

FORMAT: 4 numeric

SAS NAME: Accident.NOT_HOUR; Accident.NOT_MIN

ELEMENT VALUES:

Codes	Attributes
8888	Not Applicable (Not Notified)
0000-2359	Valid Military Times
0099-2399	Known Hours but Unknown Minutes
9998	Unknown if Notified
9999	Unknown EMS Notification Time

Definition: Notification Time EMS is the time emergency medical service was notified.

Remarks: Every effort should be made to determine the Notification Time EMS, [Arrival Time EMS](#), and [EMS Time at Hospital](#).

Code the official EMS times ***in military times*** as received. **Do not alter the times because of discrepancies with the crash time. Code Notification Time of the first EMS unit to arrive on the scene.**

All EMS time formats are in hours and minutes. If you receive an EMS time that includes the seconds' position, truncate to the reported minutes. Example: 10:51:35 would be 10:51.

If the day of the crash and the day of EMS Notification have different dates, then be sure to use the [18 \(Date of Crash and Date of EMS Notification Were Not the Same Day\)](#) in [Related Factors-Crash Level](#). Code Notification Time EMS and [Arrival Time EMS](#) no matter how much time has elapsed since the [Crash Time](#).

8888 (Not Applicable [Not Notified])

Enter this code only if EMS was never notified as part of an emergency transport.

- If it is known that EMS transport was called for non-emergency transport purposes (e.g., to transport a body to the morgue) then use this code.
- DO NOT use this code if the EMS was officially canceled. Cancellation is coded under [Arrival Time EMS](#) and [EMS Time at Hospital](#).
- If the EMS was notified then canceled, code the actual notification time and [9997 \(Officially Canceled\)](#) under [Arrival Time EMS](#) and [EMS Time at Hospital](#).

0000 - 2359 (Valid Military Times), 0099 - 2399 (Known Hours but Unknown Minutes)

Code Notification Time of the first EMS unit to arrive on the scene. If unknown minutes, code the actual hour and “99” for the minutes. Code midnight as “0000.” One minute after midnight is coded “0001.” See remarks “How to Code Midnight” under [Crash Time](#).

9998 (Unknown if Notified)

Enter this attribute if you cannot determine whether or not any EMS was ever notified.

9999 (Unknown EMS Notification Time)

Enter this attribute if EMS was notified but the time of notification is unknown.

Helicopters that transport victims to treatment facilities are coded as EMS units, but not police who may be trained to render emergency aid. This guidance is not meant to exclude helicopters that are used to transport victims for treatment that may be owned by police departments.

Consistency Checks:

Check	IF	THEN
(A070)	NOTIFICATION TIME EMS is not 8888, 9998, or 9999,	NOTIFICATION TIME EMS should not be more than 120 minutes later than CRASH TIME.
(A540)	NOTIFICATION TIME EMS is not 8888, 9998, or 9999, and ARRIVAL TIME EMS is not 8888, 9997, 9998, 9999,	ARRIVAL TIME EMS should not be more than 120 minutes later than NOTIFICATION TIME EMS.
(A560)	NOTIFICATION TIME EMS is not 8888, 9998, or 9999, and EMS TIME AT HOSPITAL is not 8888, 9997, 9998, 9999,	EMS TIME AT HOSPITAL should not be more than 180 minutes later than NOTIFICATION TIME EMS.
(E01P)	NOTIFICATION TIME EMS equals 9998,	ARRIVAL TIME EMS must equal 9998, and EMS TIME AT HOSPITAL must equal 8888 or 9998.
(E03P)	ARRIVAL TIME EMS equals 8888,	NOTIFICATION TIME EMS and EMS TIME AT HOSPITAL must equal 8888.
(E04P)	NOTIFICATION TIME EMS equals 8888,	ARRIVAL TIME EMS and EMS TIME AT HOSPITAL must equal 8888.
(E07P)	ARRIVAL TIME EMS equals 9997,	NOTIFICATION TIME EMS must not equal 8888, 9998.
(E08P)	NOTIFICATION TIME EMS is not 8888, 9998, and EMS TIME AT HOSPITAL is not 8888, 9996, 9997, 9998,	ARRIVAL TIME EMS must not equal 9997 or 9998.
(P093)	all persons TRANSPORTED TO FIRST MEDICAL FACILITY BY equals 2, 4,	NOTIFICATION TIME EMS, ARRIVAL TIME EMS, EMS TIME AT HOSPITAL must equal 8888.

C30 - Arrival Time EMS - FARS Only

FORMAT: 4 numeric

SAS NAME: Accident.ARR_HOUR; Accident.ARR_MIN

ELEMENT VALUES:

Codes	Attributes
8888	Not Applicable (Not Notified)
0000-2359	Valid Military Times
0099-2399	Known Hours but Unknown Minutes
9997	Officially Canceled
9998	Unknown if Arrived
9999	Unknown EMS Scene Arrival Time

Definition: Arrival Time EMS is the time emergency medical service arrived on the crash scene.

Remarks: This excludes any transport by anyone other than EMS. (e.g., law enforcement, POV, etc.). Every effort should be made to determine the [Notification Time EMS](#), Arrival Time EMS, and [EMS Time at Hospital](#). Code the official EMS times *in military times* as received. ***Code the arrival time of the first EMS unit to arrive on the scene. Do not alter the times because of discrepancies with the crash time.***

All EMS time formats are in hours and minutes. If you receive an EMS time that includes the seconds' position, truncate to the reported minutes. Example: 10:51:35 would be 10:51.

Code [Notification Time EMS](#) and Arrival Time EMS no matter how much time has elapsed since the [Crash Time](#).

8888 (Not Applicable [Not Notified])

Enter this attribute only if EMS was never notified. DO NOT use this code if the EMS was notified then canceled.

0000 - 2359 (Valid Military Times), 0099 - 2399 (Known Hours but Unknown Minutes)

Code the arrival time of the first EMS unit to arrive on the scene. If unknown minutes, code the actual hour and "99" for the minutes. Code midnight as "0000." One minute after midnight is coded "0001." See remarks "How to Code Midnight" under [Crash Time](#).

9997 (Officially Canceled)

Enter this attribute if EMS was officially canceled.

9998 (Unknown if Arrived)

Enter this attribute if there is no indication of official cancellation, but there is uncertainty or doubt that EMS ever arrived on the scene or not.

9999 (Unknown EMS Scene Arrival Time)

Enter this code if EMS did arrive on scene, but the time of arrival is unknown.

Consistency Checks:

Check	IF	THEN
(A540)	NOTIFICATION TIME EMS is not 8888, 9998, or 9999, and ARRIVAL TIME EMS is not 8888, 9997, 9998, 9999,	ARRIVAL TIME EMS should not be more than 120 minutes later than NOTIFICATION TIME EMS.
(A550)	ARRIVAL TIME EMS is not 8888, 9997, 9998, or 9999, and EMS TIME AT HOSPITAL is not 8888, 9997, 9998, 9999,	EMS TIME AT HOSPITAL should not be more than 60 minutes later than ARRIVAL TIME EMS.
(E01P)	NOTIFICATION TIME EMS equals 9998,	ARRIVAL TIME EMS must equal 9998, and EMS TIME AT HOSPITAL must equal 8888 or 9998.
(E02P)	ARRIVAL TIME EMS equals 9998,	EMS TIME AT HOSPITAL must equal 8888 or 9998.
(E03P)	ARRIVAL TIME EMS equals 8888,	NOTIFICATION TIME EMS and EMS TIME AT HOSPITAL must equal 8888.
(E04P)	NOTIFICATION TIME EMS equals 8888,	ARRIVAL TIME EMS and EMS TIME AT HOSPITAL must equal 8888.
(E05P)	EMS TIME AT HOSPITAL equals 9997,	ARRIVAL TIME EMS must equal 9997.
(E06P)	ARRIVAL TIME EMS equals 9997,	EMS TIME AT HOSPITAL must equal 9997.
(E07P)	ARRIVAL TIME EMS equals 9997,	NOTIFICATION TIME EMS must not equal 8888, 9998.
(E08P)	NOTIFICATION TIME EMS is not 8888, 9998, and EMS TIME AT HOSPITAL is not 8888, 9996, 9997, 9998,	ARRIVAL TIME EMS must not equal 9997 or 9998.
(P093)	all persons TRANSPORTED TO FIRST MEDICAL FACILITY BY equals 2, 4,	NOTIFICATION TIME EMS, ARRIVAL TIME EMS, EMS TIME AT HOSPITAL must equal 8888.

C31 - EMS Time at Hospital - FARS Only

FORMAT: 4 numeric

SAS NAME: Accident.HOSP_HR; Accident.HOSP_MN

ELEMENT VALUES:

Codes	Attributes
8888	Not Applicable (Not Transported)
0000-2359	Valid Military Times
0099-2399	Known Hours but Unknown Minutes
9996	Terminated Transport
9997	Officially Canceled
9998	Unknown if Transported
9999	Unknown EMS Hospital Arrival Time

Definition: EMS Time at Hospital is the time emergency medical service arrived at the treatment facility to which it was transporting victims of the crash.

Remarks: This excludes any transport by anyone other than EMS (e.g., law enforcement, POV, etc.). Every effort should be made to determine the [Notification Time EMS](#), [Arrival Time EMS](#), and EMS Time at Hospital.

Code the official EMS times *in military times* as received. ***Code the EMS time at hospital of the unit transporting the most severely injured victim. The most severely injured victim includes (and usually is) the victim who dies en route to the treatment facility or later, but not the one who dies on-scene. Do not alter the times because of discrepancies with the crash time.***

All EMS time formats are in hours and minutes. If you receive an EMS time that includes the seconds' position, truncate to the reported minutes. Example: 10:51:35 would be 10:51.

Questions arise when there is more than one EMS unit or when there is more than one injured person. Code EMS Time at Hospital according to the following guidelines:

8888 (Not Applicable [Not Transported])

Use this attribute if all the injuries are on-scene fatalities (no one is transported for treatment.) Also use this attribute if there are live victims, but no one is transported to a treatment facility by EMS.

0000 - 2359 (Valid Military Time), 0099 - 2399 (Known Hours but Unknown Minutes)

Code the EMS time at hospital of the unit transporting the most severely injured victim. The most severely injured victim includes (and usually is) the victim who dies en route to the treatment facility or later, but not the one who dies on-scene.

If unknown minutes, code the actual hour and “99” for the minutes. Code midnight as “0000.” One minute after midnight is coded “0001.” See remarks “How to Code Midnight” under [Crash Time](#).

9996 (Terminated Transport)

Enter this attribute if there is indication that EMS was notified, arrived at the scene but while in transit terminated the trip to hospital because the person died en route. This attribute should not be used when there is a hospital arrival time available for a person dead on arrival at the hospital.

9997 (Officially Canceled)

Enter this attribute if EMS was officially canceled before on scene.

9998 (Unknown if Transported)

Enter this attribute if there is no indication of official cancellation, but there is un-certainty or doubt that any victims were transported for treatment or not.

9999 (Unknown EMS Hospital Arrival Time)

Enter this attribute if EMS transported victims for treatment, but the time of arrival at the hospital or treatment facility is unknown.

Consistency Checks:

Check	IF	THEN
(A550)	ARRIVAL TIME EMS is not 8888, 9997, 9998, or 9999, and EMS TIME AT HOSPITAL is not 8888, 9997, 9998, 9999,	EMS TIME AT HOSPITAL should not be more than 60 minutes later than ARRIVAL TIME EMS.
(A551)	EMS TIME AT HOSPITAL equals 8888, 9997, 9998,	TRANSPORTED TO FIRST MEDICAL FACILITY BY should not equal 1, 3, 5 for any PERSON.
(A560)	NOTIFICATION TIME EMS is not 8888, 9998, or 9999, and EMS TIME AT HOSPITAL is not 8888, 9997, 9998, 9999,	EMS TIME AT HOSPITAL should not be more than 180 minutes later than NOTIFICATION TIME EMS.
(E01P)	NOTIFICATION TIME EMS equals 9998,	ARRIVAL TIME EMS must equal 9998, and EMS TIME AT HOSPITAL must equal 8888 or 9998.
(E02P)	ARRIVAL TIME EMS equals 9998,	EMS TIME AT HOSPITAL must equal 8888 or 9998.
(E03P)	ARRIVAL TIME EMS equals 8888,	NOTIFICATION TIME EMS and EMS TIME AT HOSPITAL must equal 8888.
(E04P)	NOTIFICATION TIME EMS equals 8888,	ARRIVAL TIME EMS and EMS TIME AT HOSPITAL must equal 8888.
(E05P)	EMS TIME AT HOSPITAL equals 9997,	ARRIVAL TIME EMS must equal 9997.
(E06P)	ARRIVAL TIME EMS equals 9997,	EMS TIME AT HOSPITAL must equal 9997.
(E08P)	NOTIFICATION TIME EMS is not 8888, 9998, and EMS TIME AT HOSPITAL is not 8888, 9996, 9997, 9998,	ARRIVAL TIME EMS must not equal 9997 or 9998.
(P091)	TRANSPORTED TO FIRST MEDICAL FACILITY BY equals 1, 3, 5,	EMS TIME AT HOSPITAL should not equal 8888, 9997, 9998.
(P093)	all persons TRANSPORTED TO FIRST MEDICAL FACILITY BY equals 2, 4,	NOTIFICATION TIME EMS, ARRIVAL TIME EMS, EMS TIME AT HOSPITAL must equal 8888.
(P095)	TRANSPORTED TO FIRST MEDICAL FACILITY BY equals 0 for every person in the case,	EMS TIME AT HOSPITAL must not equal 0000-2399, 9999.
(P510)	EMS TIME AT HOSPITAL equals 8888, 9997, 9998,	DIED AT SCENE/EN ROUTE should not equal 8 for any PERSON.
(P530)	EMS TIME AT HOSPITAL equals 9996,	DIED AT SCENE/EN ROUTE must equal 8 for at least one person.
(P54P)	DIED AT SCENE/EN ROUTE equals 8,	EMS TIME AT HOSPITAL should not equal 8888, 9997, 9998.

C32 - Related Factors – Crash Level

27	<u>Backup Due to Prior Crash</u>
28	<u>Backup Due to Regular Congestion</u>
99	<u>Reported as Unknown</u>

*** FARS ONLY ATTRIBUTES**

Definition: This element identifies factors related to the crash expressed by the investigating officer.

Remarks: Code information provided by the investigating officer in the narrative or contributing factors/circumstances field on the crash report.

For attributes **01-07**, if the officer states “the witness said,” these should not be coded. Care must be used in coding these attributes. The police crash report should state that the environmental condition was a factor or existed at this location; cannot be inferred.

Attributes 13-28 - SPECIAL CIRCUMSTANCES, are exceptions to the prior remarks. These are codes for unusual factors that occurred during the crash. If you can determine that any of these factors did happen, then these codes should be used.

This element can be coded in conjunction with other elements even if similar information is identified; for example, if a traffic control is temporarily down, it can be coded under both [DEVICE FUNCTIONING](#) and RELATED FACTORS-CRASH LEVEL [01 \(Inadequate Warning of Exits, Lanes Narrowing, Traffic Controls, etc.\)](#). In the case that more than three factors are identified, you may omit factors that are coded/identifiable in other elements.

00 (None) is used when no applicable related factors are noted in the case materials. Zero-fill all fields. Also, use **00 (None)** to complete the remaining fields when you will be recording less than three crash related factors. DO NOT leave any remaining fields blank.

***01 (Inadequate Warning of Exits, Lanes Narrowing, Traffic Controls, etc.)** is used when the case materials identify that there was inadequate warning provided to motorists associated with the trafficway. In the case of more than three applicable factors, this attribute takes precedence over [06 \(Inadequate Construction or Poor Design of Roadway, Bridge, etc.\)](#) and [03 \(Other Maintenance or Construction-Created Condition\)](#). Do not use this attribute in situations that would include construction sites or work areas (see [03 \(Other Maintenance or Construction-Created Condition\)](#)).

Examples include:

- Inadequate warning due to obscured signs.
- Inadequate warning because signs were temporarily down.
- Lack of necessary signage (e.g., merge or diverge warning, downhill grade).

***02 (Shoulder Design or Condition)** is used when the case materials identify problem conditions pertaining to the actual design or condition of the shoulder. In the case of more than three applicable factors, this attribute takes precedence over [06 \(Inadequate Construction or Poor Design of Roadway, Bridge, etc.\)](#) and [03 \(Other Maintenance or Construction-Created Condition\)](#).

Examples include:

- Soft or collapsing shoulders.
- Inadequate shoulder width.
- Shoulder is at a different level from the roadway (e.g., drop-off, lifted, not flat).

03 (Other Maintenance or Construction-Created Condition) is used when the case materials identify problem conditions pertaining to “inadequate maintenance” of the roadway (e.g., potholes, ruts in roadway) or conditions cited by the officer that are related to construction activity (e.g., addition of barricades, change in traffic patterns, merging lanes, etc.).

***04 (No or Obscured Pavement Marking)** is used when the case materials identify problem conditions pertaining to any pavement marking situations. In the case of more than three applicable factors, this attribute takes precedence over [06 \(Inadequate Construction or Poor Design of Roadway, Bridge, etc.\)](#) and [03 \(Other Maintenance or Construction-Created Condition\)](#).

Examples include:

- New asphalt that has covered old pavement markings.
- Areas where pavement marking has worn off.
- The case materials mention ice/snow/mud was obscuring the pavement markings.

05 (Surface Under Water) is used when the case materials identify that the roadway surface is under water beyond normal accumulation (i.e., depth of water). Also use this attribute when the case materials mention situations where the roadway is permanently under water (i.e., fords). In the case of more than three applicable factors, this attribute takes precedence over [**06 \(Inadequate Construction or Poor Design of Roadway, Bridge, etc.\)**](#) and [**03 \(Other Maintenance or Construction-Created Condition\)**](#).

***06 (Inadequate Construction or Poor Design of Roadway, Bridge, etc.)** is used when the case materials identify problems with the roadway design. This attribute does not include shoulder-related situations, pavement marking situations, or situations with inadequate warnings (See attributes [**01 \(Inadequate Warning of Exits, Lanes Narrowing, Traffic Controls, etc.\)**](#), [**02 \(Shoulder Design or Condition\)**](#), and [**04 \(No or Obscured Pavement Marking\)**](#)).

Examples include:

- Original design of the trafficway (i.e., roadway bridges, medians, guardrails, traffic barriers) is poor.
- Blind intersections due to highway design, not due to visual obstructions (i.e., shrubbery) etc.
- Improper banking.
- Lack of a lane for merging.
- Inadequate road surface (dirt, gravel surfaces, etc.); however, this must not be inferred; must be explicitly stated in police report as a “factor.”

07 (Surface Washed Out [caved-in, road slippage]) is used when the case materials identify the roadway was previously washed out, caved-in, or had slipped due to prior events associated with the environment (e.g., flooding, earthquakes, etc.).

12 (Distracted Driver of a Non-Contact Vehicle) is used for situations where the investigating officer indicates that the driver of a non-contact vehicle (“phantom vehicle”) was distracted.

13 (Aggressive Driving/Road Rage by Non-Contact Vehicle Driver) is only used for situations where the investigating officer indicates that a non-contact vehicle (“phantom vehicle”) was being operated aggressively. The officer must use the term “Aggressive” in describing a driver’s behavior. This can be indicated in the case materials under related/contributing factors/circumstances or in the narrative. You may encounter the term “Road Rage” used to describe aggressive driving behavior. Always be cautious with this term as the two terms are not technically interchangeable. For contact vehicles, see Driver Level-Related Factor [**08 \(Aggressive Driving/Road Rage\)**](#).

14 (Motor Vehicle Struck by Falling Cargo, or Something That Came Loose from, or Something that was Set-In-Motion by a Vehicle) is used when the case materials identify that a vehicle became a contact vehicle in the crash as a result of being struck by cargo or objects that fell from another vehicle or by something that was set-in-motion by another vehicle. The term “set-in-motion” generally applies to non-fixed or fixed objects struck and propelled by a vehicle (including pedestrians or parked vehicles). This can also include a circumstance where one vehicle overrides another and then directs or controls the overridden vehicle’s movement.

Examples include:

- Cargo falls from a truck (in-transport) and lands on another motor vehicle in-transport or a parked vehicle.
- A car runs off the roadway at an intersection, hits a stop sign and propels the stop sign into a vehicle traveling on the intersecting roadway.
- A motorcycle rider overturns in a curve, the rider is separated from the vehicle and the rider slides across the centerline into a vehicle traveling in the opposing lanes.
- A tractor trailer overrides a passenger car and with the car still pinned under the truck, the combined vehicles continue on to contact other objects.

15 (Non-Occupant Struck by Falling Cargo, or Something That Came Loose from, or Something that was Set-in-Motion by a Vehicle) is used when the case materials identify that a non-occupant (e.g., pedestrian, bicyclist, person on personal conveyance) was struck by cargo or objects that fell from a motor vehicle or by something that was set-in-motion by motor vehicle. The term “set-in-motion” generally applies to non-fixed or fixed objects struck and propelled by a vehicle (including pedestrians or parked vehicles).

Examples include:

- Cargo falls from a truck (in-transport) and lands on a bicyclist on the shoulder.
- A car runs off the roadway at an intersection, hits a stop sign and propels the stop sign into skateboarder waiting to cross the intersection.
- A car strikes a deer in the roadway and propels the deer into person jogging on the sidewalk.

16 (Non-Occupant Struck Vehicle) is used when the case materials identify that a non-occupant (e.g., pedestrian, bicyclist, person on personal conveyance) “struck” or “ran into” a motor vehicle (usually the side or back of the vehicle). **This does not include non-occupants which are struck in the vehicle's path of travel.**

Examples include:

- A bicyclist runs into the mirror of a parked car and falls into the path of a motor vehicle in-transport.
- A runner collides with the side of a vehicle that comes to a sudden stop and the runner is subsequently struck by another vehicle.

17 (Vehicle Set-In-Motion by Non-Driver) is used when the case materials identify the crash involved a passenger's action.

Examples include:

- Passenger shifting gears on the vehicle.
- Passenger hitting the accelerator.
- Passenger turning the ignition key or hitting the ignition button.

NOTE: This attribute is different from Related Factors-Person Level [05 \(Interfering with the Driver\)](#).

***18 (Date of Crash and Date of EMS Notification Were Not the Same Day)** is used when the crash victim(s) is not discovered immediately or when the effects of the crash are not immediately known.

19 (Recent Previous Crash Scene Nearby) is used when the case materials identify that a previous crash somehow influenced or contributed to the occurrence of this crash.

Examples include:

- A change in the traffic patterns.
- An obstruction on the roadway.
- A reduction in traffic speed.
- Occupants and/or vehicles on the roadway.

20 (Police Pursuit Involved) is used when the case materials identify a police pursuit had been initiated by the police and was active at the time of the crash. This attribute is also used when a pursuit had been initiated and terminated, but the pursuit action is still related to the crash. This applies for both air and ground pursuing vehicles. To identify the individual(s) involved in the pursuit, please see [Related Factors-Driver Level](#) for [37 \(Police Pursuing this Driver or Police Officer in Pursuit\)](#).

Definition of Police Pursuit: A pursuit is an event that is initiated when a law enforcement officer, operating an authorized emergency vehicle, gives notice to stop (either through the use of visual or audible emergency signals or a combination of emergency devices) to a motorist who the officer is attempting to apprehend, and that motorist fails to comply with the signal by either maintaining his/her speed, increasing speed, or taking other evasive action to elude the officer's continued attempts to stop the

motorist. A pursuit is terminated when the motorist stops, or when the attempt to apprehend is discontinued by the officer or at the direction of a competent authority.

21 (Within Designated School Zone) is used when the case materials identify the crash occurred in an area signed or marked as a “School Zone.” This may or may not be school-bus-related. “School Zones” are zones near or at a school that exist during months and hours when zone signing is in effect.

***22 (Speed Limit is a Statutory Limit as Recorded or was Determined as This State's “Basic Rule”)** is used when the case materials identify there is no posted speed limit but the state law sets the maximum speed limit on a local road or street.

23 (Indication of a Stalled/Disable Vehicle) is used when the case materials identify that a stalled or mechanically disabled vehicle was somehow related to the crash. It includes both contact and non-contact vehicles that are stalled/disabled for mechanical reasons not due to crash-related damage.

Examples include:

- A pedestrian is struck when walking from their stalled vehicle.
- A vehicle is stalled in the travel lanes causing another vehicle to lose control and crash.

24 (Unstabilized Situation Began and All Harmful Events Occurred Off of the Roadway) is used when the case materials identify the unstabilized situation began within the trafficway but off the roadway and all harmful events occurred off the roadway.

Examples include:

- A vehicle stopped on the roadside begins to accelerate to re-enter the roadway and runs into a ditch and overturns.
- An ATV is driving along the roadside and strikes a tree stump.
- A vehicle strikes a pedestrian while driving down the road shoulder.

25 (Toll Booth/Plaza Related) is used when the case materials identify that the crash occurred at or in the vicinity of a toll booth (manned or unmanned) or a toll plaza. These are crashes that occur in the upstream approach to the toll booth/plaza area and continues as the approach area (where the toll road begins to widen) leading up to the toll booths and in the departure area where the road begins to narrow leading back to the normal number of lanes comprising the toll road downstream departure area. See [Figure 11](#)

26 (Backup Due to Prior Non-Recurring Incident) is used when the case materials identify that the crash occurred in or related to an area of the trafficway where there was congestion on the roadway caused by an unusual and unplanned event.

Examples include:

- A tractor trailer transporting a trailer designated as a Wide Load.
- Debris in the roadway causing a backup.
- Backup due to traffic going to or coming from a funeral procession, sporting event, parade, or traffic signal outage.

27 (Backup Due to Prior Crash) is used when the case materials identify there was an accumulation of traffic caused by vehicles slowing or stopping due to traffic flow being impacted by a prior crash. The distance from the prior crash does not matter; only the relevance to this crash.

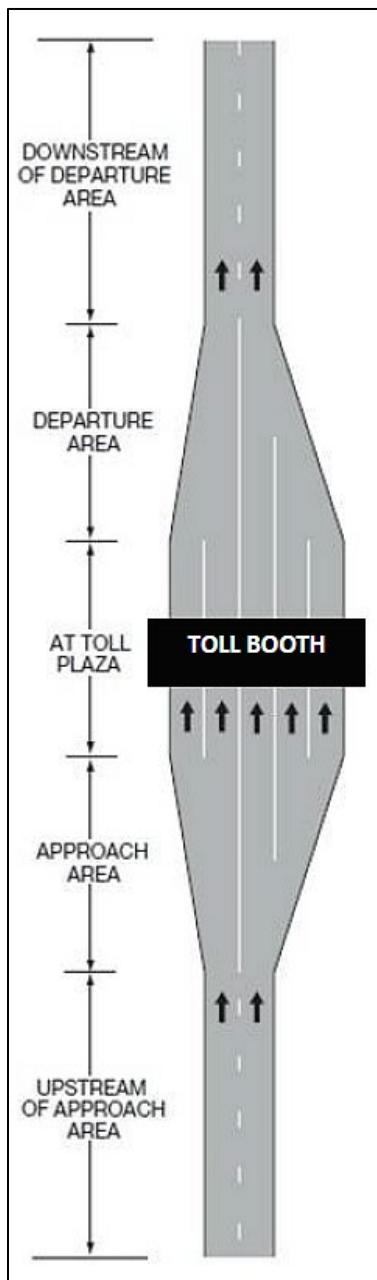

28 (Back up Due to Regular Congestion) is used when the case materials identify the crash occurred in or related to an area of trafficway where there was congestion due to heavy traffic during rush hour.

99 (Reported as Unknown) is used when the circumstances surrounding the crash are unknown and reported as **Unknown** by the investigating officer. In these circumstances, nine-fill all fields. If **99 (Reported as Unknown)** is used for any field, ALL fields must be **99 (Reported as Unknown)**. DO NOT leave any remaining fields blank.

Consistency Checks:

Check	IF	THEN
(1A0P)	RELATED FACTORS-CRASH LEVEL equals 14,	NUMBER OF VEHICLE FORMS SUBMITTED must be greater than 001.
(1A1P)	RELATED FACTORS-CRASH LEVEL equals 05,	ROADWAY SURFACE CONDITIONS must equal 06 for at least one vehicle.
(640F)	TRAFFIC CONTROL DEVICE equals 23 for any vehicle,	RELATED FACTORS-CRASH LEVEL should equal 21.
(641F)	RELATED FACTORS-CRASH LEVEL equals 21,	TRAFFIC CONTROL DEVICE should not equal 00 for every vehicle.
(642F)	TRAFFIC CONTROL DEVICE equals 00 for any vehicle,	RELATED FACTORS-CRASH LEVEL should not equal 21.
(840P)	any RELATED FACTORS-CRASH LEVEL equals 99,	all RELATED FACTORS-CRASH LEVEL must equal 99.
(850P)	the first RELATED FACTORS-CRASH LEVEL equals 00,	all RELATED FACTORS-CRASH LEVEL must be 00. If the second equals 00, then the third must also.
(860P)	any RELATED FACTORS-CRASH LEVEL is blank,	all RELATED FACTORS-CRASH LEVEL must be blanks.
(870P)	A RELATED FACTORS-CRASH LEVEL 01-07, 12- 28 can be used only once per crash.	--
(880F)	RELATED FACTORS-CRASH LEVEL equals 16,	there must be a Person Level (Not a MV Occupant) form with PERSON TYPE equal to 04-08, 19.
(890F)	RELATED FACTORS-CRASH LEVEL equals 15,	there must be a Person Level (Not a MV Occupant) form with PERSON TYPE equal to 04-08, 10, 19.
(8L8S)	AREAS OF IMPACT (THIS VEHICLE) equals 18, 19, or 20 in the CRASH EVENTS and the corresponding event in that row equals 14, 45, or 54,	RELATED FACTORS-CRASH LEVEL must equal 14.
(8L8T)	RELATED FACTORS-CRASH LEVEL equals 14,	there must exist at least one event in the CRASH EVENTS where AREAS OF IMPACT (THIS VEHICLE or OTHER VEHICLE) equals 18, 19, or 20 and the corresponding event in that row equals 14, 45, or 54.
(8L8U)	AREAS OF IMPACT (THIS VEHICLE) equals 18, 19, or 20 in the CRASH EVENTS and the corresponding event in that row equals 08, 09, 15, 49,	RELATED FACTORS-CRASH LEVEL must equal 15.
(8L8V)	RELATED FACTORS-CRASH LEVEL equals 15,	there must exist at least one event in the CRASH EVENTS where AREAS OF IMPACT (THIS VEHICLE) equals 18, 19, or 20, and the corresponding event in that row equals 08-10, 15, 18, 49, or 91.

Check	IF	THEN
(AM1P)	FIRST HARMFUL EVENT equals 54, or SEQUENCE OF EVENTS equals 54 for any vehicle,	one RELATED FACTORS-CRASH LEVEL must equal 14.
(D470)	any RELATED FACTORS-DRIVER LEVEL equals 37,	at least one RELATED FACTORS-CRASH LEVEL should equal 20.
(D500)	VIOLATIONS CHARGED equals 05,	at least one RELATED FACTORS-CRASH LEVEL should equal 20.
(PB63)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 230,	at least one RELATED FACTORS - CRASH LEVEL should equal 19 or 23.

C33 - Interstate Highway - CRSS Only

FORMAT: 1 numeric

SAS NAME: Accident.Int_Hwy

ELEMENT VALUES:

Codes	Attributes
0	<u>No</u>
1	<u>Yes</u>
9	<u>Unknown</u>

Definition: This element identifies whether or not the crash occurred on an interstate highway. Interstate highway is a Federal Highway Administration classification.

Remarks: The Interstate Highway System includes those trafficways that are within the national system for interstate transport and defense purposes. Interstates typically have limited access and multiple lanes of travel.

Crashes that occur on ramps leading to or away from an Interstate should be coded 1 (Yes).

0 (No) is used when the police crash report indicates that the crash occurred on any of the following: U.S. Highway, State Highway, County Road, Township Road, or Municipal Road.

1 (Yes) is used when the police crash report indicates the crash occurred on an interstate highway. Some police crash reports use a specific block to indicate interstate. Interstate can also be identified by the prefix "I" used in the roadway name.

9 (Unknown) is used when it cannot be determined whether the trafficway where the crash occurred was an interstate or not.

Consistency Checks:

Check	IF	THEN
(A3G0)	INTERSTATE HIGHWAY equals 1, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) is not equal to 03 or 05 or 20,	TOTAL LANES IN ROADWAY should not equal 1 for at least one vehicle involved in the FIRST HARMFUL EVENT.
(A3H0)	INTERSTATE HIGHWAY equals 1, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) is not equal to 03 or 05 or 20,	TRAFFICWAY DESCRIPTION should not equal 4 for at least one vehicle involved in the FIRST HARMFUL EVENT.
(A3I0)	INTERSTATE HIGHWAY equals 1,	RELATION TO JUNCTION (b) should not equal 02, 04, 06, 08, or 16.
(A3J0)	INTERSTATE HIGHWAY equals 1, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) is not equal to 03 or 05 or 20,	SPEED LIMIT should not equal 01-40 for at least one vehicle involved in the FIRST HARMFUL EVENT.
(A3K0)	FIRST HARMFUL EVENT equals 10,	INTERSTATE HIGHWAY should not equal 1.
(A930)	INTERSTATE HIGHWAY equals 1, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) is not equal to 03 or 05 or 20,	TRAFFIC CONTROL DEVICE should not equal 01-03, 20, 23, or 65 for at least one vehicle involved in the FIRST HARMFUL EVENT.

C34 - Stratum - CRSS Only

FORMAT: 1 numeric

SAS NAME: Accident.Stratum

ELEMENT VALUES:

Codes	Stratum Numbers
2	Stratum 2
3	Stratum 3
4	Stratum 4
5	Stratum 5
6	Stratum 6
7	Stratum 7
8	Stratum 8
9	Stratum 9
10	Stratum 10

Definition: The CRSS stratum applicable to this police crash report.

Remarks: Only motor vehicle traffic crashes are included in the CRSS. See the current **CRSS Sampling Manual**, for the definition of a CRSS crash.

CRSS Strata Definitions

Stratum #	Definition
Stratum 2	Crashes involving at least one injured (A, B, C, or ISU*) or Killed (K) person who was not in a motor vehicle (i.e., non-motorist).
Stratum 3	Crashes not qualifying for Stratum 2 involving at least one injured (A, B, C, or ISU*) or Killed (K) occupant of a motorcycle or moped.
Stratum 4	Crashes not qualifying for Strata 2 or 3 involving at least one occupant of a late model year (LMY) passenger vehicle who was injured with a Suspected Serious Injury (A) or Killed (K).
Stratum 5	Crashes not qualifying for Strata 2, 3, or 4 involving at least one occupant of a non-late model year (NLMY) passenger vehicle who was injured with a Suspected Serious Injury (A) or Killed (K).
Stratum 6	Crashes not qualifying for Strata 2, 3, 4, or 5 involving at least one occupant of a late model year (LMY) passenger vehicle who was injured (B, C, or ISU*).
Stratum 7	Crashes not qualifying for Strata 2, 3, 4, 5, or 6 involving at least one medium or heavy truck or bus (includes school bus, transit bus, and motor coach) with GVWR equal to or greater than 10,001 pounds.
Stratum 8	Crashes not qualifying for Strata 2, 3, 4, 5, 6, or 7 involving at least one occupant of a non-late model year (NLMY) passenger vehicle who was injured (B, C, or ISU*).
Stratum 9	Crashes not qualifying for Strata 2, 3, 4, 5, 6, 7, or 8 involving at least one late model year (LMY) passenger vehicle <u>AND</u> no one in the in-transport vehicle(s) were injured (A, B, C, or ISU*) or Killed (K).
Stratum 10	Crashes not qualifying for Strata 2, 3, 4, 5, 6, 7, 8, or 9.

*ISU = Injured, Severity Unknown

Important Notes:

- A. In stratum 2, non-motorist does not include occupants of a motor vehicle not in-transport.
- B. Motor vehicles that are not in-transport are not considered for stratification. Likewise, injuries sustained by occupants of motor vehicles that are not in-transport are also not considered for stratification.
- C. A motor vehicle with no occupants that is in-transport IS considered in the stratification.
- D. Late model year (LMY): the vehicle model year is equal to the crash year, the following year, or 4 prior years.
- E. Non-late model year (NLMY): the vehicle model year is older than 4 prior years or the model year of the vehicle is unknown.

Unstabilized Situations

As defined by [ANSI D-16 7th Edition](#), Section 2.4.4, “An unstabilized situation is a set of events not under human control. It originates when control is lost and terminates when control is regained, or in the absence of persons who are able to regain control, when all persons and property are at rest.” “Property” can refer to the involved vehicles, separated components of the vehicles, cargo, or objects set in motion. The duration of an unstabilized situation establishes the beginning and end of an individual crash.

At times, one police crash report may contain more than one crash. This may happen when events constituting a crash have stabilized and units involved in the first sequence are subsequently involved in another crash sequence and recorded on the same police crash report. If more than one crash is recorded on a police crash report, ALL of the crashes are to be listed and stratified separately. This includes CRSS, NTS, and those that are Out-of-Scope. In a multi-vehicle crash, if it cannot be determined conclusively that all persons and property had come to rest at some point prior to the involvement of all vehicles listed on the police crash report, the events would be part of a single unstabilized situation and thus considered one crash.

Consistency Check (CRSS Only):

Check	Language
(5AAP)	The Final Stratum should equal the Original Stratum.

C35 - Police Jurisdiction - CRSS Only

FORMAT: 3 numeric

SAS NAME: Accident.PJ

ELEMENT VALUES:

Codes	Attributes
001-128	Range

Definition: The number (range 1 through 120) of the police jurisdiction from which the police crash report was originally sampled.

Remarks: This is the police jurisdiction from which the police crash report is selected; it is written at the top of the police crash report and is prefaced by the character “PJ.” The police jurisdiction may also be shown as the second of three numbers separated by -s. The first number in the set of three is the primary sampling unit, the second is the police jurisdiction, and the third is the police crash report number. The jurisdiction number written on the police crash report must match the number shown in the “CRSS Input Form” police crash report/Jurisdiction field.

Additional State Information

Additional State Information

FORMAT: Alphanumeric

SAS NAME: None

ELEMENT VALUES:

- Blanks
- Any Alphanumeric Characters

Remarks: This space is reserved for each individual state's use. Suggested uses depend on potential needs of the state. This space may contain:

1. Police Crash Report number.
2. Additional crash location information.

If HPMS number is available, it may be inserted here.

V3 - Vehicle Number – Vehicle Level

FORMAT: 3 numeric

SAS NAME: Vehicle.Veh_No; Parkwork.VEH_NO

ELEMENT VALUES:

- 001-999

Definition: This element identifies the number assigned to this vehicle in the crash.

Remarks: Each motor vehicle in a crash must be assigned a unique number. The numbers assigned to vehicles must be consecutive, starting with 001 with no missing numbers.

Motor vehicles are assigned the police crash report's vehicle number unless a number is skipped because of a non-contact vehicle included on the police crash report with a vehicle number or a non-motorist included with a unit number.

Consistency Checks:

Check	IF	THEN
(060P)	VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is not equal to 000,	the VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST must equal some VEHICLE NUMBER in the case, and the UNIT TYPE must equal 1.
(CSI5)	VEHICLE NUMBER at the Person Level is greater than 000,	VEHICLE NUMBER at the Person Level must equal a VEHICLE NUMBER at the Vehicle Level.
(CSI6)	For each VEHICLE NUMBER, PERSON NUMBERS must be consecutive, beginning with 001 and with no gaps.	--
(PBA0)	PEDESTRIAN/ BIKE TYPING - CRASH TYPE - BICYCLE equals 111, 211, 212, and VEHICLE NUMBER - VEHICLE LEVEL equals VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 11.
(PBA1)	PEDESTRIAN/ BIKE TYPING - CRASH TYPE - BICYCLE equals 112, 151, 213, 214, 217, or 218, and VEHICLE NUMBER - VEHICLE LEVEL equals VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 10.

V4 - Number of Occupants

FORMAT: 2 numeric

SAS NAME: Vehicle.Numocc; Parkwork.PNUMOCCS

ELEMENT VALUES:

Codes	Attributes
00	<u>None</u>
01-98	<u>Actual Value* [if Total Known]</u>
99	<u>Unknown</u>

Definition: This element identifies the number of occupants in each vehicle.

Remarks: This data element must be coded for each motor vehicle involved in the crash. Code the total number of occupants (**injured and uninjured**) in this motor vehicle. In bus crashes, the total number of occupants, including the driver, must be entered.

00 (None) is used when this motor vehicle is unoccupied.

01-98 (Actual Value* [If Total Known]) is used when the number of occupants in the vehicle is known. [Person Level \(MV Occupant\) forms](#) should be submitted for all known occupants (even if there is no information in the case materials).

Buses are an exception. For buses ([Body Types 50-52, 55, 58,59](#)), the total number of occupants, including the driver, should be recorded, but [Person Level \(MV Occupant\) forms](#) should only be submitted for occupants known to be injured and for the driver, whether the driver is known to be injured or not. **NOTE:** This does NOT apply to small van-based buses ([Body Type 21](#)). Always submit a person level form for all occupants of van-based vehicles, including small van-based buses.

99 (Unknown) is used when the number of occupants for the motor vehicle is unknown. Unless evidence clearly establishes the number of occupants present, this code is used when this motor vehicle is a “hit-and-run” vehicle.

If the actual number of motor vehicle occupants is unknown, [Person Level \(MV Occupant\) forms](#) should be submitted for all known occupants (even if there is no information on the police crash report).

Buses are an exception. For buses ([Body Types 50-52, 55, 58, 59](#)), if the total number of occupants is unknown, Person Level (MV Occupant) forms should be submitted for the driver (if there was one) and all occupants known to be injured. This does NOT apply to small van-based buses ([Body Type 21](#)). If the total number of occupants is unknown for small van-based buses (Body Type 21), always submit a person level form for all known occupants (even if there is no information in the case materials).

Also use **99 (Unknown)** when the State reports information only on drivers and INJURED passengers and the total number of occupants is unknown.

* Values greater than 30 are unlikely and will raise a “U” flag.

Consistency Checks:

Check	IF	THEN
(2F0F)	NUMBER OF OCCUPANTS equals 00,	DRIVER PRESENCE must equal 0.
(4C1P)	NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 01-05, 07-09, 14, 15, 17, 19, 94, 95, 96, 97, and VEHICLE TRAILING does NOT equal 0,	NUMBER OF OCCUPANTS must not be greater than 20.
(4C2P)	NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 06, 11, 16, and VEHICLE TRAILING does NOT equal 0,	NUMBER OF OCCUPANTS must not be greater than 22.

(V430)	NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 98, 99, and VEHICLE TRAILING does NOT equal 0,	NUMBER OF OCCUPANTS should not be greater than 5.

V5 - Unit Type

FORMAT: 1 numeric

SAS NAME: Vehicle.UNITTYPE; Parkwork.PTYPE

ELEMENT VALUES:

Codes	Attributes
1	Motor Vehicle In-Transport (Inside or Outside the Trafficway)
2	Motor Vehicle Not In-Transport Within the Trafficway
3	Motor Vehicle Not In-Transport Outside the Trafficway
4	Working Motor Vehicle (Highway Construction, Maintenance, Utility only)

Definition: This element identifies the type of unit that applies to this motor vehicle at the time it became an involved vehicle in the crash and was reported as a unit on the police crash report.

Remarks: IMPORTANT: Remember, you must have at least one motor vehicle “In-Transport” involved in the crash for this to be a reportable case.

NOTE: For Unit Type attributes “2-4,” you must only submit selected elements on the Vehicle Level. [V15](#), [V25](#), and [V32](#) are not coded. Also, all elements on the Driver level must be left blank, except [D4 \(Driver Presence\)](#) and [D24 \(Related Factors-Driver Level\)](#). Related Factors-Driver Level must be coded all “00.”

1 (Motor Vehicle In-Transport [Inside or Outside the Trafficway]) is used to indicate that this is a motor vehicle in-transport. “In-Transport” means any part of the vehicle’s primary outline as defined by the four sides of the vehicle (excluding open doors or mirrors) or load, if any, is within the roadway (travel lanes) or the vehicle is in motion anywhere within or outside the trafficway boundaries. If it can’t be determined if a not in-transport, non-working motor vehicle is within or outside the trafficway, default to [3 \(Motor Vehicle Not In-Transport Outside the Trafficway\)](#).

Examples:

1. Motor vehicle in traffic on the highway.
2. Motionless motor vehicle abandoned on the roadway travel lanes.
3. Motor vehicle on roadway stopped at traffic signal.
4. Motor vehicle driving or in motion on the shoulder, median, or roadside.
5. Motor vehicle driving down a private driveway.
6. Motor vehicle in motion, outside the trafficway boundaries (e.g., vehicle pulling up to a pump in a gas station, not within trafficway; vehicle in motion in a parking lot aisle; lawn tractor driving in a field adjacent to the trafficway; ATV driving on a dirt track next to trafficway; etc.).
7. A tractor trailer with its load hanging over the roadway edge line.
8. A pickup truck on the shoulder with lumber extending into the travel lanes.

2 (Motor Vehicle Not In-Transport Within the Trafficway) is used to indicate that this is a motor vehicle **not** in-transport located **within** the trafficway boundaries when it became an involved unit. The trafficway boundaries are from property line to property line.

Examples:

1. Motor vehicle parked in designated curbside parking lane.
2. Motor vehicle parked in designated curbside parking lane with an open door crossing into the travel lane.
3. Motor vehicle stopped completely on the shoulder, median, or roadside.

3 (Motor Vehicle Not In-Transport Outside the Trafficway) is used to indicate that this is a motor vehicle **not** in-transport located **outside** the trafficway boundaries when it became an involved unit by being struck by a motor vehicle in-transport. If it can't be determined if a not in-transport, non-working motor vehicle is within or outside the trafficway, default to **3 (Motor Vehicle Not In-Transport Outside the Trafficway)**.

Examples:

1. Motor vehicle parked in a private driveway, parking lot space, or other private property (outside the trafficway boundaries).
2. Any vehicle (not in motion) used for private construction occurring outside the trafficway boundaries.

4 (Working Motor Vehicle [Highway Construction, Maintenance, Utility only]) is used to indicate that this is a motor vehicle that was in the act of performing highway construction, maintenance, or utility work related to the trafficway when it became an involved unit. This "work" may be located within open or closed portions of the trafficway and motor vehicles performing these activities can be within or outside the trafficway boundaries. This code does not include private construction/maintenance vehicles, or vehicles such as garbage trucks, delivery trucks, taxis, emergency vehicles (except example #8 below), tow trucks, etc.

Examples:

1. Asphalt/steam roller working in a highway construction zone paving the roadway or flattening dirt.
2. State highway maintenance crew painting lane lines on the road, mowing grass on the roadside or median, repairing potholes, removing debris from the roadway, etc.
3. Utility truck or a "cherry picker," performing maintenance on power lines along the roadway or maintaining a traffic signal.
4. A private excavating company contracted by the State digging the foundation for a new overpass.
5. A state, county, or privately owned snow plow, plowing ice/snow as part of a highway maintenance activity.
6. Street sweeper sweeping the street.
7. A vehicle in a mobile work convoy displaying arrow boards or other signaling devices warning motorists of the work activity.
8. A law enforcement vehicle that is participating strictly in a stationary construction or mobile maintenance activity as a traffic slowing, control, signaling, or calming influence.

When not in the act of performing "work" and involved in the crash, these highway construction, maintenance, or utility vehicles can be:

1. In-Transport when traveling from one construction site to the next (Unit Type [1 \(Motor Vehicle In-Transport \[Inside or Outside the Trafficway\]\)](#)).
2. Not In-Transport Within the Trafficway when stopped on the shoulder or within a highway work zone (Unit Type [2 \(Motor Vehicle Not In-Transport Within the Trafficway\)](#)).
3. Not In-Transport Outside the Trafficway when parked and refueling at a depot (Unit Type [3 \(Motor Vehicle Not In-Transport Outside the Trafficway\)](#)).
4. In-Transport Outside the Trafficway when relocating off the trafficway from a work activity area to another off-trafficway parking location.

Consistency Checks:

Check	IF	THEN
(060P)	VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is not equal to 000,	the VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST must equal some VEHICLE NUMBER in the case, and the UNIT TYPE must equal 1.
(252P)	RELATION TO TRAFFICWAY equals 01, 02, 03, 04, 07, 08, 10, 11, 12 , 98, or 99,	UNIT TYPE for VEHICLE NUMBER (OTHER VEHICLE) involved in the FIRST HARMFUL EVENT must not equal 3.
(255P)	RELATION TO TRAFFICWAY equals 01 or 11,	UNIT TYPE for VEHICLE NUMBER (THIS VEHICLE) involved in the FIRST HARMFUL EVENT must equal 1.
(256P)	RELATION TO TRAFFICWAY equals 01 or 11,	UNIT TYPE for VEHICLE NUMBER (OTHER VEHICLE) involved in the FIRST HARMFUL EVENT should equal 1 or 4.
(257P)	RELATION TO TRAFFICWAY equals 05,	UNIT TYPE for VEHICLE NUMBER (OTHER VEHICLE) involved in the FIRST HARMFUL EVENT must equal 1, 3, or 4.
(2H1F)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 0 or 9,	DRIVER'S VISION OBSCURED BY must equal 95.
(3BAP)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 0,	CRASH TYPE must equal 00, 04, 09, 15, 32, 42, 48, 52, 62, 66, 74, 84, 90, 93, or 98.
(3COP)	UNIT TYPE equals 1, and EXTENT OF DAMAGE equals 6,	VEHICLE REMOVAL should equal 2, 8, 9.
(42BP)	there is only one vehicle involved in the FIRST HARMFUL EVENT where UNIT TYPE equals 1,	the number of vehicles where CRASH TYPE is coded 00, 1-16, 92, 93, or 99 (excluding from the vehicles being counted, those where CRASH TYPE equals 98) must not equal 0 or be greater than 1.
(4Z1P)	UNIT TYPE equals 1, and FIRE OCCURRENCE equals 1,	at least one SEQUENCE OF EVENTS must equal 02.
(5A0P)	BODY TYPE equals 80, 81, 83, 84, 88, 89, and any RELATED FACTORS - VEHICLE LEVEL does not equal 30,	ROLLOVER must equal 0.

(9A5P)	PERSON TYPE equals 03,	UNIT TYPE must equal 2-4.
(9B7P)	UNIT TYPE equals 2-4,	PERSON TYPE of all occupants of this vehicle must equal 03.
(9B9P)	any SEQUENCE OF EVENTS equals 55,	there must be at least one other vehicle with UNIT TYPE equal to 1.
(9C0P)	FIRST HARMFUL EVENT equals 55,	there must be at least one vehicle with UNIT TYPE equal to 1.
(9C1P)	UNIT TYPE equals 4,	RELATED FACTORS-VEHICLE LEVEL must not equal 39.
(9C4P)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 0 or 9,	DRIVER MANEUVERED TO AVOID must only equal 95.
(9C6P)	UNIT TYPE equals 2-4,	RELATED FACTORS-DRIVER LEVEL must equal 0.

Check	IF	THEN
(AL3P)	UNIT TYPE equals 2-4,	MOST HARMFUL EVENT must not equal 54 for this vehicle.
(AL4P)	there is one and only one parked vehicle (UNIT TYPE equals 2 or 3) in the crash,	MOST HARMFUL EVENT for the parked vehicle must not equal 14.
(AL5P)	UNIT TYPE equals 1,	at least one event in the SEQUENCE OF EVENTS must equal the MOST HARMFUL EVENT.
(AL6P)	MOST HARMFUL EVENT equals __, and UNIT TYPE equals 1,	at least one event in the SEQUENCE OF EVENTS must equal __.
(AL7P)	UNIT TYPE equals 2-4,	MOST HARMFUL EVENT should not equal 04-07, 16, 51, 72.
(AZ20)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 0 or 9,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 00.
(BJ1P)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 0 or 9,	DRIVER DISTRACTED BY must equal 16.
(BJ2P)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 1,	DRIVER DISTRACTED BY must not equal 16 or blank.
(BJ3P)	UNIT TYPE equals 1, and DRIVER DISTRACTED BY equals 16,	DRIVER PRESENCE must equal 0 or 9.
(BJ5P)	If UNIT TYPE equals 1 and HIT AND RUN equals 1,	then DRIVER PRESENCE should not equal 0.
(FP2F)	UNIT TYPE equals 1, and CRASH TYPE equals blank, case status is flawed.	--
(FP3F)	UNIT TYPE is blank, case status is flawed.	--
(FP6F)	UNIT TYPE equals 1, and CRITICAL EVENT – PRECRASH (CATEGORY) equals blank, case status is flawed.	--
(FP7F)	UNIT TYPE equals 1, and CRITICAL EVENT – PRECRASH (EVENT) equals blank, case status is flawed.	--
(U690)	UNLIKELY: UNIT TYPE equals 2-4 and HIT and RUN equals 1.	--
(V74P)	UNIT TYPE equals 1, and ROLLOVER equals 1, 2, 9, or LOCATION OF ROLLOVER equals 1-7, 9,	at least one SEQUENCE OF EVENTS must equal 01 for this vehicle.
(VH70)	UNIT TYPE equals 2-4,	elements JACKKNIFE, TRAVEL SPEED, AND SEQUENCE OF EVENTS must all be left blank.
(VH75)	UNIT TYPE equals 4,	VEHICLE CONFIGURATION should not equal 05, 20, 21, 10.
(VH80)	UNIT TYPE equals 4,	CARGO BODY TYPE should not equal 06, 07, 11, 12, 22.

Consistency Checks (FARS Only):

Check	IF	THEN
(9A2P)	UNIT TYPE equals 2, 3,	REGISTERED VEHICLE OWNER must equal 6.
(9B3P)	UNDERRIDE/OVERRIDE equals 7,	there must be at least one vehicle with UNIT TYPE equal to 1.
(9B4P)	UNDERRIDE/OVERRIDE equals 8,	there must at least one vehicle with UNIT TYPE equal 2-4.
(9B5P)	UNIT TYPE equals 2, 3,	UNDERRIDE/OVERRIDE must equal 0.
(VH25)	UNIT TYPE equals 4,	REGISTERED VEHICLE OWNER should not equal 6, 9.

V6 - Hit-and-Run

FORMAT: 1 numeric

SAS NAME: Vehicle.Hit_Run, Parkwork.PHit_Run

ELEMENT VALUES:

Codes	Attributes
0	No
1	Yes
9	Reported as Unknown

Definition: This element refers to cases where a vehicle is a contact vehicle in the crash and does not stop to render aid (this can include drivers who flee the scene on foot).

Remarks: In many states, the investigating officer will note this in the narrative or check the appropriate box on the police crash report. In some cases, the driver can be cited for failing to render assistance. Review the case materials carefully for references to hit-and-run or failure to render aid.

It does not matter whether the hit-and-run vehicle was striking or struck. The hit-and-run vehicle(s) is (are) the one(s) that “departed prior to investigation by the police,” or that vehicle that is “abandoned” at the scene when its occupant(s) fled from the area. If the police crash report indicates that the vehicle was involved in a collision that was investigated, but there is no information on that vehicle or the driver/owner because of departure prior to police arrival on-scene, then hit-and-run is indicated.

0 (No) is used if there is no reason to believe a hit-and-run occurred involving this vehicle or its driver. Example: If a vehicle is involved in a multi-vehicle collision and one of the other contact vehicles leaves the scene.

Examples include:

1. if occupants of a vehicle are taken or go directly from the scene to a medical treatment facility or physician. However, if doubt exists concerning the departure for treatment, assume hit-and-run.
2. a driver who leaves the scene but furnishes name, address, vehicle make, model and model year such that it is recorded in the available information and the available information does not indicate hit-and-run.
3. vehicles that set an object in motion such that (a) the object is contacted, before it stabilizes, by another in-transport motor vehicle, and (b) the vehicle that set the object in motion leaves the scene without providing the pertinent information (compare with exception two above), and (c) the available information does not indicate hit-and-run.

1 (Yes) is used when it has been determined that this vehicle’s driver left the scene with or without their vehicle.

A hit-and-run occurred when this vehicle’s driver left the scene after:

- striking a pedestrian or other type of non-motorist.
- striking a parked/stopped off roadway motor vehicle (with or without occupants).
- being struck while parked or in-transport.

If Hit-and-Run is **1 (Yes)**, [Driver](#) and [Person Level \(MV Occupant\)](#) forms must be submitted for the driver and any known passengers of this vehicle involved in the crash regardless of the fact that it was a hit-and-run.

When the presence of a hit-and-run vehicle is indicated and the available information does not provide the number of occupants, [Number of Occupants](#) must equal [99 \(Unknown\)](#).

9 (Reported as Unknown) is used when the police indicate “Unknown.”

Consistency Checks:

Check	IF	THEN
(8K0P)	VIOLATIONS CHARGED equals 07, 08,	HIT-AND-RUN must not equal 0.
(BJ5P)	If UNIT TYPE equals 1 and HIT AND RUN equals 1,	then DRIVER PRESENCE should not equal 0.
(U340)	UNLIKELY: HIT-AND-RUN equals 0 or 9, and SEX equals 9.	--
(U360)	UNLIKELY: AGE equals 999 and HIT AND RUN is not equal to 1.	--
(U070)	UNLIKELY: More than one vehicle with HIT-AND-RUN equal to 1.	--
(U690)	UNLIKELY: UNIT TYPE equals 2-4 and HIT and RUN equals 1.	--
(V860)	HIT-AND-RUN equals 0, and BODY TYPE equals 61-64,	VEHICLE CONFIGURATION should equal 01, 02, 04, and CARGO BODY TYPE should equal 01-10, 12, 96-98
(V880)	HIT-AND-RUN equals 0, and BODY TYPE equals 66,	VEHICLE CONFIGURATION should equal 05-08, 19, and CARGO BODY TYPE should equal 01-04, 06-12, 96-98.
(VH87)	HIT-AND-RUN equals 0, and AREAS OF IMPACT-INITIAL CONTACT POINT equals 01-14,	the corresponding code should be included in DAMAGED AREAS or DAMAGED AREAS should equal 15.
(U450)	UNLIKELY: REGISTRATION STATE equals 91 if HIT AND RUN does not equal 1.	--
(U460)	UNLIKELY: VEHICLE MODEL equals 997 if HIT AND RUN does not equal 1.	--
(U470)	UNLIKELY: BODY TYPE equals 98 if HIT AND RUN does not equal 1.	--
(U480)	UNLIKELY: VEHICLE MAKE equals 97 if HIT AND RUN does not equal 1.	--
(U510)	UNLIKELY: VEHICLE MODEL YEAR equals 9998 if HIT AND RUN does not equal 1.	--
(U520)	UNLIKELY: RESTRAINT SYSTEM/HELMET USE equals 98 if HIT AND RUN does not equal 1.	--

Consistency Checks (FARS Only):

Check	IF	THEN
(U410)	UNLIKELY: DRIVER'S LICENSE STATE equals 98 if HIT AND RUN does not equal 1.	--

V7 - Registration State

FORMAT: 2 numeric

SAS NAME: Vehicle.REG_STAT; Parkwork.PREG_STAT

ELEMENT VALUES:

Codes	Attributes
00	Not Applicable
01	Alabama
02	Alaska
03	American Samoa
04	Arizona
05	Arkansas
06	California
08	Colorado
09	Connecticut
10	Delaware
11	District of Columbia
12	Florida
13	Georgia
14	Guam
15	Hawaii
16	Idaho
17	Illinois
18	Indiana
19	Iowa

56	Wyoming
91	Not Reported
92	No Registration
93	Multiple State Registration
94	U.S. Government Tags (includes military)
95	Canada
96	Mexico
97	Other Foreign Country*
98	Other Registration
99	Reported as Unknown

*This value is an unlikely occurrence and will raise an error flag.

Definition: This element identifies the State in which this vehicle was registered.

Remarks: For a vehicle with an expired registration, code the state where the vehicle was registered at the time of expiration.

91 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **91 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

For combination vehicles, use the registration state of the power unit only.

00 (Not Applicable) is used for vehicles that are not required to be registered. This is state specific based on state vehicle registration requirements.

Use state codes for all state registered vehicles, including state government vehicles. However, if your state does not register government-owned vehicles, use **00 (Not Applicable)**.

92 (No Registration) applies to vehicles that are required by state law to be registered and are NOT registered.

93 (Multiple State Registration) is used for commercial vehicles that are registered in more than one State under a valid reciprocal agreement (such as the International Registration Plan (IRP)).

94 (U.S. Government Tags) is used to indicate the license was issued by the U.S. Government, such as military or State Department Foreign Service.

If a police crash report data element is coded with the attribute "Other" but the officer does not specify what this refers to:

1. Code [**98 \(Other Registration\)**](#) if the police crash report attribute choices can be matched to or include all the attributes in FARS/CRSS.
2. Code [**91 \(Not Reported\)**](#) if the police crash report choices cannot be matched to or include all the attributes in FARS/CRSS.

98 (Other Registration) is used for other registrations that are not identified by their own attribute (e.g., Native American Indian Nations, Other U.S. Territories, or U.S. owned outlying areas such as Northern Marianas Islands, Wake Islands, etc.).

99 (Reported as Unknown) is used when the registration information for a vehicle cannot be identified. Example unidentified hit-and-run vehicle's registration reported as "Unknown" by police.

Consistency Checks:

Check	IF	THEN
(9K0P)	HM2 equals 2,	REGISTRATION STATE must not equal 00.
(U040)	UNLIKELY: REGISTRATION STATE equals 97.	--
(V060)	SPECIAL USE equals 04,	REGISTRATION STATE should equal 94.
(V070)	HM1 equals 2,	REGISTRATION STATE should not equal 92.

Consistency Checks (FARS Only):

Check	IF	THEN
(6GOP)	RELATED FACTORS-VEHICLE LEVEL equals 32,	REGISTRATION STATE must not equal 00, 92.
(AQOP)	REGISTRATION STATE equals 00, 92,	REGISTERED VEHICLE OWNER must equal 0, 5, 6.
(AVOP)	REGISTERED VEHICLE OWNER equals 3, 4,	REGISTRATION STATE must not equal 99.
(D330)	DRIVER PRESENCE equals 0, and REGISTRATION STATE is not equal to 00, 92, 99,	REGISTERED VEHICLE OWNER should equal 3-6.
(U450)	UNLIKELY: REGISTRATION STATE equals 91 if HIT AND RUN does not equal 1.	--
(V550)	REGISTRATION STATE equals 93, 94,	REGISTERED VEHICLE OWNER should equal 3, 4.
(V560)	SPECIAL USE equals 04,	REGISTERED VEHICLE OWNER should equal 3, and REGISTRATION STATE should equal 94.
(V592)	RELATED FACTORS-VEHICLE LEVEL equals 37,	REGISTRATION STATE should not equal 00, 92.
(V600)	REGISTERED VEHICLE OWNER equals 9,	REGISTRATION STATE should equal 99.
(V630)	REGISTRATION STATE equals 00, 92,	REGISTERED VEHICLE OWNER should NOT equal 5.
(V670)	REGISTERED VEHICLE OWNER equals 1, 2,	REGISTRATION STATE should NOT equal 99.
(V960)	REGISTRATION STATE equals 99,	REGISTERED VEHICLE OWNER should equal 5, 6, 9.

V8 - Registered Vehicle Owner - FARS Only

FORMAT: 1 numeric

SAS Name: Vehicle.OWNER, parkwork.POWNER

ELEMENT VALUES:

Codes	Attributes
0	Not Applicable, Vehicle Not Registered
1	Driver (in this crash) Was Registered Owner
2	Driver (in this crash) Not Registered Owner (other private owner listed)
3	Vehicle Registered as Business/Company/Government Vehicle
4	Vehicle Registered as Rental Vehicle
5	Vehicle Was Stolen (reported by police)
6	Driverless/Motor Vehicle Parked/Stopped Off Roadway
9	Unknown

Definition: This element is used to determine the type of registered owner of the vehicle.

Remarks: The type of ownership, “loan vs. lease,” does not change the coding. An individual or company should be the Registered Vehicle Owner, regardless of the bank holding the loan or lease. Banks and leasing companies should be the Registered Vehicle Owner for their own fleets only.

Vehicle Registration data takes precedence over police reported information.

0 (Not Applicable, Vehicle Not Registered) applies to vehicles that are not registered, both not required to be registered (State specific based on State vehicle registration requirements) and illegally not registered. (See [5 \(Vehicle Was Stolen \[reported by police\]\)](#) for stolen vehicles.) For plated Business/Company/Government Vehicles that are exempt from normal registration see [3 \(Vehicle Registered as Business/ Company/ Government Vehicle\)](#).

2 (Driver (in this crash) Not Registered Owner [other private owner listed]) is used for private owners other than the driver. Also, this includes when if the driver is a spouse of the owner but is not a co-owner.

3 (Vehicle Registered as Business/Company/Government Vehicle) is used for vehicles that are registered in a Business or Company name, or as a local, county, State, or Federal Government Vehicle. Use this attribute even if the Government vehicle is exempt from normal registration. Example: city owned police cruisers.

4 (Vehicle Registered as Rental Vehicle) applies for rental vehicles, such as: Hertz, Ryder trucks, etc.

5 (Vehicle Was Stolen [reported by police]) takes precedence over codes “0, 2, 3, 4, 6,” when multiple conditions exist.

6 (Driverless/Motor Vehicle Parked/Stopped Off Roadway) is used for both in-transport and not in-transport motor vehicles. This attribute should always be used if Unit Type is coded as “2” or “3,” even if other applicable conditions exist. This attribute is also used to indicate that this is a “driverless” motor vehicle in-transport (e.g., driverless vehicle stopped in a travel lane). If indicating this is a “driverless” motor vehicle in-transport, this attribute does not take precedence over codes “0, 3, 4, 5,” when multiple conditions exist.

9 (Unknown) is used when information on the registered owner is unknown or unclear; and in certain cases when the driver cannot be determined, but the registered owner is known.

Consistency Checks:

Check	IF	THEN
(9A2P)	UNIT TYPE equals 2, 3,	REGISTERED VEHICLE OWNER must equal 6.
(AQ0P)	REGISTRATION STATE equals 00, 92,	REGISTERED VEHICLE OWNER must equal 0, 5, 6.
(AROP)	SPECIAL USE equals 04,	REGISTERED VEHICLE OWNER must not equal 0, 1, 2, 4.
(ASOP)	RELATED FACTORS-VEHICLE LEVEL equals 32,	REGISTERED VEHICLE OWNER must not equal 0.
(AV0P)	REGISTERED VEHICLE OWNER equals 3, 4,	REGISTRATION STATE must not equal 99.
(CB0P)	REGISTERED VEHICLE OWNER equals 6,	DRIVER PRESENCE must equal 0.
(D330)	DRIVER PRESENCE equals 0, and REGISTRATION STATE is not equal to 00, 92, 99,	REGISTERED VEHICLE OWNER should equal 3-6.
(V550)	REGISTRATION STATE equals 93, 94,	REGISTERED VEHICLE OWNER should equal 3, 4.
(V560)	SPECIAL USE equals 04,	REGISTERED VEHICLE OWNER should equal 3, and REGISTRATION STATE should equal 94.
(V570)	HM1 equals 2,	REGISTERED VEHICLE OWNER should not equal 0, 1, 2, 4.
(V580)	HM1 equals 2,	REGISTERED VEHICLE OWNER should equal 3.
(V590)	RELATED FACTORS-VEHICLE LEVEL equals 32,	REGISTERED VEHICLE OWNER should equal 1-3.
(V593)	RELATED FACTORS-VEHICLE LEVEL equals 37,	REGISTERED VEHICLE OWNER should not equal 0.
(V600)	REGISTERED VEHICLE OWNER equals 9,	REGISTRATION STATE should equal 99.
(V630)	REGISTRATION STATE equals 00, 92,	REGISTERED VEHICLE OWNER should NOT equal 5.
(V670)	REGISTERED VEHICLE OWNER equals 1, 2,	REGISTRATION STATE should NOT equal 99.
(V960)	REGISTRATION STATE equals 99,	REGISTERED VEHICLE OWNER should equal 5, 6, 9.
(VH25)	UNIT TYPE equals 4,	REGISTERED VEHICLE OWNER should not equal 6, 9.

Vehicle Make/Vehicle Model Overview

FARS SPECIAL INSTRUCTION:

VEHICLE MAKE, VEHICLE MODEL, BODY TYPE, and VEHICLE MODEL YEAR as shown on crash reports must be verified with registration data. In the case of inconsistencies, registration data takes precedence over crash report data. Note that vehicle information should be gathered only from State records. Do not use any other sources to determine any of these elements; that is, you should not use sources such as the NATB Passenger Vehicle Identification Manual.

VEHICLE MAKE attributes are organized into general groups. These groups are:

Codes	Attributes
01-28	Domestic Passenger Car
29	Other Domestic Passenger Car
30-67	Import Passenger Car
69	Other Import Passenger Car
70-77	Motored Cycle/Moped
80-89	Truck/Bus
90-94	Bus
97	Not Reported
98	Other Make (where MAKE "29" or "69" are not applicable)
99	Unknown Make

VEHICLE MODEL refers to the series of vehicles for a make (e.g., Pintos, Galaxies, Mustangs are Models of Ford). It does not refer to the various styles within a model unless they are listed in the codes for VEHICLE MODEL.

VEHICLE MODEL attributes are organized into general groups. These groups are:

Codes	Attributes
001-399	Passenger Car (automobile)
400-499	Light Trucks (including truck based utility vehicles, light duty pickup trucks, standard pickup trucks, vans, mini vans, van-based station wagons, van-based buses, van derivatives, and truck-based station wagons).
598	Low Speed Vehicle (LSV)/Neighborhood Electric Vehicle (NEV)
700-739	Motored Cycles (including motorcycles, mini-bikes, motor scooters, dirt bikes, and mopeds).
850	Motor Home (truck based)
870	Medium/Heavy Van-Based Vehicle
880-897	Trucks (including all trucks over 10,000 lbs. GVWR except those pickup type trucks mentioned under BODY TYPE code "30-31" [Pickup]).
898	Other, Unknown, truck over 10,000 lbs. GVWR.
980-996	All buses except those that are van-based.
988	Other bus over 10,000 lbs. GVWR.
989	Unknown Bus
997	Not Reported
998	Other Vehicle
999	Unknown Vehicle

Note that for both **VEHICLE MAKE** and **VEHICLE MODEL** the use of the terms "other" and "unknown" have very specific meanings. "Other" refers to a VEHICLE MAKE or VEHICLE MODEL that is known but is not explicitly listed.

Vehicle Make/Vehicle Model Overview

“Unknown” refers to the situation where no specific named VEHICLE MAKE or VEHICLE MODEL is known. Selection of the proper “other” or “unknown” code can only be made with consideration of the vehicle BODY TYPE in accordance with the applicable BODY TYPE for given combinations of “other” and/or “unknown” VEHICLE MAKE and VEHICLE MODEL.

4WD, FWD, or Four-Wheel Drive does not automatically imply on/off road vehicle (utility vehicles), body types “14” and “15.”

Reconstructed/Altered Vehicles: In cases where someone builds a “homemade” vehicle from drastically mixed parts, there may be no clear MAKE or MODEL. In addition, the State may issue an Identification Number in place of the Standard VIN. In such cases, code the VIN as all “0s”; code MAKE, MODEL, and MODEL YEAR as “9s.” Code BODY TYPE as appropriate. Be sure to use [RELATED FACTORS-VEHICLE LEVEL](#) code [Reconstructed/Altered Vehicle](#).

In reconstructed/altered vehicles where the modifications are less drastic and you can determine the MAKE, MODEL, and VIN, code these elements appropriately and be sure to use the [Related Factors-Vehicle Level](#) code for [Reconstructed/Altered Vehicle](#).

If any detail is known regarding the vehicle’s Make/Model/Body/Year, code what is known and then code the other elements as unknown. For example, you know it’s a Ford 4-door passenger car but the specific model and year are not reported. Code Vehicle Make as **12 (Ford)**, Vehicle Model as **399 (Unknown (Automobile))**, Body Type as **04 (4-Door Sedan, Hard Top)**, and Vehicle Model Year as **9999 (Unknown)**.

Code **Not Reported** only when Vehicle Make, Vehicle Model, Body Type, and Vehicle Model Year are all **Not Reported**.

Not Reported

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “Not Reported.”

Code **Not Reported** in these situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

V9 - Vehicle Make

FORMAT: 2 numeric

SAS NAME: Vehicle.Make, Person.Make; Parkwork.PMAKE

89	White/Autocar White/GMC
90	Bluebird
91	Eagle Coach
92	Gillig
93	MCI
94	Thomas Built
97	Not Reported
98	Other Make
99	Unknown Make

Definition: This element identifies the make (manufacturer) of this vehicle.

Remarks: SEE ADDITIONAL REMARKS UNDER [VEHICLE MAKE/ VEHICLE MODEL OVERVIEW](#)

Note that for both Vehicle Make and Vehicle Model, the use of the terms “other” and “unknown” have very specific meanings. “Other” refers to a make or model that is known but is not explicitly listed. “Unknown” refers to the situation where no specific make or model is known. Examples: **399 (Unknown (Automobile]), 499 (Unknown (Light Truck]), 739 (Unknown cc (ATV]), 884 (Medium/Heavy Truck - Unknown Engine Location), 999 (Unknown).**

Selection of the proper “other” or “unknown” code can only be made with consideration of the vehicle’s body type. For example, if a medium/heavy truck or bus make is known and is not listed, Vehicle Make is coded **OTHER MAKE (med/heavy truck/bus or “other”)** and the appropriate model code is used. If the make is unknown but the body type is known as a “school bus,” for instance, Vehicle Make is coded **99 (Unknown Make)** and Vehicle Model is coded **989 (Unknown (Bus))**.

99 (Unknown Make) is used when the vehicle is reported as Unknown, unless reliable evidence indicates the vehicle's make.

97 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered **“Not Reported.”**

Code **97 (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials). If a vehicle make or vehicle model is encountered that is not listed, NHTSA headquarters is notified.

Consistency Checks:

Check	IF	THEN
(920P)	any one of the fields MAKE, MODEL, BODY TYPE, and MODEL YEAR, equals Not Reported [MAKE (97), MODEL (997), BODY TYPE (98), and MODEL YEAR (9998)],	the other three must also equal Not Reported.
(921P)	MAKE is not 97, 98, 99, and equals ___, and MODEL equals ___,	MODEL YEAR must equal ___, or CRASH YEAR plus 1.
(930P)	any one of the fields MAKE, MODEL, BODY TYPE, and MODEL YEAR, does not equal Not Reported [MAKE (97), MODEL (997), BODY TYPE (98), and MODEL YEAR (9998)],	the other three must also not be coded as Not Reported.
(960P)	MAKE is not 98, 99, and equals ___, and MODEL equals ___,	BODY TYPE must equal ___ (MAKE, MODEL, and BODY must be valid according to Vehicle Tables).
(U480)	UNLIKELY: VEHICLE MAKE equals 97 if HIT AND RUN does not equal 1.	--

Check	IF	THEN
(U688)	UNLIKELY: VEHICLE MODEL equals 707 and VEHICLE MAKE does not equal 77, 98, or 99.	--
(V922)	MAKE equals 98, 99, and MODEL equals ___,	MODEL YEAR should equal ___ (MODEL and MODEL YEAR should be valid according to Vehicle Tables).
(V961)	MAKE equals 98, 99, and MODEL equals ___,	BODY TYPE should equal ___ (MODEL and BODY TYPE should be valid according to the Vehicle Tables).

999	Unknown

Definition: This element identifies the model of this vehicle within a given make.

Remarks: SEE ADDITIONAL REMARKS UNDER [VEHICLE MAKE/VEHICLE MODEL OVERVIEW](#)

Note that for both Vehicle Make and Vehicle Model, the use of the terms “other” and “unknown” have very specific meanings. “Other” refers to a make or model that is known but is not explicitly listed. “Unknown” refers to the situation where no specific make or model is known. Examples: 399 (Unknown (Automobile)), 499 (Unknown (Light Trucks)), 739 (Unknown cc (ATV)), 884 (Medium/Heavy Trucks - Unknown Engine Location), 999 (Unknown).

Selection of the proper “other” or “unknown” code can only be made with consideration of the vehicle’s body type. For example, if a medium/heavy truck or bus make is known and is not listed, Vehicle Make is coded **OTHER MAKE (med/heavy truck/bus or “other”)** and the appropriate model code is used. If the make is unknown but the body type is known as a “school bus,” for instance, Vehicle Make is coded **99 (Unknown Make)** and Vehicle Model is coded **989 (Unknown (Bus))**.

997 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered **“Not Reported.”**

Code **997 (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

If a vehicle make or vehicle model is encountered that is not listed, NHTSA headquarters is notified.

Consistency Checks:

Check	IF	THEN
(920P)	any one of the fields MAKE, MODEL, BODY TYPE, and MODEL YEAR, equals Not Reported [MAKE (97), MODEL (997), BODY TYPE (98), and MODEL YEAR (9998)],	the other three must also equal Not Reported.
(921P)	MAKE is not 97, 98, 99, and equals ___, and MODEL equals ___,	MODEL YEAR must equal ___, or CRASH YEAR plus 1.
(930P)	any one of the fields MAKE, MODEL, BODY TYPE, and MODEL YEAR, does not equal Not Reported [MAKE (97), MODEL (997), BODY TYPE (98), and MODEL YEAR (9998)],	the other three must also not be coded as Not Reported.
(960P)	MAKE is not 98, 99, and equals ___, and MODEL equals ___,	BODY TYPE must equal ___ (MAKE, MODEL, and BODY must be valid according to Vehicle Tables).
(U460)	UNLIKELY: VEHICLE MODEL equals 997 if HIT AND RUN does not equal 1.	--
(U688)	UNLIKELY: VEHICLE MODEL equals 707 and VEHICLE MAKE does not equal 77, 98, or 99.	--
(V922)	MAKE equals 98, 99, and MODEL equals ___,	MODEL YEAR should equal ___ (MODEL and MODEL YEAR should be valid according to Vehicle Tables).
(V961)	MAKE equals 98, 99, and MODEL equals ___,	BODY TYPE should equal ___ (MODEL and BODY TYPE should be valid according to the Vehicle Tables).

981	Bus**: Conventional (Engine out front)	--	1965-2018, 9999	50-52,58,59
982	Bus: Front engine. Flat front	--	1976-2018, 9999	50-52,58,59
983	Bus: Rear engine, Flat front	--	1965-2018, 9999	50-52,58,59
988	Other (bus)	--	1945-2018, 9999	50-52,58,59
989	Unknown (bus)	--	1945-2018, 9999	50-52,58,59

**Use code "989" (bus) if the frontal plane or the engine location is unknown.

MOTOR HOME

Codes	Models	Includes	Model Years	Body Types
850	Motor Home	Truck based	1965-2018, 9999	65, 73

OTHER AND UNKNOWN VEHICLE

Codes	Models	Includes	Model Years	Body Types
998	Other (vehicle)	(e.g., farm vehicle, snowmobile, go-cart)	1943-2018, 9999	91-93, 95-97
999	Unknown (as to automobile, motored cycle, light truck or truck)	--	1945-2018, 9999	49, 79, 99

V11 - Body Type

FORMAT: 2 numeric

SAS NAME: Vehicle.Body_Typ, Person.Body_Typ, parkwork.PBODYTYP

ELEMENT VALUES:

Automobiles

Codes	Attributes
01	Convertible (excludes sun-roof, t-bar)
02	2-Door Sedan, Hardtop, Coupe
03	3-Door/2-Door Hatchback
04	4-Door Sedan, Hardtop
05	5-Door/4-Door Hatchback
06	Station Wagon (excluding van and truck based)
07	Hatchback, Number of Doors Unknown
17	3-Door Coupe
08	Sedan/Hardtop, Number of Doors Unknown
09	Other or Unknown Automobile Type

Automobile Derivatives

Codes	Attributes
10	Auto-Based Pickup (includes Chevrolet - El Camino, GMC -Caballero, Ford - Ranchero, Chevrolet - SSR; Subaru-Baha, Brat, and Volkswagen - Rabbit Pickup)
11	Auto-Based Panel (Cargo Station Wagon, auto-based Ambulance/Hearse)
12	Large Limousine (More than four side doors or stretched chassis)
13	Three-Wheel Automobile or Automobile Derivative

Utility Vehicles

Codes	Attributes
14	<p>Compact Utility (ANSI D16.1 Utility Vehicle Categories "Small" and "Midsize"):</p> <ul style="list-style-type: none"> • Small: Chevy-Tracker; GMC- Jimmy/Typhoon; Isuzu - Trooper II; Oldsmobile - Bravada (1991-94); Suzuki - Samurai, Sidekick. • Midsize: Acura - SLX, RDX; Audi - Q3, Q5, Q7, Allroad, SQ5; BMW - X1, X3, X5; Buick - Rendezvous, Rainier, Encore, Enclave; Chevrolet - Captiva, S10-Blazer/TrailBlazer, Tracker (1999 on), TrailBlazer (2003 on), Trax; Equinox; Diahatsu - Rocky; Dodge - Durango (1998-2003), Nitro, Raider; Fiat - 500L; Ford - Bronco II (1984 on), Escape, Explorer, Explorer Sport; GMC - Jimmy (1995 on), Envoy, Terrain; Honda - CRV, Passport, Element; Hummer - H3; Hyundai - Santa Fe, Tuscon, Veracruz (2007 only); Infiniti - QX4, JX35, QX60, QX70; Isuzu - Amigo, Axiom, Rodeo, Rodeo Sport, Vehicross, Trooper, Hombre; Jeep – Cherokee (1984 on), Commander, Grand Cherokee, Liberty, Patriot, Renegade, Wagoneer, Wrangler; Kia - Sportage, Sorrento; Land Rover - Defender (1993, 1995-1997), Discovery, Discovery Sport, Freelander (2002-2003) Evogue; Lexus - RX300, RX330, GX470; Lincoln - Aviator, MKC; Mazda - CX5, CX9 Navajo, Tribute; Mercedes - M, ML, G, GLK; Mercury - Mariner, Mountaineer; Mitsubishi - Montero, Montero Sport, Endeavor; Nissan - Juke, Pathfinder, Xterra; Oldsmobile - Bravada (1996 on); Pontiac - Aztek, Torrent; Porsche - Macan; Saab - 9-7x; Saturn - Vue; Subaru - B9 Tribeca, Forester, XV Crosstrek; Suzuki - Vitara, Vitara V6, Grand Vitara, X90, XL7; Toyota - 4-Runner, FJ Cruiser, Highlander, RAV4; Volkswagen - Tiguan; Volvo - XC70, XC90.

Codes	Attributes
15	<p>Large utility (ANSI D16.1 Utility Vehicle Categories and “Full Size” and “Large”)</p> <ul style="list-style-type: none"> • Full Size: Acura - MDX; AMC - Hummer; Buick - Enclave (2013 on), Cadillac - Escalade; Chevrolet Full-size Blazer, Tahoe, Traverse (2013 on); Chrysler - Aspen, Dodge - Durango (2004 on), Ford - Full-size Bronco (78 and after), Expedition; Honda - Pilot; Hyundai - Veracruz (2008 on); GMC - Acadia (2013 on), Jimmy (1991-1994), Yukon (Denali/XL); Infiniti - QX56, QX80; Isuzu - Ascender; Jeep - Cherokee (83 and before); Kia - Mesa, Borrego; Land Rover - LR2, LR3, Freelander (2004 on), Range Rover; Mazda - CX-9, Mercedes Benz - GL; Nissan - Armada; Porsche - Cayenne; Lexus - LX450/470; Lincoln - Navigator; Toyota - Land Cruiser, Sequoia; Volkswagen - Touareg. • Large: Avanti - Studebaker XUV; AMC -Hummer (H1, H2)
16	Utility station wagon (includes suburban limousines), Cadillac - Escalade ESV; Chevrolet - Suburban (Yukon XL (2000 on), Travellall, Ford - Excursion, Jeep - Grand Wagoneer)
19	Utility Vehicle, Unknown Body Type

[Van-Based Light Trucks \(GVWR less than or equal to 10,000 lbs.\)](#)

Codes	Attributes
20	Minivan (AM General - MV-1; Buick-Terraza; Chevrolet-Astro, City Express, Lumina, Uplander, Venture; Chrysler-Town and Country, Voyager; Dodge-Caravan, Grand Caravan, RAM-CV, Promater City; Ford-Aerostar, Windstar, Freestar, Transit Connect; GMC-Safari, Savana; Honda-Odyssey; Hyundai-Entourage; Isuzu-Oasis; Kia-Sedona; Mazda-MPV; Mercury-Monterey, Villager; Mitsubishi-Minivan; Nissan-Altra EV, Axxess, Quest, Van; Oldsmobile-Silhouette; Plymouth-Voyager, Grand Voyager, Vista; Pontiac-Transport, Montana; Saturn-Relay; Toyota-Previa, Sienna; Volkswagen-Camper, Eurovan, Routan, Vanagon.)
21	Large Van -Includes van-based buses (B150-B350, Sportsman, Royal Maxiwagon, Ram, Tradesman, Voyager [83 and before], E150-E350, Econoline, Clubwagon, Chateau, G10-G30, Chevy Van, Beauville, Sport Van, G15-G35, Rally Van, Vandura, Ford - Transit, Freightliner - Sprinter/Advantage, Mercedes Benz -Sprinter, Dodge - Sprinter, RAM-Promaster, Nissan - NV, Ford - Transit)
22	Step-van or walk-in van (GVWR less than or equal to 10,000 lbs.)
28	Other van type (Hi-Cube Van, Kary)
29	Unknown van type

[Light Conventional Trucks \(Pickup style cab, GVWR less than or equal to 10,000 lbs.\)](#)

Codes	Attributes
33	Convertible pickup
34	Light Pickup
39	Unknown (pickup style) light conventional truck type

[Other Light Trucks \(GVWR less than or equal to 10,000 lbs.\)](#)

Codes	Attributes
40	Cab Chassis Based (includes Rescue Vehicle, Light Stake, Dump, and Tow Truck)
41	Truck Based Panel
45	Other light conventional truck type
48	Unknown light truck type
49	Unknown light vehicle type (automobile, utility vehicle, van, light truck)

Buses (excludes van-based buses with a GVWR less than or equal to 10,000 lbs.)

Codes	Attributes
50	School Bus
51	Cross Country/Intercity Bus
52	Transit Bus (City Bus)
55	Van-Based Bus GVWR greater than 10,000 lbs.
58	Other Bus Type
59	Unknown Bus Type

Medium/Heavy Trucks (GVWR greater than 10,000 lbs.)

Codes	Attributes
60	Step Van (GVWR greater than 10,000 lbs.)
61	Single-unit straight truck or Cab-Chassis (GVWR range 10,001 to 19,500 lbs.)
62	Single-unit straight truck or Cab-Chassis (GVWR range 19,501 to 26,000 lbs.)
63	Single-unit straight truck or Cab-Chassis (GVWR greater than 26,000 lbs.)
64	Single-unit straight truck or Cab-Chassis (GVWR unknown)
66	Truck-tractor (Cab only, or with any number of trailing units; any weight)
67	Medium/heavy Pickup (GVWR greater than 10,000 lbs.)
71	Unknown if single-unit or combination unit Medium Truck (<i>GVWR range 10,001 lbs. to 26,000 lbs.</i>)
72	Unknown if single-unit or combination unit Heavy Truck (<i>GVWR greater than 26,000 lbs.</i>)
78	Unknown medium/heavy truck type
79	Unknown truck type (light/medium/heavy)

Motor Homes

Codes	Attributes
42	Light Truck Based Motorhome (Chassis Mounted)
65	Medium/heavy truck based motor home
73	Camper or motor home, unknown truck type

Motorcycles, Mopeds, All-Terrain Vehicles; All-Terrain Cycles

Codes	Attributes
80	Two Wheel Motorcycle (excluding motor scooters)
81	Moped or motorized bicycle
82	Three-wheel Motorcycle (2 Rear Wheels)
83	Off-Road Motorcycle
84	Motor Scooter
85	Unenclosed Three Wheel Motorcycle/Unenclosed Autocycle (1 Rear Wheel)
86	Enclosed Three Wheel Motorcycle/Enclosed Autocycle (1 Rear Wheel)
87	Unknown Three Wheel Motorcycle Type
88	Other motored cycle type (mini-bikes, pocket motorcycles “pocket bikes”)
89	Unknown motored cycle type
90	ATV/ATC (All-Terrain Cycle)

Other Vehicles

Codes	Attributes
91	Snowmobile
92	Farm equipment other than trucks
93	Construction equipment other than trucks (includes graders)
94	Low Speed Vehicle (LSV)/Neighborhood Electric Vehicle (NEV)
95	Golf Cart
96	Recreational Off-Highway Vehicle (ROV)
97	Other vehicle type (includes go-cart, fork-lift, city street sweeper)
98	Not Reported
99	Unknown Body Type

Definition: This element identifies a classification of this vehicle based on its general body configuration, size, shape, doors, etc.

Remarks: SEE ADDITIONAL REMARKS UNDER [VEHICLE MAKE/VEHICLE MODEL OVERVIEW](#)

AUTOMOBILES

These attributes are used to classify different types of passenger cars. These type of light vehicles, referred to as automobiles, are designed primarily to transport eight or fewer persons.

01 (Convertible [excludes sun-roof and t-bar]) refers to a passenger car equipped with a removable or retractable roof. To qualify for this code, the entire roof must open. Convertible roofs are generally fabric; however, removable hardtops are also included. This attribute takes priority over 2-door or 4-door codes.

02 (2-Door Sedan, Hardtop, Coupe) refers to a passenger car equipped with two doors for ingress/egress and a separate trunk area for cargo (e.g., trunk lid hinged below the backlight). Folding rear seats do not necessarily violate the separate “trunk area” concept.

03 (3-Door/2-Door Hatchback) refers to a passenger car equipped with two doors for ingress/egress and a rear hatch opening for cargo (e.g., hinged above the backlight). The cargo area is not permanently partitioned from the passenger compartment area.

04 (4-Door Sedan, Hardtop) refers to a passenger car equipped with four doors for ingress/egress and a separate trunk area for cargo (e.g., trunk lid hinged below the backlight). Folding rear seats do not necessarily violate the separate “trunk area” concept.

05 (5-Door/4-Door Hatchback) refers to a passenger car equipped with four doors for ingress/egress and a rear hatch opening for cargo (e.g., hinged above the backlight). The cargo area is not permanently partitioned from the passenger compartment area.

06 (Station Wagon [excluding van and truck based]) refers to a passenger car with an enlarged cargo area. The entire roof covering the cargo area is generally equal in height from front to rear and full height side glass is installed between the C and D-pillars. The rearmost area is not permanently partitioned from the forward passenger compartment area (e.g., “horizontal window shades” to hide cargo do not constitute partitions).

07 (Hatchback, Number of Doors Unknown) refers to a passenger car with an unknown number of doors for ingress/egress and a rear hatch opening for cargo (e.g., hinged above the backlight). The cargo area is not permanently partitioned from the passenger compartment area.

17 (3-Door Coupe) refers to a passenger car equipped with three doors for ingress/egress in which 2 of the doors are located on the driver's side and a separate trunk area for cargo (e.g., trunk lid hinged below the backlight). Folding rear seats do not necessarily violate the separate "trunk area" concept.

08 (Sedan/Hardtop, Number of Doors Unknown) refers to a passenger car equipped with an unknown number of doors for ingress/egress and a separate trunk area for cargo (e.g., trunk lid hinged below the backlight). Folding rear seats do not necessarily violate the separate "trunk area" concept.

09 (Other or Unknown Automobile Type) is used for any passenger car that cannot be described by the other automobile codes OR when it is known that the vehicle is a passenger car, but there is insufficient data to determine the type. Do not use this attribute if the police crash report alone or in combination with other information gives sufficient detail to identify a more specific attribute.

- **Example #1:** If the possible choices are codes "01," "02," or "09" but there is enough detail to identify that it is a 2-door and that it is NOT a convertible, then use [02 \(2-Door Sedan, Hardtop, Coupe\)](#).
- **Example #2:** If there is information that it is a 4-door and the police crash report eliminates the possibility of a hatchback or station wagon, then use [04 \(4-Door Sedan, Hardtop\)](#).

AUTOMOBILE DERIVATIVES

This describes certain passenger cars that have been modified to perform cargo-related tasks.

10 (Auto-Based Pickup) refers to a passenger car based, pickup type vehicle. The roof area (and side glass) rearward of the front seats on a station wagon have been removed and converted into a pickup-type cargo box.

11 (Auto-Based Panel (Cargo Station Wagon, auto-based Ambulance/Hearse) refers to an automotive station wagon that may have sheet metal rearward of the B-pillar rather than glass.

12 (Large Limousine) - more than four side doors or stretched chassis refers to an automobile that has sections added within its wheelbase to increase length and passenger/cargo carrying capacity.

13 (Three-Wheel Automobile or Automobile Derivative) refers to 3-wheel vehicles with an enclosed passenger compartment *not including* [82 \(Three-Wheeled Motorcycle \(2 Rear Wheels\)\)](#) or [86 \(Enclosed Three Wheel Motorcycle/Enclosed Autocycle \(1 Rear Wheel\)\)](#).

UTILITY VEHICLES

(Less than or equal to 10,000 lbs. GVWR)

Utility Vehicles are designed for carrying persons, and generally considered a multi-purpose vehicle that is designed to have off-road capabilities. These vehicles are: generally 4-wheel drive (4 x 4), have increased ground clearance, and are equipped with a strong frame. Four-wheel drive automobiles are not considered utility vehicles.

14 (Compact Utility) refers to a short wheelbase and narrow tracked multi-purpose vehicle designed to operate in rugged terrain.

15 (Large Utility) refers to full-size multi-purpose vehicles primarily designed around a shortened pickup truck chassis. Generally, a station wagon style body, some models are equipped with a removable top.

16 (Utility Station Wagon) refers primarily to a pickup truck based chassis enlarged to a station wagon.

19 (Utility Vehicle, Unknown Body Type) is used when it is known that the vehicle is a utility vehicle, but there is insufficient data to determine the specific type.

VAN-BASED LIGHT TRUCKS**(GVWR less than or equal to 10,000 lbs.)**

Van-Based Light Trucks (**less than or equal to** 10,000 lbs. GVWR) are designed to maximize cargo/passenger area versus overall length. Basically a “box on wheels,” these vehicles are identifiable by their enclosed cargo/passenger area and relatively short (or non-existent) hood.

20 (Minivan) refers to down-sized cargo or passenger unibody vans.

21 (Large Van) refers to a standard cargo or passenger van and includes van-based buses less than 10,001 lbs. GVWR. These vans will generally have a larger capacity in both volume and GVWR.

22 (Step Van or Walk-In Van [less than or equal to** 10,000 lbs. GVWR])** refers to a multi-stop delivery vehicle with a GVWR less than or equal to 10,000 lbs. Examples are the Grumman LLV used by the U.S. Postal Service or the Aeromate manufactured by Utilimaster Motor Corporation.

28 (Other Van Type) refers to a cargo or delivery van where the chassis and cab portions from the B-pillar forward of this vehicle are the same as in Minivans or Large Vans with a frame mounted cargo area unit added behind the driver/cab area or if the van cannot be described as a Minivan, Large Van, Step-van or a Van-based motor home. Annotate the van type when using this code. This code takes priority over Minivans and Large Vans.

29 (Unknown Van Type) is used when it is known that this vehicle is a light van, but its specific type cannot be determined.

LIGHT CONVENTIONAL TRUCKS**(Pickup Style Cab, GVWR less than or equal to 10,000 lbs.)**

Light Conventional Trucks are used to describe vehicles commonly referred to as pickup trucks and some of their derivatives. These light trucks are characteristically designed with a small cab containing a single row of seats (extended cabs with additional seats are available for some models), a large hood covering a conventional engine placement, and a separate open box area (approximately 180 to 240 centimeters long) for cargo.

Beginning in 2017, Body Types 30 and 31 were removed and replaced by the combined code of [**34 \(Light Pickup\)**](#). Beginning in 2018, Body Type 32 was removed and added to Vehicle Related Factors. See [**45 \(Slide-in Camper\)**](#).

33 (Convertible Pickup) refers to a pickup truck equipped with a removable or retractable roof. To qualify for this code, the entire roof must open. Convertible roofs are generally fabric; however, removable hardtops are also included. This code takes priority over compact and large pickups.

34 (Light Pickup) is a single unit straight truck with a pickup body style and a GVWR of 10,000 lbs. or less.

39 (Unknown (Pickup Style) Light Conventional Truck Type) is used when this vehicle is a Light Conventional Truck, but there is insufficient data to determine the specific code.

OTHER LIGHT TRUCKS**(GVWR less than or equal to 10,000 lbs.)**

Other Light Trucks are used to describe vehicles that are based upon a conventional light pickup frame, but a commercial or recreational body has been affixed to the frame rather than a pickup box.

40 (Cab Chassis Based [includes rescue vehicles, light stake, dump, and tow truck]) is used to describe a light vehicle with a pickup style cab and a commercial (non-pickup) body attached to the frame. Included are pickup based ambulances and tow trucks.

41 (Truck Based Panel) is used to describe a truck based station wagon that has sheet metal rather than glass above the beltline rearward of the B-pillars.

45 (Other Light Conventional Truck Type) is used for light conventional trucks that cannot be described elsewhere.

48 (Unknown Light Truck Type) is used when it is known that the vehicle is a light truck but further classification into one of the more detailed light truck categories (utility, van, pickup, or other light trucks) is not possible. Example: It is known the light vehicle is a utility vehicle or van but it can't be determined which one.

49 (Unknown Light Vehicle Type [automobile, utility, van, or light truck]) is used when it is known that the vehicle is a light vehicle, but insufficient data exists to specify what type of light vehicle it is.

BUSES

(excludes van-based buses with GVWR less than or equal to 10,000 lbs.)

Buses are defined as any motor vehicle designed primarily to transport large groups of passengers (nine or more persons, including the driver).

50 (School Bus) (designed to carry students, not cross country or transit) is a bus designed to carry passengers to and from educational facilities and/or related functions. The vehicles are characteristically painted yellow and clearly identified as school buses. Use this code regardless of whether the vehicle is owned by a school system or a private company. School buses converted for other uses (e.g., church bus) also take this code.

51 (Cross Country/Intercity Bus) describes a bus body type designed to travel long distances between cities (e.g., Greyhound).

52 (Transit Bus [City Bus]) describes a bus body type designed for public transportation typically within a city.

55 (Van-Based Bus GVWR greater than 10,000 lbs.) describes a bus body type built on a van-based chassis.

58 (Other Bus Type) is a vehicle designed/converted to carry nine or more persons, including the driver, not described by the attributes school bus, cross country/intercity bus, transit bus, or van-based bus. Examples include a specialized tour bus or bus based motor home.

59 (Unknown Bus Type) is used when it is known the transport device is a bus but there is insufficient data to choose between the bus attributes.

MEDIUM/HEAVY TRUCKS

(GVWR greater than 10,000 lbs.)

Medium/Heavy Trucks describe a single-unit truck specifically designed for carrying cargo on the same chassis as the cab. They pertain to a truck-tractor designed for towing trailers or semi-trailers. Although towing is their primary purpose, some truck-tractors are equipped with cargo areas located rearward of the cab.

60 (Step Van [Greater than 10,000 lbs. GVWR]) defines a single-unit, enclosed body with a GVWR greater than 10,000 lbs. and an integral driver's compartment and cargo area. Step vans are generally equipped with a folding driver seat mounted on a pedestal and a sliding door for easy ingress/egress.

61-63 (Single-Unit Straight Truck or Cab-chassis) describes a non-articulated truck designed to carry cargo. The attribute selected is based on the applicable GVWR range for the vehicle. Includes “incomplete” or “cutaway.”

64 (Single-Unit Straight Truck or Cab-chassis [GVWR unknown]) describes a medium/heavy non-articulated truck designed to carry cargo. It is known not to be a step van, van, or pickup truck, but its GVWR is unknown. Includes “incomplete” or “cutaway.”

66 (Truck-Tractor [Cab only or with any number of trailing units]) describes a fifth wheel equipped tractor-trailer power unit. The number of trailing units is not a consideration.

67 (Medium/Heavy Pickup [Greater than 10,000 lbs. GVWR]) is a single-unit straight truck with a pickup body style with a GVWR *greater than* 10,000 lbs. Examples include the Ford Super Duty 350, 450, or 550.

78 (Unknown Medium/Heavy Truck Type) is used when it is unknown whether the medium/heavy truck is a single-unit truck or a truck-tractor and/or trailer combination and it is known that the vehicle is either a medium or heavy truck with GVWR *greater than* 10,000 lbs.

79 (Unknown Truck Type [light/medium/heavy]) is used when it is known that this vehicle is a truck, but there is insufficient data to classify the vehicle further.

MOTOR HOMES

Motor Homes are recreational vehicles mounted on an incomplete vehicle chassis that is suitable to live in and drive across the country.

42 (Light Truck Based Motor Home [chassis mounted]) is used to describe a frame mounted recreational unit attached to a light van or conventional chassis.

65 (Medium/Heavy Truck Based Motor Home) describes a recreational vehicle mounted on a single unit medium/heavy truck chassis.

73 (Camper or Motor Home, unknown truck type) is used when it is known the vehicle is a camper or motor home, but the truck type is unknown.

MOTORCYCLES, MOPEDS, ALL-TERRAIN VEHICLES, ALL-TERRAIN CYCLES

80 (Two Wheel Motorcycle (excluding motor scooters)) is used when a motor vehicle having a seat or saddle for the use of its operator is a 2-wheeled open (e.g., no enclosed body) vehicle propelled by a motor. Motorcycles equipped with a side car also use this code.

81 (Moped or Motorized Bicycle) is used when the vehicle is a speed-limited motor-driven cycle capable of moving either by pedaling or by a motor. Note: In the circumstance that a person operating a motorized bicycle is classified as a non-motorist on the police crash report, this person should be coded as a motor vehicle occupant rather than a non-motorist in FARS/CRSS.

82 (Three-Wheeled Motorcycle (2 Rear Wheels)) is used when the vehicle is a 3-wheeled open vehicle propelled by a motor, or a 3-wheeled motorized bicycle capable of moving either by pedaling or by a motor.

83 (Off-Road Motorcycle) is used when the vehicle is a 2-wheeled open vehicle propelled by a motor designed or built for off road use only.

84 (Motor Scooter) a light 2-wheeled open motor vehicle on which the driver sits over an enclosed engine with legs together and feet resting on a floorboard.

85 (Unenclosed Three Wheel Motorcycle/Unenclosed Autocycle (1 Rear Wheel]) A large motorcycle with three wheels, configured with two front wheels and a saddle with handle bar or seat and a steering wheel but not completely enclosed.

86 (Enclosed Three Wheel Motorcycle/Enclosed Autocycle (1 Rear Wheel]) A large motorcycle with three wheels, configured with two front wheels, a seat and steering wheel and completely enclosed.

87 (Unknown Three Wheel Motorcycle Type) is used when the vehicle is known to be a 3-wheel motorcycle but it is not known if attribute [82 \(Three-wheel Motorcycle \(2 Rear Wheels\)\)](#), [85 \(Unenclosed Three Wheel Motorcycle/Unenclosed Autocycle \(1 Rear Wheel\)\)](#), or [86 \(Enclosed Three Wheel Motorcycle/Enclosed Autocycle \(1 Rear Wheel\)\)](#) applies.

88 (Other Motored Cycle [mini-bike, pocket motorcycles “pocket bikes”]) is used when the vehicle in question does not qualify for attributes 80-87.

89 (Unknown Motored Cycle Type) is used when it is known that the vehicle is a motored cycle, but no further data is available.

90 (ATV/ATC [All-Terrain Cycle]) is used for off-road recreational *vehicles*. ATV/ATCs have 3 or 4 wheels, a saddle type seat and handle bars for steering (no steering wheel). Does not include [96 \(Recreational Off-Highway Vehicles\(ROV\)\)](#) (automobile type seats and steering wheel).

OTHER VEHICLES

Other Vehicles describes all motored vehicles that are designed primarily for off-road use.

91 (Snowmobile) refers to a vehicle designed to be operated over snow propelled by a motor.

92 (Farm Equipment Other Than Trucks) refers to farming implements other than trucks propelled by a motor (e.g., farm tractors, combines, etc.).

93 (Construction Equipment Other Than Trucks) refers to construction equipment other than trucks propelled by a motor (e.g., bulldozer, road grader, etc.).

94 (Low speed vehicle (LSV)/Neighborhood Electric Vehicle (NEV]) refers to a vehicle that is designed for travel on secondary roads with speed limits equal to or less than 35 mph. LSVs can sometimes resemble golf carts but differ in that they must adhere to Federal Motor Vehicle Safety Standard (FMVSS) 500. Provisions of FMVSS 500 include the following:

The Vehicle must have:

- Four wheels
- Top speed of at least 20 mph, but it cannot exceed 25 mph
- GVWR less than 3,001 pounds
- Head, turn signal and tail lamps
- Reflex reflectors
- Parking brake
- Rear view mirrors
- Windshield
- Safety belts
- Seventeen (17) character VIN

95 (Golf Cart) is a motor vehicle that is designed and manufactured for operation on a golf course for sporting or recreational purposes. Golf carts or golf cars are different from code [94 \(Low speed vehicle \(LSV\)/Neighborhood Electric Vehicle \(NEV\)\)](#) in that if they are manufactured to go less than 20 mph they are not subject to the Federal Motor Vehicle Safety Standard (FMVSS) 500. As a result, golf carts will not have a 17-digit VIN. Golf carts will have a nonstandard serial number that may be reported in the case materials. Also, typically golf carts will not have safety features required of LSVs/NEVs under the FMVSS like safety belts, head lights, turn signal and tail lamps, rear view mirrors, etc.

96 (Recreational Off-Highway Vehicle [ROV]) ROVs are intended to be used on terrain similar to that on which all-terrain vehicles (ATVs) are used. ROVs are distinguished from ATVs by the presence of a steering wheel instead of a handle bar for steering, bench or bucket seats for the driver and passenger instead of straddle seating, and foot controls for throttle and braking instead of levers located on the handle bar. In addition, ROVs have a rollover protective system (ROPS), restraint systems, and a maximum speed greater than 30 mph.

97 (Other Vehicle Type) is used when the motorized vehicle in question does not qualify for Construction equipment other than trucks, Farm equipment other than trucks, or Snowmobile (e.g., fork-lift, city street sweeper, go-kart, "kit" car, etc.).

98 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**".

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Unknown Body Type) is used when the available information regarding the type of vehicle is reported as Unknown.

Consistency Checks:

Check	IF	THEN
(1D0P)	SPECIAL USE equals 01,	BODY TYPE must equal 02-09, 12, 14-21, 28, 29, 49, 99.
(1Q0F)	PERSON TYPE equals 01, and BODY TYPE equals 80-84, 88, 89,	SEATING POSITION must not equal 12-55, 99.
(1R0P)	SEATING POSITION equals 51, and BODY TYPE equals 50-52, 55, 58, 59,	INJURY SEVERITY must not equal 0, 9.

Consistency Checks (CRSS Only):

Check	IF	THEN
(V941)	BODY TYPE equals 90 or 91,	VEHICLE LICENSE PLATE NUMBER should equal 0000000000.

Consistency Checks (FARS Only):

Check	IF	THEN
(4S1P)	BODY TYPE equals 80-89, 96, and HM1 does not equal 1,	COMPLIANCE WITH CDL ENDORSEMENTS MUST equal 0.
(5SOP)	BODY TYPE equals 80-84, 88, 89, or 90,	EXTRICATION must equal 0.
(6A1P)	UNDERRIDE/OVERRIDE equals 1-8,	BODY TYPE must not equal 80-84, 88-91.
(D270)	BODY TYPE equals 50-52, 55, 63, 66, 72, or HM1 equals 2,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 00.
(D440)	COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 00,	BODY TYPE should not equal 50-52, 55, 63, 66, 72, and HM2 should not equal 2.
(P130)	BODY TYPE equals 60-67, 71, 72, 78, 79, and PERSON TYPE equals 01, 03, and INJURY SEVERITY equals 4,	FATAL INJURY AT WORK should equal 1.

V12 - Vehicle Model Year

FORMAT: 4 numeric

SAS NAME: Vehicle.MOD_YEAR, Person MOD_YEAR, Parkwork.PMODYEAR

ELEMENT VALUES:

Codes	Attributes
----	Actual Four Digit Model Year
9998	Not Reported
9999	Unknown

Definition: This element identifies the manufacturer's model year of this vehicle.

Remarks: SEE ADDITIONAL REMARKS UNDER [VEHICLE MAKE/VEHICLE MODEL OVERVIEW](#)

9998 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "Not Reported."

Code 9998 (Not Reported) in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

Code all four digits of the model year for which the vehicle was manufactured. For example, a vehicle manufactured as a 1985 model is to be coded as "1985."

Consistency Checks:

Check	IF	THEN
(1COP)	the VEHICLE MODEL YEAR is not equal to 9998 or 9999,	the VEHICLE MODEL YEAR must not be greater than CRASH YEAR plus ONE.
(900P)	VEHICLE IDENTIFICATION NUMBER (VIN) does not equal 0s, 8s, or 9s and VEHICLE MODEL YEAR is a valid year and greater than or equal to 1980 and VEHICLE MODEL YEAR equals _____,	the 10th digit of the valid VEHICLE IDENTIFICATION NUMBER (VIN) should equal _____ (contact NHTSA Headquarters for VIN Assistance).
(902P)	VEHICLE MODEL YEAR > 1980, VEHICLE MODEL YEAR is not equal to 9998 or 9999, and VEHICLE IDENTIFICATION NUMBER is not equal to all 0s, 8s, or 9s ;	VEHICLE IDENTIFICATION NUMBER positions 1-8, 11-14 should equal A-H, J-N, P, R-Z, 0-9, or *; VEHICLE IDENTIFICATION NUMBER position 9 should equal 0-9, X, or *; VEHICLE IDENTIFICATION NUMBER position 10 should equal A-H, J-N, P, R-T, V-Y, 1-9, or *; VEHICLE IDENTIFICATION NUMBER positions 15-17 should equal 0-9 or *.

Check	IF	THEN
(903P)	VEHICLE MODEL YEAR > 1980, VEHICLE MODEL YEAR is not equal to 9998 or 9999, and VEHICLE IDENTIFICATION NUMBER is not equal to <i>all 0s, 8s, or 9s</i> ;	VEHICLE IDENTIFICATION NUMBER positions 1-8, 11 should equal A-H, J-N, P, R-Z, or 0-9; VEHICLE IDENTIFICATION NUMBER position 9 should equal 0-9, or X; VEHICLE IDENTIFICATION NUMBER position 10 should equal A-H, J-N, P, R-T, V-Y, or 1-9; VEHICLE IDENTIFICATION NUMBER positions 12-14 should equal A-H, J-N, P, R-Z, 0-9, or *; VEHICLE IDENTIFICATION NUMBER positions 15-17 should equal 0-9 or *.
(920P)	any one of the fields MAKE, MODEL, BODY TYPE, and MODEL YEAR, equals Not Reported [MAKE (97), MODEL (997), BODY TYPE (98), and MODEL YEAR (9998)],	the other three must also equal Not Reported.
(921P)	MAKE is not 97, 98, 99, and equals __, and MODEL equals __,	MODEL YEAR must equal __, or CRASH YEAR plus 1.
(930P)	any one of the fields MAKE, MODEL, BODY TYPE, and MODEL YEAR, does not equal Not Reported [MAKE (97), MODEL (997), BODY TYPE (98), and MODEL YEAR (9998)],	the other three must also not be coded as Not Reported.
(P290)	AIR BAG DEPLOYED equals 01-03, 07-09, and BODY TYPE equals 01-49, and MODEL YEAR equals 1998 or newer,	SEATING POSITION should equal 11, 13, 21, 23, 31, or 33.
(U490)	UNLIKELY: GVWR/GCWR equals 8 or 9 and VEHICLE MODEL YEAR is greater than 1980 and not equal to 9998 or 9999, and VIN is not equal to 0000000000000000, 88888888888888, or 9999999999999999, and VIN passes the check digit check (i.e., VIN is a Valid VIN).	--
(U510)	UNLIKELY: VEHICLE MODEL YEAR equals 9998 if HIT AND RUN does not equal 1.	--
(V010)	MODEL YEAR should not be less than 1940.	--
(V011)	VEHICLE MODEL YEAR is less than 1950,	VEHICLE IDENTIFICATION NUMBER must equal 0s.
(V620)	CRASH MONTH is between January and March,	the VEHICLE MODEL YEAR should NOT be greater than the CRASH YEAR unless it equals 9998 or 9999 (contact Coding Assistance).
(V922)	MAKE equals 98, 99, and MODEL equals __,	MODEL YEAR should equal __ (MODEL and MODEL YEAR should be valid according to Vehicle Tables).
(V950)	VEHICLE MODEL YEAR is less than 1994, and SEATING POSITION equals 31, 33, 39,	RESTRAINT SYSTEM/HELMET USE should not equal 01, 03, and BODY TYPE should equal 12, 15, 16, 19-21.

V13 - Vehicle Identification Number

FORMAT: 17 alphanumeric

SAS NAME: Vehicle.VIN, Parkwork.PVIN

ELEMENT VALUES:

Codes	Attributes
00000000000000000000	No VIN Required
--	Any Alphanumeric Characters – Actual VIN number
888888888888888888	Not Reported
999999999999999999	Reported as Unknown
*	VIN Character Missing or Not Decipherable

Definition: This element records the vehicle identification number (VIN) *or alphanumeric identifier in the case materials* of a single vehicle or the power unit of a combination vehicle.

Remarks: SEE ADDITIONAL REMARKS UNDER [VEHICLE MAKE/VEHICLE MODEL OVERVIEW](#)

Code the complete VIN of the single vehicle or the power unit of a combination vehicle. The VIN is always left-justified. Trailer VINs are not coded in this element. See [TRAILER VEHICLE IDENTIFICATION NUMBER](#) to record the VIN on any trailer. If the VIN for the power unit of a combination vehicle is not available, code [8s \(Not Reported\)](#) for this element, rather than the trailer VIN.

The Vehicle Identification Number (VIN) standards are described in 49 CFR Part 565. This standard requires that each VIN have 17 characters, not contain the letter "I," "O," or "Q," and pass a mathematical test (check digit). **This data element may also be used to record non-standard VINS. See instruction under [*\(VIN Character Missing or Not Decipherable\)](#) for missing or illegible characters.**

For a 17-character VIN that produces check digit errors, first attempt to resolve the error. If it cannot be resolved, record the VIN as provided and override any edit checks with explanation. See instruction under [*\(VIN Character Missing or Not Decipherable\)](#) for missing or illegible characters.

Only enter [8s \(Not Reported\)](#) or [9s \(Reported as Unknown\)](#) when the entire VIN is missing or unknown.

Enter all **0s (No VIN Required)** if the vehicle is not required to have a VIN as per 49 CFR Part 565 (e.g., ATVs, off road motorcycles, farm tractors, go-carts) AND there is no VIN data available. If VIN data is available enter the VIN *as provided in the case materials*.

NOTE for pre-1981 vehicles:

If the vehicle is manufactured by the Ford Motor Company and the VIN begins or ends with a script "f," the script "f" is not entered. Proceed to the next character, as in the example below.

Example:

VIN: f3 U 6 2 S 1 0 0 9 3 2 f
ENTER: 3 U 6 2 S 1 0 0 9 3 2

In addition, if any hyphens or periods are contained in the string of alphanumeric characters, ignore them as in the example below.

Example:

VIN: S M - E . 3 0 7 6 4 2 1
ENTER: S M E 3 0 7 6 4 2 1

8s (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **8s (Not Reported)** in these three situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials), or
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials), or
3. Information on the police crash report has been sanitized/redacted and no other information is available in the case materials.

9s (Reported as Unknown) is used when the entire power unit VIN is reported as Unknown with no information available.

** (VIN Character Missing or Not Decipherable) is used for any VIN character(s) that is (are) missing or not decipherable and the correct character(s) cannot be identified to resolve the VIN for the specific position(s).*

Notes regarding VINs with less than 17 digits:

- *Some vehicles (e.g., custom, pre-1981, imported, or rebuilt vehicles) may have been assigned identification numbers that are less than 17 digits. These should be entered as reported. Do not fill the remaining positions with asterisks “*”.*
- *If a VIN is reported as less than 17 digits for a vehicle that would normally have 17 digits, and all characters are legible, fill with asterisks “*” at the end for the missing character(s).*

Examples:

- **1102112486**
- **JM2UF1114G0*******

FARS SPECIAL INSTRUCTION:

If the State will not allow transmittal of a complete standard VIN, code the right-most four characters **with asterisks “*”**. The vehicle registration file must be used to verify the VIN.

CRSS SPECIAL INSTRUCTION:

If the information from a decoded VIN and the police crash report are inconsistent, use the following guidelines.

- Make and model on the police crash report takes precedence over the make and model indicated by the VIN.
- Model year - Use model year as indicated by VIN if the VIN Make and Model matches the make and model shown on the police crash report.
- Body type - Use body type indicated by the VIN if the VIN Make and Model matches the make and model shown on the police crash report.

If the information about make and model on the police crash report is inconsistent, model takes precedence over the make.

Consistency Checks:

Check	IF	THEN
(900P)	VEHICLE IDENTIFICATION NUMBER (VIN) does not equal 0s, 8s, or 9s and VEHICLE MODEL YEAR is a valid year and greater than or equal to 1980 and VEHICLE MODEL YEAR equals _____,	the 10th digit of the valid VEHICLE IDENTIFICATION NUMBER (VIN) should equal _____ (contact NHTSA Headquarters for VIN Assistance).
(901P)	any VEHICLE IDENTIFICATION NUMBER (VIN) that does not equal 0s, 8s, or 9s,	VEHICLE IDENTIFICATION NUMBER (VIN) must be unique within a crash.
(902P)	VEHICLE MODEL YEAR > 1980, VEHICLE MODEL YEAR is not equal to 9998 or 9999, and VEHICLE IDENTIFICATION NUMBER is not equal to <i>all 0s, 8s, or 9s;</i>	VEHICLE IDENTIFICATION NUMBER positions 1-8, 11-14 should equal A-H, J-N, P, R-Z, 0-9, or *; VEHICLE IDENTIFICATION NUMBER position 9 should equal 0-9, X, or *; VEHICLE IDENTIFICATION NUMBER position 10 should equal A-H, J-N, P, R-T, V-Y, 1-9, or *; VEHICLE IDENTIFICATION NUMBER positions 15-17 should equal 0-9 or *.
(903P)	VEHICLE MODEL YEAR > 1980, VEHICLE MODEL YEAR is not equal to 9998 or 9999, and VEHICLE IDENTIFICATION NUMBER is not equal to <i>all 0s, 8s, or 9s;</i>	VEHICLE IDENTIFICATION NUMBER positions 1-8, 11 should equal A-H, J-N, P, R-Z, or 0-9; VEHICLE IDENTIFICATION NUMBER position 9 should equal 0-9, or X; VEHICLE IDENTIFICATION NUMBER position 10 should equal A-H, J-N, P, R-T, V-Y, or 1-9; VEHICLE IDENTIFICATION NUMBER positions 12-14 should equal A-H, J-N, P, R-Z, 0-9, or *; VEHICLE IDENTIFICATION NUMBER positions 15-17 should equal 0-9 or *.
(U490)	UNLIKELY: GVWR/GVCR equals 8 or 9 and VEHICLE MODEL YEAR is greater than 1980 and not equal to 9998 or 9999, and VIN is not equal to 00000000000000000000, 8888888888888888, or 9999999999999999, and VIN passes the check digit check (i.e., VIN is a Valid VIN).	--
(V011)	VEHICLE MODEL YEAR is less than 1950,	VEHICLE IDENTIFICATION NUMBER must equal 0s.
(V280)	Possible error in VIN check digit	--
(V300)	Possible error in VIN Production Number.	--
(V62P)	CARGO BODY TYPE equals 01-12, 97, 98, and VEHICLE IDENTIFICATION NUMBER does not equal <i>8s or 9s,</i>	GVWR/GCWR must equal 2, 3.

Consistency Checks (FARS Only):

Check	Language
(V270)	Possible error in VIN character types or number of characters.

V14 - Vehicle Trailing

FORMAT: 1 numeric

SAS NAME: Vehicle.TOW_VEH; Person.TOW_VEH; Parkwork.PTRAILER

ELEMENT VALUES:

Codes	Attributes
0	No Trailing Units
1	One Trailing Unit
2	Two Trailing Units
3	Three or more Trailing Units
4	Yes, Number of Trailing Units Unknown
5	Vehicle Towing Another Motor Vehicle - Fixed Linkage
6	Vehicle Towing Another Motor Vehicle - Non-Fixed Linkage
9	Unknown

Definition: This element identifies whether or not this vehicle had any attached trailing units or was towing another motor vehicle.

Remarks: Trailing unit applies to any device connected to a motor vehicle by a hitch, including tractor-trailer combinations, a single-unit truck pulling a trailer (truck trailer), a boat trailer hitched onto a motor vehicle, etc. If the case materials do not provide sufficient information if the linkage was fixed or not, consider the linkage as fixed.

A vehicle towing another motor vehicle is not considered to be a trailer but is considered to be a towed vehicle (see [5 \(Vehicle Towing Another Motor Vehicle - Fixed Linkage\)](#) or [6 \(Vehicle Towing Another Motor Vehicle - Non-Fixed Linkage\)](#)). A converter dolly is a device used to hitch a trailer to another semi-trailer or straight truck and is not counted as a separate trailing unit. For combination vehicles (medium/heavy trucks), count only the cargo-carrying units.

0 (No Trailing Units) is used when this vehicle was not pulling or towing a wheeled unit.

1 (One Trailing Unit) is used when one trailer was being pulled by this vehicle.

2 (Two Trailing Units) is used when this vehicle was pulling two trailers.

3 (Three or More Trailing Units) is used when this vehicle was pulling three or more trailers.

4 (Yes, Number of Trailing Units Unknown) is used when it is known that there was a trailer but the number of trailers cannot be determined.

5 (Vehicle Towing Another Motor Vehicle - Fixed Linkage) is used to identify that a vehicle was towing another motor vehicle(s) connected by a fixed linkage. The towed vehicle will have two or more wheels on the ground. This will most commonly apply to drive-away/tow-away tow trucks. These are vehicles equipped with a mechanism designed to be attached to a towed vehicle (e.g., hoist). This attribute would also be used for saddle-mounted towed vehicles. An example of a saddle-mount unit would be a bobtail towing one or more other bobtails. This attribute does not apply to vehicles towed by being loaded on a flatbed or auto transporter.

6 (Vehicle Towing Another Motor Vehicle - Non-Fixed Linkage) is used to identify that a vehicle was towing another motor vehicle(s) connected by a non-fixed linkage. A non-fixed linkage includes ropes, chains, or cables.

9 (Unknown) is used when it cannot be determined from any information if a unit was being pulled or towed.

FARS SPECIAL INSTRUCTION:

For vehicles being towed by an illegal hitch (rope, chain, cable), use the [22 \(Towing or Pushing Improperly\)](#) for the data element [Related Factors-Driver Level](#).

Consistency Checks:

Check	IF	THEN
(2B0P)	JACKKNIFE equals 1-3,	VEHICLE TRAILING must not equal 0, 9.
(4C1P)	NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 01-05, 07-09, 14, 15, 17, 19, 94, 95, 96, 97, and VEHICLE TRAILING does NOT equal 0,	NUMBER OF OCCUPANTS must not be greater than 20.
(4C2P)	NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 06, 11, 16, and VEHICLE TRAILING does NOT equal 0,	NUMBER OF OCCUPANTS must not be greater than 22.
(4C3P)	NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 12, and VEHICLE TRAILING does NOT equal 0,	NUMBER OF OCCUPANTS must not be greater than 25.
(4C4P)	NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 80-89, and VEHICLE TRAILING does NOT equal 0,	NUMBER OF OCCUPANTS must not be greater than 15.
(4C5P)	NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 42, 73, and VEHICLE TRAILING does NOT equal 0,	NUMBER OF OCCUPANTS must not be greater than 30.

(V993)	VEHICLE TRAILING equals 2,	VEHICLE CONFIGURATION must not equal 01, 02, 05, 06, or 08.
(V994)	VEHICLE TRAILING equals 3,	VEHICLE CONFIGURATION must not equal 01, 02, 05-07.
(V995)	VEHICLE TRAILING equals 4,	VEHICLE CONFIGURATION must not equal 01, 02, 05-08.
(V997)	VEHICLE TRAILING equals 6,	VEHICLE CONFIGURATION must not equal 04, 06-08.
(V998)	VEHICLE TRAILING equals 9,	VEHICLE CONFIGURATION must not equal 04-07 or 08.

Consistency Check (CRSS Only):

Check	IF	THEN
(V986)	VEHICLE TRAILING equals 3,	PSU should equal OH, OK, SD, UT.

Consistency Check (FARS Only):

Check	IF	THEN
(V16P)	RELATED FACTORS-DRIVER LEVEL equals 88,	VEHICLE TRAILING must not equal 0, 9.
(V983)	VEHICLE TRAILING equals 3,	STATE should equal 04, 08, 16, 18, 20, 30-32, 38-41, 46, 49.
(V984)	STATE does not equal 04, 08, 16, 18, 20, 30-32, 38-41, 46, 49,	VEHICLE TRAILING should not equal 3.

V15 - Trailer Vehicle Identification Number

FORMAT: 3 sets, 17 alphanumeric

SAS NAME: TBD

ELEMENT VALUES:

Codes	Attributes
0000000000000000000	No VIN Required
--	Any Alphanumeric Characters – Actual VIN
7777777777777777777	No Trailing Units
8888888888888888888	Not Reported
9999999999999999999	Reported as Unknown
*	VIN Character Missing or Not Decipherable

Definition: This element records the vehicle identification number (VIN) *or alphanumeric identifier in the case materials* of any trailing units of a combination vehicle.

Remarks: [SEE VEHICLE MAKE/VEHICLE MODEL OVERVIEW](#).

VINs for the power unit are not coded in this element. See [V13 Vehicle Identification Number](#) to record the VIN on the power unit.

Code the complete VIN of any trailing units of a combination vehicle (up to three trailing units). The number of VIN fields available to code is system generated based on the presence of a trailer or trailers in the element [VEHICLE TRAILING](#). For example, if VEHICLE TRAILING equals **0 (No Trailing Units)**, **5 (Vehicle Towing Fixed)**, **6 (Vehicle Towing Non-fixed)**, or **9 (Unknown)** then TRAILER VEHICLE IDENTIFICATION NUMBER is auto-filled with **7s (No Trailing Units)**. If VEHICLE TRAILING equals **1 (One Trailing Unit)** then one TRAILER VEHICLE IDENTIFICATION NUMBER set of 17 alphanumeric characters is available to code and the remaining two are 7-filled by the system.

The VIN is always left-justified.

If the VIN for any trailing unit of a combination vehicle is not available, code [8s \(Not Reported\)](#) here. For example, if a truck tractor semi-trailer combination has no VIN information for the trailer, code [8s \(Not Reported\)](#) in the available field. If a truck tractor double-trailer combination has VIN information for only one of the two trailers, code the known VIN in the first field and [8s \(Not Reported\)](#) in the second Trailer Vehicle Identification Number field.

The Vehicle Identification Number (VIN) standards are described in [49 CFR Part 565](#). This standard requires that each VIN have 17 characters, not contain the letter "I," "O," or "Q," and pass a mathematical test (check digit). ***This data element may also be used to record non-standard VINs. See instruction under [* \(VIN Character Missing or Not Decipherable\)](#) for missing or illegible characters.***

For a 17-character VIN that produces check digit errors, first attempt to resolve the error. If it cannot be resolved, record the VIN as provided and override any edit checks with explanation. See instruction under [* \(VIN Character Missing or Not Decipherable\)](#) for missing or illegible characters.

Only enter [8s \(Not Reported\)](#) or [9s \(Reported as Unknown\)](#) when the entire VIN is missing or reported unknown.

Enter all **0s (No VIN Required)** if the vehicle has a trailer but the trailer is not required to have a VIN as per [49 CFR Part 565 Requirements for Trailer Manufacturers](#). This attribute should only be used for homemade or custom trailers not manufactured for sale to the public.

NOTE for pre-1981 vehicles:

If the vehicle is manufactured by the Ford Motor Company and the VIN begins or ends with a script “f,” the script “f” is not entered. Proceed to the next character, as in the example below.

VIN: f3 U 6 2 S 1 0 0 9 3 2 f

ENTER: 3 U 6 2 S 1 0 0 9 3 2

In addition, if any hyphens or periods are contained in the string of alphanumeric characters, ignore them as in the example below.

VIN: S M - E . 3 0 7 6 4 2 1

ENTER: S M E 3 0 7 6 4 2 1

8s (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “Not Reported.”

Code **8s (Not Reported)** in these three situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials), or
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials), or
3. Information on the police crash report has been sanitized/redacted and no other information is available in the case materials.

9s (Reported as Unknown) is used when the entire trailing unit VIN is reported as Unknown. For example, the police report the vehicle information is unknown for hit-and-run vehicle known to have a trailer(s).

*** (VIN Character Missing or Not Decipherable) is used for any VIN character(s) that is (are) missing or not decipherable and the correct character(s) cannot be identified to resolve the VIN for the specific position(s).**

Notes regarding VINs with less than 17 digits:

- **Some vehicles (e.g., custom, pre-1981, imported, or rebuilt vehicles) may have been assigned identification numbers that are less than 17 digits. These should be entered as reported. Do not fill the remaining positions with asterisks “*”.**
- **If a VIN is reported as less than 17 digits for a vehicle that would normally have 17 digits, and all characters are legible, fill with asterisks “*” at the end for the missing character(s).**

Examples:

- **8675309**
- **558MEBM23FB*******

FARS SPECIAL INSTRUCTION:

If the State will not allow transmittal of a complete standard VIN, code the right-most four characters **with asterisks “*”**. The vehicle registration file must be used to verify the VIN.

Consistency Checks:

Check	IF	THEN
(4EOP)	VEHICLE TRAILING equals 1 or 2 or 3,	TRAILER VEHICLE IDENTIFICATION NUMBER must not equal 7s or blanks for all three sets.
(4E1P)	VEHICLE TRAILING equals 4,	TRAILER VEHICLE IDENTIFICATION NUMBER must not equal 7s for any of the three sets.
(904P)	TRAILER VEHICLE IDENTIFICATION NUMBER is not equal to <i>all 0s, 7s, 8s, or 9s</i> ,	TRAILER VEHICLE IDENTIFICATION NUMBER positions 1-8, 11-14 should equal A-H, J-N, P, R-Z, 0-9, or *; TRAILER VEHICLE IDENTIFICATION NUMBER position 9 should equal 0-9, X, or *; TRAILER VEHICLE IDENTIFICATION NUMBER position 10 should equal A-H, J-N, P, R-T, V-Y, 1-9, or *; TRAILER VEHICLE IDENTIFICATION NUMBER positions 15-17 should equal 0-9 or *.
(905P)	TRAILER VEHICLE IDENTIFICATION NUMBER is not equal to <i>all 0s, 7s, 8s, or 9s</i> ,	TRAILER VEHICLE IDENTIFICATION NUMBER positions 1-8, 11 should equal A-H, J-N, P, R-Z, 0-9, <i>or</i> *; TRAILER VEHICLE IDENTIFICATION NUMBER position 9 should equal 0-9, X, <i>or</i> *; TRAILER VEHICLE IDENTIFICATION NUMBER position 10 should equal A-H, J-N, P, R-T, V-Y, 1-9, <i>or</i> *; TRAILER VEHICLE IDENTIFICATION NUMBER positions 12-14 should equal A-H, J-N, P, R-Z, 0-9, or *; TRAILER VEHICLE IDENTIFICATION NUMBER positions 15-17 should equal 0-9 or *.
(U687)	UNLIKELY: TRAILER VEHICLE IDENTIFICATION NUMBER equals 0s for any of the three sets.	--

V16 - Jackknife

FORMAT: 1 numeric

SAS NAME: Vehicle.J_KNIFE

ELEMENT VALUES:

Codes	Attributes
0	Not an Articulated Vehicle
1	No
2	Yes - First Event
3	Yes - Subsequent Event

Definition: This element identifies if this vehicle experienced a “jackknife” anytime during the unstabilized situation.

Remarks: Jackknife can occur at any time during the crash sequence. This element is applicable for all power unit/trailing unit combinations (e.g., truck tractor or single-unit truck with one or more trailers, articulated bus, car pulling a boat on a trailer, light utility vehicle/trailing unit combination, etc.).

Jackknife applies to a condition that occurs to an articulated vehicle, any vehicle with a trailing unit connected by a hitch (fixed linkage) while in motion. A jackknife occurs when there is an uncontrolled articulation between the power unit and the trailing unit in which the trailing unit does not follow directly behind the power unit (tracking), and the driver did not initiate the non-tracking situation. The condition reflects a loss of control of the vehicle by the driver in which the trailing units’ normal straight-line path behind the power unit is not maintained.

If the final resting configuration of the vehicle in the police crash report diagram is in a jackknife position, it does not necessarily mean that the vehicle has jackknifed. Turning and backing are examples of driver initiated non-tracking controlled articulation and are not coded as a jackknife.

In the case materials, the terms “tractor jackknife” or “trailer swing” may be used to describe particular incidences of uncontrolled articulation. Either incident shall be coded as Jackknife.

Jackknife is not likely to be a harmful event but may be part of an unstabilized condition just before the first harmful event.

0 (Not an Articulated Vehicle) is used when this vehicle is not a vehicle-trailing unit combination. This attribute can also be used when coding a hit-and-run vehicle when there is not an indication in the case materials that the hit and run vehicle had a trailer.

1 (No) is used when no uncontrolled articulation was reported between a vehicle and a trailing unit.

2 (Yes - First Event) is used when an uncontrolled articulation was reported as occurring before or as part of the first injury or damage producing event for this vehicle.

3 (Yes - Subsequent Event) is used when an uncontrolled articulation occurs after the first injury or damage producing event for this vehicle.

Consistency Checks:

Check	IF	THEN
(2B0P)	JACKKNIFE equals 1-3,	VEHICLE TRAILING must not equal 0, 9.
(3B0P)	JACKKNIFE equals 2, 3,	TRAVEL SPEED must not equal 000.
(5B0P)	JACKKNIFE equals 0 and BODY TYPE equals 66,	VEHICLE TRAILING must not equal 1-4.
(5B0Q)	JACKKNIFE equals 0,	VEHICLE TRAILING must equal 0, 5, 6, or 9.
(7B0F)	JACKKNIFE equals 2, 3,	DRIVER PRESENCE must equal 1.
(AK00)	CARGO BODY TYPE equals 22, 96,	JACKKNIFE should equal 0.
(AL8P)	SEQUENCE OF EVENTS equals 51, 70,	JACKKNIFE must equal 2, 3.
(CI0P)	VEHICLE TRAILING equals 1-4,	JACKKNIFE must not equal 0.
(V538)	JACKKNIFE equals 2,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must not equal 04, 05, 07-09, or 13 for this vehicle.
(VH70)	UNIT TYPE equals 2-4,	elements JACKKNIFE, TRAVEL SPEED, AND SEQUENCE OF EVENTS must all be left blank.

V17 - Motor Carrier Identification Number

FORMAT: 1 set 2 numeric, 1 set 9 alphanumeric

SAS NAME: Vehicle.MCARR_ID, parkwork.PMCARR_ID, Vehicle.MCARR_I1; parkwork.PMCARR_I1,
Vehicle.MCARR_I2; parkwork.PMCARR_I2

ELEMENT VALUES:

Issuing Authority:

Codes	Attributes
00	Not Applicable
01-56	State Code
57	US DOT
58	MC/MX (ICC)
95	Canada
96	Mexico
88	None
77	Not Reported
99	Reported as Unknown

Identification Number:

Codes	Attributes
--	Actual Number
0s	Not Applicable
8s	None
7s	Not Reported
9s	Reported as Unknown

Definition: This element records the issuing authority and motor carrier identification number if applicable to this vehicle.

Remarks: The Motor Carrier Identification Number is recorded on the Truck Supplement or police crash report next to the appropriate Source (Issuing Authority.) This information should be available on your police crash report or truck and bus supplement with other elements required by the Federal Motor Carrier Safety Administration (FMCSA). You should expect to find motor carrier identification numbers for the following qualifying vehicles:

1. Light trucks pulling a trailer with gross combination weight rating (GCWR) greater than 10,000 lbs.
2. Medium/Heavy Trucks: vehicles with GVWR greater than 10,000 lbs.
3. Vehicles with 9 or more seats (including the driver).
4. Light Trucks, Vans, and Passenger Vehicles displaying a hazardous materials placard.

Federal regulations require that almost all commercial trucks/buses operating across State lines that meet the above criteria (i.e., interstate) have Identification Numbers except those hauling “exempt” commodities (such as unprocessed agricultural products). This will be a U.S. DOT or MC/MX (ICC) Number. Some States issue “Intrastate” motor carriers a State number that can also be recorded here.

Identification Number should be left justified. If less than 9 characters, left-justify and do not zero-fill.

Figure 12: Examples of Left-Justified Coding of Motor Carrier Identification Number

Supplement/PAR	Coding
0 0 3 5 1 8	0 0 3 5 1 8
3 5 1 8	0 0 0 3 5 1 8
3 5 1 8	3 5 1 8
3 5 8 1 0 0 0	3 5 8 1 0 0 0
Nebraska issued Intrastate DOT # 3 5 8 1 6 4 N E	3 5 8 1 6 4 N E

Note: Many carriers will have a U.S. DOT or MC/MX (ICC) Number plus a State Number.

HIERARCHY: When Identification Numbers are available from more than one Source (Issuing Authority), it is most important to code the U.S. DOT number then the MC/MX (ICC) number if one is available. It is next most important to code the Mexican or Canadian issued number. Finally, State-issued numbers should be coded.

57 (US DOT NUMBERS): U.S. DOT is used in “Issuing Authority” if a U.S. DOT Number or a State Number and U.S. DOT Number are recorded on the police crash report or truck and bus supplement. Enter the U.S. DOT Number in “Identification Number.”

- US DOT Numbers are in the process of being assigned to Intrastate motor carriers in a number of States. These should include the issuing State’s two-character abbreviation on the end; e.g., U.S. DOT 123456XX (where “XX” is the State abbreviation). See example of proper coding in [Figure 12](#).

58 (MC/MX (ICC) NUMBERS): MC/MX (ICC) is used in “Issuing Authority” if an MC/MX (ICC) Number or a State Number and an MC/MX (ICC) Number are recorded on the police crash report or Supplement. Enter the MC/MX (ICC) Number in “Identification Number.”

STATE NUMBERS: If only a State Number is recorded on the police crash report or Supplement, then code the appropriate FARS State Code in “Issuing Authority” and enter the State Number in “Identification Number.”

State Numbers are issued by a public utility commission, a public service commission, or some other State agency, to vehicles that operate either in interstate commerce or only within that State. However, some States do not regulate the motor carrier industry. Trucks and buses that operate strictly within such States (i.e., intrastate) may not have numbers.

CANADIAN/MEXICAN NUMBERS: Use attributes “95” or “96” in “Issuing Authority” if a Canadian or Mexican authority (respectively) has issued the only Carrier Identification Number recorded on the police crash report or Supplement.

00/0s (Not Applicable) is used when none of the qualifying criteria above apply to this vehicle.

88/8s (None) is used when you would expect this type of vehicle to have an ID Number because the qualifying criteria above apply to this vehicle, but there is no Motor Carrier Identification number to record or the case material states “No Number.” This can occur because the vehicle is not properly marked or because its use or activity at the time of the crash does not require it to have a number. Examples of vehicles that may not require a number include construction or farm equipment, vehicles operated strictly intrastate in a State that does not regulate intrastate carriers, government owned/operated vehicles, and personal use vehicles (i.e. non-commercial).

99/9s (Reported as Unknown) is used if the investigating officer reported the motor carrier identification number as unknown or when the body type of the vehicle is unknown.

77/7s (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **77/7s (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

Note: For this element, **Not Reported** is used when the qualifying criteria above apply to this vehicle but **88/8s (None)** does not apply, and:

- the police crash report or truck supplement leaves the identification number field blank; or
- the officer did not complete a supplement or a field on the police crash report (no further information given).

FARS SPECIAL INSTRUCTION:

If your State uses separate Truck/Bus Supplements, you should seek help to get routine access to them, just as with your State’s police crash report. Your State’s SAFETYNET representative may be able to provide a Motor Carrier Identification Number.

Consistency Checks:

Check	IF	THEN
(4N1P)	VEHICLE CONFIGURATION does not equal 00,	MOTOR CARRIER IDENTIFICATION NUMBER must not equal 00-00000000.
(4N2P)	MOTOR CARRIER IDENTIFICATION NUMBER equals 00-00000000,	VEHICLE CONFIGURATION must equal 00.
(4N3P)	MOTOR CARRIER IDENTIFICATION NUMBER (Identification Number) equals 00000000,	MOTOR CARRIER IDENTIFICATION NUMBER (Issuing Authority) must equal 00.
(4N4P)	MOTOR CARRIER IDENTIFICATION NUMBER does not equal 00-00000000,	BODY TYPE must equal 12, 16, 21, 28, 34, 40, 45, 48-52, 55, 58-66, 67, 71, 72, 78, 79, 92, 93, 99, or HM2 must equal 2.
(4N5P)	BODY TYPE does not equal 12, 16, 21, 28, 34, 40, 45, 48-52, 55, 58-66, 67, 71, 72, 78, 92, 93, or HM2 does not equal 2,	MOTOR CARRIER IDENTIFICATION NUMBER must equal 00-00000000, 99-999999999.

Check	IF	THEN
(4N7P)	MOTOR CARRIER IDENTIFICATION NUMBER (Identification Number) equals 888888888 or 777777777 or 999999999,	MOTOR CARRIER IDENTIFICATION NUMBER (Issuing Authority) should be filled respectively as 88 or 77 or 99.
(4NAP)	MOTOR CARRIER IDENTIFICATION NUMBER (Issuing Authority) equals 01-58, 95, 96,	MOTOR CARRIER IDENTIFICATION NUMBER (Identification Number) should not equal 888888888, 777777777, 999999997, 999999999.
(4NBP)	MOTOR CARRIER IDENTIFICATION NUMBER (Issuing Authority) equals 01-58, 95, 96,	MOTOR CARRIER IDENTIFICATION NUMBER (Identification Number) must not equal 000000000.
(4NCP)	MOTOR CARRIER IDENTIFICATION NUMBER (Issuing Authority) is 00 or 77 or 88 or 99,	MOTOR CARRIER IDENTIFICATION NUMBER (Identification Number) must be filled respectively as 000000000 or 777777777 or 888888888 or 999999999.
(U680)	UNLIKELY: MOTOR CARRIER IDENTIFICATION NUMBER (Identification Number) equals 999999997.	--
(V980)	BODY TYPE equals 50-52, 55, 58-67, 71, 72, 78, 93, or HM1 equals 2,	MOTOR CARRIER IDENTIFICATION NUMBER must not equal 00-000000000.
(V981)	VEHICLE CONFIGURATION equals 00,	MOTOR CARRIER IDENTIFICATION NUMBER should equal 00-000000000.
(V982)	MOTOR CARRIER IDENTIFICATION NUMBER does not equal 00-000000000,	VEHICLE CONFIGURATION should not equal 00.

V18 – GVWR/GCWR

Gross Vehicle Weight Rating/ Gross Combination Weight Rating

FORMAT: 1 numeric

SAS NAME: Vehicle.GVWR, parkwork.PGVWR

ELEMENT VALUES:

Codes	Attributes
0	Not Applicable
1	10,000 lbs. or less
2	10,001 lbs. - 26,000 lbs.
3	26,001 lbs. or more
8	Not Reported
9	Reported as Unknown

Definition: This element identifies the gross vehicle weight rating of this vehicle when applicable.

Remarks: Record the applicable weight range for a single vehicle's Gross Vehicle Weight Rating (GVWR) or combination vehicle's Gross Combination Weight Rating (GCWR).

It may appear as a numeric value or as a range of values like those displayed above. This information should be available on your police crash report or truck and bus supplement with other elements required by the Federal Motor Carrier Safety Administration (FMCSA).

Gross Vehicle Weight Rating (GVWR) is the value specified by the manufacturer as the recommended maximum loaded weight of a single motor vehicle.

Gross Combination Weight Rating (GCWR) is the value specified by the manufacturer(s) as the recommended maximum loaded weight of a combination (articulated) motor vehicle. This is for truck tractors and single-unit trucks pulling a trailer(s). GCWR is the sum of the gross vehicle weight ratings (GVWR) of all units, power unit and its trailer(s).

For Truck/Trailer Combinations: If your State records the GVWR of the power unit and trailer(s) in separate fields, be sure to add together the GVWRs of all the units when recording this element.

0 (Not Applicable) should be used for vehicles 10,000 lbs. or less GVWR/GCWR that do not have a hazardous material placard, and for any vehicle with less than 9 seats (including driver).

1 (10,000 lbs. or less) should be used for vehicles 10,000 lbs. or less GVWR/GCWR when displaying a hazardous materials placard and for any vehicle with 9 or more seats (including driver) that is 10,000 lbs. GVWR or less.

8 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **8 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

9 (Reported as Unknown) should be used when GVWR/GCWR information is reported as “Unknown” on your police crash report or truck and bus Supplement and the decoded VIN is unable to return a value.

PROCEDURE FOR VERIFICATION OF GVWR/GCWR RANGE:

The MDE provides decoded VIN values for GVWR. This information is available under the Vehicle Information tab.

NOTE: The VIN decoding only provides the GVWR of a single vehicle or the GVWR of the power unit in a combination unit motor vehicle.

- For Truck/Trailer Combinations:
 1. If the VIN return fits within the range provided on the police crash report or truck and bus supplement, use that value.
 2. If the VIN return falls below the range provided on the police crash report or truck and bus supplement, use the value provided on the crash report to account for the addition of the trailer's GVWR.
- If GVWR/GCWR information is unavailable or not reported on your police crash report or truck and bus Supplement, and you have a valid VIN, use the information on the power unit provided by the decoded VIN to code this element.

Comparison of the VIN and Codes for GVWR/GCWR

DECODED VIN RANGES (trucks only)	FARS/CRSS CODES
--	<u>0 – Not Applicable</u>
6,000 lbs. or less	<u>1 – 10,000 lbs. or less</u>
6,001 – 10,000 lbs.	“
10,001 – 14,000 lbs.	2 – 10,001 – 26,000 lbs.
14,001 – 16,000 lbs.	“
16,001 – 19,500 lbs.	“
19,501 – 26,000 lbs.	“
26,001 – 33,000 lbs.	3 – 26,001 lbs. or more
33,001 lbs. or more	“
Unknown	<u>9 – Reported as Unknown</u>

Use of GCWR instead of GVWR will only impact these vehicles:

1. Light trucks, 10,000 lbs. or less, pulling trailers (truck/trailers) (greater than 10,000 lbs. GCWR)
2. Single-unit trucks, less than 26,000 lbs., pulling trailers (truck/trailers) (greater than 26,000 lbs. GCWR)

Consistency Checks:

Check	IF	THEN
(U490)	UNLIKELY: GVWR/GCWR equals 8 or 9 and VEHICLE MODEL YEAR is greater than 1980 and not equal to 9998 or 9999, and VIN is not equal to 000000000000000000, 8888888888888888, or 9999999999999999, and VIN passes the check digit check (i.e., VIN is a Valid VIN).	--
(V502)	GVWR/GCWR equals 0, and HM1 equals 1,	VEHICLE CONFIGURATION and CARGO BODY TYPE must equal 00.
(V503)	GVWR/GCWR equals 1,	HM2 should equal 2, or VEHICLE CONFIGURATION should equal 20.
(V504)	GVWR/GCWR equals 1,	BODY TYPE should equal 01-22, 28-39, 41-49.
(V505)	GVWR/GCWR equals 9,	BODY TYPE should not equal 61-63, 66, 67.
(V506)	BODY TYPE equals 60,	GVWR/GCWR should equal 2.
(V507)	BODY TYPE equals 01-21, 28-30, 33-39, 45-49,	GVWR/GCWR should equal 0, 1.
(V50P)	BODY TYPE equals 61, 62, 67, 71, and VEHICLE CONFIGURATION does not equal 04,	GVWR/GCWR must equal 2, 9. (See GVWR/GCWR Remarks on how to use the VIN to determine GVWR.)
(V51P)	BODY TYPE equals 63, 66, 72,	GVWR/GCWR must equal 3. (See GVWR/GCWR Remarks on how to use the VIN to determine GVWR.)
(V532)	VEHICLE CONFIGURATION equals 01, 02, 04-08, 19, 21,	GVWR/GCWR should not equal 0 or 1.
(V540)	BODY TYPE equals 42, 73, and HM1 equals 1,	GVWR/GCWR should equal 0, 9.
(V62P)	CARGO BODY TYPE equals 01-12, 97-98, and VEHICLE IDENTIFICATION NUMBER does not equal 8s or 9s ,	GVWR/GCWR must equal 2, 3.
(V64P)	BODY TYPE equals 50-59, 60-72, 78,	GVWR/GCWR must not equal 0, 1.
(V65P)	GVWR/GCWR equals 2, 3,	VEHICLE CONFIGURATION must not equal 00, and CARGO BODY TYPE must not equal 00.
(VA70)	GVWR/GCWR equals 1, and HM2 equals 2,	VEHICLE CONFIGURATION must equal 10.

V19 - Vehicle Configuration

FORMAT: 2 numeric

SAS NAME: Vehicle.V_Config, Parkwork.PV_Config

ELEMENT VALUES:

Codes	Attributes
00	Not Applicable
10	Vehicle 10,000 pounds or less placarded for hazardous materials
01	Single-Unit Truck (2-axle and GVWR more than 10,000 lbs.)
02	Single-Unit Truck (3 or more axles)
04	Truck Pulling Trailer
05	Truck Tractor (Bobtail)
06	Truck Tractor/Semi-Trailer
07	Truck Tractor/Double
08	Truck Tractor/Triple
19	Truck More Than 10,000 lbs., Cannot Classify
20	Bus/Large Van (seats for 9-15 occupants, including driver)
21	Bus (seats for more than 15 occupants, including driver)
99	Reported as Unknown

Definition: This element identifies the general configuration of this vehicle when applicable.

Remarks: This information should be available on your police crash report or truck and bus supplement with other elements required by the Federal Motor Carrier Safety Administration (FMCSA).

In some States, the data element “Vehicle Configuration” or its attributes may appear under another title, such as: Unit Type, Vehicle Type, Type of Unit, etc. In many States, Vehicle Configuration is recorded for all vehicles. However, in our data systems, only code Vehicle Configurations for the following qualifying vehicles:

1. Light trucks pulling a trailer with gross combination weight rating (GCWR) greater than 10,000 lbs.
2. Medium/Heavy Vehicles with GVWR greater than 10,000 lbs.
3. Vehicles with 9 or more seats (including the driver).
4. Light Trucks, Vans, and Passenger Vehicles displaying a hazardous materials placard.

If Vehicle Configuration is coded “01-99,” [Cargo Body Type](#) should be coded “01-99.”

00 (Not Applicable) is used for automobiles, motorcycles, passenger vans (with less than 9 seats, including driver), and single-unit light trucks or cargo vans (10,000 lbs. or less GVWR), not carrying hazardous cargo.

A light truck carrying hazardous cargo is coded **10 (Vehicle 10,000 Pounds or Less Placarded for Hazardous Materials)**. When vehicles in this category are not displaying a hazardous materials placard, use **00 (Not Applicable)**.

01 (Single-Unit Truck [2-axle and GVWR more than 10,000 lbs.]) is a power unit that includes a permanently mounted cargo body (also called a straight truck) that has only two axles and a GVWR of over 10,000 lbs. This also includes a single-unit truck towing other vehicles where the towed vehicle has at least two wheels on the ground. (See [Cargo Body Type](#) attribute **12 (Vehicle Towing Another Motor Vehicle)**).

02 (Single-Unit Truck [3 or more axles]) is a power unit that includes a permanently mounted cargo body (also called a straight truck) that has three or more axles. When counting axles on a single-unit truck, include raised axles. This also includes a single-unit truck towing other vehicles where the towed vehicle has at least two wheels on the ground. (See [Cargo Body Type](#) attribute [12 \(Vehicle Towing Another Motor Vehicle\)](#)).

04 (Truck Pulling Trailer[s]) is used for single-unit trucks pulling a trailer.

05 (Truck Tractor [Bobtail]) is a motor vehicle consisting of a single motorized transport device designed primarily for pulling semi-trailers (e.g., cab only). These vehicles are sometimes referred to as a “bobtail.” This also includes truck tractors towing other truck tractors in a saddlemount towing position, or towing other vehicles where the towed vehicle has at least two wheels on the ground. (See [Cargo Body Type](#) attribute [12 \(Vehicle Towing Another Motor Vehicle\)](#)).

06 (Truck Tractor/Semi-Trailer) is used for truck tractors with one trailer. This attribute should not be used for single-unit trucks pulling a trailer.

07 (Truck Tractor/Double) is used for tractor pulling two trailers.

08 (Truck Tractor/Triple) is used for tractor pulling three trailers.

19 (Truck More Than 10,000 lbs., Cannot Classify) is used when you know the vehicle meets the definition of a medium/heavy truck by GVWR/GCWR, but the above attributes do not apply. An example is a vehicle with one trailer, but it is unknown whether it is a tractor-trailer or a single-unit truck pulling a trailer. Other examples would include motor homes, construction or farm equipment such as a bulldozer, crane, backhoe, combine, farm tractor, etc.

20 (Bus/Large Van [seats for 9-15 people, including driver]) is used for smaller van-based buses (less than 16 seats, including driver). Examples include commuter vans and van-based school buses. This attribute would include a limousine with seating capacity in this range.

21 (Bus [seats for more than 15 occupants, including driver]). A van-based bus qualifies for this attribute if it is configured to include enough seats. A CDL is required for the driver of this bus. This attribute would include a limousine with seating capacity in this range.

99 (Reported as Unknown) is used if the investigating officer indicates that the vehicle configuration is unknown or when the body type of the vehicle is unknown. For example, an unidentified hit-and-run vehicle would be coded as **99 (Reported as Unknown)**.

Consistency Checks:

Check	IF	THEN
(4N1P)	VEHICLE CONFIGURATION does not equal 00,	MOTOR CARRIER IDENTIFICATION NUMBER must not equal 00-0000000000.
(4N2P)	MOTOR CARRIER IDENTIFICATION NUMBER equals 00-0000000000,	VEHICLE CONFIGURATION must equal 00.
(AB1P)	VEHICLE CONFIGURATION equals 01,	CARGO BODY TYPE must NOT equal 22.
(ADOP)	VEHICLE CONFIGURATION equals 04, 06-08,	VEHICLE TRAILING must not equal 0.
(AEOP)	VEHICLE CONFIGURATION equals 05 and CARGO BODY TYPE does not equal 12,	VEHICLE TRAILING must equal 0.
(AE1P)	VEHICLE CONFIGURATION equals 05-08,	BODY TYPE must equal 66.
(AF1P)	VEHICLE CONFIGURATION equals 20, 21,	CARGO BODY TYPE must equal 22.

Check	IF	THEN
(AF2P)	VEHICLE CONFIGURATION equals 20, 21,	BODY TYPE must equal 12, 16, 20, 21, 50-52, 55, 58, 59.
(AHOP)	VEHICLE CONFIGURATION does not equal 00, 99,	BODY TYPE should equal 12, 15, 16, 21, 28, 34, 40, 41, 45, 48-52, 55, 58-66, 67, 71, 72, 78, 92, 93, or HM2 must equal 2.
(V46P)	VEHICLE CONFIGURATION equals 21,	BODY TYPE must equal 21, 50-52, 55, 58, 59.
(V470)	VEHICLE CONFIGURATION equals 01,	CARGO BODY TYPE should be 01-05, 07, 12, 96-98.
(V47P)	VEHICLE CONFIGURATION equals 21,	CARGO BODY TYPE must equal 22.
(V502)	GVWR/GCWR equals 0, and HM1 equals 1,	VEHICLE CONFIGURATION and CARGO BODY TYPE must equal 00.
(V503)	GVWR/GCWR equals 1,	HM2 should equal 2, or VEHICLE CONFIGURATION should equal 20.
(V50P)	BODY TYPE equals 61, 62, 67, 71, and VEHICLE CONFIGURATION does not equal 04,	GVWR/GCWR must equal 2, 9. (See GVWR/GCWR Remarks on how to use the VIN to determine GVWR.)
(V531)	BUS USE equals 01, 04-07, 98,	VEHICLE CONFIGURATION should equal 20, 21, and CARGO BODY TYPE should equal 22.
(V532)	VEHICLE CONFIGURATION equals 01, 02, 04-08, 19, 21,	GVWR/GCWR should not equal 0 or 1.
(V56P)	VEHICLE CONFIGURATION equals 10,	BODY TYPE must equal 01-22, 28-49.
(V57P)	VEHICLE CONFIGURATION equals 05,	CARGO BODY TYPE must equal 12, 96, and BODY TYPE must equal 66.
(V58P)	VEHICLE CONFIGURATION equals 04,	BODY TYPE must not equal 66.
(V59P)	VEHICLE CONFIGURATION equals 06,	BODY TYPE must equal 66, and VEHICLE TRAILING must equal 1.
(V60P)	VEHICLE CONFIGURATION equals 07,	BODY TYPE must equal 66, and VEHICLE TRAILING must equal 2.
(V61P)	VEHICLE CONFIGURATION equals 08,	BODY TYPE must equal 66, and VEHICLE TRAILING must equal 3.
(V640)	VEHICLE CONFIGURATION does not equal 00, 99,	BODY TYPE should not equal 28, 34, 42, 45, 48, 49.
(V65P)	GVWR/GCWR equals 2, 3,	VEHICLE CONFIGURATION must not equal 00 and CARGO BODY TYPE must not equal 00.
(V790)	BODY TYPE equals 20,	VEHICLE CONFIGURATION should equal 00, and CARGO BODY TYPE should equal 00.
(V800)	BODY TYPE equals 21, 22, 28, 29,	VEHICLE CONFIGURATION should equal 00, 04, 10, 20, 21, 99, and CARGO BODY TYPE should equal 00, 01, 22, 99.
(V810)	BODY TYPE equals 67, and VEHICLE TRAILING equals 1-4,	VEHICLE CONFIGURATION should equal 04, and CARGO BODY TYPE should equal 01, 03, 04, 09.
(V840)	BODY TYPE equals 50-59,	VEHICLE CONFIGURATION should equal 21, and CARGO BODY TYPE should equal 22.
(V850)	BODY TYPE equals 60,	VEHICLE CONFIGURATION should equal 01, 03, 04, and CARGO BODY TYPE should equal 01.

Check	IF	THEN
(V860)	HIT-AND-RUN equals 0, and BODY TYPE equals 61-64,	VEHICLE CONFIGURATION should equal 01, 02, 04, and CARGO BODY TYPE should equal 01-10, 12, 96-98.
(V870)	BODY TYPE equals 65,	VEHICLE CONFIGURATION should equal 19, and CARGO BODY TYPE should equal 97.
(V880)	HIT-AND-RUN equals 0, and BODY TYPE equals 66,	VEHICLE CONFIGURATION should equal 05-08, 19, and CARGO BODY TYPE should equal 01-04, 06-12, 96-98.
(V890)	BODY TYPE equals 71, 72,	VEHICLE CONFIGURATION should equal 19, and CARGO BODY TYPE should equal 01-04, 08, 10, 96-98.
(V900)	BODY TYPE equals 73,	VEHICLE CONFIGURATION should equal 99, and CARGO BODY TYPE should equal 99.
(V910)	BODY TYPE equals 78,	VEHICLE CONFIGURATION should equal 19, and CARGO BODY TYPE should equal 98.
(V915)	BODY TYPE equals 67, and VEHICLE TRAILING equals 0,	VEHICLE CONFIGURATION should equal 01, and CARGO BODY TYPE should equal 97.
(V920)	BODY TYPE equals 79,	VEHICLE CONFIGURATION should equal 99, and CARGO BODY TYPE should equal 99.
(V930)	VEHICLE CONFIGURATION equals 00, or CARGO BODY TYPE equals 00,	BODY TYPE should not equal 50-64, 66-72, 78, 79.
(V940)	HM1 equals 2,	VEHICLE CONFIGURATION should not equal 00, 99 and CARGO BODY TYPE should not equal 00, 99.
(V981)	VEHICLE CONFIGURATION equals 00,	MOTOR CARRIER IDENTIFICATION NUMBER should equal 00-000000000.
(V982)	MOTOR CARRIER IDENTIFICATION NUMBER does not equal 00-000000000,	VEHICLE CONFIGURATION should not equal 00.
(V985)	VEHICLE TRAILING equals 5,	VEHICLE CONFIGURATION should not equal 00, 10, 19-21.
(V991)	VEHICLE TRAILING equals 0,	VEHICLE CONFIGURATION must not equal 04, 06-08.
(V992)	VEHICLE TRAILING equals 1,	VEHICLE CONFIGURATION must not equal 01, 02, 05, 07, or 08.
(V993)	VEHICLE TRAILING equals 2,	VEHICLE CONFIGURATION must not equal 01, 02, 05, 06, or 08.
(V994)	VEHICLE TRAILING equals 3,	VEHICLE CONFIGURATION must not equal 01, 02, 05-07.
(V995)	VEHICLE TRAILING equals 4,	VEHICLE CONFIGURATION must not equal 01, 02, 05-08.
(V997)	VEHICLE TRAILING equals 6,	VEHICLE CONFIGURATION must not equal 04, 06-08.
(V998)	VEHICLE TRAILING equals 9,	VEHICLE CONFIGURATION must not equal 04-07 or 08.
(VA70)	GVWR/GCWR equals 1, and HM2 equals 2,	VEHICLE CONFIGURATION must equal 10.
(VH75)	UNIT TYPE equals 4,	VEHICLE CONFIGURATION should not equal 05, 20, 21, 10.

Consistency Checks (FARS Only):

Check	IF	THEN
(D280)	VEHICLE CONFIGURATION equals 05-08, 21, or HM1 equals 2,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 00.
(D450)	COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 00,	VEHICLE CONFIGURATION should not equal 05-08, 21, and HM2 should not equal 2.

V20 - Cargo Body Type

98	Unknown Cargo Body Type
99	Reported as Unknown

Definition: This element identifies the primary cargo carrying capability of this vehicle when applicable.

Remarks: This information should be available on the police crash report or truck and bus supplement with other elements required by the Federal Motor Carrier Safety Administration (FMCSA).

You should expect to find cargo body types for the following qualifying vehicles:

1. Light trucks pulling a trailer with gross combination weight rating (GCWR) greater than 10,000 lbs.
2. Medium/Heavy Trucks: vehicles with GVWR greater than 10,000 lbs.
3. Vehicles with 9 or more seats (including the driver).
4. Light Trucks, Vans and Passenger Vehicles displaying a hazardous materials placard.

00 (Not Applicable [N/A]) is used for automobiles, motorcycles, passenger vans (with less than 9 seats, including driver) and single-unit small trucks or vans (10,000 lbs. or less GVWR), not displaying hazardous material placard.

01 (Van/Enclosed Box) is a single-unit truck, truck/trailer, or tractor/semi-trailer having an enclosed body integral to the frame of the motor vehicle (e.g., enclosed trailers, enclosed cargo vans, and ambulances).

03 (Flatbed) is used when the available information refers to a cargo body without sides or roof, with or without readily removable stakes that may be tied together with chains/slats or panels. This includes "stake trucks."

04 (Dump) is used when the available information refers to a cargo body designed to be tilted to discharge its load by gravity.

06 (Auto Transporter) is used when the available information refers to a cargo body capable of transporting multiple, fully assembled automobiles on an “auto transporter” trailer. Do not use this code for flatbeds transporting vehicles (e.g., flatbed tow truck or flatbed semi-trailer carrying wrecked/salvaged automobiles).

07 (Garbage/Refuse) is used when the available information refers to a cargo body that is specifically designed to collect and transport garbage and refuse. This includes both conventional rear-loading and over-the-top bucket loading garbage trucks. Also included are recycle trucks and roll-off style garbage trucks.

08 (Grain/Chips/Gravel) is used when the available information refers to trucks that discharge their loads by gravity from the bottom (i.e., belly dump).

09 (Pole-Trailer) is used when the available information refers to a cargo body type that consists of a trailer designed to be attached to a towing vehicle by a reach or pole or by being boomed and secured to the towing vehicle. These are ordinarily used to carry property of a long or irregular shape, such as telephone poles. The pole trailer extends or retracts to accommodate varying lengths of cargo.

10 (Log) is used when the available information refers to a cargo body type with a fixed middle beam and side support posts specifically designed for carrying logs. This includes single-unit log trucks.

09 (Pole-Trailer) and **10 (Log)** may be listed on a police crash report as “Pole/Log.” If the trailer can telescope to carry different log lengths, then it should be considered a **09 (Pole-Trailer)**.

11 (Intermodal Container Chassis) is used when the available information refers to a cargo body type used for a trailer specifically designed to have a rail or ship container mounted directly on the chassis. These should not be confused with van/enclosed box cargo body types. Intermodal containers may also be mounted on a flatbed trailer, in which case **03 (Flatbed)** is the cargo body type.

12 (Vehicle Towing Another Motor Vehicle) is used when the available information refers to vehicles that have no cargo carrying capability but are in the act of towing another motor vehicle where the towed vehicle has at least two wheels on the ground. These are often called “drive-away, tow-aways” and will be applicable to tow trucks and specially rigged truck tractors. This includes “saddlemount” configurations. Does not apply to vehicles “towed” by being loaded on a flatbed or auto transporter.

22 (Bus) is a motor vehicle with seating for transporting nine or more persons, including the driver. This attribute would include a limousine with sufficient seating capacity to qualify as a bus.

96 (No Cargo Body Type) is used for any medium heavy truck with no cargo carrying capability (bobtail); a truck chassis with a cab only (stripped chassis); and light trucks and passenger vehicles displaying a hazardous materials placard. Other examples of **96 (No Cargo Body Type)** would be Sign Trucks, Fire Trucks, Tow Trucks, construction or farm equipment, etc.

97 (Other) is used when the cargo body type is other than the body types listed above. This includes 2-axle, 6-tire pickups greater than 10,000 lbs. without a trailer. This does not include a pickup pulling a trailer (truck/trailer). Use the Cargo Body Type of the attached trailer in these situations. This attribute would also include motor homes.

98 (Unknown Cargo Body Type) is used when the vehicle qualifies for this data element but the cargo body type is not known or when there is not enough information to distinguish one cargo body type from another. An example would be contradictory data on whether the truck is a van/enclosed box or a flatbed.

99 (Reported as Unknown) is used when the investigating officer indicates it was unknown as to cargo body type or when the body type of the vehicle is unknown. For example, an unidentified hit-and-run vehicle.

NOTE: For truck/trailer vehicle configurations where the power unit and trailer have different cargo body types, code the cargo body type of the power unit. For example, a dump truck pulling a flatbed trailer should be coded as [**04 \(Dump\)**](#).

For truck/trailer vehicle configurations where the power unit's Cargo Body Type would be coded [**96 \(No Cargo Body Type\)**](#) or [**97 \(Other\)**](#), code the cargo body of the trailer. For example: a dual-rear-wheel pickup truck pulling a flatbed trailer should be coded as [**03 \(Flatbed\)**](#).

Consistency Checks:

Check	IF	THEN
(AB1P)	VEHICLE CONFIGURATION equals 01,	CARGO BODY TYPE must NOT equal 22.
(AEOP)	VEHICLE CONFIGURATION equals 05, and CARGO BODY TYPE does not equal 12,	VEHICLE TRAILING must equal 0.
(AF1P)	VEHICLE CONFIGURATION equals 20, 21,	CARGO BODY TYPE must equal 22.
(AK00)	CARGO BODY TYPE equals 22, 96,	JACKKNIFE should equal 0.
(ALOP)	CARGO BODY TYPE equals 22,	BODY TYPE must equal 12, 16, 21, 50-52, 55, 58, 59.
(AMOP)	CARGO BODY TYPE does not equal 00, 99,	BODY TYPE should equal 12, 15, 16, 21, 28, 34, 40, 41, 45, 48-52, 55, 58-66, 67, 71, 72, 78, 92, 93, or HM2 must equal 2.
(V470)	VEHICLE CONFIGURATION equals 01,	CARGO BODY TYPE should be 01-05, 07, 12, 96-98.
(V47P)	VEHICLE CONFIGURATION equals 21,	CARGO BODY TYPE must equal 22.
(V502)	GVWR/GCWR equals 0, and HM1 equals 1,	VEHICLE CONFIGURATION and CARGO BODY TYPE must equal 00.
(V531)	BUS USE equals 01, 04-07, 98,	VEHICLE CONFIGURATION should equal 20, 21, and CARGO BODY TYPE should equal 22.
(V57P)	VEHICLE CONFIGURATION equals 05,	CARGO BODY TYPE must equal 12, 96, and BODY TYPE must equal 66.
(V62P)	CARGO BODY TYPE equals 01-12, 97-98, and VEHICLE IDENTIFICATION NUMBER does not equal 8s or 9s ,	GVWR/GCWR must equal 2, 3.
(V65P)	GVWR/GCWR equals 2, 3,	VEHICLE CONFIGURATION must not equal 00, and CARGO BODY TYPE must not equal 00.
(V660)	CARGO BODY TYPE does not equal 00, 99,	BODY TYPE should not equal 28, 34, 42, 45, 48, 49.
(V68P)	CARGO BODY TYPE equals 12,	VEHICLE TRAILING must equal 5.
(V790)	BODY TYPE equals 20,	VEHICLE CONFIGURATION should equal 00, and CARGO BODY TYPE should equal 00.
(V800)	BODY TYPE equals 21, 22, 28, 29,	VEHICLE CONFIGURATION should equal 00, 04, 10, 20, 21, 99, and CARGO BODY TYPE should equal 00, 01, 22, 99.
(V810)	BODY TYPE equals 67, and VEHICLE TRAILING equals 1-4,	VEHICLE CONFIGURATION should equal 04, and CARGO BODY TYPE should equal 01, 03, 04, 09.

Check	IF	THEN
(V840)	BODY TYPE equals 50-59,	VEHICLE CONFIGURATION should equal 21, and CARGO BODY TYPE should equal 22.
(V850)	BODY TYPE equals 60,	VEHICLE CONFIGURATION should equal 01, 03, 04, and CARGO BODY TYPE should equal 01.
(V860)	HIT-AND-RUN equals 0, and BODY TYPE equals 61-64,	VEHICLE CONFIGURATION should equal 01, 02, 04, and CARGO BODY TYPE should equal 01-10, 12, 96-98.
(V870)	BODY TYPE equals 65,	VEHICLE CONFIGURATION should equal 19, and CARGO BODY TYPE should equal 97.
(V880)	HIT-AND-RUN equals 0, and BODY TYPE equals 66,	VEHICLE CONFIGURATION should equal 05-08, 19, and CARGO BODY TYPE should equal 01-04, 06-12, 96-98.
(V890)	BODY TYPE equals 71, 72,	VEHICLE CONFIGURATION should equal 19, and CARGO BODY TYPE should equal 01-04, 08, 10, 96-98.
(V900)	BODY TYPE equals 73,	VEHICLE CONFIGURATION should equal 99, and CARGO BODY TYPE should equal 99.
(V910)	BODY TYPE equals 78,	VEHICLE CONFIGURATION should equal 19, and CARGO BODY TYPE should equal 98.
(V915)	BODY TYPE equals 67, and VEHICLE TRAILING equals 0,	VEHICLE CONFIGURATION should equal 01, and CARGO BODY TYPE should equal 97.
(V920)	BODY TYPE equals 79,	VEHICLE CONFIGURATION should equal 99, and CARGO BODY TYPE should equal 99.
(V930)	VEHICLE CONFIGURATION equals 00, or CARGO BODY TYPE equals 00,	BODY TYPE should not equal 50-64, 66-72, 78, 79.
(V940)	HM1 equals 2,	VEHICLE CONFIGURATION should not equal 00, 99 and CARGO BODY TYPE should not equal 00, 99.
(VH80)	UNIT TYPE equals 4,	CARGO BODY TYPE should not equal 06, 07, 11, 12, 22.

Definition: This element identifies the presence of hazardous cargo for this vehicle and records information about the hazardous cargo when present.

Remarks: This element must be coded for all vehicles.

Placard and Hazardous Materials Released information should be available on your police crash report or truck and bus supplement with other elements required by the Federal Motor Carrier Safety Administration (FMCSA) for commercial vehicles.

Hazardous Material is a substance or material that has been designated by the U.S. Department of Transportation, or other authorizing entity, as capable of posing an unreasonable risk to health, safety and property when transported in commerce. Any motor vehicle transporting hazardous materials in quantities above the thresholds established by the U.S. Department of Transportation, or other authorized entity is required to display a hazardous materials placard.

Exclusions:

- Fuel or oil carried by the vehicle for its own use.

Hazardous Materials Placard: is a sign required to be affixed to any motor vehicle transporting hazardous materials in quantities above the thresholds established by the U.S. Department of Transportation, or other authorized entity. This placard identifies the 1-digit hazard class division number, 4-digit hazardous material identification number, or name of the hazardous material being transported.

Vehicle transporting hazardous materials should have a diamond-shaped placard affixed indicating the material carried. (See [Figure 13](#) below.)

HM1– Hazardous Materials Involvement

Definition: This element indicates whether the vehicle was carrying hazardous materials - involvement.

1 (No) is used when there is no indication of hazardous materials for this vehicle in the case materials. For cases involving a hit and run, the default is “1 -No” when no details are reported regarding the hit and run vehicle.

If HM1 is **1 (No)**, HM2-HM5 will be coded **Not Applicable**.

2 (Yes) is used when hazardous materials were indicated for this vehicle in the case materials.

Examples for code **2 (Yes)**:

1. The officer records any information about a placard, whether or not he indicates that the vehicle was carrying hazardous materials.
2. The officer does not record any information about a placard, however, you know that hazardous material was involved.
3. Information identifying hazardous material is blank, but you know that hazardous material was released.

HM2 – Hazardous Materials Placard

Definition: This element indicates the presence of hazardous materials and whether the vehicle displayed a hazardous materials placard.

0 (Not Applicable) is used when there is no indication of hazardous materials for this vehicle in the case materials (HM1 equals [1 \(No\)](#)).

1 (No) is used when hazardous materials are involved, but the officer indicates there was no placard.

2 (Yes) is used when hazardous materials are involved, and the vehicle does have a placard.

8 (Not Reported) is used when hazardous materials are involved, but the crash report does not record any information about the presence of a placard.

HM3 – 4-Digit Hazardous Materials Identification Number

Definition: This element indicates the 4-digit identification number.

0000 (Not Applicable) – No indication of hazardous materials for this vehicle in the case materials (HM1 equals [1 \(No\)](#)).

Actual 4-digit Number – Record the 4-digit Hazardous Materials Identification Number reported in the case materials.

8888 (Not Reported) – Hazardous materials involved, but the 4-digit number was not recorded or this field is not available on your crash report. If you are provided the name of the hazardous material on your report but not the 4-digit number, use this attribute and be sure to record the 1-digit class number if it is provided.

HM4 – 2-Digit Hazardous Materials Class Number

Definition: This element indicates the single-digit hazardous material class number for the vehicle.

00 (Not Applicable) – No indication of hazardous materials for this vehicle in the case materials (HM1 equals [1 \(No\)](#)).

Actual 2-digit Class Number (01-09) – Record the 1-digit Hazardous Materials Class Number recorded on your crash report with a leading zero (e.g., if the 1-digit class number is 5, enter “05”). If you were given a two-digit number with decimal point, record only the first digit with a leading zero (e.g., if the class number is “1.3” you should record “01”). See [Figure 13](#).

88 (Not Reported) – Hazardous Materials involved, but the 1-digit number was not recorded or this field is not available in the crash materials.

HM5 – Release of Hazardous Materials from Cargo Compartment

Definition: This element indicates whether or not any hazardous cargo was released from the cargo tank or compartment.

0 (Not Applicable) – No indication of hazardous materials for this vehicle in the case materials (HM1 equals [1 \(No\)](#)).

1 (No) – Hazardous Materials involved, and the officer indicates there was no release of the material(s) from the cargo compartment.

2 (Yes) – Hazardous Materials involved, and the officer indicates there was a release of the material(s) from the cargo compartment.

8 (Not Reported) – Hazardous Materials involved, and you can't determine from the crash materials whether or not hazardous material was released from the cargo compartment.

Do not include fuel or oil carried by the vehicle for its own use that has been released.

Guideline for recording multiple hazardous materials:

- If the case has a hazmat spill and you know which material was released always record that material.
- If you were to get two hazardous materials reported of different classes (1-9), report the material from DOT Hazmat Table 1 and its associated 4-digit UN number over materials in Table 2. Table 1 includes Hazard Class or Divisions: 1.1, 1.2, 1.3, 2.3, 4.3, 5.2, 6.1, 7.
- If you have two materials of the same class (e.g., both class 8 - Corrosive) report the material in greatest quantity if you have the information, if not report the material that is listed first on the report.

Examples of Hazardous Materials are:

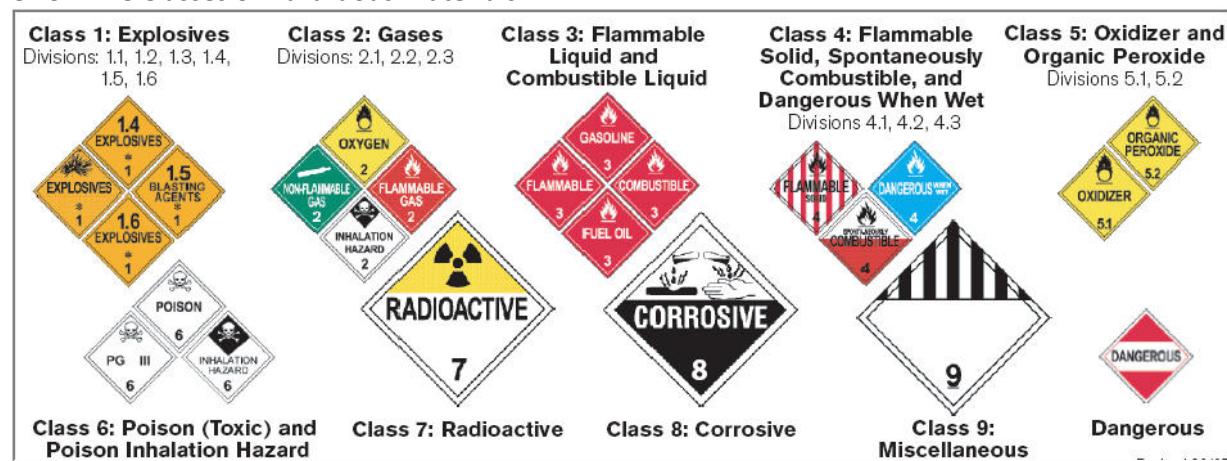

Any transport vehicle containing any quantity of the following classes of material must be placarded:

- Explosives (1.1, 1.2, 1.3)
- Poison Gas
- Materials Dangerous When Wet
- Poison
- Radioactive

Any transport vehicle containing over 1,001 lbs. or more (gross weight) of the following classes of materials must be placarded:

- Explosives (1.4, 1.5, 1.6)
- Flammable and Non Flammable Gas
- Flammable/Combustible Liquid (gasoline, fuel oil)
- Flammable Solid/Spontaneously Combustible
- Oxidizer/Organic Peroxide
- Poison
- Radioactive
- Corrosive
- Other (A material that presents a hazard during transportation that is not included in any other hazard class)

Figure 13: Nine Classes of Hazardous Materials

Consistency Checks:

Check	IF	THEN
(4N4P)	MOTOR CARRIER IDENTIFICATION NUMBER does not equal 00-000000000,	BODY TYPE must equal 12, 16, 21, 28, 34, 40, 45, 48-52, 55, 58-66, 67, 71, 72, 78, 79, 92, 93, 99, or HM2 must equal 2.
(4N5P)	BODY TYPE does not equal 12, 16, 21, 28, 34, 40, 45, 48-52, 55, 58-66, 67, 71, 72, 78, 92, 93, or HM2 does not equal 2,	MOTOR CARRIER IDENTIFICATION NUMBER must equal 00-000000000, 99-999999999.
(9KOP)	HM2 equals 2,	REGISTRATION STATE must not equal 00.
(AHOP)	VEHICLE CONFIGURATION does not equal 00, 99,	BODY TYPE should equal 12, 15, 16, 21, 28, 34, 40, 41, 45, 48-52, 55, 58-66, 67, 71, 72, 78, 92, 93, or HM2 must equal 2.
(AMOP)	CARGO BODY TYPE does not equal 00, 99,	BODY TYPE should equal 12, 15, 16, 21, 28, 34, 40, 41, 45, 48-52, 55, 58-66, 67, 71, 72, 78, 92, 93, or HM2 must equal 2.
(D580)	VIOLATIONS CHARGED equals 85,	HM1 should equal 2.
(V070)	HM1 equals 2,	REGISTRATION STATE should not equal 92.
(V502)	GVWR/GCWR equals 0, and HM1 equals 1,	VEHICLE CONFIGURATION and CARGO BODY TYPE must equal 00.
(V503)	GVWR/GCWR equals 1,	HM2 should equal 2, or VEHICLE CONFIGURATION should equal 20.
(V540)	BODY TYPE equals 42, 73, and HM1 equals 1,	GVWR/GCWR should equal 0, 9.
(V940)	HM1 equals 2,	VEHICLE CONFIGURATION should not equal 00, 99 and CARGO BODY TYPE should not equal 00, 99.
(V980)	BODY TYPE equals 50-52, 55, 58-67, 71, 72, 78, 93, or HM1 equals 2,	MOTOR CARRIER IDENTIFICATION NUMBER must not equal 00-000000000.
(VA00)	HM1 equals 1,	HM2, HM5 must equal 0, HM4 must equal 00 and HM3 must equal 0000.
(VA10)	HM1 equals 2,	HM2, HM5 must not equal 0, HM4 must not equal 00 and HM3 must not equal 0000.
(VA20)	any of HM2, HM5 equals 0, or HM4 equals 00, or HM3 equals 0000,	HM1 must equal 1.
(VA30)	any of HM2, HM5 does not equal 0, or HM4 does not equal 00, or HM3 does not equal 0000,	HM1 must equal 2.
(VA40)	HM5 equals 2,	HM3 should not equal 8888, or HM4 should not equal 88.
(VA50)	HM3 equals 8888, and HM4 equals 88,	HM5 should not equal 2.
(VA60)	HM3 does not equal 0000, 8888, or HM4 does not equal 00, 88,	HM2 should equal 2.
(VA70)	GVWR/GCWR equals 1, and HM2 equals 2,	VEHICLE CONFIGURATION must equal 10.
(VA80)	HM3 – 4-Digit Hazardous Materials Identification Number must contain 4 digits.	--

Consistency Checks (FARS Only):

Check	IF	THEN
(4S1P)	BODY TYPE equals 80-89, 96, and HM1 does not equal 1,	COMPLIANCE WITH CDL ENDORSEMENTS MUST equal 0.
(D270)	BODY TYPE equals 50-52, 55, 63, 66, 72, or HM1 equals 2,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 00.
(D280)	VEHICLE CONFIGURATION equals 05-08, 21, or HM1 equals 2,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 00.
(D300)	HM2 equals 2,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 00 or 99.
(D310)	HM2 equals 2,	COMPLIANCE WITH CDL ENDORSEMENTS should equal 1-3.
(D440)	COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 00,	BODY TYPE should not equal 50-52, 55, 63, 66, 72, and HM2 should not equal 2.
(D450)	COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 00,	VEHICLE CONFIGURATION should not equal 05-08, 21, and HM2 should not equal 2.
(V090)	HM1 equals 2,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS should equal 06, 99.
(V100)	HM1 equals 2, and RELATED FACTORS- DRIVER LEVEL does not equal 19,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 01, 02, 05.
(V570)	HM1 equals 2,	REGISTERED VEHICLE OWNER should not equal 0, 1, 2, 4.
(V580)	HM1 equals 2,	REGISTERED VEHICLE OWNER should equal 3.

V22 - Bus Use

FORMAT: 2 numeric

SAS NAME: Vehicle.Bus_Use, Parkwork.PBus_Use

ELEMENT VALUES:

Codes	Attributes
00	Not a Bus
01	School
04	Intercity
05	Charter/Tour
06	Transit/Commuter
07	Shuttle
08	Modified for Personal/Private Use
98	Not Reported
99	Reported as Unknown

Definition: This data element describes the common type of bus service this vehicle was being used for at the time of the crash or the primary use for the bus if not in service at the time of the crash.

Remarks: Buses are any motor vehicle with seats to transport nine (9) or more people, including the driver's seat. This element does not include vans that are owned and operated for personal use.

00 (Not a Bus) This should be used for vehicles with less than nine (9) seats (including the driver) and personal-use vans with nine (9) or more seats (including the driver) and also for vehicles that do not have a bus body type AND are not being used as a bus in the crash.

01 (School) is used for vehicles that meet the definition of a bus and are being used by a public or private school or district, or contracted carrier operation on behalf of the entity, providing transport for school children (up to the 12th grade) to/from school (public or private), or any other school function or activity.

In most cases, the decision to use this code will be based on a reference to the vehicle as a school bus in the case materials. In this situation, assume the criteria are met unless it is otherwise stated in the case materials.

In addition, **01 (School)** includes buses that are not externally identifiable as a school/pupil transport vehicle. For example, a transit bus, at the time of the crash, used exclusively (no other passengers except students) to transport students to/from the school or school-related activity.

04 (Intercity) is used when a company provides for-hire, long-distance passenger transportation between cities over fixed routes with regular schedules (e.g., Greyhound bus service between major cities).

05 (Charter/Tour) is used when a company provides transportation on a for-hire basis and demand-response basis, usually round-trip service for a tour group or outing.

06 (Transit/Commuter) is used for a government entity or private company that provides passenger transportation over fixed, scheduled routes, within primarily urban geographical areas. (For example; inner-city mass transit bus/van service.)

07 (Shuttle) is used when private companies provide transportation services for their own employees, non-governmental organizations (such as churches and non-profit groups), and non-educational units of government (such as departments of corrections). (Examples include buses/nine-passenger vans transporting people from airports, hotels, rental car companies, and business facility to facility.)

08 (Modified for Personal/Private Use) is used when a bus body type has been modified for personal or private use. For example, a bus with seats removed and exterior altered to allow for personal/private hauling of cargo (instead of passengers). Also includes musical groups in cross-country bus with interior remodeled with home-like conveniences.

98 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown) is used if the information about this vehicle is reported as Unknown.

Note: if the investigating officer indicates a bus was involved but not how it was being used, use **98 (Not Reported)**.

Consistency Checks:

Check	IF	THEN
(AH1P)	BUS USE equals 08,	BODY TYPE must equal 21, 22, 28, 29, 50-59.
(AH2P)	BUS USE equals 06,	BODY TYPE should equal 21 or 52 or 55.
(V051)	BUS USE equals 01,	BODY TYPE should equal 21 or 50 or 55.
(V052)	BUS USE equals 04,	BODY TYPE should equal 51.
(V053)	BUS USE equals 05,	BODY TYPE should equal 12, 16, 21, 51, 55, or 58.
(V054)	BUS USE equals 07,	BODY TYPE should equal 21, 22, 29, 50-59.
(V055)	BUS USE equals 00,	BODY TYPE must not equal 50-59.
(V056)	SPECIAL USE equals 02,	BUS USE should equal 01.
(V057)	SPECIAL USE equals 03,	BUS USE should equal 04-07, 99.
(V059)	BUS USE equals 01,	SPECIAL USE must equal 02.
(V061)	BUS USE equals 04-07,	SPECIAL USE must equal 03.
(V330)	SCHOOL BUS RELATED equals 1,	BODY TYPE of at least one of the involved vehicles should equal 50 (School Bus), or SPECIAL USE for at least one involved vehicle should equal 02 - Vehicle Used as School Bus, or BUS USE for at least one vehicle should equal 01.
(V531)	BUS USE equals 01, 04-07, 98,	VEHICLE CONFIGURATION should equal 20, 21, and CARGO BODY TYPE should equal 22.

V23 - Special Use

FORMAT: 2 numeric

SAS NAME: Vehicle.Spec_Use, Person.Spec_Use, Parkwork.PSP_USE

ELEMENT VALUES:

Codes	Attributes
00	No Special Use
01	Taxi
02	Vehicle Used for School Transport
03	Vehicle Used as Other Bus
04	Military
05	Police
06	Ambulance
07	Fire Truck
08	Non-Transport Emergency Services Vehicle
13	Incident Response
98	Not Reported
99	Reported as Unknown

Definition: This data element identifies if a special use is applicable to this vehicle at the time it was involved in the crash.

Remarks: This data element identifies any special use associated with this motor vehicle at the time of the crash. The special function served by this motor vehicle should be coded regardless of whether the function is marked on the vehicle.

00 (No Special Use) is used when the available information does not indicate or imply that this vehicle was applicable to any of the special uses listed above.

01 (Taxi) is used when this vehicle was being used during this trip (at the time of the crash) on a “fee-for-hire” basis to transport persons. Most of these vehicles will be marked and formally registered as taxis; however, vehicles that are used as taxis, even though they are not registered (e.g., Gypsy Cabs), are included here. Passengers do not have to be present at the time of the crash. Taxis and drivers that are off-duty at the time of the crash are coded as [00 \(No Special Use\)](#). If it is unknown whether or not the taxi is on-duty, code as **01 (Taxi)**. This attribute also applies for limousines on a “fee-for-hire” basis.

02 (Vehicle Used for School Transport) is used for any motor vehicle that satisfies all the following criteria:

- operated, leased, owned, or contracted by a public or private school-type institution;
- where the institution’s students may range from pre-school through high school;
- whose occupants, if any, are associated with the institution; and,
- at the time of the crash the vehicle is being used for transportation to/from a school or on a school-sponsored activity or trip.

Note: This attribute also includes vehicles that are not externally identifiable as a school/pupil transport vehicle, but do meet all of the other criteria above. For example, a transit bus, at the time of the crash, used exclusively (no other passengers except students) to transport students to/from the school or school-related activity.

In most cases, the decision to use this attribute will be based on a reference to the vehicle as a school bus in the available information. In this situation, assume the criteria are met unless it is otherwise stated in the available information.

03 (Vehicle Used as Other Bus) is used when a motor vehicle is designed for transporting nine or more persons including the driver and does not satisfy the above “school bus” criteria. For example, [BODY TYPE code “School Bus”](#) transporting senior citizens to an activity.

04 (Military) is used for any vehicle that is owned by any of the Armed Forces regardless of body type. This attribute includes:

- military police vehicles;
- military ambulances;
- military hearses; and
- military fire vehicles.

05 (Police) is a vehicle equipped with police emergency devices (lights and siren) that is owned or subsidized by any local, county, State, or Federal government entity. The police vehicle is presumed to be in special use at all times, although not necessarily in “emergency use.” Vehicles not owned by a government entity that are used by law enforcement officers (e.g., undercover) are excluded.

06 (Ambulance) is used for any readily identifiable (lights or markings) vehicles designed to transport sick or injured persons. The ambulance is presumed to be in special use at all times, although not necessarily in “emergency use.”

07 (Fire Truck) is used for any readily identifiable (lights or markings) vehicles specially designed and equipped to respond to fire, hazmat, medical, and extrication incidents. This attribute includes medium and heavy vehicles such as engines, pumper, ladder, platform aerial apparatus, heavy rescue vehicles, water tenders or tankers, brush or wilderness firefighting vehicles, etc. *The fire truck is presumed to be in special use at all times, although not necessarily in “emergency use.”*

08 (Non-Transport Emergency Services Vehicle) is used for any readily identified (lights and markings) vehicles that do not meet the criteria for [06 \(Ambulance\)](#), [07 \(Fire Truck\)](#), or [13 \(Incident Response\)](#) and are specifically designed and equipped to respond to fire, hazmat, medical and extrication incidents. This attribute includes light vehicles such as sedans, van, SUVs, pickups, trucks, motorcycles, etc. This attribute includes vehicles that have been dispatched to an incident or have initiated operation in a non-emergency mode and are not transporting passengers, such as patients or suspects. An example of a Non-Transport Emergency Services vehicle is a fire chief’s unit, commonly an SUV.

13 (Incident Response) is used for Government vehicles typically equipped with a variety of tools, emergency medical equipment, traffic cones and control signs, absorbent material (for responding to spills), emergency and work lighting. These multi-purpose response units are intended to assist law enforcement, fire and rescue personnel with trafficway incident management.

98 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).

2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown) is used if the investigating officer reported special use as unknown.

Consistency Checks:

Check	IF	THEN
(1D0P)	SPECIAL USE equals 01,	BODY TYPE must equal 02-09, 12, 14-21, 28, 29, 49, 99.
(1D0Q)	SPECIAL USE equals 00-03,	EMERGENCY MOTOR VEHICLE USE must equal 0.
(2D0P)	SPECIAL USE equals 02,	BODY TYPE should equal 15, 16, 19-21, 28, 29, 45, 48, 50-52, 55, 58, 59.
(3A0P)	SPECIAL USE equals 07,	BODY TYPE must equal 60-64, 66, 67, 71, 72, 78, 79, 99.
(3D0P)	SPECIAL USE for any vehicle equals 02,	SCHOOL BUS RELATED must equal 1.
(4A0P)	BODY TYPE equals 80-93, 95, 96,	SPECIAL USE must not equal 01-03, 06, 07.
(4D0P)	SPECIAL USE equals 03,	BODY TYPE must equal 21, 28, 29, 50-52, 55, 58, 59.
(5D0P)	SPECIAL USE equals 04,	BODY TYPE must equal 01-12, 15-17, 19-22, 28-34, 39-41, 45, 48-50, 55, 58, 59, 60-64, 66, 67, 71, 72, 78, 79, 90, 99.
(5M0G)	SPECIAL USE equals 06, and PERSON TYPE equals 02 or 09,	RELATED FACTORS - PERSON (MV OCCUPANT) LEVEL should equal 86 or 92.
(6D0P)	SPECIAL USE equals 05,	BODY TYPE must equal 01-12, 14-17, 19-22, 28-34, 39-41, 45, 48, 49, 55, 58-64, 66, 67, 71, 72, 78-82, 88-91, 94, 95, 96, 97-99.
(7D0P)	SPECIAL USE equals 06,	BODY TYPE must equal 11, 14-17, 19, 21, 22, 28, 29, 40, 41, 45, 48, 49, 61, 62, 64, 79, 98, 99.
(8D0P)	SPECIAL USE equals 08,	BODY TYPE must not equal 60-64, 66, 67, 71, 72, 78, 79, 99.
(U050)	UNLIKELY: SPECIAL USE equals 04, 08.	--
(U080)	BODY TYPE does not equal 21, 28, 29, 50-59,	UNLIKELY: SPECIAL USE equals 02 or 03.
(U420)	UNLIKELY: SPECIAL USE equals 98.	--
(V056)	SPECIAL USE equals 02,	BUS USE should equal 01.
(V057)	SPECIAL USE equals 03,	BUS USE should equal 04-07, 99.
(V058)	EMERGENCY MOTOR VEHICLE USE equals 2-6,	SPECIAL USE should equal 04-08, 13.
(V059)	BUS USE equals 01,	SPECIAL USE must equal 02.
(V060)	SPECIAL USE equals 04,	REGISTRATION STATE should equal 94.
(V061)	BUS USE equals 04-07,	SPECIAL USE must equal 03.

Check	IF	THEN
(V330)	SCHOOL BUS RELATED equals 1,	BODY TYPE of at least one of the involved vehicles should equal 50 (School Bus), or SPECIAL USE for at least one involved vehicle should equal 02 (Vehicle Used as School Bus), or BUS USE for at least one vehicle should equal 01.

Consistency Checks (FARS Only):

Check	IF	THEN
(AROP)	SPECIAL USE equals 04,	REGISTERED VEHICLE OWNER must not equal 0, 1, 2, 4.
(V560)	SPECIAL USE equals 04,	REGISTERED VEHICLE OWNER should equal 3, and REGISTRATION STATE should equal 94.

V24 - Emergency Motor Vehicle Use

FORMAT: 1 numeric

SAS NAME: Vehicle.EMER_USE, Person.EMER_USE, Parkwork.PEM_USE

ELEMENT VALUES:

Codes	Attributes
0	Not Applicable
2	Non-Emergency, Non-Transport
3	Non-Emergency Transport
4	Emergency Operation, Emergency Warning Equipment Not in Use
5	Emergency Operation, Emergency Warning Equipment in Use
6	Emergency Operation, Emergency Warning Equipment in Use Unknown
8	Not Reported
9	Reported as Unknown

Definition: Emergency Motor Vehicle Use indicates operation of any motor vehicle that is legally authorized by a government authority to respond to emergencies with or without the use of emergency warning equipment, such as a police vehicle, fire truck, or ambulance while actually engaged in such response.

Remarks: Emergency Use also refers to an official motor vehicle that is usually traveling with emergency signals in use while engaged in an emergency response; typically, red light blinking, siren sounding, etc. Services such as escorting a funeral procession, providing traffic control assistance at a work zone, or for a motorcade or a parade would not qualify as emergency uses.

If [Special Use](#) is [04 \(Military\)](#), [05 \(Police\)](#), [06 \(Ambulance\)](#), [07 \(Fire Truck\)](#), [08 \(Non-Transport, Emergency Services Vehicle\)](#), or [13 \(Incident Response\)](#) then refer to the case materials to determine if the vehicle was on an emergency response (i.e., red lights flashing, siren sounding, on route to hospital, etc.) at the time of the crash.

0 (Not Applicable) is used when [Special Use](#) for this vehicle is coded [00 \(No Special Use\)](#), [01 \(Taxi\)](#), [02 \(Vehicle Used as School Transport\)](#), or [03 \(Vehicle Used as Other Bus\)](#).

2 (Non-Emergency, Non-Transport) is used when the authorized emergency vehicle has been dispatched to an incident or has initiated operation in a non-emergency mode and is not transporting passengers, such as patients or suspects. The emergency vehicle operator is not using emergency lighting, audible siren, or emergency vehicle maneuvers.

3 (Non-Emergency Transport) is used when the authorized emergency vehicle has been dispatched to an incident or has initiated a transport-related operation in a non-emergency mode. The emergency vehicle operator is not using emergency lighting, audible siren, or emergency vehicle maneuvers. Example: transport of a suspect from one location to another or inter-facility transport of a patient in an ambulance to a nursing home.

4 (Emergency Operation, Emergency Warning Equipment Not in Use) is used when the authorized emergency vehicle has been dispatched to an incident or has initiated an emergency operation and has no emergency lighting or audible siren in use. The emergency vehicle operator may be using emergency vehicle maneuvers as allowed under State law. Examples: a police car in the last mile approaching a bank robbery; transport of a patient in an ambulance for which lights and sirens are not used per protocol.

5 (Emergency Operation, Emergency Warning Equipment in Use) is used when the authorized emergency vehicle has been dispatched to an incident or has initiated an emergency operation and is using an audible siren and/or has illuminated its emergency lighting devices. The emergency vehicle operator is using, or is prepared to use, emergency vehicle maneuvers as allowed by State law.

6 (Emergency Operation, Emergency Warning Equipment in Use Unknown) is used when the authorized emergency vehicle has been dispatched to an incident or has initiated an emergency operation and it cannot be determined if it is using an audible siren and/or has illuminated its emergency lighting devices.

8 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **8 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

Examples:

- The case materials are not clear as to whether the vehicle was on an emergency response.
- The case materials are not clear as to whether the vehicle is legally authorized by a government authority to respond to emergencies.

9 (Reported as Unknown) is used if the investigating officer reported emergency use as unknown.

Consistency Checks:

Check	IF	THEN
(1D0Q)	SPECIAL USE equals 00-03,	EMERGENCY MOTOR VEHICLE USE must equal 0.
(PB44)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 240,	EMERGENCY MOTOR VEHICLE USE should equal 2-6 for at least one vehicle.
(V058)	EMERGENCY MOTOR VEHICLE USE equals 2-6,	SPECIAL USE should equal 04-08, 13.

V25 - Travel Speed

FORMAT: 3 numeric

SAS NAME: Vehicle.TRAV_SP

ELEMENT VALUES:

Codes	Attributes
000	Stopped Motor Vehicle In-Transport
001-151	Reported Speed Up to 151 MPH
997	Greater than 151 MPH
998	Not Reported
999	Reported as Unknown

Definition: This element records the speed the vehicle was traveling prior to the occurrence of the crash as reported by the investigating officer.

Remarks: Code the Travel Speed as indicated by the investigating officer. Do not enter the [Speed Limit](#). ***It is permissible to use estimates by drivers or witnesses reported in the case materials as long as the speed reported is not contradictory to the officer's reported travel speed. See clarification on the use of information provided by witnesses in section 103. Data Sources.*** Travel Speed should be representative of the vehicle's speed associated with the pre-event movement, prior to any avoidance maneuvers. If the police calculated a speed, please be aware that this may represent the impact speed that is not necessarily the travel speed.

Code the nearest mph for this vehicle as reported on the case materials.

Examples:

Reported Speed	Code
40.2mph	40
40.5mph	41

If the officer gives a range, code the median speed and, if necessary, round up to the next higher whole number. If the officer gives a minimum speed (e.g., "at least 55 mph" or "in excess of 60 mph,") then use that speed (e.g., code as "55" and "60" respectively).

Examples:

Reported Speed	Code
40-50mph	45
45-50mph	48

000 (Stopped Motor Vehicle In-Transport) is used when this vehicle is stopped on the roadway.

998 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **998 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash

report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

Examples:

1. the officer did not mention Travel Speed, or
2. did not indicate Travel Speed within a field in the case materials.

999 (Reported as Unknown) is used when the officer indicates that Travel Speed is unknown.

Consistency Checks:

Check	IF	THEN
(3B0P)	JACKKNIFE equals 2, 3,	TRAVEL SPEED must not equal 000.
(3B1P)	CRASH TYPE equals 21-23,	TRAVEL SPEED must equal 000 for this vehicle.
(A090)	NUMBER OF VEHICLE FORMS SUBMITTED is greater than 001,	there should be at least one vehicle with TRAVEL SPEED of 001-151, 997-999, or blanks.
(A100)	FIRST HARMFUL EVENT is not equal to 02, 04, 05, 10, 16,	there should be one vehicle with TRAVEL SPEED of 001-151, 997-999, or blanks.
(AZA0)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 05 or 07,	TRAVEL SPEED must equal 000 for this vehicle.
(VH70)	UNIT TYPE equals 2-4,	elements JACKKNIFE, TRAVEL SPEED, AND SEQUENCE OF EVENTS must all be left blank.

Consistency Checks (FARS Only):

Check	IF	THEN
(A240)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01, and RELATION TO JUNCTION (a) equals 0,	TRAVEL SPEED should not equal 005-040 for any vehicle.

V26 - Underride/Override - FARS Only

FORMAT: 1 numeric

SAS NAME: Vehicle.UNDERIDE, Parkwork.PUNDERIDE

ELEMENT VALUES:

Codes	Attributes
0	No Underride or Override Noted
1	Underriding a Motor Vehicle In-Transport, Underride, Compartment Intrusion
2	Underriding a Motor Vehicle In-Transport, Underride, No Compartment Intrusion
3	Underriding a Motor Vehicle In-Transport, Underride, Compartment Intrusion Unknown
4	Underriding a Motor Vehicle Not In-Transport, Underride, Compartment Intrusion
5	Underriding a Motor Vehicle Not In-Transport, Underride, No Compartment Intrusion
6	Underriding a Motor Vehicle Not In-Transport, Underride, Compartment Intrusion Unknown
7	Overriding a Motor Vehicle In-Transport
8	Overriding a Motor Vehicle Not In-Transport
9	Unknown if Underride or Override

Definition: This element indicates whether an underride or override occurred during the crash involving this vehicle.

Remarks:

Rationale: Needed to identify the magnitude of crashes in which an underride or override occurs to support NHTSA rulemaking activities and motor vehicle bumper compatibility research.

For underrides and overrides, it is important to determine the vehicle performing the action. Two vehicles cannot be considered to underride and override simultaneously.

In cases in which two vehicles collide “head-on” and one vehicle ends up under the other, you must determine whether an **Underride** or **Override** has occurred.

An **Underride** refers to a vehicle sliding under another vehicle during a crash. The classic example is an automobile striking the rear end or the side of a tractor-trailer and coming to a stop under the trailer. In this example, the automobile is the underriding vehicle. We distinguish between those underriding vehicles with compartment intrusion versus those with no compartment intrusion.

Compartment intrusion indicates a breach of the passenger compartment of this underriding (striking) vehicle. For example, damage to the windshield or glass area.

No compartment intrusion means that the underridden vehicle (struck vehicle) did not directly enter the passenger compartment of this vehicle (for example, damage to the hood or front bumper).

It is possible for an auto to completely underride the trailer without stopping. **Underride is not applicable to motorcycles or snowmobiles.**

An **Override** refers to a vehicle riding up over another (including a parked vehicle). A vehicle straddling a guardrail, for example, is not coded as an override.

0 (No Underride or Override Noted) is used when there is no indication in the case materials that this vehicle was involved in an underride or override as defined above.

Underrides and Vehicles Under Other Vehicles

Codes “1-3” are used when **this vehicle** underrides a motor vehicle in-transport (includes those in motion outside the trafficway).

Codes “4-6” are used when **this vehicle** underrides a motor vehicle that is Not In-Transport. This includes parked/stopped off roadway motor vehicles, working motor vehicles (e.g., cherry picker, paint-striping truck).

Compartment Intrusion Guidelines:

To use Codes “1 or 4,” the police crash report should indicate that the passenger compartment of the underriding (striking) vehicle has been damaged. Sources of this information can be the police crash report narrative and/or the vehicle damage scale. If the top of the vehicle is damaged, as noted by the vehicle damage scale, Codes “1 or 4” would apply.

Codes “2 and 5,” **Underride, No Compartment Intrusion**, are used when a portion of the vehicle is under another, and it is known that there is no passenger compartment intrusion. Codes “3 and 6” are used when it is unknown if there is passenger compartment intrusion.

Overrides

7 (Overriding a Motor Vehicle In-Transport) is used when this vehicle overrides a motor vehicle in-transport (includes those in motion outside the trafficway).

8 (Overriding a Motor Vehicle Not In-Transport) is used when this vehicle overrides a motor vehicle not in-transport. This includes parked/stopped off roadway motor vehicles, working motor vehicles (e.g., cherry picker, paint-striping truck).

9 (Unknown if Underride or Override) is used when an Underride or Override occurred but it cannot be determined which is appropriate.

Consistency Checks:

Check	IF	THEN
(431P)	NUMBER OF VEHICLE FORMS SUBMITTED equals 002 and UNDERRIDE/OVERRIDE equals 1-8, 9 for one vehicle,	UNDERRIDE/OVERRIDE for the other vehicle must equal 0.
(432P)	NUMBER OF VEHICLE FORMS SUBMITTED equals 001,	UNDERRIDE/OVERRIDE must equal 0.
(6A1P)	UNDERRIDE/OVERRIDE equals 1-8,	BODY TYPE must not equal 80-84, 88-91.
(9B3P)	UNDERRIDE/OVERRIDE equals 7,	there must be at least one vehicle with UNIT TYPE equal to 1.
(9B4P)	UNDERRIDE/OVERRIDE equals 8,	there must at least one vehicle with UNIT TYPE equal 2-4.
(9B5P)	UNIT TYPE equals 2, 3,	UNDERRIDE/OVERRIDE must equal 0.
(V750)	UNDERRIDE/OVERRIDE equals 1-3,	FIRST HARMFUL EVENT or at least one SEQUENCE OF EVENTS (for this vehicle) should equal 12, 55.
(V760)	UNDERRIDE/OVERRIDE equals 4-6,	FIRST HARMFUL EVENT or at least one SEQUENCE OF EVENTS (for this vehicle) should equal 14, 45.

Check	IF	THEN
(V770)	UNDERRIDE/OVERRIDE equals 7,	at least one SEQUENCE OF EVENTS (for this vehicle) must equal 12, 55.
(V780)	UNDERRIDE/OVERRIDE equals 8,	at least one SEQUENCE OF EVENTS (for this vehicle) must equal 14, 45.

V27 - Rollover

FORMAT: 1 numeric

SAS NAME: Vehicle.Rollover; Person.ROLLOVER

ELEMENT VALUES:

Codes	Attributes
0	No Rollover
1	Rollover, Tripped by Object/Vehicle
2	Rollover, Untripped
9	Rollover, Unknown Type

Definition: This element identifies whether a rollover or overturn occurred during the crash involving this vehicle.

Remarks: Rollover is defined as any vehicle rotation of 90 degrees or more about any true longitudinal or lateral axis. Rollover can also be referred to as overturn *or end-over*, and can occur at any time during this vehicle's *sequence of events*.

Rollover does **not** apply to 2-wheeled motorcycles for this element (use [0 \(No Rollover\)](#)). However, in the [First Harmful Event](#), [Most Harmful Event](#), and [Sequence of Events](#) you may use [01 \(Rollover/ Overturn\)](#) to record that this vehicle (motorcycle) overturned.

A rollover can be used for 3- or 4-wheeled ATVs, snowmobiles, go-karts, and 3-wheeled motorcycles.

0 (No Rollover) is used when there is no indication that a rollover occurred.

1 (Rollover, Tripped by Object/Vehicle) is used when the vehicle's lateral motion is suddenly slowed or stopped by an opposing force, inducing a rollover. The opposing force may be produced by a curb, ditch, pot-hole, another vehicle, pavement, or soil dug into by the vehicle's wheels. This includes instances where a vehicle strikes a fixed object (e.g., tree, barrier, pole, or post) then rolls over.

2 (Rollover, Untripped) is used when a rollover occurs, but not as a result of a collision with an object or a vehicle or generated by any other opposing force as referred to in [1 \(Rollover, Tripped by Object/Vehicle\)](#). An untripped rollover is one for which there is no obvious cause other than normal surface friction. This is usually the result of vehicle instability and there is no evidence of furrowing or gouging on the pavement, gravel, grass, or dirt surface.

9 (Rollover, Unknown Type) is used when a rollover occurred, but there is not sufficient information to determine tripped versus untripped status.

Consistency Checks:

Check	IF	THEN
(1Z2P)	any SEQUENCE OF EVENTS equals 01, and BODY TYPE equals 01-79, 82, 90-99, or any RELATED FACTORS-VEHICLE LEVEL equals 30,	ROLLOVER must equal 1, 2, or 9.
(5A0P)	BODY TYPE equals 80, 81, 83, 84, 88, 89, and any RELATED FACTORS- VEHICLE LEVEL does not equal 30,	ROLLOVER must equal 0.

Check	IF	THEN
(V700)	ROLLOVER equals 2,	CRASH TYPE should equal 01-10, 14, 98, or 99 for this vehicle.
(V74P)	UNIT TYPE equals 1, and ROLLOVER equals 1, 2, 9, or LOCATION OF ROLLOVER equals 1-7, 9,	at least one SEQUENCE OF EVENTS must equal 01 for this vehicle.
(V75P)	ROLLOVER is not blank,	LOCATION OF ROLLOVER must not be blank.
(V76P)	ROLLOVER is blank,	LOCATION OF ROLLOVER must be blank.
(V77P)	ROLLOVER equals 1, 2, 9,	LOCATION OF ROLLOVER must equal 1-7, 9.
(V78P)	ROLLOVER equals 0,	LOCATION OF ROLLOVER must equal 0.
(V79P)	ROLLOVER equals 2, and FIRST HARMFUL EVENT equals 01,	CRASH TYPE must equal 01-10, 14, 15, or 98 for the vehicle involved in the FIRST HARMFUL EVENT.

V28 - Location of Rollover

FORMAT: 1 numeric

SAS NAME: Vehicle.ROLINLOC

ELEMENT VALUES:

Codes	Attributes
0	No Rollover
1	On Roadway
2	On Shoulder
3	On Median/Separator
4	In Gore
5	On Roadside
6	Outside of Trafficway
7	In Parking Lane/Zone
9	Unknown

Definition: This element identifies the location of the trip point or start of the vehicle's roll.

Remarks:

1 (On Roadway) is used when the available information indicates the vehicle tripped or began its roll on the roadway. A Roadway is that part of a trafficway designed, improved, and ordinarily used for motor vehicle travel. Where various classes of motor vehicles are segregated, that part of a trafficway used by a particular class is the roadway (i.e., travel lanes). Separate roadways may be provided for northbound and southbound traffic or for trucks and automobiles. This includes continuous left-turn lanes.

2 (On Shoulder) is used when the available information indicates the vehicle tripped or began its roll on the shoulder. A Shoulder is that part of a trafficway contiguous with the roadway for emergency use, for accommodation of stopped road vehicles, and for lateral support of the roadway structure.

3 (On Median/Separator) is used when the available information indicates the vehicle tripped or began its roll on the median/separator. A Median is an area of a trafficway between parallel roads separating travel in opposite directions. Continuous left-turn lanes are not considered painted medians. A Separator is the area of a trafficway between parallel roads separating travel in the same direction or separating a frontage road.

4 (In Gore) is used when the available information indicates the vehicle tripped or began its roll in the gore. The Gore is an area of land where two roadways diverge or converge. The area is bounded on two sides by the edges of the roadways, which join at the point of divergence or convergence. The direction of traffic must be the same on both of these roadways. The area includes shoulders or marked pavement, if any, between the roadways. (See [Figure 10](#))

5 (On Roadside) is used when the available information indicates the vehicle tripped or began its roll on the roadside. Roadside is the outermost part of the trafficway from the property line or other boundary into the edge of the first road.

6 (Outside of Trafficway) is used when the available information indicates the vehicle tripped or began its roll outside the right-of-way.

7 (In Parking Lane/Zone) refers to an area on the roadway, or next to the roadway, on which parking is permitted in marked or unmarked spaces. This includes curbside and edge of-roadway parking (for example, legal residential parking, city-street parking, etc.). Sometimes a strip of roadway can be designated for parking at certain hours of the day (parking lane) and for regular travel at other hours (travel lane). This code should NOT be used during hours when parking is NOT permitted (see [1 \(On Roadway\)](#)).

9 (Unknown) is used when the location of the trip point cannot be determined from available resources.

If Relation to Trafficway equals:	Then Location of Rollover should equal:
01 - On Roadway	1 - On Roadway
02 - On Shoulder	2 - On Shoulder
03 - On Median	3 - On Median/Separator
04 - On Roadside	5 - On Roadside
05 - Outside Trafficway	6 - Outside of Trafficway
06 - Off Roadway - Location Unknown	9 - Unknown
07 - In Parking Lane/Zone	7 - In Parking Lane/Zone
08 - Gore	4 - In Gore
10 - Separator	3 - On Median/Separator
11 - Continuous Left-Turn Lane	1 - On Roadway
12 - Pedestrian Refuge Island or Traffic Island	5 – On Roadside
98 - Not Reported	9 - Unknown
99 – Reported as Unknown	9 - Unknown

Consistency Checks:

Check	IF	THEN
(A380)	FIRST HARMFUL EVENT equals 01 and this vehicle is involved in the FIRST HARMFUL EVENT, and BODY TYPE does not equal 80, 81, 83, 84, 88, 89, for this vehicle, and RELATION TO TRAFFICWAY equals _____,	LOCATION OF ROLLOVER should equal _____ respectively.
(V74P)	UNIT TYPE equals 1, and ROLLOVER equals 1, 2, 9, or LOCATION OF ROLLOVER equals 1-7, 9,	at least one SEQUENCE OF EVENTS must equal 01 for this vehicle.
(V75P)	ROLLOVER is not blank,	LOCATION OF ROLLOVER must not be blank.
(V76P)	ROLLOVER is blank,	LOCATION OF ROLLOVER must be blank.
(V77P)	ROLLOVER equals 1, 2, 9,	LOCATION OF ROLLOVER must equal 1-7, 9.
(V78P)	ROLLOVER equals 0,	LOCATION OF ROLLOVER must equal 0.

V29 - Areas of Impact – Initial Contact Point/Damaged Areas

FORMAT: 2 subfields: Subfield 1, 2 numeric; Subfield 2, Select all that apply

SAS NAME: Vehicle.IMPACT1, Person.IMPACT1, Parkwork.PIMPACT1; Damage.MDAREAS

ELEMENT VALUES:

Subfield 1: Areas of Impact - Initial Contact Point

Codes	Attributes
00	Non-Collision
01-12	Clock Points
13	Top
14	Undercarriage
61	Left
62	Left-Front Side
63	Left-Back Side
81	Right
82	Right-Front Side
83	Right-Back Side
18	Cargo/Vehicle Parts Set-In-Motion
19	Other Objects Set-In-Motion
20	Object Set in Motion, Unknown if Cargo/Vehicle Parts or Other
98	Not Reported
99	Reported as Unknown

Subfield 2: Damaged Areas

Codes	Attributes
01-12	Clock Values
13	Top
14	Undercarriage
15	No Damage
99	Damage Areas Unknown

Definition (Areas of Impact - Initial Contact Point): This subfield identifies the area on this vehicle that produced the first instance of injury to non-motorists or occupants of this vehicle, or that resulted in the first instance of damage to other property or to this vehicle.

Definition (Damaged Areas): This subfield identifies all the areas on this vehicle that were damaged in the crash as reflected in the case materials by the officer.

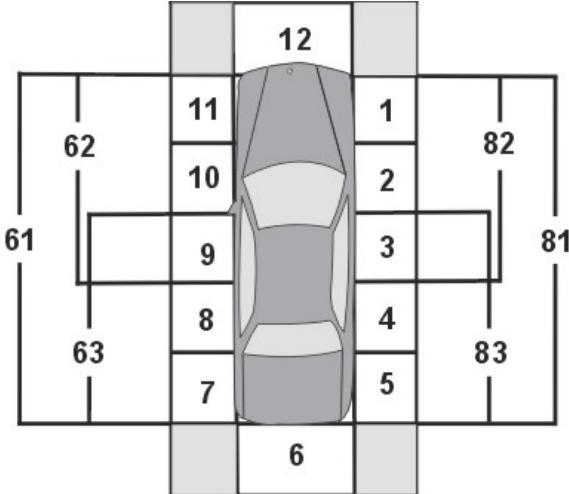

Remarks: If Areas of Impact- Initial Contact Point/Damaged Areas are provided on the crash report in this exact format, use the values from the report unless there are clear errors (e.g., officer switches vehicles by mistake). If these elements are not provided on the crash report in this exact format, then similar report fields, narrative, or diagram information may be used to code these elements. These subfields do not refer to direction of force of the impact. They identify the area(s) on the vehicle associated with the initial contact ([Subfield 1](#)) and all damage to the vehicle identified in the case material ([Subfield 2](#)).

Areas of Impact/Initial Contact Point (Subfield 1):

This subfield identifies the area on this vehicle that produced the first instance of injury to non-motorists or occupants of this vehicle, or that resulted in the first instance of damage to other property or to this vehicle. The event that produced the Initial Contact Point for this vehicle may or may not be the first harmful event for the crash. This data is derived from the [Crash Events](#) Table and will always be the first recorded Area(s) of Impact element value for each vehicle in the Crash Events Table.

*Note the same element values from **Areas of Impact – Initial Contact Point** are used to complete the **Areas of Impact (AOI)** fields in the [Crash Events](#) Table for all harmful events.

Figure 14: Areas of Impact – Initial Contact Point Element Values Diagram

00 (Non Collision [Initial Contact Point])

If the first harmful event involving this vehicle in the Crash Events Table is a non-collision event, then Initial Contact Point will be **00 (Non-Collision)**.

“01-12” refer to the points on a clock. (See [Figure 14](#)). The sides of the vehicle are divided into 5 equal segments, 01 through 05 for the right side and 07 through 11 for the left side. The front (12), back (06), top (13) and undercarriage (14) complete the outside surfaces of the vehicle. Use the diagrams in [Figure 16](#) for examples of how the 5 equal side segments are created on several vehicle types.

As procedure, start by looking for one of the “clock” values 01-12 or specific situation values 00, 13, 14, 18. If sufficient detail is not available to choose one of these values, move out to the next set of values to try to identify the appropriate codes (i.e., **62-63, 82-83, then 61, 81**). (See [Figure 14](#)) Lastly, for missing information pertaining to known harmful events, a [98 \(Not Reported\)](#) attribute is available.

61-63 and 81-83:

Codes, 62-63 and 82-83 are used when there is not sufficient detail available in the case materials to identify a more specific area of impact, 01-05 and 07-11, but one of the quadrants can be identified (i.e., **62 (Left-Front Side), 63 (Left-Back Side), 82 (Right-Front Side), or 83 (Right-Back Side)**). Also, use these attributes if the case materials indicate that the damage area is “between” or overlapping two known clock points. (e.g., if the damage area is midway between or overlapping clock points 10 and 11, use **62 (Left-Front Side)**).

Codes 61 and 81 are used when there is not sufficient detail available in the case materials to identify a more specific area of impact, 62-63 or 82-83, but one of the sides can be identified (i.e., **61 (Left) or 81 (Right)**).

Guideline for Resolving Ambiguous Information

If the language in the narrative is ambiguous **AND** the diagram or other case information don't provide resolution, use the area indicated **first in the narrative wording** to select the Area of Impact to code. See examples table below.

Examples:

Description	Coding
Front, left	12
Left, front	62
Front, corner	12
Right, rear	83
Back, right side	06

It is important to note that area of impact refers mainly to the area of the vehicle that sustained the damage and does not depend upon the attitude of the vehicle (e.g., damage to a grille is still damage at 12 o'clock even if it was caused by sliding sideways past a utility pole).

However, **13 (Top)** may raise questions. The front and rear windows of some vehicles may also be viewed from the top. It may also be difficult to code impacts to the hood and rear deck of a vehicle.

With **13 (Top)** the direction of force sometimes has to be considered. The following are guidelines for using **13 (Top)**.

1. If the area was damaged by an impact that was received horizontally to an upright vehicle, use one of the codes "01 to 12, 61-63, 81-83."
2. If the area was damaged by an impact that was received from a vertical direction above the upright vehicle, use **13 (Top)**.
3. If the impact was received or direction of force was at an angle of less than 15 degrees above the horizontal, it is considered horizontal.
4. With a vehicle in other than upright attitudes, remember, it is the area of the vehicle that was damaged that is important.

14 (Undercarriage) refers to non-horizontal impacts to the undercarriage or swiping or snagging of undercarriage components (axles, exhaust system, etc.). Tire/Wheel impacts are coded to the AREA OF IMPACT (01-12, 61-63, 81-83). If a vehicle strikes the side plane of a tractor/trailer, and the AOI for the tractor/trailer is listed as undercarriage on the police crash report, code the tractor/trailer's AOI - Initial Contact clock point involved in the impact rather than 14 (Undercarriage).

Special Instructions Involving Motorcycles:

For cases involving a motorcycle where the area of initial contact is described as "front tire/wheel" or "front end" code as **12 (Front)**, or "rear tire/wheel" or "rear end" code as **06 (Back)** if the impact was received on a horizontal plane.

If the only event for a vehicle is a non-collision event, the Area of Impact - Initial is coded **00 (Non-Collision)**. If following a non-collision event, a vehicle has a collision event; Area of Impact, Initial Contact Point is still coded **00 (Non-Collision)**.

Hitting the ground during a non-collision crash is not considered an "impact" for this subfield.

Set-In-Motion Attributes:

“Loads” of a vehicle includes persons or property upon or set-in-motion by the vehicle, persons boarding or alighting from the vehicle, and persons or property attached to and in position to move with the vehicle. A vehicle associated with a harmful event produced by a load being separated from or propelled by the vehicle should have one of the three set-in-motion AOI values for this event. These set-in-motion values identify that only the load has made contact with the other vehicle, person, or other property in that event.

Important Notes:

- A load separated from, or an object propelled by, a vehicle should **not** receive a [Sequence of Events 63 \(Ran Off Roadway-Right\)](#), [64 \(Ran Off Roadway-Left\)](#), [65 \(Cross Median\)](#), [68 \(Cross Centerline\)](#), or [69 \(Re-entering Roadway\)](#) associated with the movement of the load because these events apply to the vehicle itself and not to the load or object that was propelled. For example, if logs fall from a truck and only the logs (load of the truck) cross the centerline, this crossing of the centerline by the load would **NOT** receive a **68 (Cross Centerline)** event.
- If debris set in motion as the result of a vehicle-to-vehicle collision produces a subsequent harmful event (e.g., strikes a third vehicle) and you cannot reasonably determine which vehicle the debris came from, use the lowest vehicle number of the MVIT involved in the vehicle-to-vehicle event that produced the debris.
- The in-transport vehicle setting the object in motion and the object set in motion are coded under **VEHICLE NUMBER (THIS VEHICLE)** and **AOI (This Vehicle)**.
- The only time **AOI (This Vehicle)** and **AOI (Other Vehicle)** are both coded **18 (Cargo/Vehicle Parts Set-In-Motion)**, **19 (Other Objects Set-In-Motion)**, or **20 (Object Set in Motion, Unknown if Cargo/Vehicle Parts or Other)** is if the impact is between objects set in motion **by both** in-transport motor vehicles.

18 (Cargo/Vehicle Parts Set-In-Motion) is selected when the harmful event involves an impact between a fixed/non-fixed object or vehicle and cargo or parts from an in-transport motor vehicle that are set-in-motion. That is, use this code when the object set-in-motion is cargo (e.g., mattress, logs, tools, unsecured objects on the in-transport motor vehicle) or a part of an in-transport motor vehicle (e.g., hubcap or mirror).

Examples:

Vehicle 1 (log truck) swerves to avoid a braking vehicle (Vehicle 2). A log becomes dislodged from Vehicle 1 and lands on Vehicle 2's top.

- Vehicle 1 Area of Impact, Initial Contact Point would be coded as **18 (Cargo/Vehicle Parts Set-In-Motion)**.
- Vehicle 2 Area of Impact, Initial Contact Point would be coded as [13 \(Top\)](#).

19 (Other Objects Set-In-Motion) is used when the harmful event involves an object set-in-motion by an in-transport motor vehicle that is **NOT** cargo or part of the in-transport motor vehicle (e.g., kicked-up stone, motorcycle rider, parked vehicle, stop sign).

Examples:

Vehicle 1 kicks up a stone that strikes Vehicle 2's windshield.

- Vehicle 1 Area of Impact, Initial Contact Point would be coded as **19 (Other Objects Set-In-Motion)**.
- Vehicle 2 Area of Impact, Initial Contact Point would be coded as **12 (Front)**.

20 (Object Set in Motion, Unknown if Cargo/Vehicle Parts or Other) is used when it is UNKNOWN whether the object was the cargo or a part of an in-transport motor vehicle ([18 – Cargo/Vehicle Parts Set-in-Motion](#)) or some other object ([19 – Other Objects Set-In-Motion](#)).

98 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code 98 (Not Reported) in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

Areas of Impact - Initial Contact Point Examples of Not Reported:

- The case materials lack the detail to identify the initial contact point at all (e.g., narrative only states the vehicle departed the roadway and struck a tree).
- The case materials lack the detail to identify the initial contact point among a number of possible choices for the first harmful event for the vehicle (e.g., crash report field indicates front and right side damage from separate impacts and does not clarify which area is associated with the initial impact).

99 (Reported as Unknown) is used if the investigating officer reported that the Initial Contact Point was unknown.

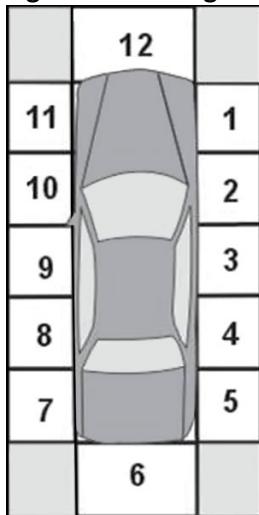

Areas of Impact - Damaged Areas (Subfield 2):

This subfield identifies all the areas on this vehicle that were damaged in the crash as reflected in the case materials. For trailers that become separated from the power unit at the onset of the unstabilized situation or during the crash, treat the entire combination as one unit when recording Damaged Areas. Please see the Clockpoint Diagrams in [Figure 16](#) to establish damage areas for the combination vehicles.

Vehicles noted as “totaled:”

This element is identifying the vehicle planes that were damaged so do not make the assumption that a vehicle noted in the case materials as “totaled” translates to all areas being damaged. This term is often referring to the cost to repair the damage not the areas damaged.

Figure 15: Damaged Areas Element Values Diagram

*Note: When entering the data there are three short cut selections in MDE for identifying multiple areas. Those selections are:

1. All Areas – this will select all values **01-12, 13 (Top), and 14 (Undercarriage)**
2. Left Side – this will select all values **07-11**.
3. Right Side – this will select all values **01-05**.

01-12 (Clock Values) refer to the points on a clock (see [Figure 15](#)) to identify areas on the vehicle that were damaged in the crash. This subfield includes induced damage identified in the report. For example, the case materials show an impact centered at 03 (AOI – Initial Contact) that produced damage in 02, 03, 04. The sides of the vehicle are divided into 5 equal segments, 01 through 05 for the right side and 07 through 11 for the left side. The front (12), back (06), top (13), and undercarriage (14) complete the outside surfaces of the vehicle. Use the diagrams in [Figure 16](#) for examples of how the 5 equal side segments are created on several vehicle types.

13 (Top) includes damage to the hood, windshield, roof, rear window, and trunk deck.

14 (Undercarriage) includes damage to the tires/wheels, axles, exhaust system, etc.

15 (No Damage) is used for vehicles that experience harmful events but the events do not produce physical damage to the vehicle itself.

Examples include:

- Vehicles that have the [non-collision harmful events](#) of gas inhalation, injured in vehicle, fell/jumped from vehicle, or other non-collision.
- Vehicles that have a collision event but the event does not produce damage to the vehicle such as; running over a pedestrian lying in the roadway, striking a bicyclist, striking another vehicle where only the struck vehicle is damaged, or when the only collision event is cargo falling from this vehicle that lands on another vehicle or person.

99 (Damage Areas Unknown) is used when the case materials do not indicate which area or areas received damage or when the information in the case materials is confusing or inadequate for the purposes of this determination.

Handling of known events with unknown damage areas:

For situations where you have known damage areas associated with a specific event(s) and additional harmful events without knowing specific damage areas for the additional events, code only the known damage areas in this subfield. For example, if the police crash report narrative only states that “V1 departed the roadway striking several trees” with the only indication of damage given as the initial front contact, and a police crash report box marked “Totaled,” code only 12 for the known damage to the front of the vehicle.

Handling of non-collision harmful events that produce vehicle damage:

For situations where a vehicle is involved in the following [non-collision harmful events](#): **(01) Rollover/Overturn, (02) Fire/Explosion, (03) Immersion or Partial Immersion, (16) Thrown or Falling Object, (44) Pavement Surface Irregularity (Ruts, Potholes, Grates, etc.), (51) Jackknife (harmful to this vehicle), or (72) Cargo/Equipment Loss or Shift (harmful to this vehicle)**, code only the damage areas reflected in the case materials by the officer.

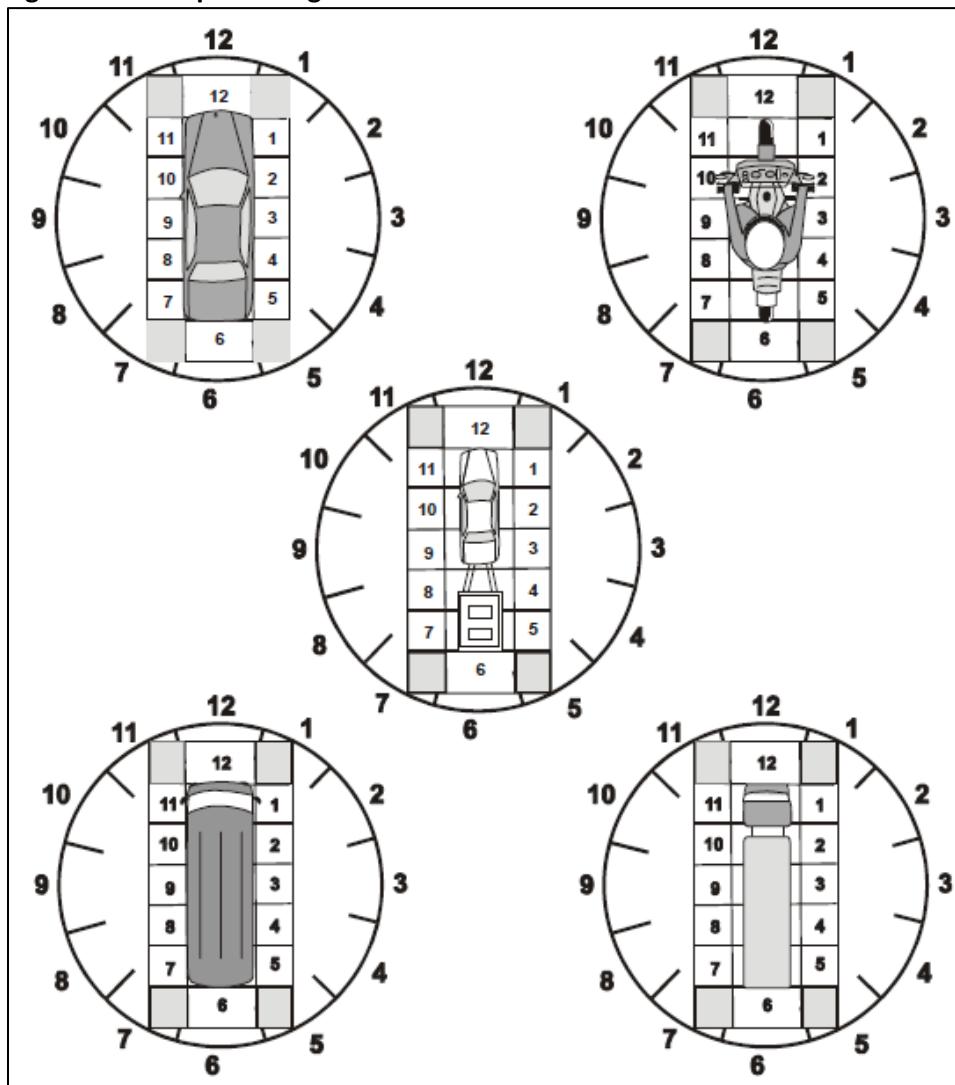

For example, the investigating officer may indicate damaged locations that translate to:

- 01-12, 13, 14 for a vehicle that was consumed by a fire or immersed in a river.
- 01-05, 13 for a vehicle that rolls onto its right side and then roof.
- 13 for a vehicle that only has damage to the hood from a fire.
- 13 for a vehicle that has a tree fall on its roof.
- 14 for a vehicle that strikes a pothole on its undercarriage.

Do not record damage at these locations for these non-collision harmful events unless so indicated by the case materials.

If a vehicle that experiences only these non-collision events and has only “non-collision” reflected in the case materials by the officer for its damaged areas, then use [99 \(Damage Areas Unknown\)](#).

Figure 16: Clockpoint Diagram

Consistency Checks:

Check	IF	THEN
(2U0Q)	BODY TYPE equals 80-84, 88, 89,	AREA OF IMPACT - INITIAL CONTACT POINT should not equal 14.
(3B2P)	CRASH TYPE equals 20, 24, 28, 34, 36, 38, 40, 50-54, 56, 58, or 60,	AREA OF IMPACT-INITIAL CONTACT POINT must equal 12 for this vehicle.
(3B3P)	CRASH TYPE equals 21-23, 25-27, 29-31, 35, 37, 39, or 41,	AREA OF IMPACT-INITIAL CONTACT POINT must equal 6 for this vehicle.
(3B6P)	CRASH TYPE equals 87,	AREA OF IMPACT-INITIAL CONTACT POINT must equal 01-05, 81-83 for this vehicle.

Check	IF	THEN
(3B7P)	CRASH TYPE equals 89,	AREA OF IMPACT-INITIAL CONTACT POINT must equal 07-11, 61-63 for this vehicle.
(3CA0)	EXTENT OF DAMAGE for this vehicle equals 0,	DAMAGED AREAS must equal 15.
(420P)	MANNER OF COLLISION equals 07, 08,	there must be at least two vehicle forms with AREA OF IMPACT-INITIAL CONTACT POINT equal to 01-05, 07-11, 61-63, 81-83, 98, 99.
(421P)	MANNER OF COLLISION equals 01,	AREA OF IMPACT-INITIAL CONTACT POINT for one vehicle in the first harmful event must equal 12, and AREA OF IMPACT-INITIAL CONTACT POINT for the other vehicle in the first harmful event must equal 06.
(422P)	MANNER OF COLLISION equals 02,	AREA OF IMPACT-INITIAL CONTACT POINT for one vehicle in the first harmful event must equal 12, and AREA OF IMPACT-INITIAL CONTACT POINT for the other vehicle in the first harmful event must equal 12.
(423P)	MANNER OF COLLISION equals 06,	AREA OF IMPACT-INITIAL CONTACT POINT for one vehicle in the first harmful event must equal 01, 11, 12, 98, 99, and AREA OF IMPACT-INITIAL CONTACT POINT for the other vehicle in the first harmful event must equal 01-05, 07-11, 61-63, 81-83, 98, 99.
(424P)	MANNER OF COLLISION equals 09,	AREA OF IMPACT-INITIAL CONTACT POINT for one vehicle in the first harmful event should equal 06, and AREA OF IMPACT-INITIAL CONTACT POINT for the other vehicle in the first harmful event should equal 01-05, 07-11, 61-63, 81-83, 98, 99.
(425P)	MANNER OF COLLISION equals 10,	AREA OF IMPACT-INITIAL CONTACT POINT for one vehicle in the first harmful event should equal 06, and AREA OF IMPACT-INITIAL CONTACT POINT for the other vehicle in the first harmful event should equal 06, 98, 99.
(8L8Q)	AREA OF IMPACT (THIS VEHICLE) equals 18, 19, or 20 in the CRASH EVENTS,	the corresponding event in that row must not equal 12 or 55.
(8L8R)	the CRASH EVENTS event equals 54,	AREA OF IMPACT (THIS VEHICLE) must equal 18, 19, or 20 in that row.
(8L8S)	AREA OF IMPACT (THIS VEHICLE) equals 18, 19, or 20 in the CRASH EVENTS and the corresponding event in that row equals 14, 45, or 54,	RELATED FACTORS-CRASH LEVEL must equal 14.
(8L8T)	RELATED FACTORS-CRASH LEVEL equals 14,	there must exist at least one event in the CRASH EVENTS where AREA OF IMPACT (THIS VEHICLE or OTHER VEHICLE) equals 18, 19, or 20 and the corresponding event in that row equals 14, 45, or 54.

Check	IF	THEN
(8L8U)	AREA OF IMPACT (THIS VEHICLE) equals 18, 19, or 20 in the CRASH EVENTS and the corresponding event in that row equals 08, 09, 15, 49,	RELATED FACTORS-CRASH LEVEL must equal 15.
(8L8V)	RELATED FACTORS-CRASH LEVEL equals 15,	there must exist at least one event in the CRASH EVENTS where AREA OF IMPACT (THIS VEHICLE) equals 18, 19, or 20, and the corresponding event in that row equals 08-10, 15, 18, 49, or 91.
(8L8W)	SEQUENCE OF EVENTS is not equal to 45,	AREA OF IMPACT (OTHER VEHICLE) should not equal 18 or 19.
(8L8X)	AREA OF IMPACT (THIS VEHICLE) equals 18,	there should be a previous event involving that vehicle where the CRASH EVENTS event equals 60.
(8L8Y)	SEQUENCE OF EVENTS is equal to 45 (Working Motor Vehicle),	AREA OF IMPACT (THIS VEHICLE) and AREA OF IMPACT (OTHER VEHICLE) should not both equal 18 or 19 in that same event row.
(8L9P)	BODY TYPE does not equal 80-84, 88-91, and the CRASH EVENTS event equals 54, and the corresponding AREA OF IMPACT (THIS VEHICLE) equals 19 or 20 in that row,	there should be a previous event with CRASH EVENTS event equal to 18, 73, or 91 involving that vehicle.
(BZ10)	CRITICAL EVENT – PRECRASH (EVENT) equals 53,	AREA OF IMPACT-INITIAL CONTACT POINT should not equal 12 for this vehicle.
(BZ20)	CRITICAL EVENT – PRECRASH (EVENT) equals 51, 52,	AREA OF IMPACT-INITIAL CONTACT POINT should not equal 06 for this vehicle.
(FP1F)	AREA OF IMPACT – INITIAL CONTACT POINT equals blank, case status is flawed.	--
(VH81)	any DAMAGED AREAS equals 15 or 99,	only that one values must be coded.
(VH82)	EXTENT OF DAMAGE for this vehicle equals 2, 4, 6,	DAMAGED AREAS must not equal 15.
(VH83)	the only harmful SEQUENCE OF EVENTS for this vehicle equals 04-06,	DAMAGED AREAS should equal 15.
(VH84)	the only harmful SEQUENCE OF EVENTS for this vehicle equals 01-03, 16, 44, 51, 72,	DAMAGED AREAS should not equal 15.
(VH85)	AREA OF IMPACT-INITIAL CONTACT POINT equals 61-63,	DAMAGED AREAS should include at least one of the codes 07-11, or DAMAGED AREAS should equal 15.
(VH86)	AREA OF IMPACT-INITIAL CONTACT POINT equals 81-83,	DAMAGED AREAS should include at least one of the codes 01-05, or DAMAGED AREAS should equal 15.
(VH87)	HIT-AND-RUN equals 0, and AREA OF IMPACT-INITIAL CONTACT POINT equals 01-14,	the corresponding code should be included in DAMAGED AREAS, or DAMAGED AREAS should equal 15.

V30 - Extent of Damage

FORMAT: 1 numeric

SAS NAME: Vehicle.DEFORMED, Parkwork.PVEH_SEV

ELEMENT VALUES:

Codes	Attributes
0	No Damage
2	Minor Damage
4	Functional Damage
6	Disabling Damage
8	Not Reported
9	Reported as Unknown

Definition: This element indicates the amount of damage sustained by this vehicle in this crash as indicated in the case materials based on an operational damage scale.

Remarks: *There is a distinction between the cost to repair the damage and the degree to which the damage affects the vehicle's operability (totaled, under/over monetary threshold). Operational damage is recorded here. For example, if the available information indicates that the vehicle was totaled and the vehicle was towed away, use 6 (Disabling Damage). However, if the available information indicates that the vehicle was totaled, but the vehicle was driven away, use 4 (Functional Damage).*

0 (No Damage) is used when there is no damage indicated in the available information for this vehicle.

2 (Minor Damage) is damage that does not disable or affect the operation of the motor vehicle. This attribute is used when the case materials indicate damage to the vehicle to be Minor or less than Functional and the vehicle is not towed due to damage.

Examples of **2 (Minor Damage)** include dented or bent fenders, bumpers, grills, body panels, and destroyed hubcaps.

4 (Functional Damage) is damage that is not disabling, but affects the operation of the motor vehicle or its parts. This attribute is used when the available information specifically indicates the damage is moderate or functional.

Examples of **4 (Functional Damage)** include:

- doors, windows, hood and trunk lids that will not operate properly;
- broken glass that obscures vision;
- damage that would prevent the motor vehicle from passing an official motor vehicle inspection;
- tire damage even though the tire may have been changed at the scene;
- bumpers that are loose;
- headlamp or taillight damage that would make night driving hazardous but would not affect daytime driving; and,
- damage to turn signals, horn, or windshield wipers, that makes them inoperative.

6 (Disabling Damage) is damage that precludes departure of the motor vehicle from the crash scene in its usual daylight-operating manner after simple repairs. As a result, the motor vehicle would have had to have been towed or carried from the crash scene, or assisted by an emergency motor vehicle. This attribute should be used when the available information specifically indicates disabling or severe damage. This attribute is also used

when the damage is indicated to be of greater magnitude than Functional (moderate), e.g., major, extensive, totaled and the vehicle was towed from the scene.

8 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **8 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

9 (Reported as Unknown) is used when the available information specifically indicated the damage severity to be unknown.

Consistency Checks:

Check	IF	THEN
(3COP)	UNIT TYPE equals 1, and EXTENT OF DAMAGE equals 6,	VEHICLE REMOVAL should equal 2, 8, 9.
(3C1P)	EXTENT OF DAMAGE equals 0, 2,	VEHICLE REMOVAL must not equal 2.
(3C1Q)	EXTENT OF DAMAGE equals 0, 2,	VEHICLE REMOVAL should equal 3, 5, or 7 .
(3C2P)	VEHICLE REMOVAL equals 2,	EXTENT OF DAMAGE must equal 6, 8, 9.
(3C3P)	EXTENT OF DAMAGE equals 6,	VEHICLE REMOVAL must not equal 3 or 7 .
(3CA0)	EXTENT OF DAMAGE for this vehicle equals 0,	DAMAGED AREAS must equal 15.
(VH82)	EXTENT OF DAMAGE for this vehicle equals 2, 4, 6,	DAMAGED AREAS must not equal 15.

Consistency Check (FARS ONLY):

Check	Language
(U370)	UNLIKELY: EXTENT OF DAMAGE equals 8 if STATE NUMBER does not equal 17, 34, 48, 49, or 53.

V31 - Vehicle Removal

FORMAT: 1 numeric

SAS NAME: Vehicle.TOWED, Parkwork.PTOWED

ELEMENT VALUES:

Codes	Attributes
2	Towed Due to Disabling Damage
3	Towed Not Due to Disabling Damage
7	Towed, Unknown Reason
5	Not Towed
8	Not Reported
9	Reported as Unknown

Definition: This data element describes the mode in which the vehicle left the scene of the crash.

Remarks: This data element describes the mode in which the vehicle left the scene of the crash. Towing includes vehicles carried from the scene on a flatbed tow truck.

If the vehicle is a combination vehicle (power unit and at least one trailer), the power unit and/or trailer(s) are considered when determining tow status. If the available information indicates the power unit, or trailer of a combination unit, sustained enough damage to require towing, consider this vehicle as towed due to damage.

2 (Towed Due to Disabling Damage) is used for any towing that is due to disabling damage caused by this crash that prohibits vehicle movement under its own **power**.

If a vehicle was pushed by hand or by another vehicle after the crash because it was not drivable, then use **2 (Towed Due to Disabling Damage)**.

If a vehicle was towed due to damage **AND** for other reasons such as driver arrest, then code this vehicle as **2 (Towed Due to Disabling Damage)**.

3 (Towed Not Due to Disabling Damage) is used when the vehicle has been towed but the towing results from other than disabling damage (e.g., minor damage, functional damage, mired vehicles, driver arrested, injured driver, etc.).

7 (Towed, Unknown Reason) is used if the vehicle is towed, but the reason for towing is unknown. For example, a vehicle is reported in the case materials as towed but it cannot be determined whether it was due to disabling damage or for other reasons.

5 (Not Towed) is used when it is specifically indicated in the available information that the vehicle was not towed or when the preponderance of the information available indicates that the vehicle was driven away or was not **towed**.

NOTE: The police crash report narrative may be used to supersede and/or clarify the above information.

8 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **8 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

9 (Reported as Unknown) is used when the investigating officer indicates it was unknown as to how the vehicle was removed.

Consistency Checks:

Check	IF	THEN
(3COP)	UNIT TYPE equals 1, and EXTENT OF DAMAGE equals 6,	VEHICLE REMOVAL should equal 2, 8, 9.
(3C1P)	EXTENT OF DAMAGE equals 0, 2,	VEHICLE REMOVAL must not equal 2.
(3C1Q)	EXTENT OF DAMAGE equals 0, 2,	VEHICLE REMOVAL should equal 3, 5, or 7 .
(3C2P)	VEHICLE REMOVAL equals 2,	EXTENT OF DAMAGE must equal 6, 8, 9.
(3C3P)	EXTENT OF DAMAGE equals 6,	VEHICLE REMOVAL must not equal 3 or 7 .
(U430)	UNLIKELY: VEHICLE REMOVAL equals 8.	--

V32 - Sequence of Events

FORMAT: Read Only

SAS NAME: Cevent.SOE; Vevent.SOE

ELEMENT VALUES:

Non-Harmful Events:

Codes	Attributes
61	Equipment Failure (blown tire, brake failure, etc.)
62	Separation of Units
63	Ran Off Roadway-Right
64	Ran Off Roadway-Left
79	Ran off Roadway - Direction Unknown
71	End Departure
65	Cross Median
68	Cross Centerline
66	Downhill Runaway
67	Vehicle Went Airborne
69	Re-entering Roadway
70	Non-harmful, Swaying Trailer/Jackknife
60	Cargo/Equipment Loss or Shift (non-harmful)

Non-Collision Harmful Events:

Codes	Attributes
01	Rollover/Overtur
02	Fire/Explosion
03	Immersion or Partial Immersion
04	Gas Inhalation
51	Jackknife (harmful to this vehicle)
06	Injured in Vehicle (Non-Collision)
44	Pavement Surface Irregularity (Ruts, Potholes, Grates, etc.)
07	Other Non-Collision
72	Cargo/Equipment Loss, Shift, or Damage (harmful)
16	Thrown or Falling Object
05	Fell/Jumped from Vehicle

Collision with Motor Vehicle In-Transport:

Codes	Attributes
12	Motor Vehicle In-Transport
54	Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport
55	Motor Vehicle in Motion Outside the Trafficway

Collision with Object Not Fixed:

Codes	Attributes
08	Pedestrian
09	Pedalcyclist
10	Railway Vehicle

Codes	Attributes
74	Road Vehicle on Rails
11	Live Animal
49	Ridden Animal or Animal-Drawn Conveyance
18	Other Object (Not Fixed)
15	Non-Motorist on Personal Conveyance
14	Parked Motor Vehicle
45	Working Motor Vehicle
73	Object That Had Fallen from Motor Vehicle In-Transport
91	Unknown Object Not Fixed

Collision with Fixed Object:

Codes	Attributes
17	Boulder
19	Building
58	Ground
20	Impact Attenuator/Crash Cushion
50	Bridge Overhead Structure
21	Bridge Pier or Support
23	Bridge Rail (Includes Parapet)
24	Guardrail Face
52	Guardrail End
25	Concrete Traffic Barrier
57	Cable Barrier
26	Other Traffic Barrier
59	Traffic Sign Support
46	Traffic Signal Support
30	Utility Pole/Light Support
31	Other Post, Other Pole, or Other Supports
32	Culvert
33	Curb
34	Ditch
35	Embankment
38	Fence
39	Wall
40	Fire Hydrant
41	Shrubbery
42	Tree (Standing Only)
48	Snow Bank
53	Mail Box
43	Other Fixed Object
93	Unknown Fixed Object

Unknown

Code	Attribute
99	<i>Reported as Unknown</i>

Definition: The events in sequence related to this motor vehicle, regardless of injury and/or property damage. Code each event for this vehicle in the order in which they occur, time wise, from police crash report narrative and diagram.

Remarks: This data element is derived from the [Crash Events](#) Table. Recording of Crash Events ends at the last harmful event of the entire crash. Therefore, a non-harmful event (e.g., crossing the centerline) that occurs following the last harmful event of the crash will not be included. Prior to selecting an unknown value, the case materials should be thoroughly evaluated to identify if a specific attribute can be applied.

Correction to the Sequence Events order must be made by revision to the [Crash Events](#) Table.

Non-Harmful Events:

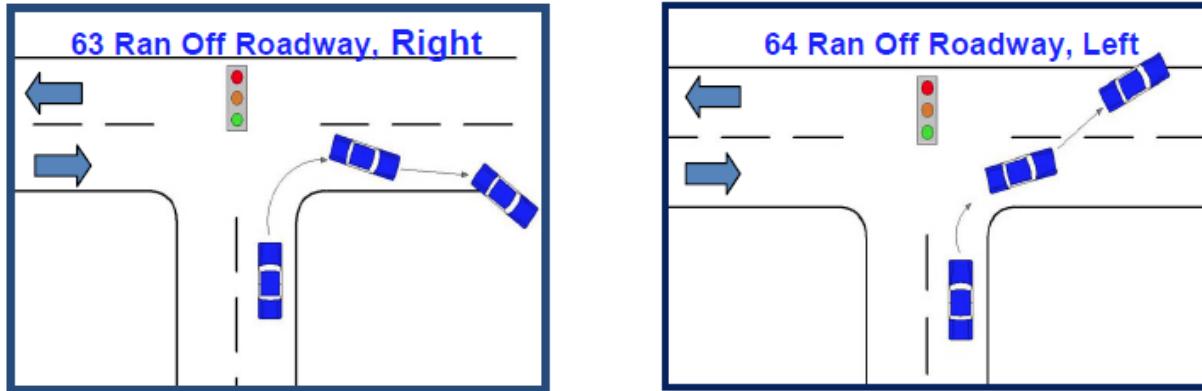

61 (Equipment Failure) (blown tire, brake failure, etc.) Examples of equipment failure include blown tires, brake failures, etc. This attribute should not be used to describe damage resulting from a collision event.

62 (Separation of Units) is used when a trailing unit separates from its power unit or another trailing unit(s). This applies to truck tractors with trailer(s), single-unit trucks with a trailer and other vehicles pulling a trailer (e.g., car pulling a boat or motor home).

63 (Ran Off Roadway-Right) is used if any part of the vehicle runs off the right side of the roadway. Identification of running off roadway can be determined from the case materials. This attribute can be used anytime in the event sequence before or after any harmful events. This attribute does not apply to the “load” in cases involving Areas of Impact [18 \(Cargo/Vehicle Parts Set-In-Motion\)](#) or [19 \(Other Objects Set-In-Motion\)](#).

64 (Ran Off Roadway-Left) is used if any part of the vehicle runs off the left side of the roadway. Identification of running off roadway can be determined from the case materials. This attribute can be used anytime in the event sequence before or after any harmful events. This attribute does not apply to the “load” in cases involving Areas of Impact [18 \(Cargo/Vehicle Parts Set-In-Motion\)](#) or [19 \(Other Objects Set-In-Motion\)](#).

Figure 17: Ran Off Roadway Examples

79 (Ran off Roadway-Direction Unknown) is used when any part of the vehicle ran off the roadway but it cannot be determined from the case materials whether right or left. *See clarification on the use of information provided by witnesses in section [103. Data Sources](#).*

Coding Guidelines for Running Off Roadway (Right or Left)

For Divided Highways:

On a divided highway, a vehicle can run off the roadway by leaving the roadway and entering the median. When this occurs involving a vehicle on the correct side of a divided highway, the proper “Ran Off Roadway” attribute is always [64 \(Ran Off Roadway - Left\)](#). In situations where a vehicle departs the roadway into the median, traverses the median, and continues across the opposing roadway, code [64 \(Ran Off Roadway - Left\)](#) followed by [65 \(Cross Median\)](#).

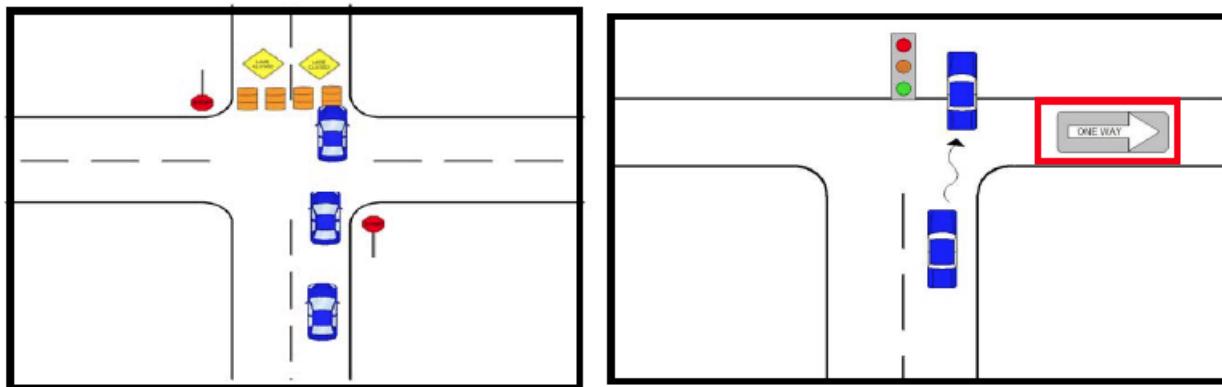

For vehicles turning at “T-intersections”:

For “T-intersections” when the vehicle loses control when in a turn, choose right or left based upon the direction of travel for the vehicle’s proper travel lane for their intended travel path. For vehicles traveling straight through “T-Intersections” use [71 \(End Departure\)](#). See [Figure 18](#) below.

71 (End Departure) is used if the vehicle leaves the roadway by traveling straight through the top of a “T-intersection” of a two-way trafficway or top of an intersecting one-way roadway. This code should also apply to vehicles traveling off the end of dead end roadways or into the barrier of a closed trafficway. See [Figure 18](#) below.

Figure 18: End Departure Examples

71 – End Departure

65 (Cross Median) is used when a vehicle departs its roadway and traverses the median and enters the shoulder or travel lanes on the opposite side of a divided highway. This attribute does not apply to the “load” in cases involving Areas of Impact [18 \(Cargo/Vehicle Parts Set-In-Motion\)](#) or [19 \(Other Objects Set-In-Motion\)](#).

68 (Cross Centerline) is used when a vehicle crosses over the centerline of a two-way, undivided highway. The centerline must be delineated with paint or raised markers. This is also used for unstabilized situations involving vehicles that depart from their initial travel lane(s) and enter the continuous left-turn lane, having a harmful event that is located within the marked boundaries of the continuous left-turn lane. This attribute also applies to vehicles that traverse the continuous left-turn lane area, having a harmful event that is located in the opposing travel lane(s). This attribute does not apply to the “load” in cases involving Areas of Impact [18 \(Cargo/Vehicle Parts Set-In-Motion\)](#) or [19 \(Other Objects Set-In-Motion\)](#).

66 (Downhill Runaway) refers to any vehicle that cannot decelerate on a downhill grade. This does not apply to a vehicle that cannot slow down due to lack of surface friction (due to ice, snow, etc.).

67 (Vehicle Went Airborne) must only be used if the officer indicates by narrative or diagram that the vehicle left the ground (excludes vehicles leaving the ground during a rollover event). Examples: The vehicle drove off a cliff, the vehicle was launched into the air after striking another vehicle or after traversing a berm.

69 (Re-entering Roadway) is used when a vehicle that departed the roadway portion of the trafficway returns to the same roadway (e.g., a motor vehicle in transport runs off the roadway right, strikes the guardrail face, then re-enters the roadway and collides with another motor vehicle in transport). This attribute does not apply to the “load” in cases involving Areas of Impact [18 \(Cargo/Vehicle Parts Set-In-Motion\)](#) or [19 \(Other Objects Set-In-Motion\)](#).

70 (Non-harmful, Swaying Trailer/Jackknife) applies to a condition that occurs to an articulated vehicle, (any vehicle with a trailing unit(s) connected by a hitch; e.g., truck tractor or single-unit truck with one or more trailers, articulated bus, or a car pulling a boat on a trailer, etc.) while in motion. The condition reflects a loss of control of the vehicle by the driver in which the trailer(s) yaws from its normal straight-line path behind the power unit.

60 (Cargo/Equipment Loss or Shift [non-harmful]) refers specifically to the loss or shift of items carried on or in a motor vehicle or its trailing unit, *that does not cause damage and/or injury* to the vehicle, *its occupants*, its parts, trailing unit, *or the cargo* itself. This attribute should never be used:

1. to refer to a “collision” event (see [54 \(Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport\)](#))
2. to a harmful event related to the loss or shift of cargo in/on a vehicle causing damage to that vehicle, its cargo, or injury to its occupants (see [72 \(Cargo/Equipment Loss, Shift, or Damage \[harmful\]\)](#)).

Examples:

- A load of logs on a tractor semi-trailer shifts as the truck rounds a curve resulting in an overturn. The shift of the load of logs would be a **60 (Cargo/Equipment Loss or Shift [non-harmful])**
- A spare tire falls from a vehicle. The loss of the spare tire would be a **60 (Cargo/ Equipment Loss or Shift [non-harmful])**
- An axle on a vehicle breaks and the wheel then separates from the vehicle would be a ([61 \(Equipment Failure\)](#)).

Non-Collision events involving motorcycles and vehicles with a “load”:

Non-Collision events may occur before or after a collision event. They should not be coded as a separate event if they occur as part of a collision event.

Examples:

- A motorcycle strikes a deer, overturns and the rider becomes separated from the vehicle. Code the collision event, not the non-collision “[Rollover/Oturn](#)” and “[Fell/Jumped from Vehicle](#)” that occur as part of the collision event.
- One tractor/trailer rear-ends another tractor/trailer. The impact pushes the lead vehicle’s load into the back of the tractor cab with part falling onto the roadway. Code the collision event, not the non-collision “[cargo-loss or shift](#)” that occurred as part of the collision event.

Non-Collision Harmful Events:

01 (Rollover/Overtturn) is used when a motor vehicle rotates (rollover) at least one quarter turn onto its side or end.

NOTES regarding 01 (Rollover/Overtturn):

- For motorcycles, laying the motorcycle down on its side is sufficient to use attribute **01 (Rollover/Overtturn)** as a harmful event if damage or injury is produced, even though the data element ROLLOVER is not applicable to motorcycles.
- Every vehicle that overturns will have contact with the ground. The collision event **58 (Ground)** should not be used in describing a non-collision **01 (Rollover/Overtturn)** event. For example: A vehicle's tires furrow into soft soil causing the vehicle to roll. The harmful event is **01 (Rollover/Overtturn)**. If the report identifies the vehicle "struck" the ground, and that harmful collision event caused the vehicle to roll, the events are **58 (Ground), 01 (Overtturn/Rollover)**. Note this will give you a Level 2 edit check. If overriding the edit check, be specific in your override remarks.
- The only instances **67 (Airborne)** should be used immediately prior or immediately after **01 (Rollover/Overtturn)** is if the officer identifies "airborne" as defined in this element. Note this will give you a Level 2 edit check. If overriding the edit check, be specific in your override remarks.
- A vehicle rolls over 3 quarter turns. This is one rollover event involving 3 quarter turns.
- If there is a **01 (Rollover/Overtturn)** that begins in another location but involves a ditch or embankment in the case (e.g., "rolled through the ditch," "rolled down the embankment," "came to rest against the embankment"), then the rule applies where if there is no damage associated with an impact with the fixed object during the rollover, it is not included in the Crash Events. If there is indication that damage resulted from an impact with the fixed object, it is included in the Crash Events. This follows the same logic as striking a tree or another vehicle during an overturn.
- For a vehicle that rolls over, strikes a fence and continues to rollover. Only two events would be coded for that circumstance. The first event would be the rollover followed by an impact with the fence. In order for more than one rollover event to appear in a vehicles sequence of events, the vehicle must return to its wheels, and track for a period of time before experiencing a separate rollover event. This would be a rare occurrence and must be clearly identified in the case materials.

Note: For medium/heavy trucks with attached trailers by fixed linkage, when either the power unit or the trailer rolls over, the entire vehicle will be considered a rollover.

02 (Fire/Explosion) is used for a vehicle fire or explosion that occurs during the crash sequence or as a result of the crash.

As it pertains to the occurrence of **02 (Fire/Explosion)**, the crash circumstances are not considered stabilized until the threat of damage to this vehicle, or injury consequences to this vehicle's occupants, has ceased. Therefore, the crash sequence is not considered stabilized until all occupants have exited the vehicle and the scene has been declared safe by police or other authority. Fires that occur at a later time to vehicles abandoned at the scene (e.g., in open fields, on hillsides, etc.), or to vehicles removed from the scene to another location (tow yard, curbside, etc.), are not considered part of the crash sequence.

03 (Immersion or Partial Immersion) is used when an in-transport motor vehicle enters a body of water and results in injury or damage. This code would also be used if the vehicle came to rest in water and the depth cannot be ascertained from case materials. NOTE: In immersion fatalities, the injury to the person may be noted as "drowning."

04 (Gas Inhalation) includes injury or death as a result of toxic fumes, such as carbon monoxide fumes leaking from a motor vehicle in-transport.

51 (Jackknife [harmful to this vehicle]) applies to a condition that occurs to an articulated vehicle, (any vehicle with a trailing unit(s) connected by a hitch; e.g., truck tractor or single-unit truck with one or more trailers, articulated bus, car pulling a boat on a trailer, etc.) while in motion. The condition reflects a loss of control of the vehicle by the driver in which the trailer(s) yaws from its normal straight-line path behind the power unit, striking the power unit, causing damage to the power unit or trailer. Jackknife should only be coded as a harmful event if there is clear indication of damage to the jackknifed vehicle or injury to its occupants caused by the jackknife.

06 (Injured in Vehicle [Non-Collision]) is used when an occupant is injured during an unstabilized situation without a collision, excluding cargo/equipment loss or shift. Examples: Driver slams on brake, causing an unrestrained passenger to be injured. Driver makes a sharp turn causing driver to strike head on side window, knocking driver unconscious.

44 (Pavement Surface Irregularity [ruts, potholes, grates, etc.]) is used when the pavement surface irregularity is on a paved surface. Other examples include indication of contact with a dip, depression, low spot, trough, etc.) If the impact is with a surface irregularity (e.g., ruts, potholes) not on a paved surface use the [58 \(Ground\)](#). For a vehicle that “bottoms out” on the paved surface (causing damage) due to speed but not because of a pavement surface irregularity, use attribute **07 (Other Non-Collision)**.

07 (Other Non-Collision). Non-collision not captured in the listed non-collision attributes.

Examples:

- Damage to the vehicle produced by its own dislodged vehicle parts (including hood flying up and contacting the windshield).
- A vehicle “bottoms out” on the roadway (causing damage) due to speed but not because of a pavement surface irregularity. For impacts on the roadway due to pavement surface irregularities should be coded [44 \(Pavement Surface Irregularity \[ruts, potholes, grates, etc.\]\)](#).

16 (Thrown or Falling Object) is used when any object (1) is thrown (intentionally or unintentionally) and strikes an in-transport vehicle, or (2) falls onto, into, or in the path of an in-transport motor vehicle. If a tree limb falls from a tree and is contacted by a car, enter **16 (Thrown or Falling Object)**. If a person maliciously throws an object off an overpass into traffic below, enter **16 (Thrown or Falling Object)**. This excludes contacts made by loads or objects set in-motion by a motor vehicle (see [54 \(Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport\)](#)).

72 (Cargo/Equipment Loss, Shift, or Damage [harmful]) refers specifically to the loss or shift of items carried on or in a motor vehicle or its trailing unit, *causing damage and/or injury* to the vehicle, *its occupants*, its parts, trailing unit, *or the cargo* itself. *Harm can be measured in loss of monetary value from unrecoverable cargo loss as well as physical damage.* This attribute should never be used to refer to a “collision” event (see [54 \(Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport\)](#))

Examples:

- A pickup truck brakes rapidly to avoid a collision. This causes a piece of lumber in the pickup bed to smash through the rear window.
- *Unsecured cargo shifts inside a box truck and bursts through the wall of the trailer.*
- *Pallets of beehives on a flatbed truck fall off the truck on a sharp curve causing the hives to open and the bees to fly away.*
- *A tanker truck overturns ([01 Rollover/Overtake](#)) followed by the loss of 5000 gallons of milk (72 Cargo/Equipment Loss, Shift, or Damage [harmful]).*

Notes:

In situations when a cargo shift is part of a collision event, the cargo shift is not coded separately. See [Non-Collision events involving motorcycles and vehicles with a "load."](#)

- *Unsecured cargo shifts inside a box truck causing a loss of control. The driver overcorrects, driving off the road. This would be a [60 \(Cargo/Equipment Loss or Shift \[non-harmful\]\)](#).*
- *Use [07 \(Other Non-Collision\)](#) in a situation where a motor vehicle in transport is towing another unit (e.g., motor vehicle, trailer, etc.) and the second unit collides into the back of the power unit (not a Jackknife or part of a collision event).*

05 (Fell/Jumped from Vehicle) is used when an occupant of this vehicle falls or jumps (not suicide) from the vehicle causing injury. For example, an occupant of a motor vehicle in-transport leans against the car door, it opens and the occupant falls out; or a person riding on a vehicle's exterior (hood, roof, running board, etc.) falls or jumps, and is injured by the fall. If an occupant falls or jumps from a vehicle and is struck by that vehicle, use this attribute.

Collision with Motor Vehicle In-Transport:

12 (Motor Vehicle In-Transport) is used when the injury- or damage-producing event is two motor vehicles in-transport making contact within the trafficway boundaries. In-transport means that the motor vehicle is in-motion or on the roadway portion of a trafficway.

54 (Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport) is used when the injury- or damage-producing event is two motor vehicles in-transport making contact by something set-in-motion by one or both of the **vehicles**.

In crashes involving harmful events caused by objects set-in-motion by a motor vehicle in-transport, remember that a vehicle's load is considered to be part of the vehicle.

Examples:

- If cargo falls from a truck (in-transport) and strikes another motor vehicle **in-transport**, this is treated as a two-vehicle crash. Therefore, the proper code for both vehicles is **54 (Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport)** and the AREA OF IMPACT (THIS VEHICLE) column is coded [18 \(Cargo/Vehicle Parts Set-In-Motion\)](#).
- If an **in-transport** vehicle strikes an at-rest object in the roadway that was previously cargo or part of another motor vehicle in-transport, the SEQUENCE OF EVENTS for that event is [73 \(Object That Had Fallen from Motor Vehicle In-Transport\)](#). If that object is then propelled into another motor vehicle in-transport, the proper SEQUENCE OF EVENTS attribute for this next event is **54 (Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport)** and the AREA OF IMPACT (THIS VEHICLE) column is coded [19 \(Other Objects Set-In-Motion\)](#).
- If an **in-transport** vehicle strikes an at-rest object in the roadway that was not cargo or part of another motor vehicle in-transport, the SEQUENCE OF EVENTS for that event is [18 \(Other Object \[Not Fixed\]\)](#). If that object is then propelled into another motor vehicle in-transport, the proper SEQUENCE OF EVENTS code for this next event is **54 (Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in- Motion from/by Another Motor Vehicle In-Transport)** and the AREA OF IMPACT (THIS VEHICLE) column is coded [19 \(Other Objects Set-In-Motion\)](#).

This attribute does not apply when the cargo, persons, or objects set-in-motion by an in-transport motor vehicle strikes something other than another in-transport motor vehicle. In this case, use the applicable “[collision with non-fixed object](#),” or “[collision with fixed object](#)” code for the object struck by the cargo, person, or object set-in-motion.

Examples:

- If cargo falls from a truck (in-transport) and strikes another vehicle that is not in-transport, the proper SEQUENCE OF EVENTS attribute is [14 \(Parked Motor Vehicle\)](#) or [45 \(Working Motor Vehicle\)](#) depending on which type of not in-transport vehicle was contacted by the load and the AREA OF IMPACT (THIS VEHICLE) column is coded [18 \(Cargo/Vehicle Parts Set-In-Motion\)](#).
- If cargo falls from a truck (in-transport) and strikes a pedestrian, the proper SEQUENCE OF EVENTS attribute would be [08 \(Pedestrian\)](#) and the AREA OF IMPACT (THIS VEHICLE) column is coded [18 \(Cargo/Vehicle Parts Set-In-Motion\)](#).
- If a pedestrian is struck by an at-rest object propelled by an in-transport vehicle (e.g., parked motor vehicle, stop sign, etc.), the proper SEQUENCE OF EVENTS attribute for this harmful event is [08 \(Pedestrian\)](#) and the AREA OF IMPACT (THIS VEHICLE) column is coded [19 \(Other Objects Set-In-Motion\)](#).

55 (Motor Vehicle in Motion Outside the Trafficway) is used when the injury- or damage-producing event is two motor vehicles in-transport making contact outside the trafficway boundaries in a motor vehicle traffic crash.

Example:

A vehicle loses control attempting to turn into a gas station and strikes another vehicle pulling away from the pump in the station lot.

Collision with Object Not Fixed:

08 (Pedestrian) is used for all those not on a personal conveyance. A person pushing a vehicle should be coded **08 (Pedestrian)**. A person being carried by another person should also be considered a **08 (Pedestrian)**.

09 (Pedalcyclist) is used for any person on a non-motorized other road vehicle propelled by pedaling. Examples include a bicycle, tricycle, unicycle, or pedal car.

If a non-motorist is hit as a result of a vehicle-to-vehicle collision and you cannot reasonably determine which vehicle struck the non-motorist, use the lowest vehicle number of the MVIT(s) involved in the vehicle-to-vehicle event that resulted in the pedestrian or pedalcyclist collision. In the element [NM25 RELATED FACTORS – PERSON \(NOT A MOTOR VEHICLE OCCUPANT\) LEVEL](#) code [31 Default Code Used for Vehicle Numbering](#).

10 (Railway Vehicle) is any land vehicle that is (1) designed primarily for, or in use for, moving persons or property from one place to another on rails and (2) not in use on a land way other than a railway.

- Inclusions: Railway Trains, Street car/trolley on private way
- Exclusions: Street car/trolley operating on trafficway

74 (Road Vehicle on Rails) is any land vehicle on rails operating in a trafficway.

- Inclusions: Street car/trolley operating on trafficway
- Exclusions: Railway Trains, Street car/trolley on private way, Street car/trolley or electric bus operating on tires.

11 (Live Animal) is used for collisions with live animals (domesticated or wild) that are not themselves being used as transportation or to draw a wagon, cart, or other transport device (see [ANSI D16.1](#)). Default to **11 (Live Animal)** if it cannot be determined if the struck animal is alive, dead, or if it was being ridden or drawing a transport device.

49 (Ridden Animal or Animal-Drawn Conveyance) is used for ridden animals and animals drawing transport devices. See **18 (Other Object [Not Fixed])** for an animal carcass.

18 (Other Object [Not Fixed]) is used when a motor vehicle in-transport strikes a non-fixed object that is known NOT to have been the cargo or part of another motor vehicle in-transport, or when it is UNKNOWN whether the object was the cargo or part of another motor vehicle in-transport (i.e., refers to objects such as a dead body, animal carcass, construction cones or barrels, an unattached trailer, a bicycle without a rider, downed tree limbs or power lines, or debris from a prior crash). For objects that have become separated from a motor vehicle in-transport not as a result of a prior crash, use attribute [73 \(Object That Had Fallen from Motor Vehicle In-Transport\)](#).

15 (Non-Motorist on Personal Conveyance) is used for pedestrians using personal conveyances. A personal conveyance is a device, other than a transport device, used by a pedestrian for personal mobility assistance or recreation. These devices can be motorized or human powered, but not propelled by pedaling.

Inclusions:

1. Rideable toys
 - a. Roller Skates, in-line skates
 - b. Skateboards
 - c. Skates
 - d. Baby carriage
 - e. Scooters
 - f. Toy Wagons
2. Motorized rideable toys
 - a. Motorized skateboard
 - b. Motorized toy car
3. Devices for personal mobility assistance
 - a. Segway-style devices
 - b. Motorized and non-motorized wheelchair
 - c. Handicapped scooters

Exclusions:

1. Golf cart
2. Low Speed Vehicles (LSVs)
3. Go-carts
4. Minibike
5. "Pocket" motorcycles
6. Motor scooters
7. Moped

14 (Parked Motor Vehicle) is used when the impact occurred between a motor vehicle in-transport and a motor vehicle neither on a roadway nor in motion. A vehicle stopped off the roadway, its door open over a roadway, is not in-transport.

45 (Working Motor Vehicle) is used to indicate the motor vehicle contacted was in the act of performing construction, maintenance, or utility work related to the trafficway when it became an involved unit. This "work" may be located within open or closed portions of the trafficway and motor vehicles performing these activities can be within or outside the trafficway boundaries. This code does not include private construction/maintenance vehicles, or vehicles such as garbage trucks, delivery trucks, taxis, emergency vehicles, tow trucks, etc.

Examples:

1. Asphalt/steam roller working in a highway construction zone paving the roadway or flattening dirt.
2. State highway maintenance crew painting lane lines on the road, mowing grass on the roadside or median, repairing potholes, removing debris from the roadway, etc.
3. Utility truck or a "cherry picker," performing maintenance on power lines along the roadway or maintaining a traffic signal.
4. A private excavating company contracted by the State digging the foundation for a new overpass.
5. A State, county, or privately owned snow plow, plowing ice/snow as part of a highway maintenance activity.
6. Street sweeper sweeping the street.
7. A vehicle in a mobile work convoy displaying arrow boards or other signaling devices warning motorists of the work activity.
8. A law enforcement vehicle that is participating strictly in a stationary construction or mobile maintenance activity as a traffic slowing, control, signaling, or calming influence.

FARS SPECIAL INSTRUCTION:

NOTE: Code "45" excludes working activities other than highway construction, maintenance, or utility vehicles (garbage truck picking up trash, mail/delivery trucks while making deliveries, personal vehicles plowing snow, etc. These are considered motor vehicles In-transport). Use Related Factors-Vehicle Level code [**42 \(Other Working Vehicle \[Not Construction, Maintenance, Utility, Police, Fire, or EMS Vehicle\]\)**](#) to identify these vehicles.

A question may arise when a police, fire, or emergency medical vehicle is struck on the roadway while at the scene of a crash, at a traffic stop, or as traffic control. The question becomes, "has its function changed from being a motor vehicle in-transport to a working vehicle?" The answer is "no." Treat these situations as a motor vehicle in-transport striking another motor vehicle in-transport. Use Related Factors-Vehicle Level code [**41 \(Police, Fire, or EMS Vehicle Working at the Scene of an Emergency or Performing Other Traffic Control Activities\)**](#) to identify that this vehicle was struck while performing these work activities.

73 (Object That Had Fallen from Motor Vehicle In-Transport) is used when a motor vehicle in- transport strikes a non-fixed object at rest that is known to have been the cargo or part of another motor vehicle in-transport. Do not use this attribute for debris from a prior crash. This attribute does not include vehicle occupants that are ejected or fall from a motor vehicle in-transport. (Example: Motorcycle operator falling from a motorcycle.) For people falling from a motor vehicle see non-collision event [**05 \(Fell/Jumped From Vehicle\)**](#). For impacts involving two motor vehicles in transport resulting from cargo, persons, or objects set in motion see [**54 \(Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by another Motor Vehicle In-Transport\)**](#).

For example, if cargo that fell from a vehicle and was at rest in the roadway is struck this attribute would apply. If the cargo was at rest in the roadway as a result of a prior accident, use attribute [**18 \(Other Object \[Not Fixed\]\)**](#).

91 (Unknown Object Not Fixed) is used when the event involves an object that is known to be not fixed but the case materials do not identify the specific object.

Collision with Fixed Object:

The attributes [58 \(Ground\)](#), [33 \(Curb\)](#), [34 \(Ditch\)](#), and [35 \(Embankment\)](#) are grouped under the Collision with Fixed Object subset because they are intended to be harmful events in the crash (i.e. – they are associated with an impact that produces injury or damage).

When coding these events there must be fields on the police crash report or verbiage in the narrative such as “struck,” “hit,” “impacted,” etc. that identify these as harmful.

For cases where the indication of the harmful event came from the narrative, there may not be a corresponding indication of damage in any police crash report field. In these instances, code the harmful event as stated in the narrative and include the corresponding attribute under [Areas of Impact](#).

If there is no indication of damage from contact with the fixed object in fields on the police crash report and the narrative language does not identify it as a harmful event (e.g., “came to rest on the embankment” or “drove through” or “drove across” the ditch and/or the embankment, or “drove over” the curb do not code [33 \(Curb\)](#), [34 \(Ditch\)](#), or [35 \(Embankment\)](#) in the Sequence of Events.

17 (Boulder) is a rock of sufficient mass that when struck by a motor vehicle moves very little and remains basically intact.

19 (Building) is used when the vehicle strikes a roofed and walled structure built for permanent use. The type of construction material used is not of interest, nor is the use of the building.

58 (Ground) is used when the impact is with an earthen or paved surface off of the roadway. **58 (Ground)** is not to be entered when the harmful event is [01 \(Rollover/Overtur](#)n).

Indication of furrowing, gouging, or digging in of the tires/wheels is not sufficient to code the collision event 58 (Ground). For example, if the police crash report narrative states; “the truck’s tires dug into the turf causing the vehicle to rollover” the harmful event should be [01 \(Rollover/Overtur](#)n).

20 (Impact Attenuator/Crash Cushion) is a device for controlling the absorption of energy released during vehicle collision (crash cushion). Its most common application involves the protection of fixed roadside objects such as bridge piers, elevated gores at exit ramps, etc. Examples include barrels filled with water or sand, and plastic collapsible structures.

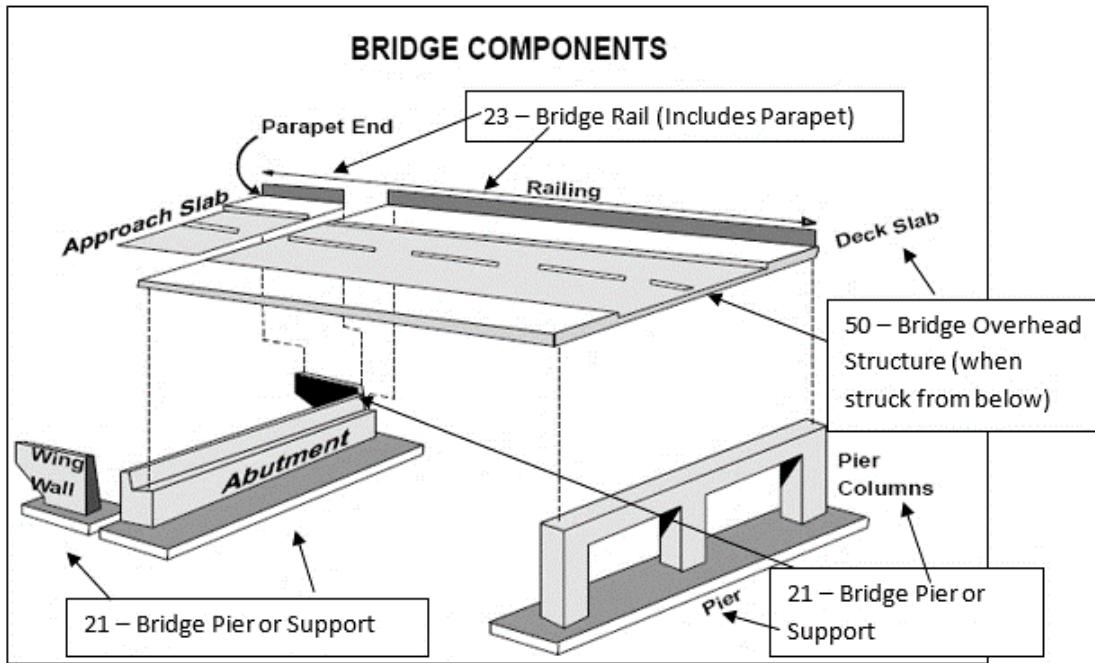

50 (Bridge Overhead Structure) is used when striking the bottom of a bridge while traveling on a trafficway underneath it. See [Figure 19](#).

21 (Bridge Pier or Support) is a square or round column of stone, concrete, brick, steel, or wood for supporting a bridge between abutments. This attribute includes the bridge abutments that are supporting the ends of a bridge. Abutments are generally designed for retaining or supporting the embankment under bridge ends and composed of stone, concrete, brick, or wood (includes the wing-walls). See [Figure 19](#).

23 (Bridge Rail [Includes Parapet]) is a wooden, brick, stone, concrete, or metal fence-like structure that runs along the outermost edge of the roadway or sidewalk on the bridge or a rail constructed along the top of a parapet. Balustrade is often used synonymously with parapet. See [Figure 19](#)

- Bridges do not need to support another roadway. It may be an overpass for a train or even for a viaduct (water conduit).

Figure 19: Bridge Components Diagram

24 (Guardrail Face) is a low barrier that has the primary longitudinal structure composed of metal (plates, mesh, box beam, etc.). A guardrail is differentiated from [25 \(Concrete Traffic Barrier\)](#) by the material making up the greatest part of the longitudinal portion of the structure. In the case of guardrails, this is metal whereas in concrete barriers this is concrete (including concrete rails). If the crash report does not differentiate between guardrail face and end, default to guardrail face.

Guardrails that serve as bridge rails should be coded as [23 \(Bridge Rail \[Includes Parapet\]\)](#).

52 (Guardrail End) is coded if a vehicle strikes the end of a guardrail. Guardrails can have a separate flat or rounded piece of metal attached to the end of an expanse of guardrail face.

25 (Concrete Traffic Barrier) refers to the longitudinal traffic barriers constructed of concrete. This includes all temporary concrete barriers regardless of location (i.e., temporary Jersey Barrier on a bridge being used to control traffic during bridge repair/construction). Concrete walls (vertical side surfaces) do not apply here; see [39 \(Wall\)](#).

57 (Cable Barrier) refers to a flexible barrier system that uses several cables typically supported by steel posts. These barriers are designed to help lessen impact or keep vehicles within the confines of the road.

26 (Other Traffic Barrier) is used for all other longitudinal barriers such as wood or rock.

59 (Traffic Sign Support) is used when the post supporting a traffic sign, or the sign itself, is hit by a motor vehicle in-transport. This includes mile marker posts and signs above the trafficway.

46 (Traffic Signal Support) is used when the post supporting a traffic signal, or the signal itself, is hit by a motor vehicle in-transport.

30 (Utility Pole/Light Support) refers to supports for highway lighting systems, not including other private lighting systems (e.g., parking lot lights). **30 (Utility Pole/Light Support)** is used for electrical, telephone, cable & other utility pole-type supports.

31 (Other Post, Other Pole, or Other Supports) is used for posts other than highway signs, utility poles, or light supports (e.g., reflectors on poles alongside of roadway, parking meters, flag poles, etc.). For mail box posts, use [**53 \(Mail Box\)**](#). For fence posts, use [**38 \(Fence\)**](#).

32 (Culvert) is a man-made drain or channel crossing under a road, sidewalk, etc.

33 (Curb) is a concrete or asphalt structure that borders the paved surface. It provides drainage control and pavement edge delineation. The face of the curb may be sloped or vertical. Ensure that the police crash report provides some indication that damage has occurred when a vehicle strikes a curb. This attribute includes collisions with curbing that forms raised islands, medians, or separators. For example, if the report identifies the vehicle struck/collided with a traffic island, channelizing island, raised median, or separator use **33 (Curb)** not [**43 \(Other Fixed Object\)**](#).

34 (Ditch) includes any man-made structure for drainage purposes. A ditch ends where a culvert begins and resumes on the opposite side of the culvert. Reference to a “ditchbank,” “embankment of the ditch,” or “ditch embankment” should be coded under **34 (Ditch)**.

35 (Embankment) is a raised structure to hold back water, to carry a roadway, or the result of excavation or washout (including erosion) that may be faced with earth (or rock, stone, or concrete). A **35 (Embankment)** can usually be differentiated from a [**39 \(Wall\)**](#) by its incline whereas a wall is usually vertical. However, there are exceptions to this; such as a retaining wall that may be inclined or a vertical embankment that is caused by a natural event such as a washout.

In crashes involving a field approach or driveway crossing, use attribute **35 (Embankment)** when no specific components (e.g., culverts or ditches) are identified.

38 (Fence) includes the fence posts. A Fence can be made of wood, chain link, stone, etc.

39 (Wall) is a primarily vertical structure composed of concrete, metal, timber, or stone that is not part of a building or a fence but typically is used for retaining earth, abating noise, and separating areas (but not for containment as in the primary function of a fence). Also included as a **39 (Wall)** are headwalls (or endwalls) that are sometimes provided on culvert ends principally to protect the sides of the embankment around the culvert opening against erosion. This does not include wing-walls, which are attached to ends of bridge abutments and extend back at an angle from the roadway. Wingwalls should be coded as [**21 \(Bridge Pier or Support\)**](#).

40 (Fire Hydrant) refers to the roadside device used by fire departments to provide water for fighting fires. Usually made of steel, these devices are also referred to as fire plugs or fire stand pipes in some areas.

41 (Shrubbery) refers to vegetation that is usually of a woody multi-stemmed variety and in most instances, is low growing rather than tall. May also be called bushes. Some common examples are boxwood, hawthorn, and mountain laurel.

42 (Tree [Standing Only]) is used when a vehicle strikes a standing tree. This includes impacts from overhanging branches, tree stumps, or large cactus (Saguaro). If a vehicle strikes a fallen tree, use [**18 \(Other Object \[Not Fixed\]\)**](#). If a tree falls on a vehicle as it is passing by, use [**16 \(Thrown or Falling Object\)**](#).

48 (Snow Bank) is used when snowfall and/or road plowing creates essentially fixed barriers of snow/ice that are not snow-covered earth or rock embankments.

53 (Mail Box) refers to a private residence mail/newspaper box including the post. A cluster of private mailboxes is included in this attribute. This element does not include U.S. Mailboxes, which are typically blue and are for general public use. Code a U.S. Mailbox as [43 \(Other Fixed Object\)](#).

43 (Other Fixed Object) is used when the object is fixed (considered a permanent structure) and is not described by any of the other fixed object attributes. This attribute excludes collisions with curbing that forms raised islands, medians, or separators (See also [33 \(Curb\)](#).)

Examples:

- Bus shelters
- Pedestrian walkways
- Toll booths
- Guy wires supporting utility poles
- U. S. Mailbox for public use

Other examples would include property damage to standing crops, yards and other vegetation (excluding: [41 \(Shrubbery\)](#), [42 \(Tree \[Standing Only\]\)](#), and [58 \(Ground\)](#)) if noted on the crash report.

When the case materials identify a non-specific object impact, apply the following guidelines. If the case materials only identify the harmful event as:

- “Fixed Object,” then use [43 \(Other Fixed Object\)](#)
- “Sign,” then use [59 \(Traffic Sign Support\)](#)
- “Post,” then use [31 \(Other Post, Other Pole, or Other Supports\)](#)
- “Sign Post,” then use [59 \(Traffic Sign Support\)](#)
- “Bridge,” then use [23 \(Bridge Rail \[Includes Parapet\]\)](#) when the vehicle is on top of the bridge, when the vehicle is going under the bridge, then use [21 \(Bridge Pier or Support\)](#)
- “Barrier,” then use [26 \(Other Traffic Barrier\)](#)

93 (Unknown Fixed Object) is used when the event involves an object that is known to be fixed but the case materials do not identify the specific object.

Unknown

99 (Reported as Unknown) is used when police indicate unknown.

Consistency Checks:

Check	IF	THEN
(1Z0N)	SEQUENCE OF EVENTS for this vehicle should not include more than one occurrence of 01. Please see SEQUENCE OF EVENTS remarks for 01 (Rollover/Overturn) to confirm coding.	--
(1Z1N)	SEQUENCE OF EVENTS for this vehicle should not equal 01, 67 consecutively or 67, 01 consecutively.	--
(1Z1P)	any SEQUENCE OF EVENTS equals 66,	ROADWAY GRADE should equal 6 for this vehicle.

Check	IF	THEN
(1Z2P)	any SEQUENCE OF EVENTS equals 01, and BODY TYPE equals 01-79, 82, 90-99, or any RELATED FACTORS-VEHICLE LEVEL equals 30,	ROLLOVER must equal 1, 2, or 9.
(2Z0F)	any SEQUENCE OF EVENTS equals 12, 14, 45, 54, 55,	NUMBER OF VEHICLE FORMS SUBMITTED must be greater than 001.
(4Z0P)	SEQUENCE OF EVENTS equals 02,	FIRE OCCURRENCE for this vehicle must equal 1.
(4Z1P)	UNIT TYPE equals 1 and FIRE OCCURRENCE equals 1,	at least one SEQUENCE OF EVENTS must equal 02.
(5Z0F)	SEQUENCE OF EVENTS equals 08,	at least one person must have PERSON TYPE equal to 05, 10.
(671F)	the only harmful event in the SEQUENCE OF EVENTS for this vehicle equals 02 or 04,	CRITICAL EVENT – PRECRASH (EVENT) must equal 98.
(6Z0F)	SEQUENCE OF EVENTS equals 09,	at least one person must have PERSON TYPE equal to 06, 07.
(7Z0F)	any SEQUENCE OF EVENTS equals 05, 06,	at least one occupant of this vehicle (PERSON TYPES 01, 02, 09) must have INJURY SEVERITY equal to 1-5, or blank.
(8L8Q)	AREAS OF IMPACT (THIS VEHICLE) equals 18, 19, or 20 in the CRASH EVENTS,	the corresponding event in that row must not equal 12 or 55.
(8L8R)	the CRASH EVENTS event equals 54,	AREAS OF IMPACT (THIS VEHICLE) must equal 18, 19, or 20 in that row.
(8L8S)	AREAS OF IMPACT (THIS VEHICLE) equals 18, 19, or 20 in the CRASH EVENTS and the corresponding event in that row equals 14, 45, or 54,	RELATED FACTORS-CRASH LEVEL must equal 14.
(8L8T)	RELATED FACTORS-CRASH LEVEL equals 14,	there must exist at least one event in the CRASH EVENTS where AREAS OF IMPACT (THIS VEHICLE or OTHER VEHICLE) equals 18, 19, or 20 and the corresponding event in that row equals 14, 45, or 54.
(8L8U)	AREAS OF IMPACT (THIS VEHICLE) equals 18, 19, or 20 in the CRASH EVENTS and the corresponding event in that row equals 08, 09, 15, 49,	RELATED FACTORS-CRASH LEVEL must equal 15.
(8L8V)	RELATED FACTORS-CRASH LEVEL equals 15,	there must exist at least one event in the CRASH EVENTS where AREAS OF IMPACT (THIS VEHICLE) equals 18, 19, or 20, and the corresponding event in that row equals 08-10, 15, 18, 49, or 91.
(8L8W)	SEQUENCE OF EVENTS is not equal to 45,	AREAS OF IMPACT (OTHER VEHICLE) should not equal 18 or 19.
(8L8X)	AREAS OF IMPACT (THIS VEHICLE) equals 18,	there should be a previous event involving that vehicle where the CRASH EVENTS event equals 60.
(8L8Y)	SEQUENCE OF EVENTS is equal to 45 (Working Motor Vehicle),	AREAS OF IMPACT (THIS VEHICLE) and AREAS OF IMPACT (OTHER VEHICLE) should not both equal 18 or 19 in that same event row.

Check	IF	THEN
(8L9P)	BODY TYPE does not equal 80-84, 88-91, and the CRASH EVENTS event equals 54, and the corresponding AREAS OF IMPACT (THIS VEHICLE) equals 19 or 20 in that row,	there should be a previous event with CRASH EVENTS event equal to 18, 73, or 91 involving that vehicle.
(8Z0F)	any SEQUENCE OF EVENTS equals 15,	at least one Person Level (Not a MV Occupant) form must have a PERSON TYPE code of 08.
(9B9P)	any SEQUENCE OF EVENTS equals 55,	there must be at least one other vehicle with UNIT TYPE equal to 1.
(A041)	CRASH MONTH equals 05-09,	SEQUENCE OF EVENTS, FIRST HARMFUL EVENT, MOST HARMFUL EVENT should not equal 48.
(A520)	SEQUENCE OF EVENTS equals 10,	TRAFFIC CONTROL DEVICE should not equal 01-09, 20-29, 40-50, 98.
(A521)	any SEQUENCE OF EVENTS equals 46,	SPEED LIMIT should equal 05-50, 98, or 99 for this vehicle.
(A495)	TRAFFICWAY DESCRIPTION equals 0,	the <u>first event</u> in SEQUENCES OF EVENTS for this vehicle should not equal 63, 64, 69, or 71.
(A612)	PERSON TYPE equals 04, and VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST equals____,	at least one SEQUENCE OF EVENTS must equal 10 or 49 for that vehicle number in the CRASH EVENTS table.
(A613)	PERSON TYPE equals 05, and VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST equals____,	at least one SEQUENCE OF EVENTS must equal 08 for that vehicle number in the CRASH EVENTS table.
(A614)	PERSON TYPE equals 06, and VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST equals____,	at least one SEQUENCE OF EVENTS must equal 09 for that vehicle number in the CRASH EVENTS table.
(A615)	PERSON TYPE equals 07, and VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST equals____,	at least one SEQUENCE OF EVENTS must equal 09 for that vehicle number in the CRASH EVENTS table.
(A616)	PERSON TYPE equals 08, and VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST equals____,	at least one SEQUENCE OF EVENTS must equal 15 for that vehicle number in the CRASH EVENTS table.
(A617)	PERSON TYPE equals 10, and VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST equals____,	at least one SEQUENCE OF EVENTS must equal 08 for that vehicle number in the CRASH EVENTS table.
(A618)	PERSON TYPE equals 19, and VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST equals____,	at least one SEQUENCE OF EVENTS must equal 99 for that vehicle number in the CRASH EVENTS table.
(A619)	the total count of persons with PERSON TYPE equal to 05 that have the same VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is____,	the number of events equal to 08 for that vehicle in the CRASH EVENTS table should equal ____.
(A61A)	the total count of PERSON TYPES is equal to 08 for the vehicle in VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is____,	the number of events equal to 15 in the CRASH EVENTS table should equal ____ for that vehicle.

Check	IF	THEN
(A61B)	the total count of PERSON TYPES is equal to 10 for the vehicle in VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is ____,	the number of events equal to 08 in the CRASH EVENTS table should equal ____ for that vehicle.
(AL1P)	SEQUENCE OF EVENTS equals 51, 62, 70,	VEHICLE TRAILING must not equal 0.
(AL2P)	SEQUENCE OF EVENTS equals 45,	WORK ZONE should equal 1-4.
(AL5P)	If UNIT TYPE equals 1,	at least one event in the SEQUENCE OF EVENTS must equal the MOST HARMFUL EVENT.
(AL6P)	MOST HARMFUL EVENT equals __, and UNIT TYPE equals 1,	at least one event in the SEQUENCE OF EVENTS must equal ____.
(AL8P)	SEQUENCE OF EVENTS equals 51, 70,	JACKKNIFE must equal 2, 3.
(AM1P)	FIRST HARMFUL EVENT equals 54, or SEQUENCE OF EVENTS equals 54 for any vehicle,	one RELATED FACTORS-CRASH LEVEL must equal 14.
(AM2P)	any SEQUENCE OF EVENTS equals 25 or 57,	TRAFFICWAY DESCRIPTION should equal 3, 6.
(BZ40)	CRITICAL EVENT - PRECRASH (EVENT) equals 01,	at least one SEQUENCE OF EVENTS must equal 61 for this vehicle.
(BZ50)	CRITICAL EVENT - PRECRASH (EVENT) equals 12, and PRE-IMPACT LOCATION is not equal to 5,	at least one SEQUENCE OF EVENTS must equal 64 for this vehicle.
(BZ60)	CRITICAL EVENT - PRECRASH (EVENT) equals 13, and PRE-IMPACT LOCATION is not equal to 5,	at least one SEQUENCE OF EVENTS must equal 63 for this vehicle.
(BZ70)	CRITICAL EVENT - PRECRASH (EVENT) equals 14,	at least one SEQUENCE OF EVENTS must equal 71 for this vehicle.
(BZ90)	CRASH TYPE equals 01-05, and PRE-IMPACT LOCATION is not equal to 0 or 5,	at least one SEQUENCE OF EVENTS prior to the first harmful event must equal 63.
(BZ91)	CRASH TYPE equals 06-10, and PRE-IMPACT LOCATION is not equal to 0 or 5,	at least one SEQUENCE OF EVENTS prior to the first harmful event must equal 64.
(PB00)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 110-910,	at least one SEQUENCE OF EVENTS for the striking vehicle must equal 08 or 15.
(PB02)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 111-980,	at least one SEQUENCE OF EVENTS for the striking vehicle must equal 09.
(U651)	UNLIKELY: SEQUENCE OF EVENTS equals 62, 60 consecutively.	--
(U652)	UNLIKELY: SEQUENCE OF EVENTS equals 01, 58 or 58, 01 consecutively.	--
(U653)	UNLIKELY: SEQUENCE OF EVENTS equals 65, 69 consecutively.	--
(V74P)	UNIT TYPE equals 1, and ROLLOVER equals 1, 2, 9, or LOCATION OF ROLLOVER equals 1-7, 9,	at least one SEQUENCE OF EVENTS must equal 01 for this vehicle.
(V990)	any SEQUENCE OF EVENTS equals 61,	CONTRIBUTING CIRCUMSTANCES, MOTOR VEHICLE should not equal 00.
(VH70)	UNIT TYPE equals 2-4,	elements JACKKNIFE, TRAVEL SPEED, AND SEQUENCE OF EVENTS must all be left blank.

Check	IF	THEN
(VH83)	the only harmful SEQUENCE OF EVENTS for this vehicle equals 04-06,	DAMAGED AREAS should equal 15.
(VH84)	the only harmful SEQUENCE OF EVENTS for this vehicle equals 01-03, 16, 44, 51, 72,	DAMAGED AREAS should not equal 15.

Consistency Checks (FARS Only):

Check	IF	THEN
(A230)	SEQUENCE OF EVENTS equals 10,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 01-03.
(V750)	UNDERRIDE/OVERRIDE equals 1-3,	FIRST HARMFUL EVENT or at least one SEQUENCE OF EVENTS (for this vehicle) should equal 12, 55.
(V760)	UNDERRIDE/OVERRIDE equals 4-6,	FIRST HARMFUL EVENT or at least one SEQUENCE OF EVENTS (for this vehicle) should equal 14, 45.
(V770)	UNDERRIDE/OVERRIDE equals 7,	at least one SEQUENCE OF EVENTS (for this vehicle) must equal 12, 55.
(V780)	UNDERRIDE/OVERRIDE equals 8,	at least one SEQUENCE OF EVENTS (for this vehicle) must equal 14, 45.

V33 - Most Harmful Event

FORMAT: 2 numeric

SAS NAME: Vehicle.M_HARM; parkwork.PM_HARM

ELEMENT VALUES:

Non-Collision Most Harmful Events:

Codes	Attributes
01	Rollover/Overtur
02	Fire/Explosion
03	Immersion or Partial Immersion
04	Gas Inhalation
51	Jackknife (harmful to this vehicle)
06	Injured in Vehicle (Non-Collision)
44	Pavement Surface Irregularity (Ruts, Potholes, Grates, etc.)
07	Other Non-Collision
16	Thrown or Falling Object
72	Cargo/Equipment Loss, Shift, or Damage (harmful)
05	Fell/Jumped from Vehicle

Collision with Motor Vehicle In-Transport:

Codes	Attributes
12	Motor Vehicle In-Transport
54	Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport
55	Motor Vehicle in Motion Outside the Trafficway

Collision with Object Not Fixed:

Codes	Attributes
08	Pedestrian
09	Pedalcyclist
10	Railway Vehicle
74	Road Vehicle on Rails
11	Live Animal
49	Ridden Animal or Animal Drawn Conveyance
18	Other Object (Not Fixed)
15	Non-Motorist on Personal Conveyance
14	Parked Motor Vehicle
45	Working Motor Vehicle
73	Object That Had Fallen from Motor Vehicle In-Transport
91	Unknown Object Not Fixed

Collision with Fixed Object:

Codes	Attributes
17	Boulder
19	Building
58	Ground

Codes	Attributes
20	Impact Attenuator/Crash Cushion
50	Bridge Overhead Structure
21	Bridge Pier or Support
23	Bridge Rail (Includes Parapet)
24	Guardrail Face
52	Guardrail End
25	Concrete Traffic Barrier
57	Cable Barrier
26	Other Traffic Barrier
59	Traffic Sign Support
46	Traffic Signal Support
30	Utility Pole/Light Support
31	Other Post, Other Pole, or Other Supports
32	Culvert
33	Curb
34	Ditch
35	Embankment
38	Fence
39	Wall
40	Fire Hydrant
41	Shrubbery
42	Tree (Standing Only)
48	Snow Bank
53	Mail Box
43	Other Fixed Object
93	Unknown Fixed Object

Unknown

Code	Attribute
99	Reported as Unknown

Definition: This element identifies the event that resulted in the most severe injury or, if no injury, the greatest property damage involving this motor vehicle.

Remarks: Must be the major event **FOR THIS VEHICLE**, even if different from the [FIRST HARMFUL EVENT](#). **Code for each vehicle. May be different for each vehicle.**

Code using the following hierarchy:

Fatalities/injuries to non-occupants are attributed to the vehicle that struck them when applying this hierarchy.

A. FATALITIES take precedence over INJURIES.

1. If this vehicle is involved in more than one event that causes fatality to its own occupants or to persons not in a motor vehicle, choose the event that causes the greatest number of fatalities to occupants of this vehicle or to persons not in a motor vehicle (not occupants of other vehicles). *I.e., if there are fatalities to non-occupants and vehicle occupants in separate events, the greater number of fatalities is more harmful.*

2. If this vehicle is involved in more than one event that causes fatality to its own occupants or to persons not in a motor vehicle; and if there are an equal number of fatalities in each such event, choose the fatal event that is worst with respect to other injuries and property damage. *I.e., if there are equal numbers of fatalities in each event, the event that also has additional injuries/damage is more harmful.*
 3. As last resort, choose the fatal event that occurred first, time-wise.
- B. INJURIES take precedence over PROPERTY DAMAGE.**
1. If the vehicle is not involved in events that cause fatality to its occupants or to persons not in a motor vehicle, choose the event that produces the worst injury.
 2. If in doubt, choose the event with the greatest number of injuries.
 3. If in doubt, choose the event that occurred first, time-wise.
- C. If only PROPERTY DAMAGE results for this vehicle:**
1. Choose the event causing the most damage.
 2. If in doubt, choose the event that happened first, time-wise.

Non-Collision Most Harmful Events:

Non-Collision events involving motorcycles and vehicles with a “load”:

Non-Collision events may occur before or after a collision event. They should not be coded as a separate event if they occur as part of a collision event.

Examples:

- A motorcycle strikes a deer, overturns and the rider becomes separated from the vehicle. Code the collision event, not the non-collision “Rollover/Overtur” and “Fell/Jumped from Vehicle” that occur as part of the collision event.
- One tractor/trailer rear-ends another tractor/trailer. The impact pushes the lead vehicle’s load into the back of the tractor cab with part falling onto the roadway. Code the collision event, not the non-collision “cargo-loss or shift” that occurred as part of the collision event.

Most Harmful Event Coding Procedures for Parked and Working Motor Vehicles

1. If the MOST HARMFUL EVENT for a parked/working motor vehicle is an impact with a motor vehicle in-transport, use [**12 \(Motor Vehicle In-Transport\)**](#).
 - a. Example: A parked motor vehicle (V2) is struck by an in-transport motor vehicle (V1) and this is the most harmful event for the parked motor vehicle (V2). The MOST HARMFUL EVENT for the parked motor vehicle (V2) is [**12 \(Motor Vehicle In-Transport\)**](#).
2. If the MOST HARMFUL EVENT for a parked/working motor vehicle is an impact with something after it has been set-in-motion, code that other thing.
 - a. Example: In a chain reaction crash, an in-transport motor vehicle (V1) strikes a parked motor vehicle (V2) injuring the person sitting in the driver's seat of V2. The parked motor vehicle (V2) is pushed into an unoccupied motor vehicle (V3) and the parked motor vehicle (V3) strikes and kills a pedestrian. The MOST HARMFUL EVENT for parked motor vehicle (V3) is [**08 \(Pedestrian\)**](#).
3. If the MOST HARMFUL EVENT for a parked/working motor vehicle is an impact with anything set-in-motion except another parked or working motor vehicle, see attribute [**12 \(Motor Vehicle In-Transport\)**](#).
4. If the MOST HARMFUL EVENT for a parked/working motor vehicle is an impact with another parked or working motor vehicle that has been set-in-motion, use [**14 \(Parked Motor Vehicle\)**](#) or [**45 \(Working Motor Vehicle\)**](#), whichever describes the object set-in-motion.

5. The MOST HARMFUL EVENT for a parked/working motor vehicle can be a non-collision harmful event not recorded in the events list. For example, if a parked vehicle rolls over after an impact with an in-transport motor vehicle and the MOST HARMFUL EVENT is the rollover, then use code **01 (Rollover/Overtur**n).

 - a. Example: A parked motor vehicle (V2) is struck by an in-transport vehicle (V1). Parked motor vehicle (V2) is pushed down an embankment and rolls over. The case materials indicate the most harmful event for parked motor vehicle (V2) is the rollover. MOST HARMFUL EVENT for parked motor vehicle (V2) is **01 (Rollover / Overtur**n).

01 (Rollover/Overturn) is used when a motor vehicle rotates (rollover) at least one quarter turn onto its side or end. For motorcycles, laying the motorcycle down on its side is sufficient to code **01 (Rollover/ Overtur**n) as a harmful event if damage or injury is produced, even though the data element Rollover is not applicable to motorcycles.

If there is a **01 (Rollover/Overtur**n) that begins in another location but involves a ditch or embankment in the case (e.g., “rolled through the ditch,” “rolled down the embankment,” “came to rest against the embankment”), then the rule applies where if there is no damage associated with an impact with the fixed object during the rollover, it is not included in the Crash Events. If there is indication that damage resulted from an impact with the fixed object, it is included in the Crash Events. This follows the same logic as striking a tree or another vehicle during an overturn.

Note: For medium/heavy trucks with attached trailers by fixed linkage, when either the power unit or the trailer rolls over, the entire vehicle will be considered a rollover.

02 (Fire/Explosion) is used for a vehicle fire or explosion that occurs during the crash sequence or as a result of the crash.

As it pertains to the occurrence of **02 (Fire/Explosion)**, the crash circumstances are not considered stabilized until the threat of damage to this vehicle, or injury consequences to this vehicle's occupants, has ceased.

Therefore, the crash sequence is not considered stabilized until all occupants have exited the vehicle and the scene has been declared safe by police or other authority. Fires that occur at a later time to vehicles abandoned at the scene (e.g., in open fields, on hillsides, etc.), or to vehicles removed from the scene to another location (tow yard, curbside, etc.), are not considered part of the crash sequence.

03 (Immersion or Partial Immersion) is used when an in-transport motor vehicle enters a body of water and results in injury or damage. This code would also be used if the vehicle came to rest in water and the depth cannot be ascertained from case materials. **NOTE:** In immersion fatalities, the injury to the person may be noted as “drowning.”

04 (Gas Inhalation) includes injury or death as a result of toxic fumes, such as carbon monoxide fumes leaking from a motor vehicle in-transport.

51 (Jackknife [harmful to this vehicle]) applies to a condition that occurs to an articulated vehicle, (any vehicle with a trailing unit(s) connected by a hitch; e.g., truck tractor or single-unit truck with one or more trailers, articulated bus, car pulling a boat on a trailer, etc.) while in motion. The condition reflects a loss of control of the vehicle by the driver in which the trailer(s) yaws from its normal straight-line path behind the power unit, striking the power unit, causing damage to the power unit or trailer. Jackknife should only be coded as a harmful event if there is clear indication of damage to the jackknifed vehicle or injury to its occupants caused by the jackknife.

06 (Injured in Vehicle [Non-Collision]) is used when an occupant is injured during an unstabilized situation without a collision, excluding cargo/equipment loss or shift. Examples: Driver slams on brake, causing an

unrestrained passenger to be injured. Driver makes a sharp turn causing driver to strike head on side window, knocking driver unconscious.

44 (Pavement Surface Irregularity [ruts, potholes, grates, etc.]) is used when the pavement surface irregularity is on a paved surface. Other examples include indication of contact with a dip, depression, low spot, trough, etc.) If the impact is with a surface irregularity (e.g., ruts, potholes) not on a paved surface, use the [58 \(Ground\)](#). For a vehicle that “bottoms out” on the paved surface (causing damage) due to speed but not because of a pavement surface irregularity, use attribute **07 (Other Non-Collision)**.

07 (Other Non-Collision). Non-collision not captured in the listed non-collision attributes.

Examples:

- Damage to the vehicle produced by its own dislodged vehicle parts (including hood flying up and contacting the windshield).
- A vehicle “bottoms out” on the roadway (causing damage) due to speed but not because of a pavement surface irregularity. For impacts on the roadway due to pavement surface irregularities should be coded **44 (Pavement Surface Irregularity [ruts, potholes, grates, etc.])**.

16 (Thrown or Falling Object) is used when any object (1) is thrown (intentionally or unintentionally) and strikes an in-transport vehicle, or (2) falls onto, into, or in the path of an in-transport motor vehicle. If a tree limb falls from a tree and is contacted by a car, enter **16 (Thrown or Falling Object)**. If a person maliciously throws an object off an overpass into traffic below, enter **16 (Thrown or Falling Object)**. This excludes contacts made by loads or objects set-in-motion by a motor vehicle (see [54 \(Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport\)](#)).

72 (Cargo/Equipment Loss, Shift, or Damage [harmful]) refers specifically to the loss or shift of items carried on or in a motor vehicle or its trailing unit, *causing damage and/or injury* to the vehicle, *its occupants*, its parts, trailing unit, *or the cargo* itself. *Harm can be measured in loss of monetary value from unrecoverable cargo loss as well as physical damage.* This attribute should never be used to refer to a “collision” event (see [54 \(Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport\)](#)).

Examples:

- A pickup truck brakes rapidly to avoid a collision. This causes a piece of lumber in the pickup bed to smash through the rear window.
- *Unsecured cargo shifts inside a box truck and bursts through the wall of the trailer.*
- *Pallets of beehives on a flatbed truck fall off the truck on a sharp curve causing the hives to open and the bees to fly away.*
- *A tanker truck overturns ([01 Rollover/Overturn](#)) followed by the loss of 5000 gallons of milk (72 Cargo/Equipment Loss, Shift, or Damage [harmful]).*

Notes:

In situations when a cargo shift is part of a collision event, the cargo shift is not coded separately. See [Non-Collision events involving motorcycles and vehicles with a “load.”](#)

- *Unsecured cargo shifts inside a box truck causing a loss of control. The driver overcorrects, driving off the road. This would be a [60 \(Cargo/Equipment Loss or Shift \[non-harmful\]\)](#) in the Sequence of Events.*
- *Use [07 \(Other Non-Collision\)](#) in a situation where a motor vehicle in transport is towing another unit (e.g., motor vehicle, trailer, etc.) and the second unit collides into the back of the power unit (not a Jackknife or part of a collision event).*

05 (Fell/Jumped from Vehicle) is used when an occupant of this vehicle falls or jumps (not suicide) from the vehicle causing injury. For example, an occupant of a motor vehicle in-transport leans against the car door, it

opens and the occupant falls out; or a person riding on a vehicle's exterior (hood, roof, running board, etc.) falls or jumps, and is injured by the fall. If an occupant falls or jumps from a vehicle and is struck by that vehicle, use this attribute.

Collision with Motor Vehicle In-Transport:

12 (Motor Vehicle In-Transport) is used when the most injury- or damage-producing event is two motor vehicles in-transport making contact within the trafficway boundaries.

Parked and Working Motor Vehicles:

This attribute is used for parked and working motor vehicles when their most harmful event is an impact with a motor vehicle in-transport.

This attribute also applies to parked and working motor vehicles when their most harmful event is an impact with any object set-in-motion other than another parked or working motor vehicle. Set-in-motion objects include cargo, persons, stone, stop sign, tire tread, and debris from a previous impact. If the object set-in-motion is another parked or working motor vehicle use [**14 \(Parked Motor Vehicle\)**](#) or [**45 \(Working Motor Vehicle\)**](#), whichever describes the object set-in-motion.

Examples:

- If the MOST HARMFUL EVENT for V1 (a motor vehicle in-transport) is when V1 strikes V2 (another motor vehicle in-transport) within the trafficway boundaries, then the most harmful event for V1 is [**12 \(Motor Vehicle In-Transport\)**](#).
- If the most harmful event for V2 (a parked motor vehicle) is when V2 is struck by V1 (a motor vehicle in-transport), then the MOST HARMFUL EVENT for V2 is [**12 \(Motor Vehicle In-Transport\)**](#).
- If the MOST HARMFUL EVENT for V2 (a parked motor vehicle) is when V2 is struck by a stop sign set-in-motion by V1 (a motor vehicle in-transport), then the MOST HARMFUL EVENT for V2 is [**12 \(Motor Vehicle In-Transport\)**](#).
- If V1 (a motor vehicle in-transport) strikes V2 (a parked motor vehicle) and V2 then strikes V3 (a parked motor vehicle), then the MOST HARMFUL EVENT for V3 is [**14 \(Parked Motor Vehicle\)**](#).

54 (Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport) applies only to events involving two in-transport motor vehicles. It is used in two situations: **1)** The most harmful injury- or damage-producing event for an in-transport motor vehicle is when something it sets in motion (cargo, person, object) strikes another in-transport motor vehicle. **2)** The most harmful injury- or damage-producing event for an in-transport motor vehicle is when it is struck by cargo, persons, or objects set-in-motion by another in-transport motor vehicle.

Example:

Cargo that fell from an in-transport motor vehicle (V1) is involved in an impact with V2, another in-transport motor vehicle. The case materials indicate this is the most harmful event for both V1 and V2. MOST HARMFUL EVENT is **54 (Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport)** for both V1 and V2.

When selecting the MOST HARMFUL EVENT, **54 (Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport)** does not have to be the MOST HARMFUL EVENT for both vehicles.

Example:

Cargo that fell from an in-transport motor vehicle (V1) is involved in an impact with V2, another in-transport motor vehicle. This event is the only event for V1. Thus, **54 (Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport)** is the MOST

HARMFUL EVENT for V1. The case material identifies a subsequent impact by V2 with a tree on the roadside as the MOST HARMFUL EVENT for V2. Thus, [42 \(Tree \[Standing Only\]\)](#) is the MOST HARMFUL EVENT for V2.

This attribute does not apply when the most harmful event for an **in-transport motor vehicle** is an impact between cargo, a person, or object it set-in-motion and something other than a motor vehicle in transport. In this case, use the “[collision with non-fixed object](#),” or “[collision with fixed object](#)” code that is applicable.

Examples:

- If the MOST HARMFUL EVENT for an in-transport motor vehicle is when cargo that fell off its trailer strikes a pedestrian, code [08 \(Pedestrian\)](#).
- If the MOST HARMFUL EVENT for an in-transport motor vehicle is when a parked motor vehicle it set-in-motion strikes a pedestrian, code [08 \(Pedestrian\)](#).
- If the MOST HARMFUL EVENT for an in-transport motor vehicle is when cargo that fell off its trailer strikes a parked motor vehicle, code [14 \(Parked Motor Vehicle\)](#).

55 (Motor Vehicle in Motion Outside the Trafficway) is used when the injury- or damage-producing event is two motor vehicles in-transport making contact outside the trafficway boundaries in a motor vehicle traffic crash.

Example:

A vehicle loses control attempting to turn into a gas station and strikes another vehicle pulling away from the pump in the station lot.

Collision with Object Not Fixed:

08 (Pedestrian) is used for all those not on a personal conveyance. A person pushing a vehicle should be coded **08 (Pedestrian)**. A person being carried by another person should also be considered a **08 (Pedestrian)**.

09 (Pedalcyclist) is used for any person on a non-motorized other road vehicle propelled by pedaling. Examples include a bicycle, tricycle, unicycle, or pedal car.

If a non-motorist is hit as a result of a vehicle-to-vehicle collision and you cannot reasonably determine which vehicle struck the non-motorist, use the lowest vehicle number of the MVIT involved in the vehicle-to-vehicle event that resulted in the pedestrian or pedalcyclist collision. In the element [NM25 RELATED FACTORS – PERSON \(NOT A MOTOR VEHICLE OCCUPANT\) LEVEL](#) code [31 Default Code Used for Vehicle Numbering](#).

10 (Railway Vehicle) is any land vehicle that is (1) designed primarily for, or in use for, moving persons or property from one place to another on rails and (2) not in use on a land way other than a railway.

- **Inclusions:** Railway Trains, Street car/trolley on private way
- **Exclusions:** Street car/trolley operating on trafficway

74 (Road Vehicle on Rails) is any land vehicle on rails operating in a trafficway.

- **Inclusions:** Street car/trolley operating on trafficway
- **Exclusions:** Railway Trains, Street car/trolley on private way, Streetcar/trolley or electric bus operating on tires

11 (Live Animal) is used for collisions with live animals (domesticated or wild) that are not themselves being used as transportation or to draw a wagon, cart, or other transport device (see [ANSI D16.1](#)). Default to **11 (Live Animal)** if it cannot be determined if the struck animal is alive, dead, or if it was being ridden or drawing a transport device.

49 (Ridden Animal or Animal-Drawn Conveyance) is used for ridden animals and animals drawing transport devices. See **18 (Other Object [Not Fixed])** for an animal carcass.

18 (Other Object [Not Fixed]) is used when a motor vehicle in-transport strikes a non-fixed object that is known NOT to have been the cargo or part of another motor vehicle in-transport or when it is UNKNOWN whether the object was the cargo or part of another motor vehicle in-transport (i.e., refers to objects such as a dead body, animal carcass, construction cones or barrels, an unattached trailer, a bicycle without a rider, downed tree limbs or power lines, or debris from a prior crash). For objects that have become separated from a motor vehicle in-transport not as a result of a prior crash, use attribute [**73 \(Object That Had Fallen from Motor Vehicle In-Transport\)**](#).

15 (Non-Motorist on Personal Conveyance) is used for pedestrians using personal conveyances. A personal conveyance is a device, other than a transport device, used by a pedestrian for personal mobility assistance or recreation. These devices can be motorized or human powered, but not propelled by pedaling.

Inclusions:

1. Rideable toys
 - a. Roller Skates, in-line skates
 - b. Skateboards
 - c. Skates
 - d. Baby carriage
 - e. Scooters
 - f. Toy Wagons
2. Motorized rideable toys
 - a. Motorized skateboard
 - b. Motorized toy car
3. Devices for personal mobility assistance
 - a. Segway-style devices
 - b. Motorized and non-motorized wheelchair
 - c. Handicapped scooters

Exclusions:

1. Golf cart
2. Low Speed Vehicles (LSVs)
3. Go-carts
4. Minibike
5. "Pocket" motorcycles
6. Motor scooters
7. Moped

14 (Parked Motor Vehicle) is used when the impact occurred between a motor vehicle in-transport and a motor vehicle neither on a roadway nor in motion. A vehicle stopped off the roadway, its door open over a roadway, is not in-transport. This attribute would also apply for a parked vehicle struck by another parked vehicle. For example, if a motor vehicle in-transport hits a parked vehicle and pushes it into a second parked vehicle (the only event for the second parked vehicle), the most harmful event for the second parked vehicle is **14 (Parked Motor Vehicle)**.

45 (Working Motor Vehicle) is used to indicate the motor vehicle contacted was in the act of performing construction, maintenance, or utility work related to the trafficway when it became an involved unit. This "work" may be located within open or closed portions of the trafficway and motor vehicles performing these activities can be within or outside the trafficway boundaries. This code does not include private

construction/maintenance vehicles, or vehicles such as garbage trucks, delivery trucks, taxis, emergency vehicles, tow trucks, etc.

Examples:

1. Asphalt/steam roller working in a highway construction zone paving the roadway or flattening dirt.
2. State highway maintenance crew painting lane lines on the road, mowing grass on the roadside or median, repairing potholes, removing debris from the roadway, etc.
3. Utility truck or a "cherry picker," performing maintenance on power lines along the roadway or maintaining a traffic signal.
4. A private excavating company contracted by the State digging the foundation for a new overpass.
5. A State, county, or privately owned snow plow, plowing ice/snow as part of a highway maintenance activity.
6. Street sweeper sweeping the street.
7. A vehicle in a mobile work convoy displaying arrow boards or other signaling devices warning motorists of the work activity.
8. A law enforcement vehicle that is participating strictly in a stationary construction or mobile maintenance activity as a traffic slowing, control, signaling, or calming influence.

NOTE: Code "45" excludes working activities other than highway construction, maintenance, or utility vehicles (e.g., garbage truck picking up trash, mail/delivery trucks while making deliveries, personal vehicles plowing snow, etc.) These are considered motor vehicles In-transport). Use [Related Factors-Vehicle Level code 42 \(Other Working Vehicle \[Not Construction, Maintenance, Utility, Police, Fire, or EMS Vehicle\]\)](#) to identify these vehicles.

A question may arise when a police, fire, or emergency medical vehicle is struck on the roadway while at the scene of a crash, at a traffic stop, or as traffic control. The question becomes, "has its function changed from being a motor vehicle in-transport to a working vehicle?" The answer is "no." Treat these situations as a motor vehicle in-transport striking another motor vehicle in-transport. Use [Related Factors-Vehicle Level code 41 \(Police, Fire, or EMS Vehicle Working at the Scene of an Emergency or Performing Other Traffic Control Activities\)](#) to identify that this vehicle was struck while performing these work activities.

73 (Object That Had Fallen from Motor Vehicle In-Transport) is used when a motor vehicle in- transport strikes a non-fixed object at rest that is known to have been the cargo or part of another motor vehicle in-transport. Do not use this attribute for debris from a prior crash. This attribute does not include vehicle occupants that are ejected or fall from a motor vehicle in-transport. (Example: Motorcycle operator falling from a motorcycle.) For people falling from a motor vehicle see non-collision event [05 \(Fell/Jumped From Vehicle\)](#). For impacts involving two motor vehicles in transport resulting from cargo, persons, or objects set in motion see [54 \(Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons, or Objects Set-in-Motion from/by another Motor Vehicle In-Transport\)](#).

For example, if cargo that fell from a vehicle and was at rest in the roadway is struck this attribute would apply. If the cargo was at rest in the roadway as a result of a prior accident, use attribute [18 \(Other Object \[Not Fixed\]\)](#).

91 (Unknown Object Not Fixed) is used when the event involves an object that is known to be not fixed but the case materials do not identify the specific object.

Collision with Fixed Object:

The attributes [58 \(Ground\)](#), [33 \(Curb\)](#), [34 \(Ditch\)](#), and [35 \(Embankment\)](#) are grouped under the Collision with Fixed Object subset because they are intended to be harmful events in the crash (i.e. – they are associated with an impact that produces injury or damage).

When coding these events there must be fields on the police crash report or verbiage in the narrative such as “struck,” “hit,” “impacted,” etc. that identify these as harmful.

For cases where the indication of the harmful event came from the narrative, there may not be a corresponding indication of damage in any police crash report field. In these instances, code the harmful event as stated in the narrative and include the corresponding attribute under [Areas of Impact](#).

If there is no indication of damage from contact with the fixed object in fields on the police crash report and the narrative language does not identify it as a harmful event (e.g., “came to rest on the embankment,” or “drove through” or “drove across” the ditch and/or the embankment, or “drove over” the curb do not code [33 \(Curb\)](#), [34 \(Ditch\)](#), or [35 \(Embankment\)](#) in the Sequence of Events.

17 (Boulder) is a rock of sufficient mass that when struck by a motor vehicle moves very little and remains basically intact. It may be considered as a fixed object.

19 (Building) is used when the vehicle strikes a roofed and walled structure built for permanent use. The type of construction material used is not of interest, nor is the use of the building.

58 (Ground) is used when the impact is with an earthen or paved surface off of the roadway. **58 (Ground)** is not to be entered when the harmful event is [01 \(Rollover/Overtturn\)](#).

Indication of furrowing, gouging, or digging in of the tires/wheels is not sufficient to code the collision event **58 (Ground)**. For example, if the police crash report narrative states; “the trucks tires dug into the turf causing the vehicle to roll over” the harmful event should be [01 \(Rollover/Overtturn\)](#).

20 (Impact Attenuator/Crash Cushion) is a device for controlling the absorption of energy released during vehicle collision (crash cushion). Its most common application involves the protection of fixed roadside objects such as bridge piers, elevated gores at exit ramps, etc. Examples include barrels filled with water or sand, and plastic collapsible structures.

50 (Bridge Overhead Structure) is used when striking the bottom of a bridge while traveling on a trafficway underneath it. See [Figure 19](#) for a diagram of Bridge Components.

21 (Bridge Pier or Support) is a square or round column of stone, concrete, brick, steel, or wood for supporting a bridge between abutments. This attribute includes the bridge abutments that are supporting the ends of a bridge. Abutments are generally designed for retaining or supporting the embankment under bridge ends and composed of stone, concrete, brick, or wood (includes the wing-walls). See [Figure 19](#) for a diagram of Bridge Components.

23 (Bridge Rail [Includes Parapet]) is a wooden, brick, stone, concrete, or metal fence-like structure that runs along the outermost edge of the roadway or sidewalk on the bridge or a rail constructed along the top of a parapet. Balustrade is often used synonymously with parapet. See [Figure 19](#) for a diagram of Bridge Components.

- Bridges do not need to support another roadway. It may be an overpass for a train or even for a viaduct (water conduit).

24 (Guardrail Face) is a low barrier that has the primary longitudinal structure composed of metal (plates, mesh, box beam, etc.). A guardrail is differentiated from [25 \(Concrete Traffic Barrier\)](#) by the material making up the greatest part of the longitudinal portion of the structure. In the case of guardrails, this is metal whereas in concrete barriers this is concrete (including concrete rails). If the crash report does not differentiate between guardrail face and end, default to guardrail face.

Guardrails that serve as bridge rails should be coded as [23 \(Bridge Rails \[Includes Parapet\]\)](#).

52 (Guardrail End) is coded if a vehicle strikes the end of a guardrail. Guardrails can have a separate flat or rounded piece of metal attached to the end of an expanse of guardrail face.

25 (Concrete Traffic Barrier) refers to the longitudinal traffic barriers constructed of concrete. This includes all temporary concrete barriers regardless of location (i.e., temporary Jersey Barrier on a bridge being used to control traffic during bridge repair/construction). Concrete walls (vertical side surfaces) do not apply here; see [39 \(Wall\)](#).

57 (Cable Barrier) refers to a flexible barrier system that uses several cables typically supported by steel posts. These barriers are designed to help lessen impact or keep vehicles within the confines of the road.

26 (Other Traffic Barrier) is used for all other longitudinal barriers such as wood or rock.

59 (Traffic Sign Support) is used when the post supporting a traffic sign, or the sign itself, is hit by a motor vehicle in-transport. This includes mile marker posts and signs above the trafficway.

46 (Traffic Signal Support) is used when the post supporting a traffic signal, or the signal itself, is hit by a motor vehicle in-transport.

30 (Utility Pole/Light Support) refers to supports for highway lighting systems, not including other private lighting systems (e.g., parking lot lights). **30 (Utility Pole/Light Support)** is used for electrical, telephone, cable, and other utility pole-type supports.

31 (Other Post, Other Pole, or Other Supports) is used for posts other than highway signs, utility poles, or light supports (e.g., reflectors on poles alongside of roadway, parking meters, flag poles, etc.). For mail box posts, use [53 \(Mail Box\)](#). For fence posts, use [38 \(Fence\)](#).

32 (Culvert) is a man-made drain or channel crossing under a road, sidewalk, etc.

33 (Curb) is a concrete or asphalt structure that borders the paved surface. It provides drainage control and pavement edge delineation. The face of the curb may be sloped or vertical. Ensure that the police crash report provides some indication that damage has occurred when a vehicle strikes a curb. This attribute includes collisions with curbing that forms raised islands, medians, or separators. For example, if the report identifies the vehicle struck/collided with a traffic island, channelizing island, raised median, or separator use **33 (Curb)** not [43 \(Other Fixed Object\)](#).

34 (Ditch) includes any man-made structure for drainage purposes. A ditch ends where a culvert begins and resumes on the opposite side of the culvert. Reference to a “ditchbank,” “embankment of the ditch,” or “ditch embankment” should be coded under **34 (Ditch)**.

35 (Embankment) is a raised structure to hold back water, to carry a roadway, or the result of excavation or washout (including erosion) that may be faced with earth (or rock, stone, or concrete). A **35 (Embankment)** can usually be differentiated from a [39 \(Wall\)](#) by its incline whereas a wall is usually vertical. However, there are exceptions to this; such as a retaining wall that may be inclined or a vertical embankment that is caused by a natural event such as a washout.

In crashes involving a field approach or driveway crossing, use attribute **35 (Embankment)** when no specific components (e.g., culverts or ditches) are identified.

38 (Fence) includes the fence posts. A Fence can be made of wood, chain link, stone, etc.

39 (Wall) is a primarily vertical structure composed of concrete, metal, timber, or stone that is not part of a building or a fence but typically is used for retaining earth, abating noise, and separating areas (but not for containment as in the primary function of a fence). Also included as a **39 (Wall)** are headwalls (or endwalls) that are sometimes provided on culvert ends principally to protect the sides of the embankment around the culvert opening against erosion. This does not include wing-walls, which are attached to ends of bridge abutments and extend back at an angle from the roadway. Wingwalls should be coded as [21 \(Bridge Pier or Support\)](#).

40 (Fire Hydrant) refers to the roadside device used by fire departments to provide water for fighting fires. Usually made of steel, these devices are also referred to as fire plugs or fire stand pipes in some areas.

41 (Shrubbery) refers to vegetation that is usually of a woody multi-stemmed variety and in most instances, is low growing rather than tall. May also be called bushes. Some common examples are boxwood, hawthorn, and mountain laurel.

42 (Tree [Standing Only]) is used when a vehicle strikes a standing tree. This includes impacts from overhanging branches, tree stumps, or large cactus (Saguaro). If a vehicle strikes a fallen tree, use [18 \(Other Object \[Not Fixed\]\)](#). If a tree falls on a vehicle as it is passing by, use [16 \(Thrown or Falling Object\)](#).

48 (Snow Bank) is used when snowfall and/or road plowing creates essentially fixed barriers of snow/ice that are not snow-covered earth or rock embankments.

53 (Mail Box) refers to a private residence mail/newspaper box including the post. A cluster of private mailboxes is included in this attribute. This element does not include U.S. Mailbox, which are typically blue and are for general public use. Code a U.S. Mailbox as **43 (Other Fixed Object)**.

43 (Other Fixed Object) is used when the object is fixed (considered a permanent structure) and is not described by any of the other fixed object attributes. This attribute excludes collisions with curbing that forms raised islands, medians, or separators (See also [33 \(Curb\)](#).)

Examples:

- Bus shelters
- Pedestrian walkways
- Toll booths
- Guy wires supporting utility poles
- U. S. Mailbox for public use

Other examples would include property damage to standing crops, yards, and other vegetation (excluding: [41 \(Shrubbery\)](#), [42 \(Tree \[Standing Only\]\)](#), and [58 \(Ground\)](#)) if noted on the crash report.

When the case materials identify a non-specific object impact, apply the following guidelines. If the case materials only identify the harmful event as:

- “Fixed Object,” then use [43 \(Other Fixed Object\)](#)
- “Sign,” then use [59 \(Traffic Sign Support\)](#)
- “Post,” then use [31 \(Other Post, Other Pole, or Other Supports\)](#)
- “Sign Post,” then use [59 \(Traffic Sign Support\)](#)
- “Bridge,” then use [23 \(Bridge Rail \[Includes Parapet\]\)](#) when the vehicle is on top of the bridge, when the vehicle is going under the bridge, then use [21 \(Bridge Pier or Support\)](#)
- “Barrier,” then use [26 \(Other Traffic Barrier\)](#)

93 (Unknown Fixed Object) is used when the event involves an object that is known to be fixed but the case materials do not identify the specific object.

Unknown

99 (Reported as Unknown) is only used if the Most Harmful Event is an event where the [Sequence of Events](#) is [99 \(Reported as Unknown\)](#).

Consistency Checks:

Check	IF	THEN
(A041)	CRASH MONTH equals 05-09,	SEQUENCE OF EVENTS, FIRST HARMFUL EVENT, MOST HARMFUL EVENT should not equal 48.
(AL3P)	UNIT TYPE equals 2-4,	MOST HARMFUL EVENT must not equal 54 for this vehicle.
(AL4P)	there is one and only one parked vehicle (UNIT TYPE equals 2 or 3) in the crash,	MOST HARMFUL EVENT for the parked vehicle must not equal 14.
(AL5P)	UNIT TYPE equals 1,	at least one event in the SEQUENCE OF EVENTS must equal the MOST HARMFUL EVENT.
(AL6P)	MOST HARMFUL EVENT equals __, and UNIT TYPE equals 1,	at least one event in the SEQUENCE OF EVENTS must equal __.
(AL7P)	UNIT TYPE equals 2-4,	MOST HARMFUL EVENT should not equal 04-07, 16, 51, 72.

V34 - Related Factors – Vehicle Level

FORMAT: 2 numeric occurring 2 times

SAS NAME: Vehicle.VEH_SC1; Vehicle.VEH_SC2. parkwork.PVEH_SC1, parkwork.PVEH_SC2

ELEMENT VALUES:

Codes	Attributes
00	None

Special Vehicle Flags:

Codes	Attributes
30	Multi-Wheeled Motorcycle Conversion
*32	Vehicle Registration for Handicapped
33	Vehicle Being Pushed by Non-Motorist
35	Reconstructed/Altered Vehicle
*37	Transporting Children to/from Head Start/Day Care
39	Highway Construction, Maintenance, or Utility Vehicle, In-Transport (Inside or Outside Work Zone)
40	Highway Incident Response Vehicle
41	Police, Fire, or EMS Vehicle Working at the Scene of an Emergency or Performing Other Traffic Control Activities
42	Other Working Vehicle (Not Construction, Maintenance, Utility, Police, Fire, or EMS Vehicle)
44	Adaptive Equipment
45	Slide-in Camper
99	Reported as Unknown

***FARS ONLY ATTRIBUTES**

Definition: This element identifies factors related to this vehicle expressed by the investigating officer.

Remarks: Code information provided by the investigating officer in the narrative, contributing factors/circumstances field, or citations/violations section on the crash report.

CODING HIERARCHY: When more than two attributes apply, select the attributes that cannot be captured under other elements.

Vehicle conditions include manufacturer defects, driver's changes that are defective and maintenance conditions. RELATED FACTORS-DRIVER LEVEL [24 \(Operating Without Required Equipment\)](#) can be coded in conjunction with vehicle level conditions.

00 (None) is used when no applicable related factors are noted in the case materials. Zero-fill all fields. Also, use 00 (None) to complete the remaining fields when you will be recording less than two vehicle related factors. DO NOT leave any remaining fields blank.

Attributes 30-44 are flags used to identify this vehicle as one with special circumstances. They do not necessarily imply that this circumstance caused the crash.

30 (Multi-Wheeled Motorcycle Conversion) is used when the case materials identify this vehicle is a motorcycle that is converted to a multi-wheeled configuration from a 2-wheeled OEM motorcycle. These vehicles will not have a body type attribute [82 \(Three-Wheeled Motorcycle \[2 Rear Wheels\]\)](#) available in the manufacturer's Make/Model/Model Year/Body Type table.

***32 (Vehicle Registration for Handicapped)** is used when the case materials identify this vehicle is registered and/or specially equipped for a handicapped individual. This information can be derived from the vehicle registration. This excludes placards that are usually hung from the rear-view mirror and can be moved from one vehicle to the other.

33 (Vehicle Being Pushed by Non-Motorist) is used when the case materials identify this vehicle is being pushed by a non-motorist with or without a driver at the controls.

45 (Slide-in Camper) *A slide-in camper is a unit that mounts within a pickup bed. Pickup bed caps, tonneau covers, or frame mounted campers are not applicable for this code.*

35 (Reconstructed/Altered Vehicle) is used when the case materials identify this vehicle is a home-made vehicle constructed from vehicle components or is significantly altered in some way. These vehicles may have standard VIN or the State may issue a number in place of the VIN for their registration.

Examples include:

- The addition of enhanced performance engine chips or accessories.
- Significant altering of suspension system (e.g., “monster trucks,” “low riders,” etc.).
- Hydraulic systems or tilted/canted wheels.

***37 (Transporting Children to/from Head Start/Day Care)** is used when the case materials identify this vehicle is used to transport children to Day Care/Head Start in vehicles arranged, operated, or owned by Head Start or Day Care Program. This attribute is not intended for children being transported to daycare by family/friends in personal vehicles.

39 (Highway Construction, Maintenance, or Utility Vehicle, In-Transport [Inside or Outside Work Zone]) is used when the case materials identify this vehicle is a highway construction, maintenance, or utility vehicle that is in-transport at the time it became involved in the crash. Note: This is **only** used when the vehicle is considered to not be a working motor vehicle and is “**in-transport**.” For example, while moving from one job site to another job site or returning to the depot after concluding work activities. This attribute refers to vehicles owned by a local, county, State, or Federal agency. Private vehicles are excluded.

40 (Highway Incident Response Vehicle) is used when the case materials identify this vehicle is a State government-owned vehicle whose function is to drive the major highways to assist motorists with flat tires, provide gas, etc.

Examples include:

- DOT Help
- Good Samaritans
- Courtesy Patrol
- Motorist Assist Vehicle

41 (Police, Fire, or EMS Vehicle Working at the Scene of an Emergency or Performing Other Traffic Control Activities) is used when the case materials identify this vehicle is a police car, fire truck, or ambulance performing some work function related to working at the scene of an emergency or acting as traffic control.

Examples include:

- Police car, fire truck, or ambulance at the scene of a crash.
- Fire truck at the scene of a fire.
- Police car leading or trailing a convoy for a funeral.
- Police car blocking the entrance to a parade route.
- Police car at a check point.

42 (Other Working Vehicle (Not Construction, Maintenance, Utility, Police, Fire, or EMS Vehicle) is used when the case materials identify this vehicle is performing some other work activity at the time it was involved in the crash and that activity is somehow associated with the crash.

Examples include:

- Garbage truck picking up trash.
- Personal pickup with a snow blade plowing.
- UPS or postal vehicle stopped in the roadway while making a delivery.
- Food delivery truck making a delivery.

44 (Adaptive Equipment) is used when the case materials identify this vehicle is equipped with adaptive equipment for handicapped operator(s).

Examples include:

- Extended brake/gas pedals
- Special steering apparatus
- Hand brakes or accelerator, etc.

99 (Reported as Unknown) is used when “unknown” is reported for the vehicle condition in the police crash report itself and none of the special circumstances exist. In these circumstances, nine-fill all fields. If **99 (Reported as Unknown)** is used for any field, **ALL** fields must be **99 (Reported as Unknown)**. DO NOT leave any remaining fields blank. Also use this attribute for Hit-and-Run vehicles and drivers when no factors are identified or reported by the officer for this vehicle or driver.

Consistency Checks:

Check	IF	THEN
(1G0P)	one RELATED FACTORS-VEHICLE LEVEL equals 99,	both factors must equal 99.
(1Z2P)	any SEQUENCE OF EVENTS equals 01, and BODY TYPE equals 01-79, 82, 90-99, or any RELATED FACTORS-VEHICLE LEVEL equals 30,	ROLLOVER must equal 1, 2, or 9.
(2G0P)	either RELATED FACTORS-VEHICLE LEVEL equals blanks,	the other factor must also equal blanks.
(3G0P)	the first RELATED FACTORS-VEHICLE LEVEL equals 00,	the other factor must also equal 00.
(4G0P)	A RELATED FACTORS-VEHICLE LEVEL between 30 and 45 can be used only once per vehicle form.	--
(5A0P)	BODY TYPE equals 80, 81, 83, 84, 88, 89, and any RELATED FACTORS - VEHICLE LEVEL does not equal 30,	ROLLOVER must equal 0.
(6G0Q)	any RELATED FACTORS - VEHICLE LEVEL equals 30,	BODY TYPE must equal 80 for this vehicle.
(9C1P)	UNIT TYPE equals 4,	RELATED FACTORS-VEHICLE LEVEL must not equal 39.
(VH06)	BODY TYPE equals 82,	RELATED FACTORS-VEHICLE LEVEL must not equal 30.
(V031)	RELATED FACTORS-VEHICLE LEVEL equals 39,	BODY TYPE should not equal 01, 12, 13, 33, 42, 50-52, 55, 58, 59, 65, 73, 80-83, 88-92.

Check	IF	THEN
(V032)	RELATED FACTORS-VEHICLE LEVEL equals 40,	BODY TYPE should not equal 01, 12, 13, 33, 42, 50-52, 55, 58, 59, 60-67, 71-73, 78, 80-83, 88-93.
(V033)	<i>RELATED FACTORS-VEHICLE LEVEL equals 45,</i>	<i>BODY TYPE must equal 33-39, 67.</i>

Consistency Checks (FARS Only):

Check	IF	THEN
(6G0P)	RELATED FACTORS-VEHICLE LEVEL equals 32,	REGISTRATION STATE must not equal 00, 92.
(AS0P)	RELATED FACTORS-VEHICLE LEVEL equals 32,	REGISTERED VEHICLE OWNER must not equal 0.
(V590)	RELATED FACTORS-VEHICLE LEVEL equals 32,	REGISTERED VEHICLE OWNER should equal 1-3.
(V592)	RELATED FACTORS-VEHICLE LEVEL equals 37,	REGISTRATION STATE should not equal 00, 92.
(V593)	RELATED FACTORS-VEHICLE LEVEL equals 37,	REGISTERED VEHICLE OWNER should not equal 0.

V35 - Fire Occurrence

FORMAT: 1 numeric

SAS NAME: Vehicle.FIRE_EXP, Person.FIRE_EXP, Parkwork.PFIRE

ELEMENT VALUES:

Codes	Attributes
0	No or Not Reported
1	Yes

Definition: This element identifies whether or not a fire in any way related to the crash occurred in this vehicle.

Remarks: For the purposes of this element, “vehicle” is defined to mean the power unit plus any and all trailing units associated with the power unit.

If it cannot be determined that a fire occurred in the vehicle during the crash, use **0 (No or Not Reported)**.

1 (Yes) is used when the case materials indicate that this vehicle sustained fire damage.

In a multi-vehicle crash where a fire occurs, only the vehicles sustaining fire damage should be coded as **1 (Yes)**.

Fires that begin in a vehicle before the first impact may be counted. If fire damage is produced, **02 (Fire/Explosion)** would be the [First Harmful Event](#).

If the [Most Harmful Event](#) for this vehicle is **02 (Fire/Explosion)**, or a fire in the vehicle is produced by damage in the crash, use **1 (Yes)**. The involved vehicles may be at rest for a short period of time.

If the vehicles are at rest long enough to raise a question about the fire’s relationship to the crash’s damage-producing events, use **0 (No or Not Reported)**.

Examples for Fire Occurrence:

Examples	Code
1. Car (V#1) strikes tank truck (V#2) in rear, the car catches on fire with no fire occurring for the tank truck.	<ul style="list-style-type: none"> • V#1 – 1 (Yes) • V#2 – 0 (No or Not Reported)
2. Vehicle #1 catches fire, causing driver to strike vehicle #2.	<ul style="list-style-type: none"> • V#1 – 1 (Yes) • V#2 – 0 (No or Not Reported)
3. Vehicle #1 catches fire, causing driver to stop vehicle in roadway and all occupants exit vehicle. Two minutes later, a second car (V#2) rear-ends the stopped car and its driver is killed from collision. (Attributes reflect the second crash.)	<ul style="list-style-type: none"> • V#1 – 0 (No or Not Reported) • V#2 – 0 (No or Not Reported)

Consistency Checks:

Check	IF	THEN
(4Z0P)	SEQUENCE OF EVENTS equals 02,	FIRE OCCURRENCE for this vehicle must equal 1.
(4Z1P)	UNIT TYPE equals 1, and FIRE OCCURRENCE equals 1,	at least one SEQUENCE OF EVENTS must equal 02.
(540F)	FIRST HARMFUL EVENT equals 02,	the vehicle involved in the FIRST HARMFUL EVENT must have FIRE OCCURRENCE equal to 1.

V36 - Vehicle License Plate Number - CRSS Only

FORMAT: 10

SAS NAME:

ELEMENT VALUES:

Codes	Attributes
0000000000	No License Plate
--	Actual License Plate Number
9999999998	Not Reported
9999999999	Reported as Unknown

Definition: This element captures the license plate number of this vehicle.

Remarks:

0000000000 (No License Plate) would be used when the police crash report identifies that this vehicle did not have a license plate when required or plates are not required for this type of vehicle.

9999999998 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "Not Reported."

Code **9999999998 (Not Reported)** in these situations:

- A coded data block exists and it is left blank, and
- No other information is available (e.g., narrative, diagram, or case materials)

9999999999 (Reported as Unknown) is used for a police reported "unknown."

Consistency Checks:

Check	IF	THEN
(D093)	Any VEHICLE LICENSE PLATE NUMBER that does not equal 0000000000, 9999999999, or 9999999998,	VEHICLE LICENSE PLATE NUMBER must be unique within a crash.
(V941)	BODY TYPE equals 90 or 91,	VEHICLE LICENSE PLATE NUMBER must equal 0000000000.

Driver Level Data Elements

[D1 – State Number – FARS Only](#)

[D2 – Consecutive Number – FARS Only](#)

[D3 – Vehicle Number – Driver Level](#)

[D4 – Driver Presence](#)

[D5 – Driver's License State – FARS Only](#)

[D6 – Driver's Zip Code](#)

[D7 – Non-CDL License Type/Status – FARS Only](#)

[D8 – Commercial Motor Vehicle License Status – FARS Only](#)

[D9 – Compliance with CDL Endorsements – FARS Only](#)

[D10 – License Compliance with Class of Vehicle – FARS Only](#)

[D11 – Compliance with License Restrictions – FARS Only](#)

[D12 – Driver Height – FARS Only](#)

[D13 – Driver Weight – FARS Only](#)

[D14, D15, D16, D17, D18 – Driver Level Counters – FARS Only](#)

[D24 – Related Factors – Driver Level](#)

D3 - Vehicle Number – Driver Level

FORMAT: 3 numeric

SAS NAME: Vehicle.Veh_No

ELEMENT VALUES:

- 000-999

Definition: This element identifies the vehicle number associated with this driver.

Remarks:

- Must be coded on an original submission
- System-Generated (MDE System Only)
- See [Vehicle Number-Vehicle Level](#) for assignments numbers.
- FOR DRIVERLESS, PARKED/STOPPED OFF ROADWAY/WORKING MOTOR VEHICLES, AND MOTOR VEHICLES IN MOTION OUTSIDE THE TRAFFICWAY, ONLY CODE [DRIVER PRESENCE \(D4\)](#) AND [RELATED FACTORS-DRIVER LEVEL \(D24\)](#).

Consistency Check:

Check	Language
(CSI2)	There must be exactly one Driver Level form corresponding to each Vehicle Level form.

D4 - Driver Presence

FORMAT: 1 numeric

SAS NAME: Vehicle.Dr_Pres

ELEMENT VALUES:

Codes	Attributes
0	No Driver Present/Not Applicable
1	Yes
9	Unknown

Definition: This element identifies whether or not a driver was present in this vehicle at the onset of the unstabilized situation.

Remarks:

0 (No Driver Present/Not Applicable) is used when there is no person who was controlling this vehicle at the time of the crash.

Also, use **0 (No Driver Present/Not Applicable)** when [Unit Type](#) for this vehicle is not a motor vehicle in-transport ([Unit Type](#) attributes “2, 3, 4”). Use this attribute regardless of the presence of an occupant in the driver’s seat.

1 (Yes) is used when there is a person who is physically controlling the vehicle at the onset of the unstabilized situation for this crash. Do not use this attribute for a child sitting in the driver’s seat unless the case materials indicate the child was in control of the vehicle. Hit-and-run drivers are included in this attribute. A driver under medical distress would be included. This attribute includes when it is known there was a driver but it is unknown which occupant was the driver at the time of the crash.

9 (Unknown) is used when it is unknown if there was a driver present in the vehicle at the time of the crash.

If coded **0 (No Driver Present/Not Applicable)** or **9 (Unknown)**, all other elements on the Driver Level except [RELATED FACTORS-DRIVER LEVEL](#) must be left blank. A Person Level - Occupant of a Motor Vehicle form with [PERSON TYPE](#) equal to **01 (Driver of a Motor Vehicle In-Transport)** must not be submitted for that vehicle.

If coded **0 (No Driver Present/Not Applicable)** or **9 (Unknown)**, [Related Factors-Driver Level](#) are coded “00” unless [UNIT TYPE](#) is equal to 1 (Motor Vehicle In-Transport [Inside or Outside the Trafficway]). In such a case, only select [RELATED FACTORS-DRIVER LEVEL](#) that are applicable.

Consistency Checks:

Check	IF	THEN
(1H6F)	DRIVER PRESENCE equals 0, 9,	VIOLATIONS CHARGED must be blank.
(1HFF)	DRIVER PRESENCE equals 0, 9,	SPEEDING RELATED must be blank.
(1HJF)	DRIVER'S VISION OBSCURED BY equals 95,	DRIVER PRESENCE must equal 0 or 9.
(2FOF)	NUMBER OF OCCUPANTS equals 00,	DRIVER PRESENCE must equal 0.
(2HOF)	DRIVER PRESENCE equals 0, 9,	RELATED FACTORS-DRIVER LEVEL must not equal 04, 08, 09, 10 , 12, 13, 15, 16, 19, 52, 53, 58, 59, 73, 74, 77-88.

Check	IF	THEN
(2H1F)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 0 or 9,	DRIVER'S VISION OBSCURED BY must equal 95.
(3BAP)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 0,	CRASH TYPE must equal 00, 04, 09, 15, 32, 42, 48, 52, 62, 66, 74, 84, 90, 93, or 98.
(3BGP)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 00,	DRIVER PRESENCE must equal 0 or 9.
(3H0F)	DRIVER PRESENCE equals 1,	there must be one and only one Person Level form for that vehicle with PERSON TYPE equal to 01, or there must be no Person Level form for that vehicle with PERSON TYPE equal to 01 and at least two Person Level forms for that vehicle with PERSON TYPE equal to 09.
(4H0F)	DRIVER PRESENCE equals 0, 9,	there must not be a Person Level form for that vehicle with PERSON TYPE equal to 01.
(5LOF)	RELATED FACTORS-DRIVER LEVEL equals 20,	DRIVER PRESENCE must not equal 1, 9.
(5L1F)	RELATED FACTORS-DRIVER LEVEL equals 04, 08, 09, 10 , 12, 13, 15, 16, 19, 52, 53, 58, 59, 73, 74, 77-88,	DRIVER PRESENCE must not equal 0 or 9.
(6H0P)	DRIVER PRESENCE equals 0, 9,	DRIVER'S ZIP CODE must be blank.
(6H1P)	DRIVER PRESENCE equals 0, 9,	CONDITION (IMPAIRMENT) AT TIME OF CRASH (D23) must be blank.
(7B0F)	JACKKNIFE equals 2, 3,	DRIVER PRESENCE must equal 1.
(9A3P)	UNIT TYPE equals 2-4,	DRIVER PRESENCE must equal 0.
(9C4P)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 0 or 9,	DRIVER MANEUVERED TO AVOID must only equal 95.
(9C5P)	DRIVER MANEUVERED TO AVOID equals 95,	DRIVER PRESENCE must equal 0 or 9.
(A080)	DRIVER PRESENCE equals 0, and FIRST HARMFUL EVENT equals 12, and NUMBER OF VEHICLE FORMS SUBMITTED equals 002,	one RELATED FACTORS-DRIVER LEVEL should equal 20.
(AZ20)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 0 or 9,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 00.
(BJ1P)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 0 or 9,	DRIVER DISTRACTED BY must equal 16.
(BJ2P)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 1,	DRIVER DISTRACTED BY must not equal 16 or blank.
(BJ3P)	UNIT TYPE equals 1, and DRIVER DISTRACTED BY equals 16,	DRIVER PRESENCE must equal 0 or 9.
(BJ5P)	If UNIT TYPE equals 1 and HIT AND RUN equals 1,	then DRIVER PRESENCE should not equal 0.
(FD0F)	DRIVER PRESENCE is blank; case status is flawed.	--
(PB30)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 220,	at least one DRIVER PRESENCE must equal 0 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.

Check	IF	THEN
(PB60)	PERSON TYPE equals 05 or 08, and DRIVER PRESENCE equals 0 for the motor vehicle that strikes the non-motorist,	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN should equal 220.
(PB61)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 220,	DRIVER PRESENCE should equal 0 for the motor vehicle striking the non-motorist.

Consistency Checks (FARS Only):

Check	IF	THEN
(1H0F)	DRIVER PRESENCE equals 0, 9,	PREVIOUS SPEEDING CONVICTIONS must be blank.
(1H1F)	DRIVER PRESENCE equals 0, 9,	DRIVER'S LICENSE STATE must be blank.
(1H2F)	DRIVER PRESENCE equals 0, 9,	LICENSE COMPLIANCE WITH CLASS OF VEHICLE must be blank.
(1H3F)	DRIVER PRESENCE equals 0, 9,	NON-CDL LICENSE STATUS and COMMERCIAL MOTOR VEHICLE LICENSE STATUS must be blank.
(1H4F)	DRIVER PRESENCE equals 0, 9,	COMPLIANCE WITH LICENSE RESTRICTIONS must be blank.
(1H7F)	DRIVER PRESENCE equals 0, 9,	PREVIOUS RECORDED CRASHES must be blank.
(1H8F)	DRIVER PRESENCE equals 0, 9,	<i>all three Subfields of</i> PREVIOUS RECORDED SUSPENSIONS <i>AND REVOCATIONS</i> must be blank.
(1H9F)	DRIVER PRESENCE equals 0, 9,	PREVIOUS DWI CONVICTIONS must be blank.
(1HAF)	DRIVER PRESENCE equals 0, 9,	PREVIOUS OTHER MOVING VIOLATION CONVICTIONS must be blank.
(1HBF)	DRIVER PRESENCE equals 0, 9,	DATE OF LAST CRASH, SUSPENSION, CONVICTION must be blank.
(1HCF)	DRIVER PRESENCE equals 0, 9,	DATE OF FIRST CRASH, SUSPENSION, CONVICTION must be blank.
(1HDF)	DRIVER PRESENCE equals 0, 9,	DRIVER HEIGHT (feet and inches) must equal blank.
(1HEF)	DRIVER PRESENCE equals 0, 9,	DRIVER WEIGHT must equal blank.
(BJOP)	DRIVER PRESENCE equals 0, 9,	COMPLIANCE WITH LICENSE ENDORSEMENTS must be blank.
(BNOP)	DRIVER PRESENCE equals 0, 9,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS must be blank.
(CB0P)	REGISTERED VEHICLE OWNER equals 6,	DRIVER PRESENCE must equal 0.
(D330)	DRIVER PRESENCE equals 0, and REGISTRATION STATE is not equal to 00, 92, 99,	REGISTERED VEHICLE OWNER should equal 3-6.

D5 - Driver's License State – FARS Only

FORMAT: 2 numeric

SAS NAME: Vehicle.L_STATE

ELEMENT VALUES:

93	Indian Nation
94	U.S. Government
95	Canada
96	Mexico
97	Other Foreign Country
98	<u>Not Reported</u>
99	<u>Reported as Unknown</u>

Definition: This element identifies the state of issue for the license held by this driver.

Remarks: If no license is required or driver is not licensed, use the resident State of the driver. U.S. Government is used to indicate the license was issued by the U.S. Government, such as military or State Department Foreign Service.

57 (Other U.S. Driver's License) is used for U.S. territories not identified by their own attribute (Other U.S. Territories, or U.S. owned outlying areas such as Northern Marianas Islands, Wake Islands, etc.).

98 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials)
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

Consistency Checks:

Check	IF	THEN
(1H1F)	DRIVER PRESENCE equals 0, 9,	DRIVER'S LICENSE STATE must be blank.
(1IOP)	DRIVER'S LICENSE STATE equals 99,	NON-CDL LICENSE STATUS must not equal 0-4, 6, and COMMERCIAL MOTOR VEHICLE LICENSE STATUS must not equal 00-08.
(1KOP)	DRIVER'S LICENSE STATE equals 99,	LICENSE COMPLIANCE WITH CLASS OF VEHICLE must not equal 0-3.
(2IOP)	DRIVER'S LICENSE STATE equals 99,	COMPLIANCE WITH LICENSE RESTRICTIONS must not equal 0-3.
(3I1P)	DRIVER'S LICENSE STATE equals 99,	all driver history counters PREVIOUS RECORDED CRASHES must equal 99.
(3I2P)	DRIVER'S LICENSE STATE equals 98 , 99,	all driver history counters must equal 99.
(3I3P)	DRIVER'S LICENSE STATE equals 99,	all driver history counters PREVIOUS DWI CONVICTIONS must equal 99.
(3I4P)	DRIVER'S LICENSE STATE equals 99,	all driver history counters PREVIOUS SPEEDING CONVICTIONS must equal 99.
(3I5P)	DRIVER'S LICENSE STATE equals 99,	all driver history counters PREVIOUS OTHER MOVING VIOLATION CONVICTIONS must equal 99.
(B1OP)	DRIVER'S LICENSE STATE equals 99,	COMPLIANCE WITH CDL ENDORSEMENTS must not equal 1, 2.
(CJ00)	PREVIOUS RECORDED CRASHES equals 98,	DRIVER'S LICENSE STATE should equal 09, 13, 28, 30, 35, 49.
(CJ01)	any driver history counter is not equal to 99,	DRIVER'S LICENSE STATE must not be 96, 97, 98, or 99.
(D010)	DRIVER'S LICENSE STATE equals 96, 97,	PREVIOUS RECORDED CRASHES should equal 99.

Check	IF	THEN
(D020)	DRIVER'S LICENSE STATE equals 96, 97,	<i>all three Subfields of</i> PREVIOUS RECORDED SUSPENSIONS AND REVOCATIONS should equal 99.
(D030)	DRIVER'S LICENSE STATE equals 96, 97,	PREVIOUS DWI CONVICTIONS should equal 99.
(D040)	DRIVER'S LICENSE STATE equals 96, 97,	PREVIOUS SPEEDING CONVICTIONS should equal 99.
(D050)	DRIVER'S LICENSE STATE equals 96, 97,	PREVIOUS OTHER MOVING VIOLATION CONVICTIONS should equal 99.
(D170)	DRIVER'S LICENSE STATE does not equal 93-99,	DRIVER'S ZIP CODE should not equal 99999.
(D180)	DRIVER LICENSE STATE equals 95- 97,	DRIVER ZIP CODE should not equal 99999.
(D320)	DRIVER'S LICENSE STATE does not equal 93-99,	DRIVER'S ZIP CODE should equal 99999 or be a valid zip code for DRIVER'S LICENSE STATE.
(D480)	DRIVER'S LICENSE STATE equals 09, 13, 28, 30, 35, 49,	PREVIOUS RECORDED CRASHES should equal 98.
(D710)	DRIVER'S LICENSE STATE equals 02, 04, 09, 15, 20, 30, 38, 40,	NON-CDL LICENSE TYPE should not equal 2.
(U410)	UNLIKELY: DRIVER'S LICENSE STATE equals 98 if HIT AND RUN does not equal 1.	--

D6 - Driver's Zip Code

FORMAT: 5 numeric

SAS NAME: Vehicle.DR_Zip

ELEMENT VALUES:

Codes	Attributes
00000	Not a Resident of U.S. or Territories
nnnnn	Actual Value
99999	Unknown

Definition: This element identifies the zip code of this driver's area of residence.

Remarks:

Code only the first five digits of nine-digit zip codes.

00000 (Not Resident of U.S. or Territories) is used when the address found in the case materials indicates that the driver resides at an address that has not been assigned a ZIP code by the U.S. Post Office.

99999 (Unknown) is used whenever the Zip code cannot be determined. For example, use this attribute when no information is provided on the police crash report about the driver (e.g., hit-and-run). In addition, use this code if the driver, licensed or not, has no permanent address. For example, the driver could be living out of his/her vehicle (camper, motor home, etc.), or the driver could be "homeless."

If a ZIP CODE is listed on the police crash report but it is not a valid number use attribute **99999 (Unknown)**.

FARS SPECIAL INSTRUCTION:

Use the following guidelines to resolve discrepancies between the police crash report and Driver License File:

- If the street address is the same on both sources but the zip codes differ, use the zip code from the License File.
- If you have internet access available, you may use the [USPS Zip Code Look Up web site](#) to confirm you have the correct address.
- If the street addresses on the two sources differ, then use the zip code for the address reported on the police crash report.
- If you have both a residence address and a different mailing address (e.g., a P.O. Box) use the zip code for the residence address.

If the police crash report indicates an address in-state and a driver's license from another State is recorded (with a different residence address), attempt to determine the most current address for the driver. If the most current address cannot be determined, use the zip code that corresponds to the address from the [DRIVER'S LICENSE STATE](#).

CRSS SPECIAL INSTRUCTION:

For the purposes of this variable, a driver is considered to reside at the address listed on the police crash report. This address was most likely taken from the driver's license given to the police officer and/or from the licensing State's driver license file.

If the driver's address is present and the Zip code is missing or not available, then determine the correct Zip code by using the National Five Digit Zip Code & Post Office Directory.

Consistency Checks:

Check	IF	THEN
(6HOP)	DRIVER PRESENCE equals 0, 9,	DRIVER'S ZIP CODE must be blank.
(BYOP)	DRIVER'S ZIP CODE must be a valid code, blanks, 00000, or 99999.	--

Consistency Checks (FARS Only):

Check	IF	THEN
(D160)	NON-CDL LICENSE STATUS does not equal 9, or COMMERCIAL MOTOR VEHICLE LICENSE STATUS does not equal 99,	DRIVER'S ZIP CODE should not equal 99999.
(D170)	DRIVER'S LICENSE STATE does not equal 93-99,	DRIVER'S ZIP CODE should not equal 99999.
(D180)	DRIVER LICENSE STATE equals 95-97,	DRIVER ZIP CODE should not equal 99999.
(D320)	DRIVER'S LICENSE STATE does not equal 93-99,	DRIVER'S ZIP CODE should equal 99999 or be a valid zip code for DRIVER'S LICENSE STATE.

D7 - Non-CDL License Type/Status – FARS Only

FORMAT: 1 numeric occurring 2 times.

SAS NAME: Vehicle.L_TYPE; Vehicle.L_STATUS

ELEMENT VALUES:

Type

Codes	Attributes
0	Not Licensed
1	Full Driver License
2	Intermediate Driver License
7	Learner's Permit
8	Temporary License
9	Unknown License Type

Status

Codes	Attributes
0	Not Licensed
1	Suspended
2	Revoked
3	Expired
4	Canceled or Denied
6	Valid
9	Unknown License Status

Definition: This element identifies in two subfields the type of license held by this driver and the status of the license at the time of the crash.

Source: Official driver record and police report. Official driver records take precedence over police-reported information.

Remarks:

This element is used to establish the driver's license type and status for all license classes except the commercial driver's license (CDL). It also captures the type and status of the NON-CDL driving privilege for drivers with CDLs.

The NON-CDL License Type/Status is coded for all drivers, including drivers with a CDL.

Use the “[Type](#)” field to record whether the driver has a full driver's license, intermediate driver's license, learner's permit, temporary license, or is not licensed. Use the “[Status](#)” field to record if the license is valid, suspended, revoked, expired, canceled, or denied.

Note About Involved Drivers in the Military:

When involved drivers are in the military, the analyst should be cautious because some States automatically (without driver application) renew drivers' licenses or extend the license until the individual is discharged. Each State analyst should be familiar with their State's policy on military personnel and code these license variables accordingly. In addition, when out-of-state driver requests are made the analyst requesting the data should note that the driver is in the military.

0 (Not Licensed) (for both Type and Status). **0 (Not Licensed)** should be used only when it has been reasonably established that the driver is not licensed (anywhere). Takes precedence over all other NON-CDL License Type/Status attributes. Drivers who have a license but fail to have their license with them at the time of the crash should be coded according to the type (class) of license they possess and the validity of the license. If the police report indicates that the driver has “no license,” the analyst should first determine whether this means that the person was not in possession of his/her license at the time of the crash, or that the driver is not a registered motor vehicle operator. A review of the violations cited section of the police report may yield some clues in this matter. If the person is cited for not possessing his/her license or for not having one, then code this information in variables [D21 Violations Charged](#) and [D24 Related Factors-Driver Level](#). If the analyst is uncertain as to whether or not the person possesses a license, then code [Unknown](#) should be used.

Non-CDL License Type Remarks:

1 (Full Driver License) is used for unlimited driving privileges (with no GDL restrictions). This is based on your State’s eligibility guidelines.

7 (Learner’s Permit) and **2 (Intermediate Driver License)** are the first two stages of a tiered licensing process that allows young drivers to obtain full driver license privileges through safe driving practices. Typical restrictions include minimum age requirements, passing vision/ knowledge tests, and supervision by adult driver over the age of 21. Other requirements may include limiting the number of passengers in the vehicle, occupants must wear seatbelts, zero alcohol tolerance, and no at-fault crashes or convictions for a period of time.

NOTE: If **7 (Learner’s Permit)** or **2 (Intermediate Driver License)** has expired, code Type as **2 (Intermediate Driver License)** or **7 (Learner’s Permit)** and Status as **3 (Expired)**.

NOTE: It is important that you know your State’s graduated driver license restrictions. GDL program restrictions vary from State-to-State.

2 (Intermediate Driver License) is the second stage of obtaining a full license privilege. It is typically for drivers between the ages of 16 and 17, and does not require total supervision during daylight hours (e.g., adult supervision during the hours of midnight to 5 am). A **2 (Intermediate Driver License)** may be suspended or revoked under certain violations. Other conditions may include conviction-free performance, seat-belt use for occupants, and some age restrictions for passengers. If any restriction is violated, this GDL restriction period can be extended.

NOTE: **2 (Intermediate Driver License)** does not apply for States that do not have a GDL program. However, your State may have a Learner’s Permit. Also, your State may not use the name “Intermediate Driver License” and may call it something else.

NOTE: **7 (Learner’s Permit)** is the first stage of obtaining a full license privilege. It is typically for drivers between 14 and 16 years of age, and typically requires total adult supervision, seat-belt use for occupants, and conviction-free performance. If any restriction is violated, this GDL restriction period can be extended.

8 (Temporary License) includes any type of non-permanent license issued for a period of time less than that for a permanent license (e.g., temporary license to drive within a resort area; temporary license issued to foreign nationals). Short-term permanent licenses are not temporary (e.g., license issued to elderly drivers requiring frequent re-testing).

7 (Learner’s Permit) and **2 (Intermediate Driver License)** held by young drivers awaiting a **1 (Full Driver’s License)** are not to be coded **8 (Temporary License)**.

9 (Unknown License Type) should be used when the type of the license is unknown. **9 (Unknown License Type)** is also used when it is unknown whether the driver had a license or not (e.g., hit-and-run).

Non-CDL License Status Remarks:

0 (Not Licensed) should be used only when it has been reasonably established that the driver is not registered (anywhere). **0 (Not Licensed)** takes precedence over all other Non-CDL License Status attributes. Drivers who have a license but fail to have their license with them at the time of the crash should be coded according to the type (class) of license they possess and the validity of the license. If the police report indicates that the driver has “no license,” the analyst should first determine whether this means that the person was not in possession of his/her license at the time of the crash, or that the driver is not a registered motor vehicle operator. A review of the violations cited section of the police report may yield some clues in this matter. If the person is cited for not possessing his/her license or for not having one, then code this information in variables [D21 Violations Charged](#) and [D24 Related Factors-Driver Level](#). If the analyst is uncertain as to whether or not the person possesses a license, then code **9 (Unknown)** should be used.

1 (Suspended), 2 (Revoked), or 3 (Expired) are used if a **1 (Full Driver License)** * is suspended, revoked, or expired. A **2 (Intermediate Driver License)** may be **1 (Suspended)** or **2 (Revoked)** under certain violations. If **7 (Learner's Permit)** or **2 (Intermediate Driver License)** has expired, then code **3 (Expired)**.

Examples:

If a **1 (Full Driver License)** is revoked or suspended but limited driving is permitted (e.g., to and from work), use the following criteria:

- a. If the crash occurs during permitted times of driving, code Non-CDL License Type as **1 (Full Driver License)** and Status as **6 (Valid)**, code [Compliance with License Restrictions](#) as **1 (Restrictions Complied with)**, and code Related Factors-Driver Level as [19 \(Legally Driving on Suspended or Revoked License\)](#).
- b. If the crash occurs during invalid times for driving, code Non-CDL License Type as **1 (Full Driver License)** and Status as **1 (Suspended)** or **2 (Revoked)**, code [Compliance with License Restrictions](#) as **2 (Restriction Not Complied with)**, and do NOT use Related Factors-Driver Level as [19 \(Legally Driving on Suspended or Revoked License\)](#).

1 (Suspended) takes precedence over all other License Status attributes except **0 (Not Licensed)**.

4 (Canceled or Denied) is used whenever the driver’s official driver record indicates the driver’s license* (1) was canceled; or (2) the driver’s request for license, or an extension of one, was denied.

6 (Valid) refers to any license held by the driver that is valid for a class of vehicle*. If the driver is in violation of some aspect of his/her license (e.g., one of the restrictions) do not consider the license as being not valid. Record the restriction on element [Compliance with License Restrictions](#) if applicable. If the police cite the driver for the violation, then the information would be recorded under elements [D21 Violations Charged](#) and/or [D24 Related Factors-Driver Level](#).

9 (Unknown License Status) should be used when the status of the license is unknown. **9 (Unknown License Status)** is also used when it is unknown whether the driver had a license or not (e.g., hit-and-run).

[See Cross Reference table for coding elements D7 and D10](#), following the remarks section of element [D10 License Compliance with Class of Vehicle](#).

* **NON-CDL privilege only**

IMPORTANT NOTE:

In distinguishing license requirements from restrictions, focus upon whether or not all drivers possessing the type of license are mandated to obey the requirement. If they are, then the requirement is not a restriction, but rather part of the definition of the license. Restrictions, on the other hand, are requirements specific to individual drivers.

Consistency Checks:

Check	IF	THEN
(1H3F)	DRIVER PRESENCE equals 0, 9,	NON-CDL LICENSE STATUS and COMMERCIAL MOTOR VEHICLE LICENSE STATUS must be blank.

(D730)	RELATED FACTORS-DRIVER LEVEL equals 73,	COMPLIANCE WITH LICENSE RESTRICTIONS should equal 2, and NON-CDL LICENSE TYPE should equal 2, 7.

See the following tables for additional guidance for coding Non-CDL License Type/Status for young drivers with GDL License ([7 \(Learner's Permit\)](#) and [2 \(Intermediate Driver Licenses\)](#)) and CDL Drivers:

Coding Scenarios for CDL Licenses

No.	Coding Scenarios for CDL Licenses	D7 Non-CDL Type	D7 Non-CDL Status	D8 CMV Status	D10 Comp w/ Class	D11 Comp w/ Restriction
1.	CDL w/no endorsement valid, driving a CDL vehicle (no endorsement required). Non-CDL License Type/Status is Full License/Valid.	1	6	6	3	0
2.	CDL w/hazardous material endorsement, valid driving CDL vehicle w/hazardous cargo. Non-CDL License Type/Status is Full License/Valid.	1	6	6	3	1
3.	CDL w/hazardous material endorsement, valid driving non-CDL vehicle. Non-CDL License Type/Status is Full License/Valid.	1	6	6	3	0
4.	CDL w/ no endorsements suspended, driving a CDL (double bottom) vehicle. Non-CDL License Type/Status is Full License/Valid.	1	6	1	2	2
5.	CDL w/tanker endorsement, disqualified, driving a tanker. Non-CDL License Type/Status is Full License/Suspended.	1	1	5	2	1
6.	CDL w/tanker endorsement suspended, driving a non-CDL vehicle. Non-CDL License Type/Status is Full License/Valid.	1	6	1	3	0
7.	Non-CDL license driving CDL 24 passenger bus. Non-CDL License Type/Status is Full License/Valid.	1	6	0	2	2
8.	Non-CDL license driving 24 passenger bus. Non-CDL License Type/Status is Full License/Suspended.	1	1	0	2	2
9.	*CDL w/no endorsements valid, driving CDL vehicle (endorsement requirement unknown). Non-CDL License Type/Status is Full License/Suspended.	1	1	6	8	9
10.	*CDL w/no endorsements *CDL w/tanker endorsements valid, driving non-CDL vehicle. Non-CDL License Type/Status is Full License/Suspended.	1	1	6	2	0
11.	*CDL w/tanker endorsements valid, driving non-CDL vehicle. Non-CDL License Type/Status is Full License/Suspended.	1	1	6	2	0

* possible, but unlikely situation

Coding Scenarios for GDL Programs

No.	Coding Scenarios for Graduated Driver's Licensing Program	<u>D7 Non-CDL Type</u>	<u>D7 Non-CDL Status</u>	<u>D11 Comp. w/ Restriction</u>	<u>D24 Related Factors- Driver Level</u>
1.	A 16-year-old driver with a valid Intermediate License driving a vehicle during prohibited driving hours without corrective lenses.	2	6	2	73, 74
2.	A 15-year-old with a valid Learner's Permit driving alone (adult supervision required).	7	6	2	73
3.	A 16-year-old with a valid Intermediate License not complying with seat-belt requirement during permitted daytime driving hours.	2	6	2	73
4.	A 17-year-old driver with a valid Intermediate License. The officer reported there was a 19-year-old non-family passenger, in violation of the State's GDL requirements.	2	6	2	73
5.	An 18-year-old driver with an expired Learner's Permit driving with no violations of GDL restrictions.	7	3	1	00
6.	A 15-year-old with a suspended Learner's Permit is driving without required prescription lenses, and is complying with all GDL restrictions.	7	1	2	74
7.	A driver with a suspended Intermediate Driver's License complying with all GDL restrictions.	2	3	1	00
8.	A 19-year-old with a valid Intermediate License that was extended due to prior GDL violations is driving a truck greater than 26,000 lbs. requiring a CDL during prohibited hours.	2	6	2	73
9.	A driver with a valid Full Driver's License driving without required corrective lenses.	1	6	2	74

D8 - Commercial Motor Vehicle License Status – FARS Only

FORMAT: 2 numeric

SAS NAME: Vehicle.CDL_STAT

ELEMENT VALUES:

Codes	Attributes
00	No (CDL)
01	Suspended
02	Revoked
03	Expired
04	Canceled or Denied
05	<u>Disqualified</u>
06	<u>Valid</u>
07	<u>Commercial Learner's Permit (CLP)</u>
08	<u>Other - Not Valid</u>
99	<u>Unknown License Status</u>

Definition: This element indicates the status for a driver's Commercial Driver's License (CDL) if applicable.

Remarks: This element indicates the status for a driver's Commercial Driver's License (CDL).

As of April 1, 1992, all States require a driver to have a CDL for driving a **commercial motor vehicle in excess of 26,000 pounds**; or for transporting hazardous materials in sufficient amounts to be placarded; or for transporting 16 or more passengers, including the driver.

See the [Coding Scenarios for CDL Licenses table](#) for guidance on coding this element and related driver status elements.

05 (Disqualified) is used for commercial drivers who have their CDL privilege taken away for violations against the Federal regulations. Although similar to suspension, the reasons for "disqualification" of a CDL may differ from State suspension reasons.

06 (Valid) refers to a CDL official record status that authorizes the driver to operate a class of a commercial motor vehicle.

07 (Commercial Learner's Permit [CLP]) means a permit issued to an individual by a State or other jurisdiction of domicile, which, when carried with a valid driver's license issued by the same State or jurisdiction, authorizes the individual to operate a class of a commercial motor vehicle for purposes of behind-the-wheel training. When issued to a CDL holder, a CLP serves as authorization for behind-the-wheel training in a CMV for which the holder's current CDL is not valid.

08 (Other - Not Valid) should be used when a CDL is surrendered or not valid due to the lack of medical clearance.

99 (Unknown License Status) should be used when the status of the CDL license is unknown or when it is unknown whether the driver had a CDL license or not (e.g., hit-and-run).

Consistency Checks:

Check	IF	THEN
(1H3F)	DRIVER PRESENCE equals 0, 9,	NON-CDL LICENSE STATUS and COMMERCIAL MOTOR VEHICLE LICENSE STATUS must be blank.
(1IOP)	DRIVER'S LICENSE STATE equals 99,	NON-CDL LICENSE STATUS must not equal 0-4, 6, and COMMERCIAL MOTOR VEHICLE LICENSE STATUS must not 00-08.
(5I1P)	NON-CDL LICENSE STATUS for this person equals 9,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS should equal 99.
(6IOP)	NON-CDL LICENSE STATUS equals 9, and COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 00,	COMPLIANCE WITH LICENSE RESTRICTIONS must not equal 1-3.
(7KOP)	any VIOLATIONS CHARGED equals 71,	NON-CDL LICENSE STATUS must equal 0, 1, 2, or COMMERCIAL MOTOR VEHICLE LICENSE STATUS must equal 01, 02, 05.
(BNOP)	DRIVER PRESENCE equals 0, 9,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS must be blank.
(CCOP)	COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 00, 99,	COMPLIANCE WITH CDL ENDORSEMENTS must not equal 1.
(D060)	NON-CDL LICENSE STATUS equals 1-4, 6, or COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 1-8, and PERSON TYPE equals 01,	AGE should not be less than 015.
(D160)	NON-CDL LICENSE STATUS does not equal 9, or COMMERCIAL MOTOR VEHICLE LICENSE STATUS does not equal 99,	DRIVER'S should not equal 99999.
(D260)	NON-CDL LICENSE STATUS equals 9, or COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 99,	COMPLIANCE WITH LICENSE RESTRICTIONS should not equal 0.
(D270)	BODY TYPE equals 50-52, 55, 63, 66, 72, or HM1 equals 2,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 00.
(D280)	VEHICLE CONFIGURATION equals 05-08, 21, or HM1 equals 2,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 00.
(D300)	HM2 equals 2,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 00 or 99.
(D340)	NON-CDL LICENSE STATUS equals 1-4, 6, 9, or COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 01-08, 99,	LICENSE COMPLIANCE WITH CLASS OF VEHICLE should not equal 0.
(D420)	COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 00,	COMPLIANCE WITH CDL ENDORSEMENTS should not equal 1-3.
(D430)	COMPLIANCE WITH CDL ENDORSEMENTS equals 1-3,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 00.
(D440)	COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 00,	BODY TYPE should not equal 50-52, 55, 63, 66, 72, and HM2 should not equal 2.
(D450)	COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 00,	VEHICLE CONFIGURATION should not equal 05-08, 21, and HM2 should not equal 2.

Check	IF	THEN
(D460)	COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 99,	COMPLIANCE WITH CDL ENDORSEMENTS should equal 0, 3, 9.
(V090)	HM1 equals 2,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS should equal 06, 99.
(V100)	HM1 equals 2, and RELATED FACTORS-DRIVER LEVEL does not equal 19,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 01, 02, 05.

D9 - Compliance With CDL Endorsements – FARS Only

FORMAT: 1 numeric

SAS NAME: Vehicle.L_ENDORS

ELEMENT VALUES:

Codes	Attributes
0	No Endorsements Required for the vehicle
1	Endorsement(s) Required, complied with
2	Endorsement(s) Required, not complied with
3	Endorsement(s) Required, compliance unknown
9	Unknown, if required

Definition: This element indicates whether the vehicle driven at the time of the crash requires endorsement(s) on a Commercial Driver's License (CDL) and whether this driver is complying with the CDL endorsements.

Remarks: These endorsements include double/triple bottoms, passenger vehicles with 16 passengers, tank, hazardous materials, combined tank/hazardous materials, and others. This element is to be coded independently from CDL Status. The driver is not automatically failing to comply with a CDL endorsement by not having a valid CDL. See the [Guidance on Coding This Element per License Type and Vehicle](#) section below.

0 (No Endorsements Required for the vehicle) is used when this vehicle requires no special endorsement on a CDL or requires no CDL to operate.

1 (Endorsement(s) Required, complied with) is used when this vehicle requires a CDL and requires a particular endorsement or set of endorsements, and the driver has a CDL and is in compliance with the specific endorsements. (Note: The status of the CDL is not used in determining if the driver has complied with the endorsement.)

2 (Endorsement(s) Required, not complied with) is used when this vehicle requires a CDL and particular endorsement(s) on the CDL, but the driver does not have a CDL or does not have the particular endorsement(s) required for the vehicle driven. The driver may have some other endorsement(s). (Note: The status of the CDL is not used in determining if the driver has complied with the endorsement.)

3 (Endorsement(s) Required, compliance unknown) is used when this vehicle requires a CDL and particular endorsement(s) on the CDL, but it is not known whether the driver was in compliance with the particular endorsement(s) or it is not known whether the driver had a CDL.

9 (Unknown, if required) is used when it is unknown if the vehicle requires a CDL, or when it is unknown if an endorsement is required on a CDL to operate the crash vehicle. The driver may or may not have a CDL.

Guidance on Coding This Element per License Type and Vehicle

The tables below provide guidance for coding this element for the type of license and vehicle driven in the crash:

Non-CDL Driver License

VEHICLE DRIVEN IN THE CRASH	D9
Automobile	0
Non-CDL Truck/Bus	0
CDL, Not Requiring Endorsement	0
CDL, Requiring Endorsement	2
CDL, Unknown If Required	9

CDL with No Endorsement

VEHICLE DRIVEN IN THE CRASH	D9
Automobile	0
Non- CDL Truck/Bus	0
CDL, Not Requiring Endorsement	0
CDL, Requiring Endorsement	2
CDL, Unknown If Required	9

CDL with Endorsement

VEHICLE DRIVEN IN THE CRASH	D9
Automobile	0
Non- CDL Truck/Bus	0
CDL, Not Requiring Endorsement	0
CDL, Matching Endorsement	1
CDL, W/Different Endorsement	2
CDL, Unknown If Required	9

CDL, Endorsement Unknown

VEHICLE DRIVEN IN THE CRASH	D9
Automobile	0
Non- CDL Truck/Bus	0
CDL, Not Requiring Endorsement	0
CDL, Requiring Endorsement	3
CDL, Unknown If Required	9

CDL Unknown

VEHICLE DRIVEN IN THE CRASH	D9
Automobile	0
Non- CDL Truck/Bus	0
CDL, Not Requiring Endorsement	0
CDL, Requiring Endorsement	3
CDL, Unknown If Required	9

Not Licensed

VEHICLE DRIVEN IN THE CRASH	D9
Automobile	0
Non- CDL Truck/Bus	0
CDL, Not Requiring Endorsement	0
CDL, Requiring Endorsement	2
CDL, Unknown If Required	9

Consistency Checks:

Check	IF	THEN
(4S1P)	BODY TYPE equals 80-89, 96, and HM1 does not equal 1,	COMPLIANCE WITH CDL ENDORSEMENTS MUST equal 0.
(BIOP)	DRIVER'S LICENSE STATE equals 99,	COMPLIANCE WITH CDL ENDORSEMENTS must not equal 1, 2.
(BJOP)	DRIVER PRESENCE equals 0, 9,	COMPLIANCE WITH LICENSE ENDORSEMENTS must be blank.
(BKOP)	LICENSE COMPLIANCE WITH CLASS OF VEHICLE equals 1,	COMPLIANCE WITH CDL ENDORSEMENTS must not equal 1-3, 9.
(BLOP)	COMPLIANCE WITH CDL ENDORSEMENTS equals 1, and any RELATED FACTORS-DRIVER LEVEL equals 19,	LICENSE COMPLIANCE WITH CLASS OF VEHICLE must equal 3.
(CCOP)	COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 00, 99,	COMPLIANCE WITH CDL ENDORSEMENTS must not equal 1.
(CGOP)	LICENSE COMPLIANCE WITH CLASS OF VEHICLE equals 0,	COMPLIANCE WITH CDL ENDORSEMENTS must not equal 1, 3.
(D310)	HM2 equals 2,	COMPLIANCE WITH CDL ENDORSEMENTS should equal 1-3.
(D410)	LICENSE COMPLIANCE WITH CLASS OF VEHICLE equals 0,	COMPLIANCE WITH CDL ENDORSEMENTS should not equal 1-3, 9.
(D420)	COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 00,	COMPLIANCE WITH CDL ENDORSEMENTS should not equal 1-3.
(D430)	COMPLIANCE WITH CDL ENDORSEMENTS equals 1-3,	COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 00.
(D460)	COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 99,	COMPLIANCE WITH CDL ENDORSEMENTS should equal 0, 3, 9.

D10 - License Compliance with Class of Vehicle - FARS Only

FORMAT: 1 numeric

SAS NAME: Vehicle.L_COMPL

ELEMENT VALUES:

Codes	Attributes
0	Not licensed
1	No license required for this class vehicle
2	No valid license for this class vehicle
3	Valid license for this class vehicle
8	Unknown if CDL and/or CDL endorsement required for this vehicle
9	Unknown

Definition: This element refers to the type of license possessed or not possessed by the driver for the class of vehicle being driven at the time of the crash.

Source: Official driver record and police report. Official driver records take precedence over police reported information.

Remarks: This element is coded according to the driver's [Non-CDL License Status](#) when driving a vehicle not requiring a CDL and to the driver's [Commercial Motor Vehicle License Status](#) when driving a vehicle requiring a CDL.

Also see [Remarks for D7 on military personnel](#).

0 (Not licensed) should be used only when it has been reasonably established that the driver is not licensed (anywhere) and where [D7](#) equals **0 (Not licensed)**. Drivers who have a license but fail to have their license with them at the time of the crash should be coded according to the type of license they possess and the class of vehicle they were driving. **0 (Not licensed)** should not be used in this instance. If the police report indicates that the driver has "no license," the analyst must first determine whether this means the person was not in possession of his/her license at the time of the crash or that the driver is not a licensed motor vehicle operator. A review of the violations cited section of the police report might yield some clues in this matter. If the person is cited for not possessing his/her license or for not having one, then code this information in variables [D21 Violations Charged](#) and [D24 Related Factors-Driver Level](#). If the analyst is uncertain as to whether or not the person possesses a license, then **9 (Unknown)** should be used.

1 (No license required for this class vehicle) means that a license was not required for the vehicle being driven (e.g., mopeds in some States).

2 (No valid license for this class vehicle) may be used for suspended, revoked, canceled, or expired driving privileges. It also refers to **drivers with a valid license** but not for the class of vehicle driven at the time of the crash. As an example, the driver has an "operator's license" when a "public passenger" type of license is required. For this driver, **2 (No valid license for this class vehicle)** should be coded. Another common situation occurs when a separate license is required for a motorcycle. If the driver possesses a valid license for a passenger car but not for the motorcycle, then **2 (No valid license for this class vehicle)** should be used if the driver was involved in this crash while driving a motorcycle.

A license (or a portion of the license applicable to the class vehicle driven) that is not in effect because of some action taken by the State, such as suspended, revoked, etc., is not to be coded as valid. Similarly, learner's permits that are not used under the proper conditions (for example, a required licensed driver for

the class of vehicle driven is not present to accompany the driver involved) are not to be coded as valid either.

2 (No valid license for this class vehicle) should be used for suspended, revoked, disqualified, canceled, or expired CDL licenses when the vehicle requires a CDL (see table for [Coding Scenarios for CDL Licenses](#)).

3 (Valid license for this class vehicle) refers to the class of vehicle being driven. As an example, the driver has a “motorcycle” driver’s license only and was driving a motorcycle at the time of the crash; **3 (Valid license for this class vehicle)** should be used. On the other hand, a driver might possess a multiple-class license allowing him or her to drive a passenger car as well as a motorcycle. If the vehicle being driven at the time of the crash is a passenger car, also code this element **3 (Valid license for this class vehicle)**. If the vehicle driver requires a CDL and the CDL status is valid, use **3 (Valid license for this class vehicle)**.

8 (Unknown if CDL and/or CDL endorsement required for the vehicle) should be used if it cannot be determined if the vehicle driven requires a CDL or CDL endorsement. There should be sufficient cause to suspect the need for a CDL or CDL endorsement to use this code, such as the vehicle’s size (26,001 lbs. or more), configuration (tractor/trailer, combinations, tankers, etc.), or possibly hauling hazardous cargo.

9 (Unknown) should be used when the driver has a license but the type or validity are uncertain or if it is unknown whether the driver had a license or not (e.g., hit-and-run).

A cross-reference table for coding variables D7 and D10 follows. Consult this table only when the driver is operating a vehicle that does not require a CDL.

Cross Reference Table for [D7](#) and D10:

D10 (License Compliance with Class of Vehicle)

D7 (Status)	0	1	2	3	8	9
0	Y	Y	N	N	N	N
1	N	Y	Y	N	N	N
2	N	Y	Y	N	N	N
3	N	Y	Y	N	N	N
4	N	Y	Y	N	N	N
6	N	Y	Y	Y	N	Y
9	N	Y	N	N	N	Y

Y = Valid Combination

N = Invalid Combination

REMINDER: [D7](#) applies to any license entry in the driver’s record (except CDL). D10 applies to this vehicle only.

Consistency Checks:

Check	IF	THEN
(1H2F)	DRIVER PRESENCE equals 0, 9,	LICENSE COMPLIANCE WITH CLASS OF VEHICLE must be blank.
(1KOP)	DRIVER'S LICENSE STATE equals 99,	LICENSE COMPLIANCE WITH CLASS OF VEHICLE must not equal 0-3.
(6LOP)	COMPLIANCE WITH LICENSE RESTRICTIONS equals 1, and RELATED FACTORS-DRIVER LEVEL equals 19,	LICENSE COMPLIANCE WITH CLASS OF VEHICLE must equal 3.
(8LOP)	LICENSE COMPLIANCE WITH CLASS OF VEHICLE equals 0-2, 9,	RELATED FACTORS-DRIVER LEVEL must not equal 19.
(9JOP)	LICENSE COMPLIANCE WITH CLASS OF VEHICLE equals 0, 1,	COMPLIANCE WITH LICENSE RESTRICTIONS must not equal 1-3, 9.
(BKOP)	LICENSE COMPLIANCE WITH CLASS OF VEHICLE equals 1,	COMPLIANCE WITH CDL ENDORSEMENTS must not equal 1-3, 9.
(BLOP)	COMPLIANCE WITH CDL ENDORSEMENTS equals 1, and any RELATED FACTORS-DRIVER LEVEL equals 19,	LICENSE COMPLIANCE WITH CLASS OF VEHICLE must equal 3.
(CGOP)	LICENSE COMPLIANCE WITH CLASS OF VEHICLE equals 0,	COMPLIANCE WITH CDL ENDORSEMENTS must not equal 1, 3.
(D340)	NON-CDL LICENSE STATUS equals 1-4, 6, 9, or COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 01-08, 99,	LICENSE COMPLIANCE WITH CLASS OF VEHICLE should not equal 0.
(D380)	NON-CDL LICENSE STATUS equals 9,	LICENSE COMPLIANCE WITH CLASS OF VEHICLE should equal 1, 9.
(D390)	NON-CDL LICENSE STATUS equals 0,	LICENSE COMPLIANCE WITH CLASS OF VEHICLE should not equal 2, 3, 8, 9.
(D400)	NON-CDL LICENSE STATUS equals 0-4,	LICENSE COMPLIANCE WITH CLASS OF VEHICLE should not equal 3, 8, 9.
(D410)	LICENSE COMPLIANCE WITH CLASS OF VEHICLE equals 0,	COMPLIANCE WITH CDL ENDORSEMENTS should not equal 1-3, 9.

D11 - Compliance with License Restrictions – FARS Only

FORMAT: 1 numeric

SAS NAME: Vehicle.L_RESTRI

ELEMENT VALUES:

Codes	Attributes
0	No Restrictions or Not Applicable
1	Restrictions Complied With
2	Restrictions Not Complied With
3	Restrictions, Compliance Unknown
9	Unknown

Definition: This element identifies if a driver was compliant with restrictions on their license.

Remarks: Refers to both physical restrictions (corrective lenses, automatic transmission, etc.) and imposed restrictions (limited driving). Starting in 2004, it also refers to any limitations imposed on Learner's Permits and Intermediate Licenses in States with graduated driver licensing (GDL) programs. (e.g., driving during prohibited periods [midnight to 5 AM]; driving without adult supervision, etc.). (See [Coding Scenarios for GDL Licensing Program](#) table.)

Code all applicable restrictions regardless of license status.

Examples:

If a [Non-CDL License Type](#) of **1 (Full Driver License)** is revoked or suspended but limited driving is permitted (e.g., to and from work), use the following criteria:

- a. If the crash occurs during permitted times of driving, code [Non-CDL License Type](#) as **1 (Full Driver License)** and Status as **6 (Valid)**, code Compliance with License Restrictions as [1 \(Restrictions Complied with\)](#), and code Related Factors-Driver Level as [19 \(Legally Driving on Suspended or Revoked License\)](#).
- b. If the crash occurs during invalid times for driving, code [Non-CDL License Type](#) as **1 (Full Driver License)** and Status as **1 (Suspended)** or **2 (Revoked)**, code Compliance with License Restrictions as [2 \(Restriction Not Complied with\)](#), and do NOT use Related Factors-Driver Level as [19 \(Legally Driving on Suspended or Revoked License\)](#).

If due to a CDL, a driver has more than one license restriction, code compliance for the most appropriate license restrictions based on the vehicle being driven at the time of the crash. (i.e. – if vehicle being driven requires a CDL, use the CDL license restrictions).

0 (No Restrictions or Not Applicable) is used when the driver has no restrictions on their license, when the driver is unlicensed or when they are operating a vehicle that does not require a license.

1 (Restrictions Complied With) is used when the driver is in compliance with the restrictions for their driver's license.

2 (Restrictions Not Complied With) is used when the driver is not compliant with the restrictions for their driver's license.

3 (Restrictions, Compliance Unknown) is used when it is known that this driver has restrictions on their license but compliance is not known.

9 (Unknown) is used when it is unknown if the driver is licensed or when it is unknown if a licensed driver had restrictions.

Consistency Checks:

Check	IF	THEN
(1H4F)	DRIVER PRESENCE equals 0, 9,	COMPLIANCE WITH LICENSE RESTRICTIONS must be blank.
(2IOP)	DRIVER'S LICENSE STATE equals 99,	COMPLIANCE WITH LICENSE RESTRICTIONS must not equal 0-3.
(5IOP)	NON-CDL LICENSE STATUS equals 0,	COMPLIANCE WITH LICENSE RESTRICTIONS must not equal 1-3, 9.
(6IOP)	NON-CDL LICENSE STATUS equals 9, and COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 00,	COMPLIANCE WITH LICENSE RESTRICTIONS must not equal 1-3.
(6LOP)	COMPLIANCE WITH LICENSE RESTRICTIONS equals 1, and RELATED FACTORS-DRIVER LEVEL equals 19,	LICENSE COMPLIANCE WITH CLASS OF VEHICLE must equal 3.
(7IOP)	COMPLIANCE WITH LICENSE RESTRICTIONS equals 1, and RELATED FACTORS-DRIVER LEVEL equals 19,	NON-CDL LICENSE STATUS must equal 6.
(8J2P)	RELATED FACTORS-DRIVER LEVEL equals 73, 74,	COMPLIANCE WITH LICENSE RESTRICTIONS must equal 2.
(9JOP)	LICENSE COMPLIANCE WITH CLASS OF VEHICLE equals 0, 1,	COMPLIANCE WITH LICENSE RESTRICTIONS must not equal 1-3, 9.
(D260)	NON-CDL LICENSE STATUS equals 9, or COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 99,	COMPLIANCE WITH LICENSE RESTRICTIONS should not equal 0.
(D690)	NON-CDL LICENSE TYPE equals 2, 7, and COMPLIANCE WITH LICENSE RESTRICTIONS equals 2,	RELATED FACTORS-DRIVER LEVEL should equal 73, 74.
(D700)	NON-CDL LICENSE TYPE equals 1, and COMPLIANCE WITH LICENSE RESTRICTIONS equals 2,	RELATED FACTORS-DRIVER LEVEL should equal 74.
(D730)	RELATED FACTORS-DRIVER LEVEL equals 73,	COMPLIANCE WITH LICENSE RESTRICTIONS should equal 2, and NON-CDL LICENSE TYPE should equal 2, 7.

D12 - Driver Height – FARS Only

FORMAT: 1 set 1 numeric, 1 set 2 numeric

SAS NAME: Vehicle.DR_HGT

ELEMENT VALUES:

FEET

Codes	Attributes
0	See Inches
2-8	Actual Feet
9	Unknown

INCHES

Codes	Attributes
00-11, 24-96	Actual Inches
98	Other
99	Unknown

Definition: This element identifies a driver's height.

Remarks: Use the driver licensing files to code this element. The coroner's report may be used and may contain more current/accurate information.

Code the driver's height in feet and inches, if available. Inches less than 10 must be right-justified with a leading "0" (e.g., nine inches is coded "09"). If Height is only available in total inches, then code INCHES and code FEET as "0."

The tallest Height that can be recorded in total INCHES is 96 inches (8 ft.). The tallest Height that can be recorded in FEET and INCHES is 8 ft. – 11 inches. If the driver is taller than 96 inches, then you must code Height as feet and inches. If the driver is taller than 8 ft. – 11 inches, then you must code the DRIVER HEIGHT as "Other" (0 FEET, 98 INCHES).

DRIVER HEIGHT less than "3 Feet" or greater than "7 Feet – 0 Inches," or less than "36 Inches" or greater than "0 Feet – 84 Inches" will raise an error flag.

Consistency Checks:

Check	IF	THEN
(1HDF)	DRIVER PRESENCE equals 0, 9,	DRIVER HEIGHT (feet and inches) must equal blank.
(4H1P)	DRIVER HEIGHT/INCHES is less than 12,	DRIVER HEIGHT/FEET must not be blank nor equal to 0.
(4H2P)	DRIVER HEIGHT/INCHES is greater than 11,	DRIVER HEIGHT/FEET must equal 0.
(4H3P)	DRIVER HEIGHT/FEET is 2-8,	DRIVER HEIGHT/ INCHES must equal 00-11.
(4H4P)	DRIVER HEIGHT/FEET equals 9,	DRIVER HEIGHT/INCHES must equal 99.
(4H5P)	DRIVER HEIGHT/INCHES equals 99,	DRIVER HEIGHT/FEET must equal 9.
(4H6P)	DRIVER HEIGHT/INCHES equals 98,	DRIVER HEIGHT/FEET must equal 0.
(4H7P)	DRIVER HEIGHT/FEET is 0,	DRIVER HEIGHT/INCHES must equal 24-96, 98.
(D600)	DRIVER HEIGHT/INCHES is greater than 11,	DRIVER HEIGHT/INCHES should not be less than 48.
(D610)	DRIVER HEIGHT/FEET is not blank and not equal to 0,	DRIVER HEIGHT/FEET should not be less than 3.

Check	IF	THEN
(U260)	UNLIKELY: DRIVER HEIGHT (in feet) is less than 3 feet or greater than 7 feet; verify data.	--
(U280)	UNLIKELY: DRIVER HEIGHT is less than 36 inches or greater than 84 inches, verify data.	--

D13 - Driver Weight – FARS Only

FORMAT: 3 numeric

SAS NAME: Vehicle.DR_WGT

ELEMENT VALUES:

Codes	Attributes
040-700	Actual weight in pounds
998	Other
999	Unknown

Definition: This element identifies a driver's weight.

Remarks: Use the driver licensing files to code this element. The coroner's report may be used and may contain more current/accurate information.

Code the driver's weight in pounds, if available.

Weight should be right justified.

Weights less than 100 lbs. must be coded with a leading "0" in the left-most position (e.g., 98 lbs. is coded "098").

DRIVER WEIGHT less than 50 lbs. or greater than 399 lbs. will raise an error flag.

Consistency Checks:

Check	IF	THEN
(1HEF)	DRIVER PRESENCE equals 0, 9,	DRIVER WEIGHT must equal blank.
(U290)	UNLIKELY: DRIVER WEIGHT is less than 50 lbs. or greater than 399 lbs., verify data.	--

D14, D15, D16, D17, D18 - Driver Level Counters – FARS Only

[D14 - Previous Recorded Crashes*](#)

[D15 - Previous Recorded Suspensions, Revocations, and Withdrawals*](#)

[D16 - Previous DWI Convictions*](#)

[D17 - Previous Speeding Convictions*](#)

[D18 - Previous Other Moving Violation Convictions*](#)

FORMAT: 2 numeric for each element

SAS NAME: Vehicle.PREV_ACC, Vehicle.PREV_SUS, Vehicle.PREV_DWI, Vehicle.PREV_SPD, Vehicle.PREV_OTH
ELEMENT VALUES:

Codes	Attributes
00	<u>None</u>
01-97	<u>Actual Value</u>
98	Crashes not reported on Driving Record (valid only for <u>Previous Recorded Crashes</u>)
99	<u>Unknown</u>

D14 Definition for Previous Recorded Crashes: This element records any previous crashes for this driver. Count only events occurring within **five years** from the crash date.

D15 Definitions for Previous Recorded Suspensions, Revocations, and Withdrawals:

Subfield 1: Previous Underage Administrative Per Se for BAC:

This subfield records any underage pre-conviction administrative license suspension, revocation, or withdrawal in the previous five years including those for zero tolerance alcohol violations while driving or refusing to submit to chemical testing. This subfield is only for administrative actions associated with alcohol. These are NOT BAC CONVICTIONS.

Subfield 2: Previous Administrative Per Se for BAC (Not Underage):

This subfield records the count of previous pre-conviction administratively imposed suspensions, revocations, or withdrawals within the previous five years for driving with a BAC above a specified limit or refusing to submit to chemical testing. This subfield is only for administrative actions associated with alcohol. These are NOT BAC CONVICTIONS.

Subfield 3: Previous Recorded Other Suspensions, Revocations, or Withdrawals:

This subfield records any previous license suspensions, revocations, or withdrawals for this driver other than Administrative action for BAC violations. This subfield would include administrative actions associated with drugged driving. Count only the events occurring within five years from the crash date. If it can be identified on the driving record, do not include in this count recorded actions resulting from non-traffic related issues or offenses (e.g., failure to pay child support, failure to appear in court for a non-driving offense, a suspension imposed for a drug-related offense not involving the operation of a motor vehicle). Also note that “cancellation” of a CDL license is not counted here. If a driver has been DISQUALIFIED for a CDL, record this here.

D16 Definition for Previous DWI Convictions: This element records any previous DWI convictions for this driver. Count only the events occurring within **five years** from the crash date.

D17 Definition for Previous Speeding Convictions: This element records any previous Speeding convictions for this driver. Count only the events occurring within **five years** from the crash date.

D18 Definition for Previous Other Moving Violation Convictions: This element records any other previous moving violation convictions for this driver. Count only the events occurring within **5 years** from the crash date. This count excludes non-moving violations noted in the driver history. Examples include, registration or title violations, operating a motor vehicle without insurance, failure to pay required toll, improper/illegal parking, leaving child unattended in vehicle, driving on a suspended/revoked license, etc.

Remarks: *DO NOT* include the current crash in any of the counters.

Remember there is a difference between a violation and a conviction. The violation is not counted in [Previous DWI](#), [Previous Speeding](#), and [Previous Other Moving Violation Convictions](#). These elements refer ONLY TO CONVICTIONS. Both convictions and violations appear on driver records in many States. Be careful that you code the conviction dates and NOT the violation dates.

DWI refers to both alcohol and drug convictions.

When you are responding to another State's request for driver data, do the following:

1. In the counters, record both in-state and out-of-state convictions, crashes, suspensions, and revocations that appear on your State's record.
2. List out-of-state activity that is included in the counters in the area provided on the Out-of-State Driver Data Response through MDE.

Drivers can have a driving record or driver's license from more than one State. When you are coding the driver level counter elements ([Crashes](#), [Suspensions](#), [Revocations](#), [DWI](#), [Speeding](#), and [Other Moving Violation Convictions](#)), be sure to combine distinct events from all of the records you have. Be careful not to double-count the same event. Also use Related Factors – Driver Level [89 \(Driver has a Driving Record or Driver's License from More Than One State\)](#) when this situation occurs.

[PREVIOUS OTHER MOVING VIOLATION CONVICTIONS](#) includes all other motor vehicle convictions. Some examples of convictions include:

- running a red light,
- reckless driving,
- improper lane changing,
- failure to yield, etc.

00 (None) indicates no counts of the indicated type appear on the driving history record.

01-97 (Actual Value) Record the actual count of events of the indicated type recorded on the driver history within the previous five years.

99 (Unknown) indicates the driver appears to be licensed but a driver history cannot be obtained or accessed. If any counter equals 99, all counters must equal 99.

* For Element _____, Values greater than _____ are unlikely and will raise an error flag:

Element	Value
PREVIOUS RECORDED CRASHES	8
Any Subfield of PREVIOUS RECORDED SUSPENSIONS AND REVOCATIONS	10
PREVIOUS DWI CONVICTIONS	8
PREVIOUS SPEEDING CONVICTIONS	8
PREVIOUS OTHER MOVING VIOLATION CONVICTIONS	8

Make sure you know what constitutes a MOVING VIOLATION in your State. The DMV should be able to help you determine these.

Consistency Checks:

Check	IF	THEN
(1H7F)	DRIVER PRESENCE equals 0, 9,	PREVIOUS RECORDED CRASHES must be blank.
(1H8F)	DRIVER PRESENCE equals 0, 9,	<i>all three Subfields of</i> PREVIOUS RECORDED SUSPENSIONS AND REVOCATIONS must be blank.
(1H9F)	DRIVER PRESENCE equals 0, 9,	PREVIOUS DWI CONVICTIONS must be blank.
(1H0F)	DRIVER PRESENCE equals 0, 9,	PREVIOUS SPEEDING CONVICTIONS must be blank.
(1HAF)	DRIVER PRESENCE equals 0, 9,	PREVIOUS OTHER MOVING VIOLATION CONVICTIONS must be blank.
(1J0P)	any counter equals 99,	all counters must equal 99.
(1J1P)	any counter equals 99,	DATE OF LAST CRASH, SUSPENSION, CONVICTION must equal 999999.
(1J2P)	any counter equals 99,	DATE OF FIRST CRASH, SUSPENSION, CONVICTION must equal 999999.
(2J0P)	all counters are not blanks and PREVIOUS RECORDED CRASHES is not equal to 98 and any counter are not equal to 00, 99,	DATE OF LAST CRASH, SUSPENSION, CONVICTION must not equal 000000, 999999.
(2J1P)	all counters are not blanks and PREVIOUS RECORDED CRASHES is not equal to 98 and any counter are not equal to 00, 99,	DATE OF FIRST CRASH, SUSPENSION, CONVICTION must not equal 000000, 999999.
(3I1P)	DRIVER'S LICENSE STATE equals 99,	all driver history counters PREVIOUS RECORDED CRASHES must equal 99.
(3I2P)	DRIVER'S LICENSE STATE equals 98 , 99,	then all driver history counters must equal 99.
(3I3P)	DRIVER'S LICENSE STATE equals 99,	all driver history counters PREVIOUS DWI CONVICTIONS must equal 99.
(3I4P)	DRIVER'S LICENSE STATE equals 99,	all driver history counters PREVIOUS SPEEDING CONVICTIONS must equal 99.
(3I5P)	DRIVER'S LICENSE STATE equals 99,	all driver history counters PREVIOUS OTHER MOVING VIOLATION CONVICTIONS must equal 99.
(4J0P)	all counters are not blanks and the sum of all counters less than 98 is equal to 1,	DATE OF LAST CRASH, SUSPENSION, CONVICTION must equal DATE OF FIRST CRASH, SUSPENSION, CONVICTION.
(CJ00)	PREVIOUS RECORDED CRASHES equals 98,	DRIVER'S LICENSE STATE should equal 09, 13, 28, 30, 35, 49.
(CJ01)	any driver history counter is not equal to 99,	DRIVER'S LICENSE STATE must not be 96, 97, 98, or 99.
(D010)	DRIVER'S LICENSE STATE equals 96, 97,	PREVIOUS RECORDED CRASHES should equal 99.
(D020)	DRIVER'S LICENSE STATE equals 96, 97,	<i>all three Subfields of</i> PREVIOUS RECORDED SUSPENSIONS AND REVOCATIONS should equal 99.
(D030)	DRIVER'S LICENSE STATE equals 96, 97,	PREVIOUS DWI CONVICTIONS should equal 99.

Check	IF	THEN
(D040)	DRIVER'S LICENSE STATE equals 96, 97,	PREVIOUS SPEEDING CONVICTIONS should equal 99.
(D050)	DRIVER'S LICENSE STATE equals 96, 97,	PREVIOUS OTHER MOVING VIOLATION CONVICTIONS should equal 99.
(D100)	NON-CDL LICENSE STATUS equals 9,	all driver history counters PREVIOUS RECORDED CRASHES should equal 99.
(D110)	NON-CDL LICENSE STATUS equals 9,	all driver history counters should equal 99.
(D120)	NON-CDL LICENSE STATUS equals 9,	all driver history counters PREVIOUS DWI CONVICTIONS should equal 99.
(D130)	NON-CDL LICENSE STATUS equals 9,	all driver history counters PREVIOUS SPEEDING CONVICTIONS should equal 99.
(D140)	NON-CDL LICENSE STATUS equals 9,	all driver history counters PREVIOUS OTHER MOVING VIOLATION CONVICTIONS should equal 99.
(D480)	DRIVER'S LICENSE STATE equals 09, 13, 28, 30, 35, 49,	PREVIOUS RECORDED CRASHES should equal 98.
(U210)	UNLIKELY: PREVIOUS RECORDED CRASHES is greater than 8 and less than 98.	--
(U220)	UNLIKELY: any Subfield of PREVIOUS RECORDED SUSPENSIONS AND REVOCATIONS is greater than 10 and less than 98.	--
(U230)	UNLIKELY: PREVIOUS DWI CONVICTIONS is greater than 8 and less than 98.	--
(U240)	UNLIKELY: PREVIOUS SPEEDING CONVICTIONS is greater than 8 and less than 98.	--
(U250)	UNLIKELY: PREVIOUS OTHER MOVING VIOLATION CONVICTIONS is greater than 8 and less than 98.	--

D19, D20 - Date of First and Last Crash, Suspension, Conviction - FARS Only

FORMAT: 1 set 2 numeric, 1 set 4 numeric for each element.

SAS NAME: Vehicle.FIRST_MO, Vehicle.FIRST_YR/Vehicle.LAST_MO, Vehicle.LAST_YR

ELEMENT VALUES:

MONTH

Codes	Attributes
00	No Record
01-12	Actual Month
99	Unknown

YEAR

Codes	Attributes
0000	No Record
--	All 4 Digits of Actual Year
9999	Unknown

Definition for Date of First Crash, Suspension, Conviction: This element identifies the date of the first crash, suspension, or conviction recorded in elements [D14 through D18](#). Count only dates of events occurring within **five years** from the crash date.

Definition for Date of Last Crash, Suspension, Conviction: This element identifies the date of the last crash, suspension, or conviction recorded in elements [D14 through D18](#). Count only dates of events occurring within **five years** from the crash date.

Remarks: If it can be identified on the driving record, do not include recorded suspensions and revocations resulting from non-traffic related issues or offenses (e.g., failure to pay child support, failure to appear in court for a non-driving offense, a suspension imposed for a drug-related offense not involving the operation of a motor vehicle).

Code only dates of events occurring within **five years** from the crash date. Code the month and year in that order.

This element, although it contains two pieces of information, should be treated as one element. That is never leave month blank without leaving the year blank, and vice versa.

Consistency Checks:

Check	IF	THEN
(1HCF)	DRIVER PRESENCE equals 0, 9,	DATE OF FIRST CRASH, SUSPENSION, CONVICTION must be blank.
(1HBF)	DRIVER PRESENCE equals 0, 9,	DATE OF LAST CRASH, SUSPENSION, CONVICTION must be blank.
(1J1P)	If any counter equals 99,	DATE OF LAST CRASH, SUSPENSION, CONVICTION must equal 999999.
(1J2P)	If any counter equals 99,	DATE OF FIRST CRASH, SUSPENSION, CONVICTION must equal 999999.

Check	IF	THEN
(2JOP)	all counters are not blanks and PREVIOUS RECORDED CRASHES is not equal to 98 and any counter are not equal to 00, 99,	DATE OF LAST CRASH, SUSPENSION, CONVICTION must not equal 000000, 999999.
(2J1P)	all counters are not blanks and PREVIOUS RECORDED CRASHES is not equal to 98 and any counter are not equal to 00, 99,	DATE OF FIRST CRASH, SUSPENSION, CONVICTION must not equal 000000, 999999.
(2KOP)	DATE OF FIRST CRASH, SUSPENSION, CONVICTION must be less than or equal to DATE OF LAST CRASH, SUSPENSION, CONVICTION.	--
(3J1P)	all counters equal 00,	DATE OF FIRST CRASH, SUSPENSION, CONVICTION must equal 000000.
(4JOP)	all counters are not blanks and the sum of all counters less than 98 is equal to 1,	DATE OF LAST CRASH, SUSPENSION, CONVICTION must equal DATE OF FIRST CRASH, SUSPENSION, CONVICTION.
(4KOP)	Month of DATE OF LAST CRASH, SUSPENSION, CONVICTION equals 00,	then Year (of same) must equal 0000.
(4K1P)	Year of DATE OF LAST CRASH, SUSPENSION, CONVICTION equals 0000,	then Month (of same) must equal 00.
(4K2P)	Month of DATE OF FIRST CRASH, SUSPENSION, CONVICTION equals 00,	Year (of same) must equal 0000.
(4K3P)	Year of DATE OF FIRST CRASH, SUSPENSION, CONVICTION equals 0000,	Month (of same) must equal 00.
(5JOP)	If the sum of all counters less than 98 is greater than fifteen,	DATE OF LAST CRASH, SUSPENSION, CONVICTION must not equal DATE OF FIRST CRASH, SUSPENSION, CONVICTION.
(5KOP)	The Year of DATE OF FIRST CRASH, SUSPENSION, CONVICTION must be within five years of the Year of CRASH DATE.	--
(990P)	any counter equals 99,	all counters and DATE OF LAST CRASH, SUSPENSION, CONVICTION and DATE OF FIRST CRASH, SUSPENSION, CONVICTION must equal 9999.
(D150)	the sum of all counters less than 98 is greater than five but less than fifteen,	DATE OF LAST CRASH, SUSPENSION, CONVICTION should not equal DATE OF FIRST CRASH, SUSPENSION, CONVICTION.

D21 - Violations Charged

FORMAT: 2 numeric. Select all that apply.

SAS NAME: Violatn.MVIOLATN

ELEMENT VALUES:

Reckless/Careless/Hit-and-Run Type Offenses

Codes	Attributes
00	None
01	Manslaughter or homicide
02	Willful reckless driving; driving to endanger; negligent driving
03	Unsafe reckless (not willful, wanton reckless) driving
04	Inattentive, careless, improper driving
10	Use of Telecommunications device
05	Fleeing or eluding police
06	Fail to obey police, fireman, authorized person directing traffic
07	Hit-and-run, fail to stop after crash
08	Fail to give aid, information, wait for police after crash
09	Serious violation resulting in death

Impairment Offenses

Codes	Attributes
11	Driving while intoxicated (alcohol or drugs) or BAC above limit (any detectable BAC for CDLs)
12	Driving while impaired
13	Driving under influence of substance not intended to intoxicate
14	Drinking while operating
15	Illegal possession of alcohol or drugs
16	Driving with detectable alcohol
18	Refusal to submit to chemical test
19	Alcohol, drug, or impairment violations generally

Speed-Related Offenses

Codes	Attributes
21	Racing
22	Speeding (above the speed limit)
23	Speed greater than reasonable and prudent (not necessarily over the limit)
24	Exceeding special limit (e.g., for trucks, buses, cycles, or on bridge, in school zone, etc.)
25	Energy speed (exceeding 55 mph, non-pointable)
26	Driving too slowly
29	Speed related violations, generally

Rules of the Road – Traffic Sign & Signals

Codes	Attributes
31	Fail to stop for red signal
32	Fail to stop for flashing red
33	Violation of turn on red (fail to stop & yield, yield to pedestrians before turning)
34	Fail to obey flashing signal (yellow or red)
35	Fail to obey signal, generally
36	Violate RR grade crossing device/regulations
37	Fail to obey stop sign
38	Fail to obey yield sign
39	Fail to obey traffic control device

Rules of the Road – Turning, Yielding, Signaling

Codes	Attributes
41	Turn in violation of traffic control (disobey signs, turn arrow, or pavement markings; this is not a right-on-red violation)
42	Improper method & position of turn (too wide, wrong lane)
43	Fail to signal for turn or stop
45	Fail to yield to emergency vehicle
46	Fail to yield, generally
48	Enter intersection when space insufficient
49	Turn, yield, signaling violations, generally

Rules of the Road – Wrong Side, Passing & Following

Codes	Attributes
51	Driving wrong way on one-way road
52	Driving on left, wrong side of road, generally
53	Improper, unsafe passing
54	Pass on right (drive off pavement to pass)
55	Pass stopped school bus
56	Fail to give way when overtaken
58	Following too closely
59	Wrong side, passing, following violations, generally

Rules of the Road – Lane Usage

Codes	Attributes
61	Unsafe or prohibited lane change
62	Improper use of lane (enter of 3-lane road, HOV designated lane)
63	Certain traffic to use right lane (trucks, slow-moving, etc.)
66	Motorcycle lane violations (more than two per lane, riding between lanes, etc.)
67	Motorcyclist attached to another vehicle
69	Lane violations, generally

Non-Moving – License and Registration Violations

Codes	Attributes
71	Driving while license withdrawn
72	Other driver license violations
73	Commercial driver violations (log book, hours, permits carried)
74	Vehicle registration violations
75	Fail to carry insurance card
76	Driving uninsured vehicle
79	Non-moving violations, generally

Equipment

Codes	Attributes
81	Lamp violations
82	Brake violations
83	Failure to require restraint use (by self or passengers)
84	Motorcycle equipment violations (helmet, special equipment)
85	Violation of hazardous cargo regulations
86	Size, weight, load violations
89	Equipment violations, generally

License and Registration Violations

Codes	Attributes
91	Parking
92	Theft, unauthorized use of motor vehicle
93	Driving where prohibited (sidewalk, limited access, off truck route)
97	Not Reported
98	Other moving violation (coasting, backing, opening door)
99	Unknown Violation(s)

Definition: This element identifies all violations, citations, and infractions noted as charged to this driver in this crash.

Remarks: This refers to those violations to the Vehicle Code charged as noted in the case materials associated with this crash. Code all violations listed in the case materials for this driver regardless of ownership of the vehicle (e.g., “borrowed,” “fleet,” “rental cars,” etc.).

If you are unable to distinguish between the violations within a specific category, use the General Code (i.e., 09, 19, 29, 39, 49, 59, 69, 79, 89) for that category.

00 (None) is used when there is indication that no violations were charged to this driver or when no violations are noted in the case materials for this driver and that indicates no violations were charged to the driver.

CRSS SPECIAL INSTRUCTION:

In cases where the investigating officer has designated “pending” in the case materials use **00 (None)**.

71 (Driving While License Withdrawn) would include violations for operating a vehicle with a suspended or revoked driver's license or violating the provisions of a work permit.

72 (Other Driver License Violations) is used when the driver is cited for not complying with learner's permit or intermediate driver license restrictions (GDL Restrictions) or if the driver's license has expired. This attribute is also used when the driver has been cited for driving without a license (i.e., never been issued a license). For suspended or revoked, see [71 \(Driving While License Withdrawn\)](#).

97 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **97 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials)
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Unknown Violation(s)) is used when it is known that this driver had one or more violations but the specific violation(s) or violation category(ies) cannot be identified.

Examples:

- If it is known a driver had two violations but they cannot be identified code 99 (Unknown Violation(s)) once.
- If the driver has a known specific violation(s) and other unspecified violation(s) code all the specific violation(s) and code 99 (Unknown Violation(s)) once.

FARS SPECIAL INSTRUCTION:

In cases where the investigating officer has designated “pending,” always follow up whenever possible to confirm a violation was charged before entering [00 \(None\)](#) or [99 \(Unknown\)](#).

Consistency Checks:

Check	IF	THEN
(1H6F)	DRIVER PRESENCE equals 0, 9,	VIOLATIONS CHARGED must be blank.
(6K0P)	VIOLATION CHARGED equals 71,	RELATED FACTORS-DRIVER LEVEL must not equal 19.
(7K1P)	VIOLATIONS CHARGED code 99 must not be used more than once per driver.	--
(8K0P)	VIOLATIONS CHARGED equals 07, 08,	HIT-AND-RUN must not equal 0.
(A270)	any VIOLATIONS CHARGED equals 31-35, 37,	TRAFFIC CONTROL DEVICE should equal 01-20, 98.
(D080)	VIOLATION CHARGED equals 01-06, 09, 31-69, 81-91, 98,	RELATED FACTORS-DRIVER LEVEL should not all equal 00, 99.
(D090)	VIOLATIONS CHARGED equals 11-19, and PERSON TYPE equals 01, 03,	POLICE REPORTED ALCOHOL INVOLVEMENT should equal 1, or POLICE REPORTED DRUG INVOLVEMENT should equal 1.
(D500)	VIOLATIONS CHARGED equals 05,	at least one RELATED FACTORS-CRASH LEVEL should equal 20.

Check	IF	THEN
(D530)	any VIOLATIONS CHARGED equals 36 for a vehicle involved in the FIRST HARMFUL EVENT,	RELATION TO JUNCTION (b) should equal 06.
(D560)	VIOLATIONS CHARGED equals 66,	BODY TYPE should equal 80-83, 88, 89.
(D570)	any VIOLATIONS CHARGED equals 83,	not all occupants of this vehicle should have RESTRAINT SYSTEM/HELMET USE equal to 01-05, 08, 10-12, 16, 19.
(D580)	VIOLATIONS CHARGED equals 85,	HM1 should equal 2.
(D5A0)	VIOLATIONS CHARGED equals 21-25, 29,	SPEEDING RELATED must equal 2-5.
(D5B0)	any VIOLATIONS CHARGED equals 11-13, 18, 19,	at least one CONDITION (IMPAIRMENT) AT TIME OF CRASH (D23) should equal 09.
(D5E0)	any VIOLATIONS CHARGED equals 00 or 97,	only that one code and no other must be coded for this driver.
(U440)	UNLIKELY: VIOLATIONS CHARGED equals 97.	--

Consistency Checks (FARS Only):

Check	IF	THEN
(7KOP)	any VIOLATIONS CHARGED equals 71,	NON-CDL LICENSE STATUS must equal 0, 1, 2, or COMMERCIAL MOTOR VEHICLE LICENSE STATUS must equal 01, 02, 05.
(D350)	VIOLATIONS CHARGED equals 71,	NON-CDL LICENSE STATUS should not equal 0, 3, 6, 9.

D22 - Speeding Related

FORMAT: 1 numeric

SAS NAME: Vehicle.Speedrel

ELEMENT VALUES:

Codes	Attributes
0	<u>No</u>
2	<u>Yes, Racing</u>
3	<u>Yes, Exceeded Speed Limit</u>
4	<u>Yes, Too Fast for Conditions</u>
5	<u>Yes, Specifics Unknown</u>
9	<u>Reported as Unknown</u>

Definition: This element identifies if the driver's speed was related to the crash as identified by law enforcement.

Remarks: If the case materials state that more than one condition was present at the same time, enter the code with the lowest value. For example, if the driver was charged with "Too Fast for Conditions" **and** had a factor recorded for "Exceeded Speed Limit," you would use code **3 (Yes, Exceeded Speed Limit)** because that has a lower value than **4 (Yes, Too Fast for Conditions)**.

Speed can be indicated in the case materials by the police issuing a citation for a speed offense, by their indicating a related or contributing factor, or through a description in the narrative.

0 (No) is used if the case materials do not indicate any speed related charges (violations, citations) and do not indicate any speed related factors.

2 (Yes, Racing) is used when two or more motor vehicles are engaged in a speed-related competition on the trafficway.

3 (Yes, Exceeded Speed Limit) is used when a motor vehicle is traveling above the posted/statutory speed limit on certain designated roadways and/or by certain types of vehicles (e.g., for trucks, buses, motorcycles, on bridge, at night, in school zone, etc.). **Do not compare an estimated travel speed to the posted speed limit for determining the correct attribute for this data element.** This attribute would apply in a case where law enforcement reports actual or estimated speed as unknown and still identifies exceeding the speed limit as a factor.

4 (Yes, Too Fast for Conditions) is used when a vehicle is traveling at a speed that was unsafe for the road, weather, traffic, or other environmental conditions at the time.

5 (Yes, Specifics Unknown) is used when it is known that Speed or Speeding applies but it cannot be determined which of the more specific attributes apply. When the only known information is "traveling at a high rate of speed" or "speed was a factor" default to **5 (Yes, specifics unknown)**.

9 (Reported as Unknown) is used if the police state that the circumstances of the crash are unknown (i.e., it is unknown what factors, if any, may have been present at the time of the crash).

Consistency Checks:

Check	IF	THEN
(1HFF)	DRIVER PRESENCE equals 0, 9,	SPEEDING RELATED must be blank.
(D5A0)	VIOLATIONS CHARGED equals 21-25, 29,	SPEEDING RELATED must equal 2-5.

D23/NM14 - Condition (Impairment) at Time of Crash

FORMAT: 2 numeric. Select all that apply

SAS NAME: Drimpair.DRIMPAIR

ELEMENT VALUES:

Codes	Attributes
00	None/Apparently Normal
01	III, Blackout
02	Asleep or Fatigued
03	Walking with a Cane or Crutches, etc.
04	Paraplegic or in a Wheelchair
05	Impaired Due to Previous Injury
06	Deaf
07	Blind
08	Emotional (Depressed, Angry, Disturbed, etc.)
09	Under the Influence of Alcohol, Drugs, or Medication
10	Physical Impairment – No Details
96	Other Physical Impairment
98	Not Reported
99	Reported as Unknown If Impaired

Definition: This element identifies physical impairments to this driver or non-motorist that may have contributed to the cause of the crash as identified by law enforcement.

Remarks: Select all that apply. These impairments can appear anywhere in the case materials--in the narrative section, in the violations section, in a column entitled "Contributing Factors," or "Driver Action," etc. **See clarification on the use of information provided by witnesses in section [103. Data Sources](#).**

00 (None/Apparently Normal) is used when:

- When the case materials make a positive statement that the individual was apparently normal or "none" was indicated on the police crash report.
- When the case materials do not indicate an impairment in an available field and not reporting an impairment in that field indicates **00 (None/Apparently Normal)**.
- When the investigating officer:
 - is limited in the number of factors that can be displayed
 - and cannot select an impairment in addition to another factor relevant to the crash
 - and some other factor is selected
 - and no other indication of impairment exists in the case materials.
- **For omission of information see [98 \(Not Reported\)](#) guidance below.**

01 (III, Blackout) is used when indicated in the case materials. Enter this attribute even if the source of the illness or loss of consciousness is alcohol or drug related. Use this attribute if the driver or non-motorist had fainted and/or seizures were identified.

02 (Asleep or Fatigued) is used when indicated in the case materials. Also, use this attribute when the investigating officer indicates the person was drowsy or sleepy. Alcohol or other drugs may be the source of this impairment.

03 (Walking with a Cane or Crutches, etc.) is used when non-motorist is walking with a cane, walker, knee scooter, or crutches when indicated in the case materials.

04 (Paraplegic or in a Wheelchair) is used if this person is paraplegic or in a wheelchair. This includes motorized and non-motorized wheelchairs and handicap scooters.

05 (Impaired Due to Previous Injury) is used if the case materials dictate this condition (e.g., if a person is involved in this crash subsequent to his/her involvement in a previous crash in which the person was injured). This attribute should be extremely rare.

06 (Deaf) is used when this condition is attributed to this person in the case materials.

07 (Blind) is used when this condition is attributed to this person in the case materials.

08 (Emotional [Depressed, Angry, Disturbed, etc.]) is used when the person is arguing with someone, is having a disagreement, is depressed, and/or is emotionally upset.

09 (Under the Influence of Alcohol, Drugs, or Medication) is used when the investigating officer indicates that the individual was under the influence of alcohol, drugs, or medication. This attribute excludes interpretation of test results by the analyst/coder.

10 (Physical Impairment-No Details) is used when the case materials indicate a physical impairment existed but provides no further details about the impairment.

96 (Other Physical Impairment) is used when the case materials indicate that a physical impairment was involved but it isn't a listed attribute.

98 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown if Impaired) is used if the investigating officer states that the physical impairment of this person is unknown.

Consistency Checks:

Check	IF	THEN
(4X2F)	any CONDITION (IMPAIRMENT) AT TIME OF CRASH (D23) equals 00 or 98 or 99,	only that one code and no other must be coded for this driver.
(4X4F)	any CONDITION (IMPAIRMENT) AT TIME OF CRASH (D23) equals 09,	POLICE REPORTED ALCOHOL INVOLVEMENT (P16) or POLICE REPORTED DRUG INVOLVEMENT (P19) should equal 1 for this person.
(6H1P)	DRIVER PRESENCE equals 0, 9,	CONDITION (IMPAIRMENT) AT TIME OF CRASH (D23) must be blank.
(B17P)	CONDITION (IMPAIRMENT) AT TIME OF CRASH (D23) equals 09 for this driver,	CRITICAL EVENT: PRECRASH (EVENT) should not equal 08 for this driver's vehicle.
(D5B0)	any VIOLATIONS CHARGED equals 11-13, 18, 19,	at least one CONDITION (IMPAIRMENT) AT TIME OF CRASH (D23) should equal 09.
(U530)	UNLIKELY: <u>any</u> CONDITION (IMPAIRMENT) AT TIME OF CRASH (D23) equals 03, 05, or 07.	--
(U682)	UNLIKELY: CRITICAL EVENT: PRECRASH (EVENT) equals 08 for this vehicle and CONDITION (IMPAIRMENT) AT TIME OF CRASH (D23) does not equal 01 for this vehicle's driver.	--

D24 - Related Factors – Driver Level

FORMAT: 2 numeric occurring 4 times

SAS NAME: Vehicle.DR_SF1, Vehicle.DR_SF2, Vehicle.DR_SF3, Vehicle.DR_SF4

ELEMENT VALUES:

Codes	Attributes
99	Reported as Unknown

*** FARS ONLY ATTRIBUTES**

Definition: This element identifies factors related to this driver expressed by the investigating officer.

Remarks: Code information provided by the investigating officer in the narrative, contributing factors/circumstances field, or citations/violations section on the crash report. This is a nominal list only and does NOT imply a hierarchy. However, if more than four factors apply to this driver, capture those that cannot be collected elsewhere in the data.

NOTE: RELATED FACTORS-DRIVER LEVEL SHOULD BE CODED ONLY FOR “IN-TRANSPORT VEHICLES” ([UNIT TYPE “1”](#)).

RELATED FACTORS FOR MOTOR VEHICLE OCCUPANTS OTHER THAN DRIVERS OF “IN-TRANSPORT” VEHICLES SHOULD BE CODED UNDER [RELATED FACTORS-PERSON \(MV OCCUPANT\) LEVEL](#) (INCLUDING ALL OCCUPANTS IN [UNIT TYPES](#) “2, 3, AND 4.”)

00 (None) is used when no applicable related factors are noted in the case materials, including hit-and-run vehicle drivers when no factors are identified or reported by the officer for this vehicle or driver. Zero-fill all fields. Also, use **00 (None)** to complete the remaining fields when you will be recording less than four driver related factors. DO NOT leave any remaining fields blank.

Physical/Mental Condition:

06 (Careless Driving) is used when the case materials include a factor or note a violation indicating careless driving.

Examples include:

- driving without due care
- operating a motor vehicle in a careless manner
- failure to give full time and attention
- inattentive operation.

08 (Aggressive Driving/Road Rage) is used when the case materials include a factor or note a violation identifying aggressive driving behavior. The officer must use the term “Aggressive” in describing this driver’s behavior. You may encounter the term “Road Rage” used to describe aggressive driving behavior. The two terms are not technically interchangeable but both will be coded here.

***13 (Mentally Challenged)** is used when the case materials identify that the driver has a mental illness or intellectual disorder.

***04 (Reaction to or Failure to Take Drugs/Medication)** is used when the case materials identify that this driver had an allergic reaction to medication/drugs, a reaction to drug interaction (over the counter and/or prescribed), or if there is information identifying that the driver failed to take required medication.

12 (Mother of Dead Fetus/Mother of Infant Born Post Crash) is used when the case materials identify that this driver is the mother of a fetus that died in or as a result of this crash or it is identified that this driver gave birth after the crash whether the child survives or not. Note that for crash classification purposes, a fetus is considered to be part of a pregnant woman rather than a separate individual and, thus, is not counted as a separate occupant in the crash.

Miscellaneous Factors:

***15 (Seat Back Not in Normal Upright Position, Seat Back Reclined)** is used when the case materials identify that this driver’s seat back was not in a normal, safe driving position prior to the crash.

18 (Traveling on Prohibited Trafficways) is used when the case materials identify this driver was driving on an open trafficway that prohibited travel for the kind of vehicle they were operating. For example, driving a moped on an interstate, driving a truck where prohibited, or operating a vehicle with hazardous materials cargo where prohibited. For trucks or slower vehicles using the left lane when prohibited, use [**28 \(Improper Lane Usage\)**](#).

***19 (Legally Driving on Suspended or Revoked License)** is used when the case materials identify this driver's license was suspended/revoked but they were legally driving at the time of the crash. For example, occupational restricted licenses typically allow drivers to drive to work, school, community service, or certain other activities, with restrictions including the times of day, days of week and areas to which they may drive. Drivers whose licenses have been suspended or revoked for certain alcohol- or drug-related offenses can apply for ignition interlock restricted licenses. These licenses permit them to drive if they use an ignition interlock device, which tests breath for alcohol consumption, installed in their car.

20 (Leaving Vehicle Unattended with Engine Running. Leaving Vehicle Unattended in Roadway) is used when the case materials identify this driver took improper actions where their vehicle was left in a location intentionally and the driver was not present in or in close proximity to the vehicle.

Examples include:

- Leaving the vehicle curbside or in a driveway with a running engine.
- Abandoning a non-running vehicle in the middle of traffic.
- "Double-parked"
- "Parked on a bridge or tunnel"
- "Parking within an intersection"

21 (Overloading or Improper Loading of Vehicle with Passengers or Cargo) is used when the case materials identify this driver improperly loaded the vehicle occupants or cargo into or on the vehicle.

Examples include:

- The vehicle had more than 3 passengers in the front seat.
- There were persons riding on the exterior of the vehicle.
- The vehicle was carrying occupants that were sitting or standing on the rails, tailgate of a pickup, or improperly sitting in the bed of a pickup.
- More than one person secured in a belt restraint.
- An unsecured or uncovered load violation.
- The vehicle's trunk was open with extra-large cargo protruding.
- The case materials state the vehicle was overweight, over length, or illegally or improperly oversize.

22 (Towing or Pushing Improperly) is used when the case materials identify this driver was operating the vehicle that was towing another vehicle with an improper connection (e.g., by rope or cable) or was pushing another vehicle in a dangerous manner (e.g., bumper to bumper).

23 (Failure to Dim Lights or to Have Lights on When Required) is used when the case materials identify this driver failed to use proper headlight beams, failed to reduce high beams for an approaching vehicle or when following another vehicle, or used fog lights when prohibited.

Examples include:

- The vehicle has its headlamps adjusted improperly causing glare.
- The vehicle failed to have its headlights on in a tunnel.
- A motorcycle not using lights as required.

24 (Operating Without Required Equipment) is used when the case materials identify this driver was operating the vehicle without a required piece of equipment or with required equipment being inoperable. For seatbelts, child restraints, and motorcycle helmets do not use this attribute when there is indication that an available restraint was not used (i.e., Police Crash Report police crash report Restraint Use box is marked as “Not Used”).

Examples include:

- Defective or no lamps, brakes, mirrors, muffler, flares, wipers, horn, snow tires, chains, etc.
- A vehicle does not have extended side mirrors when required (e.g., when pulling a trailer).
- A vehicle driving in snow without snow tires when required.
- If the seatbelts have been removed from the vehicle.
- If there was no child safety seat(s) in the vehicle when required for the occupant(s).
- For a motorcycle rider that had no helmet with them when required by law.
- If the vehicle failed to have an airbag(s) reinstalled after a prior crash.

***26 (Following Improperly)** is used when the case materials identify this driver followed too closely.

Examples include:

- Following a fire truck too closely.
- Failure to maintain a safe passing distance between trucks.
- Following another vehicle in a caravan too closely to allow entry by a merging vehicle.
- Following too close, generally. Also code for cases where the case materials document the vehicle was following too closely for weather conditions.

NOTE: 26 (Following Improperly) denotes “after or before the process of lane change” while **27 (Improper or Erratic Lane Changing)** signifies “in the process.”

***27 (Improper or Erratic Lane Changing)** is used when the case materials identify this driver was making unsafe lane changes or failed to obey a “no lane change” sign or pavement marking prohibiting lane change. This may also be used in cases where the officer states the vehicle was weaving in and out of traffic.

***28 (Improper Lane Usage)** is used when the case materials identify this driver failed to properly keep their vehicle in the appropriate lane of travel. This attribute does not apply to vehicles that run off the roadway or that cross the median. Also do not use this value for a vehicle that leaves its lane because of a previous impact or at the direction of a flagman or police officer. For situations where the vehicle is on the wrong side as a result of a passing maneuver, see [33 \(Passing Where Prohibited by Posted Signs, Pavement Markings, or School Bus Displaying Warning Not to Pass\)](#). See [51 \(Driving on Wrong Side of Two-Way Trafficway \[Intentional or Unintentional\]\)](#) for Driving on Wrong Side of Road.

Examples include:

- A vehicle that “drove left of center” striking an oncoming vehicle (includes both crossing a painted centerline and failing to maintain the proper side of a 2 lane roadway with no painted centerline.)
- A vehicle that goes straight in a turn lane.
- A vehicle that was using more than one lane on its side of a multi-lane highway.
- Trucks, buses, or slow vehicles failing to keep right for faster moving traffic.

***29 (Intentional Illegal Driving on Road Shoulder, in Ditch, on Sidewalk, or on Median)** is used when the case materials identify this driver was intentionally illegally driving in a location off of the roadway (e.g., shoulder, median, roadside, etc.). This attribute should not be used when the vehicle enters one of these locations as part of an avoidance maneuver or as a result of a critical or harmful event. Also do not use this value for a vehicle that leaves its lane at the direction of a flagman or police officer.

***30 (Making Improper Entry to or Exit from Trafficway)** is used when the case materials identify this driver made an improper entry to or exit from the trafficway. For improper entry of the roadway from a parked or stopped position see [31 \(Starting or Backing Improperly\)](#).

Examples include:

- Driving onto or from a controlled access highway where prohibited.
- A vehicle entering a highway from a roadside location like a front yard, adjacent pasture, or field.
- A vehicle entering a highway on an exit ramp or exiting on an entrance ramp.

***31 (Starting or Backing Improperly)** is used when the case materials identify this driver improperly entered the roadway from a parked or stopped position or improperly backed the vehicle in the roadway.

Examples include:

- Making an unsafe start from a parked position.
- Backing up on a one-way roadway.
- Starting onto a highway from a parked position on the shoulder.

32 (Opening Closure into Moving Traffic or While Vehicle is in Motion) is used when the case materials identify this driver improperly opened their door into moving traffic. This would include opening the trunk while the vehicle is in-transport.

***33 (Passing Where Prohibited by Posted Signs, Pavement Markings, or School Bus Displaying Warning Not to Pass)** is used when the case materials identify this driver passed improperly by executing a passing maneuver where prohibited as designated by traffic controls or rules of the road.

Examples include:

- A vehicle passing a stopped school bus.
- A vehicle crossing over the solid line to pass another vehicle.
- Passing a vehicle stopped to allow a pedestrian movement.

***34 (Passing on Right Side)** is used when the case materials identify this driver was passing on the right side where it was prohibited. Includes passing on the right shoulder, emergency lane, or roadside.

***35 (Passing with Insufficient Distance, or Inadequate Visibility, or Failing to Yield to Overtaking Vehicle)** is used when the case materials identify this driver exercised faulty judgment when passing or being passed.

Examples include:

- A vehicle passing uphill or in a curve that limits visibility.
- Cutting off the other vehicle while passing or being passed.

36 (Operating the Vehicle in an Erratic, Reckless, or Negligent Manner) is used when the case materials identify this driver was operating the vehicle in an erratic, reckless, or negligent manner. These are circumstances where the driver is engaged in a driving behavior with willful or wanton disregard for safety. This attribute can be used in conjunction with other factors but must be explicitly stated on the police record.

Examples include:

- Driving erratically
- Erratic lane changing
- Suddenly changing speed

09 (Emergency Services Personnel) is used when the case materials identify that this driver was a fire fighter, wrecker service worker, or emergency medical service (EMS) personnel working at the time of the crash.

16 (Police or Law Enforcement Officer) is used when the case materials identify this driver was a Federal, State, or local law enforcement officer working at the time of the crash. This attribute also includes military and park police, border patrol, and all other sworn law enforcement officers.

37 (Police Pursuing This Driver or Police Officer in Pursuit) is used when the case materials identify this driver was fleeing from or attempting to elude the police, or this driver is a police officer engaged in a “pursuit” that is active at the time of crash. For a case where both the fleeing driver and pursuing officer are in-contact vehicles, this factor is used for both drivers. Identify the officer using factor [16 \(Police or Law Enforcement Officer\)](#). Also see Related Factors-Crash Level, for use of [20 \(Police Pursuit Involved\)](#).

Definition of Police Pursuit: A pursuit is an event that is initiated when a law enforcement officer, operating an authorized emergency vehicle, gives notice to stop (either through the use of visual or audible emergency signals or a combination of emergency devices) to a motorist who the officer is attempting to apprehend, and that motorist fails to comply with the signal by either maintaining his/her speed, increasing speed, or taking other evasive action to elude the officer’s continued attempts to stop the motorist. A pursuit is terminated when the motorist stops, or when the attempt to apprehend is discontinued by the officer, or at the direction of a competent authority.

***38 (Failure to Yield Right-of-Way)** is used when the case materials identify this driver failed to yield the right-of-way.

Examples include:

- Failure to yield to pedestrian in a crosswalk.
- Failure to yield at an intersection or merge.
- Failure to yield to emergency vehicles.
- Failure to yield to streetcar already in intersection.

***39 (Failure to Obey Actual Traffic Signs, Traffic Control Devices, or Traffic Officers, Failure to Obey Safety Zone Traffic Laws)** is used when the case materials identify this driver failed to obey an applicable traffic control device (**sign or signal**, **traffic officer**, or **traffic safety zone laws**). If a driver stops as required but then fails to yield, use code [38 \(Failure to Yield Right-of-Way\)](#) and not **39 (Failure to Obey Actual Traffic Signs, Traffic Control Devices, or Traffic Officers, Failure to Obey Safety Zone Traffic Laws)**.

Examples include:

- Failure to obey flashing signal.
- Violation of “No Turn On Red.”
- Failure to obey lane use control signal.
- Failure to obey stop signs.
- Failure to obey yield sign (use both codes [38 \(Failure to Yield Right-of-Way\)](#) and **39 (Failure to Obey Actual Traffic Signs, Traffic Control Devices, or Traffic Officers, Failure to Obey Safety Zone Traffic Laws)**).
- Passing around railroad gates.
- When vehicle does not stop when required by a traffic signal.

***40 (Passing Through or Around Barrier)** is used when the case materials identify this driver was driving in a prohibited area (play street, construction, etc.). This would denote “demarcated” areas. For driving around a railroad gate use [39 \(Failure to Obey Actual Traffic Signs, Traffic Control Devices, or Traffic Officers, Failure to Obey Safety Zone Traffic Laws\)](#).

***41 (Failure to Observe Warnings or Instructions on Vehicles Displaying Them)** is used when the case materials identify this driver failed to heed warnings or follow instructions displayed on other vehicles.

Examples include:

- Construction instructions such as arrows directing traffic mounted on a vehicle
- Instructions on or warnings by emergency vehicles (ambulances, fire trucks, police cars)
- Failure to observe a wide right-turn warning on trucks or buses
- Failure to heed hazard lights on a disabled vehicle or a school bus arm

***42 (Failure to Signal Intentions)** is used when the case materials identify this driver failed to signal their intentions. This attribute includes a failure to signal by either lamp turn signal or hand.

***45 (Driving Less Than Posted Minimum)** is used when the case materials identify this driver was driving too slowly, or so as to impede traffic.

***47 (Making Right Turn from Left-Turn Lane, Left Turn from Right-Turn Lane)** is used when the case materials identify this driver was making an improper turn from a turn lane. To distinguish from [27 \(Improper or Erratic Lane Changing\)](#) and [28 \(Improper Lane Usage\)](#), police officer must indicate the driver's intention to turn to use this attribute.

***48 (Making Other Improper Turn)** is used when the case materials identify this driver made a turn that was improper because it was unsafe, poorly executed, or in bad judgment. This attribute excludes turns that are improper because they are prohibited (e.g., No Right on Red, turning left in violation of a traffic signal). A roadway departure is not an indication of an improper turn in and of itself.

Examples include:

- a “too wide” right or left turn
- an unsafe U-turn (from the shoulder, etc.).

50 (Driving Wrong Way on One-Way Trafficway) is used when the case materials identify this driver was driving in the wrong direction on a one-way trafficway. If this is a divided highway, although each side is “one-way,” driving against traffic should be coded as **51 (Driving on Wrong Side of Two-Way Trafficway [Intentional or Unintentional])**. If the vehicle was going the wrong way on an entrance or exit ramp, also use [30 \(Making Improper Entry to or Exit from Trafficway\)](#).

51 (Driving on Wrong Side of Two-Way Trafficway [Intentional or Unintentional]) is used when the case materials identify this driver was established in and driving on the wrong side of the highway. “Unintentional” means they may not be aware they are on the wrong side. For situations where a driver unintentionally crosses the centerline, see [28 \(Improper Lane Usage\)](#). For situations where the vehicle is on the wrong side as a result of a passing maneuver, see [33 \(Passing Where Prohibited by Posted Signs, Pavement Markings, or School Bus Displaying Warning Not to Pass\)](#).

Examples include:

- Driving the wrong way/on the wrong side of a divided trafficway.
- Driving on the wrong side of an undivided trafficway.
- Driving the wrong way on a Rotary Intersection.
- Driving on the left half of approaching bridge or tunnel.

***52 (Operator Inexperience)** is used when the case materials identify this driver lacks experience operating the vehicle they were driving at the time of the crash. Should be expressed by officer, driver, or passenger and not presumed based on age, rental status, or State of residence.

Examples include:

- A new/young recently licensed driver
- A driver inexperienced in the operation of a large truck or bus (based on the judgment of the police officer)
- A person driving a rental car where they are unfamiliar with the vehicle

***53 (Unfamiliar with Roadway)** is used when the case materials identify this driver is unfamiliar with the area/location where they were driving when the crash occurred. Should be expressed by officer, driver, or passenger and not presumed based on age, rental status, or State of residence.

Examples include:

- A driver from out-of-state unfamiliar with area.
- A driver operating on a new stretch of road or section of road altered because of construction and/or detour.

54 (Stopped in Roadway [Vehicle Not Abandoned]) is used when the case materials identify this driver stopped their vehicle in the roadway/travel lanes. It is intended to capture an unusual condition where a vehicle is stopped in the roadway with the driver present in or in close proximity to the vehicle. It includes both a vehicle in the process of stopping and “stopped” vehicles. It **excludes** typical “stopping” situations such as stopping in/for traffic, waiting to turn, or stopping for a traffic control.

Examples include:

- A vehicle disabled in a prior crash,
- A vehicle with a flat tire
- A vehicle that stops for debris in the roadway, etc.

55 (Improper Management of Vehicle Controls (SPECIFY)) is used for driver errors related to accelerating/braking/gear selection, etc. (e.g., reverse instead of forward, forward instead of reverse, accelerator instead of brake, unspecified pedal error, etc.).

***Note:** For attributes with a “Specify:” designation, a fill-in text box will open in MDE. This text box should be used to provide additional detail about the attribute selection. Please include a specific reason for this selection.

56 (Object Interference with Vehicle Controls (SPECIFY)) is used for items reported to have interfered with the driver’s operation of the vehicle controls (e.g., footwear interfered with pedals, floor mat interfered with pedals, loose cargo interfered with pedals, etc.).

***Note:** For attributes with a “Specify:” designation, a fill-in text box will open in MDE. This text box should be used to provide additional detail about the attribute selection. Please include a specific reason for this selection.

57 (Driving with Tire-Related Problems) is used when the officer noted this driver was driving with “donut”/spare tire, improperly sized tire(s), driving on run flats in an air-out situation, etc.

58 (Overcorrecting) is used when the case materials identify this driver “overcorrected” based on the judgment of the police officer. This must be stated by the officer in the narrative or police crash report field to be coded. Overcorrecting and Oversteering are technically different but this attribute may be selected for a reported combination of the two (e.g., overcorrecting/oversteering) on the police crash report.

59 (Getting Off/Out of a Vehicle) is used when the case materials identify this driver was attempting to exit the vehicle when involved in the crash. It applies for either moving or non-moving vehicles.

60 (Alcohol and/or Drug Test Refused) is used when the officer notes that this person refused to take an alcohol and/or a drug test. Refusing a test does not necessarily mean that a test was not given. It is possible that after a refusal, the officer may have obtained a warrant or some other authorization to administer a test post-refusal. **This includes when the person initially refuses and later consents.** Because of this, it is possible to code **60 (Alcohol and/or Drug Test Refused)** and also code an actual test with results for the same person.

10 (Looked But Did Not See) is used when the driver is paying attention to driving (not distracted), but does not see the relevant vehicle, object, etc. This attribute should be used when a driver has an opportunity to take some action prior to impact, but the driver takes no action and no distractions apply under Driver Distracted By. This situation frequently occurs when an overtaking vehicle is in the driver's "blind spot" or at intersections when a crossing vehicle is not noticed.

Skidding, Swerving, Sliding Due To:

This set of attributes is applicable to the driver that attempted to avoid one of the following or whose ability to control the vehicle was affected by one of the following.

***77 (Severe Crosswind)** is used when the case materials identify this driver's ability to control the vehicle was affected by severe crosswinds.

***78 (Wind from Passing Truck)** is used when the case materials identify this driver's ability to control the vehicle was affected by winds produced by a passing truck.

***79 (Slippery or Loose Surface)** is used when the case materials identify this driver's ability to control the vehicle was affected by the surface composition of the roadway and/or the condition of that composition. Not to be used when the surface is slippery due to environment conditions such as rain, ice, or snow (see [87 \(Ice, Snow, Slush, Water, Sand, Dirt, Oil, or Wet Leaves on Road\)](#)).

Examples include:

- A slippery surface that is old or worn resulting in loose gravel on the roadway.
- Blacktop that is slick as a newly paved surface.

***80 (Tire Blowout or Flat)** is used when the case materials identify this driver's ability to control the vehicle was affected by a tire blowout or flat.

***81 (Debris or Objects in Road)** is used when the case materials identify this driver attempted to avoid or lost control as a result of debris in the road. Examples would include nails, glass, trash cans, tire retread, trash, dead animals, pile of sand, barricades, etc.

***82 (Ruts, Holes, Bumps in Road)** is used when the case materials identify this driver attempted to avoid or lost control as a result of road surface anomalies such as ruts, holes, dips, or bumps.

***83 (Live Animals in Road)** is used when the case materials identify this driver attempted to avoid or lost control as a result of a live animal(s) in the road.

***84 (Vehicle in Road)** is used when the case materials identify this driver attempted to avoid or lost control as a result of another vehicle in the road. This includes both contact and non-contact vehicles that remain at the scene.

***85 (Phantom Vehicle)** is used when the case materials identify this driver attempted to avoid or lost control as a result of a non-contact vehicle that left the scene as described by the police officer.

***86 (Pedestrian, Pedal Cyclist, or Other Non-Motorist)** is used when the case materials identify this driver attempted to avoid or lost control as a result of a pedestrian, a pedal cyclist (bicyclist), or other type of non-motorist.

***87 (Ice, Snow, Slush, Water, Sand, Dirt, Oil, or Wet Leaves on Road)** is used when the case materials identify this driver's ability to control the vehicle was affected by a substance on the roadway that caused the roadway to be slick, which may interfere with the traction of the vehicle. This attribute does not include part of the roadway composition. For cases involving roadway composition issues, see [79 \(Slippery or Loose Surface\)](#).

***88 (Trailer Fishtailing or Swaying)** is used when the case materials identify this driver's ability to control the vehicle was affected by a trailer fishtailing or swaying. This condition may or may not result in a jackknife.

Special Circumstances (73, 74, 89, 91):

73 (Driver Has Not Complied with Learner's Permit or Intermediate Driver License Restrictions [GDL Restrictions]) is used when the case materials identify this driver was a young driver and was not in compliance with a learner's permit or intermediate driver license restriction under a State's graduated driver's license (GDL) program.

Examples include:

- Nighttime driving restrictions (e.g., midnight until 6 a.m.).
- Unsupervised driving restrictions (e.g., the driver must have a passenger over the age of 21 to legally drive the vehicle).
- Passenger Restriction (e.g., the driver is only allowed one other passenger in the vehicle when driving).

This should **not** be used for restrictions for eyeglasses, lenses, equipment, or other physical restrictions (see **74 (Driver Has Not Complied with Physical or Other Imposed Restrictions [not including GDL Restrictions])**).

***74 (Driver Has Not Complied with Physical or Other Imposed Restrictions (not including GDL Restrictions))** is used when the case materials identify this driver did not comply with physical or other imposed license restrictions.

Examples include:

- Driving without corrective lenses when required.
- Driving without required equipment (e.g., automatic transmission, adaptive controls, etc.).
- Violating special privileges on a suspended/revoked license for other than permitted activities (e.g., driving permitted only to and from work). Not to be used for general "driving on a suspended or revoked license."
- Driving vehicle without "Interlock System" when required.

***89 (Driver has a Driving Record or Driver's License from More than One State)** is used when the case materials identify this driver had any combination of a State or record in more than one State. This is coded regardless of the status of the license or the driving privilege of the driver at the time of the crash.

91 (Non-Traffic Violation Charged [Manslaughter, Homicide, or Other Assault Offense Committed Without Malice]) is used when the case materials identify this driver will receive "Criminal" charges such as intoxicated assault or vehicular manslaughter. It would exclude other criminal offenses such as hit-and-run or failure to render aid at the scene of a crash.

Unknown

99 (Reported as Unknown) is used when the circumstances surrounding the crash are unknown and reported as “unknown” by the investigating officer. In these circumstances, nine-fill all fields. If **99 (Reported as Unknown)** is used for any field, ALL fields must be **99 (Reported as Unknown)**. DO NOT leave any remaining fields blank.

FARS ONLY ATTRIBUTES*Consistency Checks:**

Check	IF	THEN
(2H0F)	DRIVER PRESENCE equals 0, 9,	RELATED FACTORS-DRIVER LEVEL must not equal 04, 08, 09 , 10 , 12, 13, 15, 16, 19, 52, 53, 58, 59, 73, 74, 77-88.

[PC22 – Pre-Impact Location](#)

[PC23 – Crash Type](#)

Precrash Data Overview

Precrash data elements are completed for each of the in-transport motor vehicles in the case. This means that the entire crash is first completed from the perspective of one vehicle, then from the perspective of a second vehicle, if any, and so forth. The precrash data elements are:

- [Driver Distracted By](#)
- [Pre-Event Movement \(Prior to Recognition of Critical Event\)](#)
- [Critical Precrash Category](#)
- [Critical Precrash Event](#)
- [Attempted Avoidance Maneuver](#)
- [Pre-Impact Stability](#)
- [Pre-Impact Location](#)
- [Crash Type](#)

The precrash data elements are designed to identify the following:

- What was this vehicle doing just prior to the critical precrash event?
- What made this vehicle's situation critical?
- What was the avoidance response, if any, to this critical situation?
- What was the movement of the vehicle just prior to impact?

The most important determination that must be made for each in-transport motor vehicle is: what was this vehicle's Critical Precrash Event, (i.e., what action by this vehicle, another vehicle, person, animal, or non-fixed object was critical to this vehicle's crash?). Once the critical event is determined, the remaining precrash data elements are coded relative to this selected [Critical Precrash Event](#).

Do not consider culpability as a factor for determining precrash data. Many crash scenarios will suggest fault, but this is considered coincidental rather than by design.

Critical Crash Envelope

The critical crash envelope begins at the point where:

1. the driver recognizes an impending danger (e.g., deer runs into the roadway), or
2. the vehicle is in an imminent path of collision with another vehicle, pedestrian, pedalcyclist, other non-motorist, object, or animal.

The critical crash envelope ends when:

1. all three:
 - a. the driver has made a successful avoidance maneuver, and
 - b. has full steering control, and
 - c. the vehicle is tracking; OR
2. the driver's vehicle strikes another vehicle, pedestrian, pedalcyclist, other non-motorist, object, or animal.

Simple Single Critical Crash Envelope

Most crashes involve only a single critical crash envelope in which the object contacted is captured under the Critical Precrash Event, (e.g., a vehicle is traveling straight on a roadway and a deer runs into the roadway and is struck by the vehicle). This scenario, and similar ones, are very straightforward and will not present many problems.

Precrash Data Overview

Complex Single Critical Crash Envelope

However, some single critical crash envelopes are more complex.

Example A: A driver avoids one obstacle and immediately strikes another vehicle, person, object, or animal. Because immediate is defined as **not** having an opportunity, or sufficient time, to take any additional avoidance actions, the Critical Precrash Event is related to the vehicle, person, object, or animal that the driver successfully avoided instead of the vehicle's first harmful event (i.e., its impact); see [example 3](#) and [example 5](#).

Example B: The driver avoids an obstacle only to (a) lose steering control and/or (b) have the vehicle stop tracking, and the vehicle subsequently strikes another vehicle, person, object, or animal.

Regardless of whether the driver:

1. attempted to regain steering control,
2. caused the vehicle to resume a tracking posture, or
3. avoided the impacted vehicle, person, object, or animal,

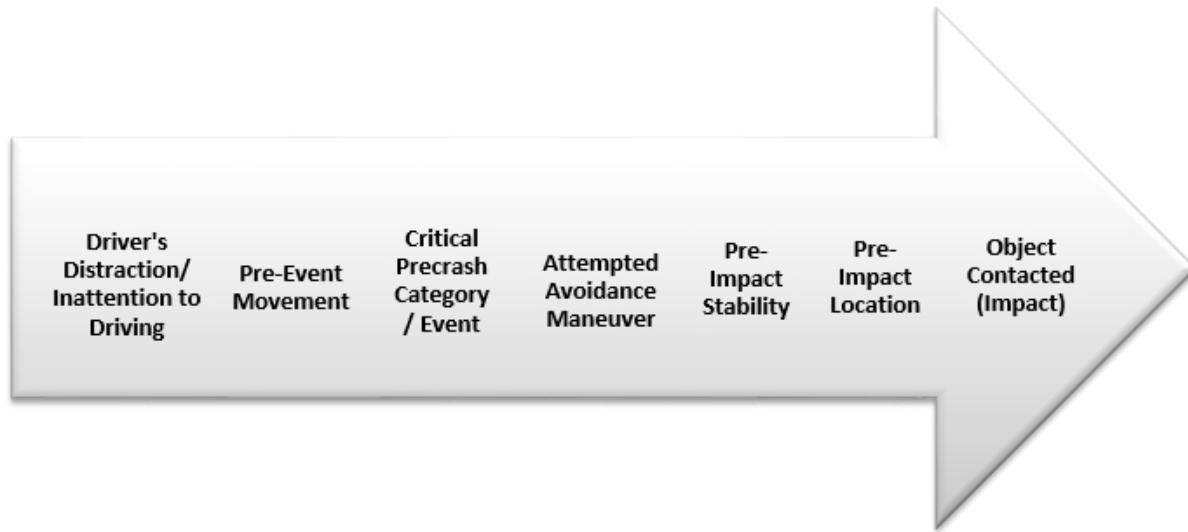

the Critical Precrash Event is similarly related to the vehicle, person, object, or animal that the driver successfully avoided because the driver's critical crash envelope was never stabilized.

In both examples above, the [Attempted Avoidance Maneuver](#) records the successful action taken to avoid the Critical Precrash Event.

Vehicles that are not involved in an impact with another vehicle, person, object, or animal in the sequence of crash events (that define this crash) are not included.

The coding order for a single critical crash envelope is illustrated in [Figure 20](#).

Figure 20: Typical Order of a Single Critical Crash Envelope

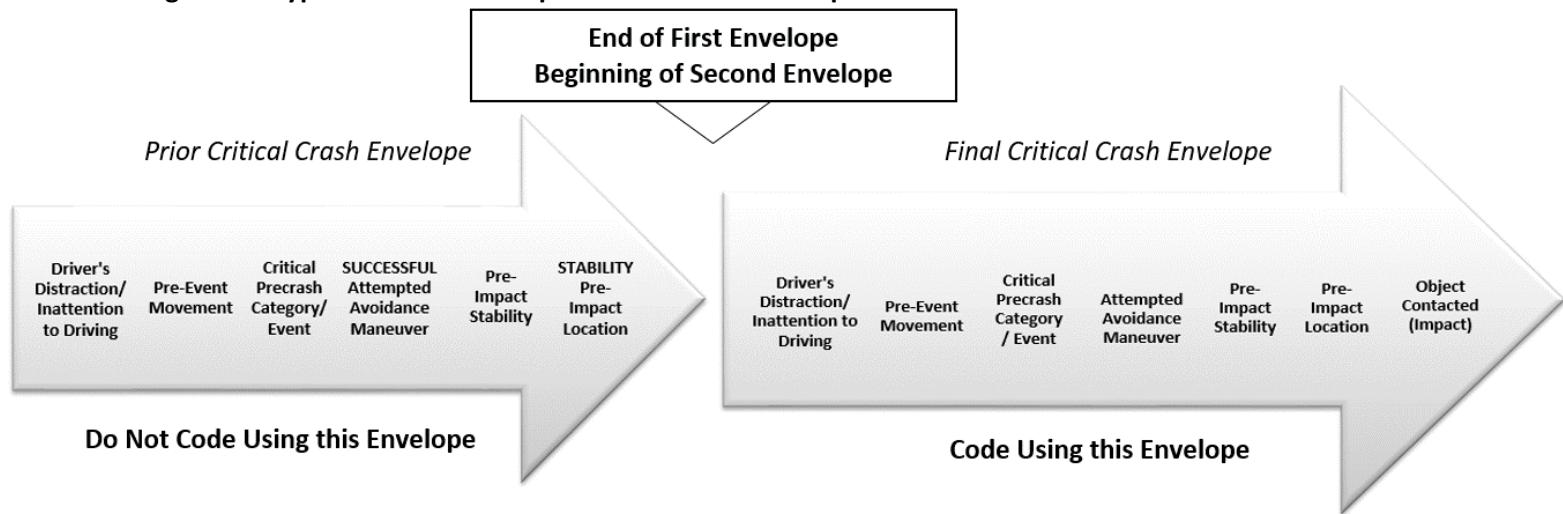

Multiple Critical Crash Envelopes

When a case involves multiple critical crash envelopes, select only the final critical crash envelope. In this situation, encode the element [Pre-Event Movement \(Prior to Recognition of Critical Event\)](#) as: **Successful avoidance maneuver to a previous critical event**. The final critical crash envelope is the one that resulted in this vehicle's first harmful event (i.e., its impact) as shown in [Figure 21](#).

Precrash Data Overview

Figure 21: Typical Order of Multiple Critical Crash Envelopes

When there is doubt as to whether this vehicle had experienced a complex single, or multiple critical crash envelopes, choose the Critical Precrash Category/Event, to the vehicle, person, object, or animal that the driver successfully avoided (i.e., default to Complex Single). See [Complex Single Critical Crash Envelope](#) examples A and B above.

The following pages have: a method protocol, a [flowchart](#) illustrating the proper method and protocol for determining the precrash data elements, ten [Precrash General Rules](#), and [eighteen examples](#) of various crash event sequences that contain one or more critical crash envelopes.

Method Protocol

Consider the information obtained from the Police Report and any supplemental documents as inputs to your decision making process.

1. Determine [Critical Precrash Category/Critical Precrash Event](#).

What action by this vehicle, another vehicle, person, animal, or object was critical to this driver becoming involved in the crash (i.e., use the “**BUT FOR**” * test)?

* FOR EXAMPLE:

- “**But for**” Vehicle # going left-of-center, this vehicle would not have been involved in this crash.
- “**But for**” having entered into the intersection, this vehicle would not have been involved in this crash.

ASK yourself questions (a) through (f) below. Proceed through each question that applies to the crash you are researching. Stop when the answer to the questions is “Yes.” This is the Critical Precrash Category.

- a. Did the vehicle exhibit a control loss?
- b. Does the evidence suggest that the vehicle was in an environmentally dangerous position?
- c. Was another vehicle “in” this vehicle's lane?
- d. Was another vehicle entering into this vehicle's lane?
- e. Was a pedestrian, pedalcyclist, or other non-motorist in or approaching this vehicle's path?
- f. Was an animal in or approaching this vehicle's path or was an object in this vehicle's path?

2. Determine [Driver Distracted By](#).

3. Determine [Pre-Event Movement \(Prior to Recognition of Critical Event\)](#).

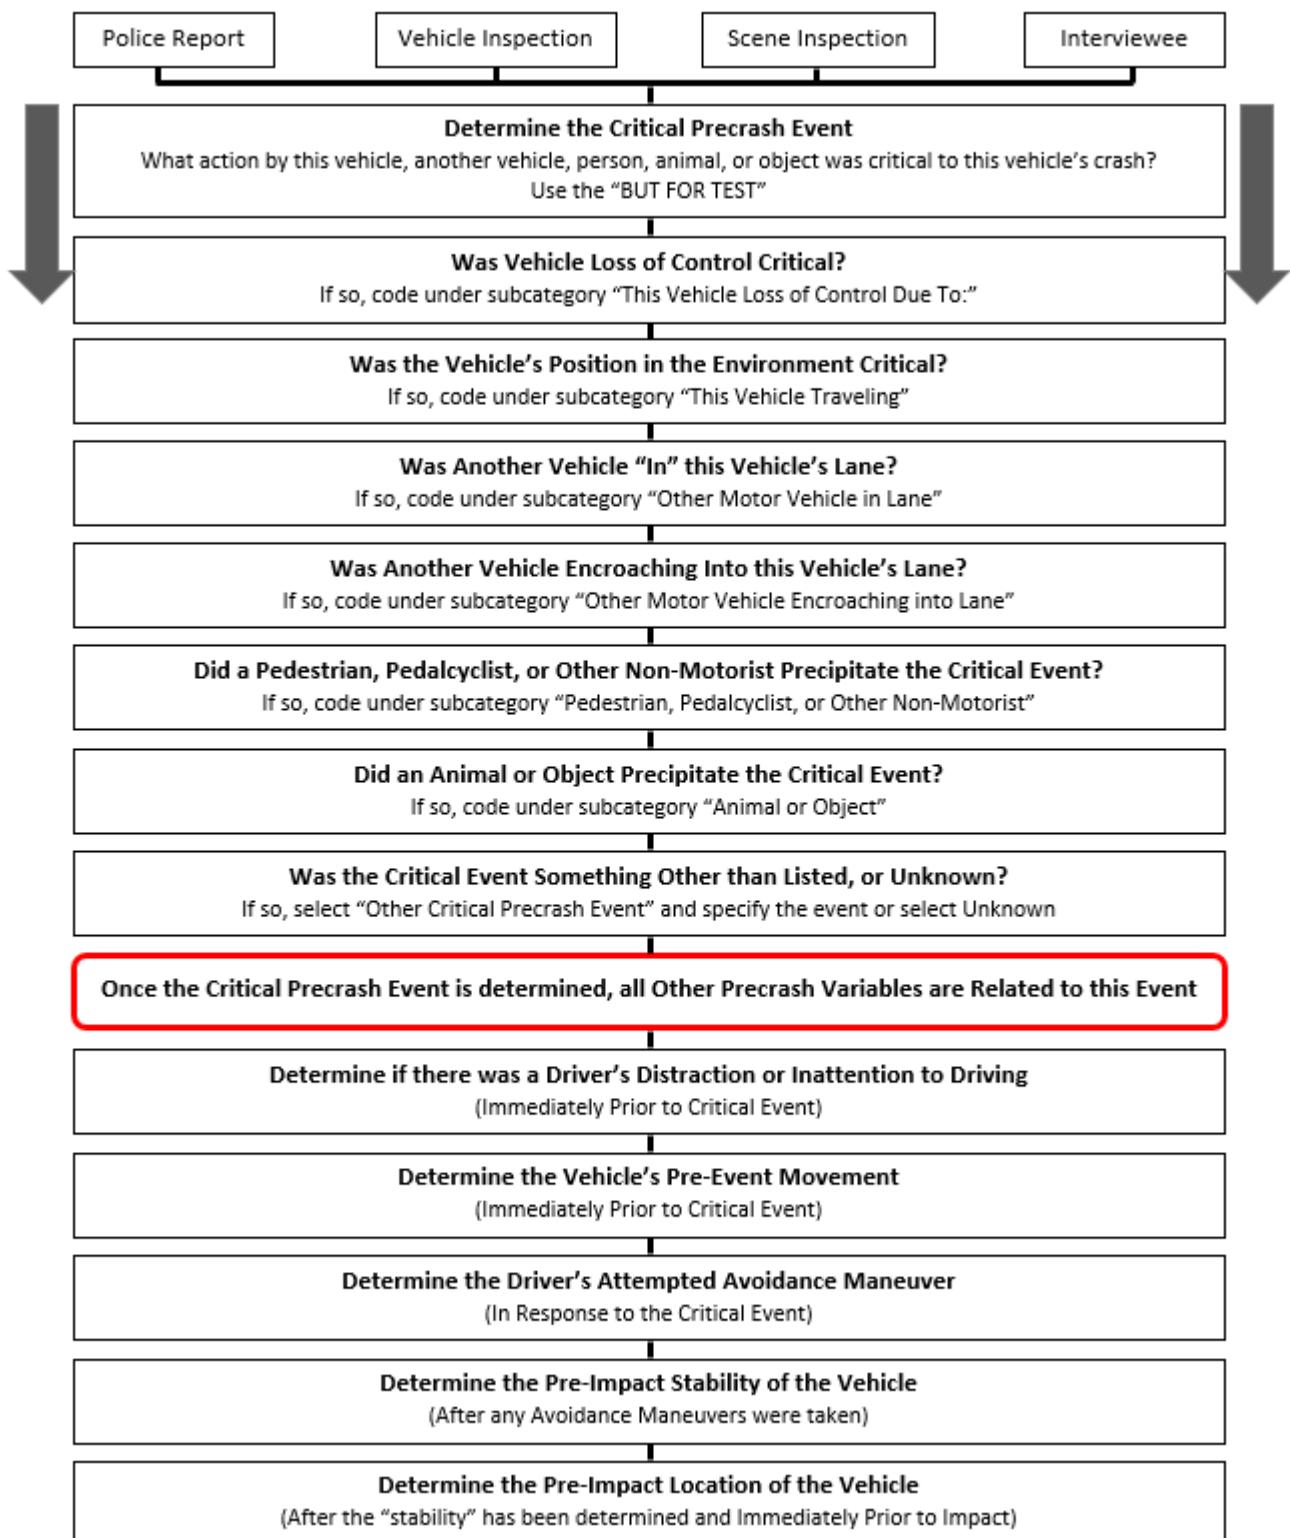

4. Determine [Attempted Avoidance Maneuver](#).

What does your information indicate that the driver tried to do to avoid the crash?

5. Determine [Pre-Impact Stability](#).

6. Determine [Pre-Impact Location](#).

Precrash Methodology Flowchart

Precrash General Rules

1. [Attempted Avoidance Maneuver](#) assesses what the driver's action(s) was during the critical crash envelope in response to his/her realization of impending danger.
2. The mere presence of a traffic control signal/sign typically does not make the situation critical when determining [Critical Precrash Event](#).
For example: A single vehicle approaches a stop sign and departs the right side of the road impacting a tree, in an attempt to avoid passing through the intersection. The sign has no bearing and therefore, does not make the situation critical.
3. When you know the [Critical Precrash Category](#), but are unable to select a specific [Critical Precrash Event](#), use the following guideline:
Default to one of the “Other” or “Unknown” attributes within each Critical Precrash Event category, rather than coding the entire Critical Precrash Category as “Other critical precrash event.”
4. If control is lost due to driver illness such as heart attacks, diabetic comas, etc., then Critical Precrash Event should be coded as “[Other cause of control loss \(Specify:\)](#).”
5. When coding [Critical Precrash Category](#) as “This vehicle loss of control,” the loss of control must have occurred prior to the driver doing any avoidance maneuver. If the driver attempts a maneuver (i.e., brakes, steers, etc.) as a result of the driver's perception of a vehicle, object, pedestrian, or non-motorist, then select the vehicle, object, pedestrian, or non-motorist as the critical event because that is what made the situation critical. If the vehicle is in a yaw prior to the driver taking an avoidance action, then loss-of-control is what made it critical (e.g., critical curve scuff, hydroplaning, etc.).
6. When determining Critical Precrash Category/Event if you do not know from available sources that driver had the right-of-way at a controlled or uncontrolled intersection, then use the following as a guideline:
 - a. If the junction is controlled by a 3-way/4-way stop sign, or is uncontrolled, then use the common rule that the vehicle on the right has the right-of-way for determining encroachment.
 - b. If the junction is controlled by an on-colors traffic control device, and both drivers claim a green light, then both vehicles are in an environmentally dangerous position, and Critical Precrash Event for both vehicles should be [This Vehicle Traveling](#) (Critical Precrash category) [Crossing over \(passing through\) junction](#) (Critical Precrash Event).
7. When two vehicles are initially traveling on the same trafficway and one executes a left turn with the right-of-way (i.e. green arrow), use [Other Motor Vehicle Encroaching Into Lane - From opposite direction-over right lane line](#) for the turning vehicle's critical event. This applies to [Crash Types 68, 69](#).
If the vehicles were initially on different trafficways (Crash Types [76, 77](#) and [82, 83](#)) the critical event for the vehicle turning left with the right-of-way should be [Other Motor Vehicle Encroaching - From crossing street across path](#).
8. “Fixed” objects (e.g., trees, poles, fire hydrants, etc.) cannot be in the roadway.
9. A motor vehicle is stopped in a travel lane and is struck by another motor vehicle ricocheting off a vehicle. The Critical Precrash Event for the vehicle struck by the ricocheting vehicle is in the [category](#) of either: [Other Motor Vehicle In Lane](#) or [Other Motor Vehicle Encroaching Into Lane](#).

Precrash Data Overview

10. [Pre-Impact stability](#) should be indicated as “[Tracking](#)” if the following are met:

- a. no skid marks are present on the diagram or mentioned in the narrative.
- b. the case materials do not indicate skidding **AND**
- c. the vehicle did not rotate 30 degrees or more (either clockwise or counterclockwise).

Note regarding Pre-Impact Stability:

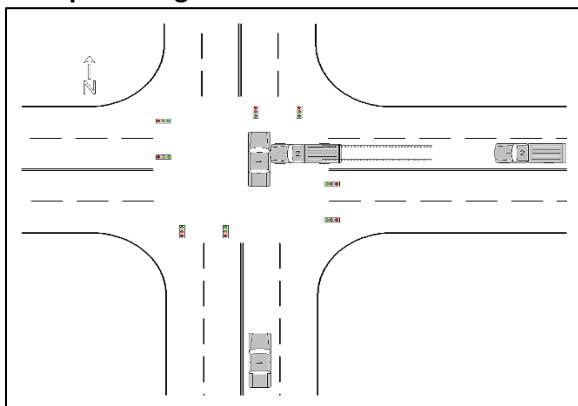

If the case materials do not provide enough information (e.g., in the diagram, narrative, etc.) to determine precrash stability, code [9 \(Precrash Stability Unknown\)](#).

Trafficway and its component definitions (i.e., roadway, road, shoulder, and median) can be found in the [ANSI D16.1 Manual on the Classification of Motor Vehicle Traffic Accidents](#).

Precrash Examples

Example 1

Example 1 Diagram

Vehicle 1 was traveling northbound on a four-lane roadway. Vehicle 2 was traveling westbound on an intersecting four-lane roadway. The intersection was controlled by traffic signals. Both vehicles entered the intersection and the right side of Vehicle 1 was struck by the front of Vehicle 2. Police could not determine which vehicle had the right-of-way, both drivers claimed to have a green light. The driver of Vehicle 1 reported that he never saw Vehicle 2 approaching.

"None" was identified by police on the crash report for both drivers in the data element for recording driver distractions. The police also indicated that no skid marks were present at the scene associated with Vehicle 1, but there were pre-impact skids present at the scene associated with Vehicle 2 and that this supported the driver's statement that he attempted to stop when he saw Vehicle 1 in his path.

Precrash Element	Vehicle 1	Vehicle 2
Driver Distracted By	Not Distracted	Not Distracted
Pre-Event Movement	Going Straight	Going Straight
Critical Precrash (Category)	This Vehicle Traveling	This Vehicle Traveling
Critical Precrash (Event)	Crossing Over (Passing Through) Junction	Crossing Over (Passing Through) Junction
Attempted Avoidance Maneuver	No Avoidance Maneuver	Braking
Pre-Impact Stability	Tracking	Skidding Longitudinally Rotation Less Than 30 Degrees
Pre-Impact Location	Stayed in Original Travel Lane	Stayed in Original Travel Lane
Crash Type	87	86

In this example, the **Critical Crash Envelope** for Vehicle 1 (V₁CCE) begins at the point where it is in an imminent collision path with Vehicle 2. The **Critical Crash Envelope** for Vehicle 2 (V₂CCE) begins at the point where the drivers recognize the impending danger. The **Critical Crash Envelopes** end at the point of impact with the other vehicle.

Since it could not be determined which vehicle had the right-of-way, the **Critical Event** is determined using [Precrash General Rule #6b.](#) It states; "If the junction is controlled by an on-colors traffic control device, and both drivers claim a green light, then both vehicles are in an environmentally dangerous position and the **Critical Event** for both vehicles should be [This Vehicle Traveling \(Critical Event - Precrash \(Category\)\) Crossing Over \(Passing Through\) Junction \(Critical Event - Precrash \(Event\)\).](#)"

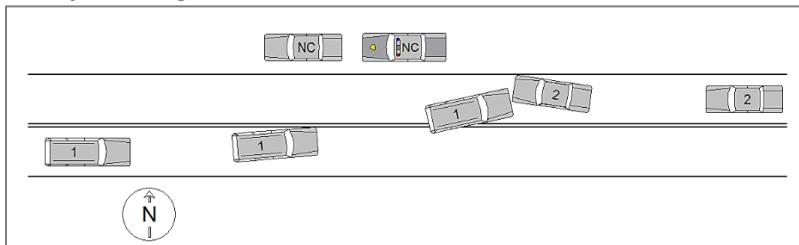

Precrash Data Overview

Vehicle 1's **Pre-Impact Stability** was [Tracking](#) based on [Precrash General Rule #10](#). [Skidding Longitudinally Rotation Less Than 30 Degrees](#) was selected for Vehicle 2's **Pre-Impact Stability** because tire marks were identified on the report and there was no indication of rotation.

It is important to keep in mind the type of traffic control (traffic signal versus stop sign) when determining right-of-way. Using the same scenario but substituting stops signs for the traffic signals, would change the **Critical Event** for both vehicles. [Precrash General Rule #6a](#) states; "If the junction is controlled by a 3-way or 4-way stop sign, or is uncontrolled, the vehicle on the right [Vehicle 2 in this case] would have had the right-of-way for determining encroachment."

Example 2

Example 2 Diagram

Vehicle 1 and Vehicle 2 are traveling in opposite directions on the same roadway. A police car (with lights activated) is making a traffic stop on the north side of the road. The driver of Vehicle 1 is looking at the activity on his left. Before he can react, Vehicle 1 crosses the centerline and strikes the front of Vehicle 2. The driver of Vehicle 2 also noticed the police activity, but he was attentive to the slowing traffic ahead. Vehicle 2 attempted to avoid the crash by braking and steering right.

Precrash Element	Vehicle 1	Vehicle 2
Driver Distracted By	Distracted by Outside Person, Object, or Event	Not Distracted
Pre-Event Movement	Going Straight	Going Straight
Critical Precrash (Category)	This Vehicle Traveling	Other Motor Vehicle Encroaching Into Lane
Critical Precrash (Event)	Over the Lane Line on Left Side of Travel Lane	From Opposite Direction Over Left Lane Line
Attempted Avoidance Maneuver	No Avoidance Maneuver	Braking and Steering Right
Pre-Impact Stability	Tracking	Tracking
Pre-Impact Location	Stayed on Roadway, But Left Original Travel Lane	Stayed in Original Travel Lane
Crash Type	50	51

In this example, Vehicle 1 has one **Critical Crash Envelope** ($V_1\text{CCE}$) that begins at the point where Vehicle 1 is in an imminent collision path with Vehicle 2. Vehicle 1's **Critical Crash Envelope** ends at the point of impact with Vehicle 2.

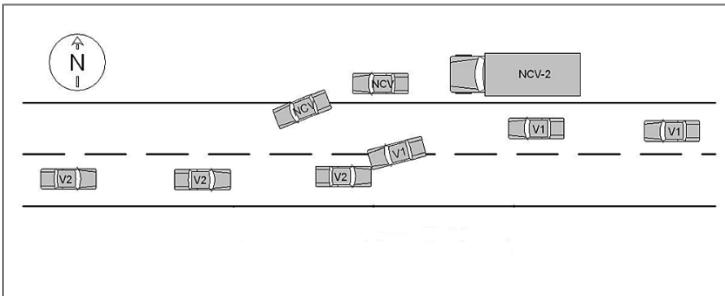

Vehicle 2's **Critical Crash Envelope** ($V_2\text{CCE}$) begins when the driver recognizes impending danger and ends at the point of impact with Vehicle 1.

When determining **Crash Type**, it is important to keep in mind that some **Crash Configurations** are plane of impact dependent, while others are not. In this case the **Crash Type** for Vehicle 1 and Vehicle 2 is [50 and 51 Head-On](#) respectively since it involved the front planes of both vehicles. If the collision had involved the side of one or both of the vehicles, then the **Crash Type** would have been [64 and 65 Angle/Sideswipe](#).

Precrash Data Overview

Example 3

Example 3 Diagram

Vehicle 1 and Vehicle 2 are traveling in opposite directions on the same roadway. A noncontact vehicle (NCV) is parked in front of a non-contact heavy truck on the road shoulder and suddenly enters the roadway into Vehicle 1's travel lane. The driver of Vehicle 1 instantly brakes and steers left to avoid the non-contact vehicle. Vehicle 1 crosses over the center line and **immediately** strikes the front of Vehicle 2. Vehicle 2 had no avoidance maneuvers. "None" was identified by police on the crash report for both drivers in the data element for recording driver distractions.

Precrash Element	Vehicle 1	Vehicle 2
Driver Distracted By	Not Distracted	Not Distracted
Pre-Event Movement	Going Straight	Going Straight
Critical Precrash (Category)	Other Motor Vehicle Encroaching Into Lane	Other Motor Vehicle Encroaching Into Lane
Critical Precrash (Event)	From Parking Lane/Shoulder	From Opposite Direction Over Left Lane Line
Attempted Avoidance Maneuver	Braking and Steering Left	No Avoidance Maneuver
Pre-Impact Stability	Tracking	Tracking
Pre-Impact Location	Stayed on Roadway, But Left Original Travel Lane	Stayed in Original Travel Lane
Crash Type	58	59

In this example, Vehicle 1 has one **Critical Crash Envelope** (V₁CCE). Vehicle 1's **Critical Crash Envelope** involved a successful avoidance of a non-contact vehicle and resulted in an **immediate** impact to Vehicle 2. Vehicle 1's **Critical Crash Envelope** was initiated by the non-contact vehicle; afterwards there was no opportunity for subsequent avoidance actions. Therefore, the encroachment of the non-contact vehicle into Vehicle 1's travel lane is coded as the **Critical Event - Precrash (Event)** for Vehicle 1. Vehicle 1's **Attempted Avoidance Maneuver** is coded as the action taken to avoid the non-contact vehicle.

Vehicle 2 has one **Critical Crash Envelope** (V₂CCE) that begins at the point where Vehicle 1 is in an imminent path of collision with Vehicle 2 and ends at the point of impact with Vehicle 1.

[Tracking](#) is selected as Vehicle 1's **Pre-Impact Stability** based on [Precrash General Rule #10](#).

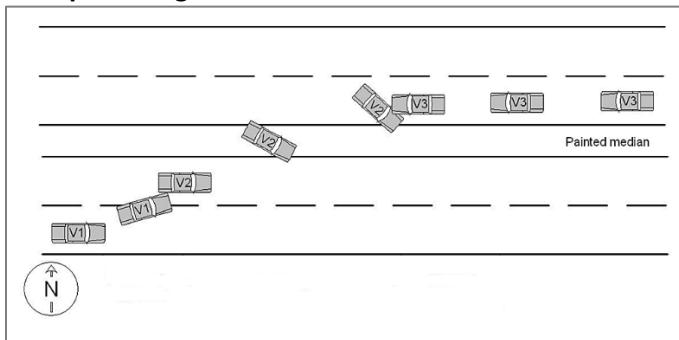

Vehicle 1's **Pre-Impact Location** is [Stayed On Roadway But Left Original Travel Lane](#). This attribute best describes the location of the vehicle after the critical event and before impact.

The non-contact vehicle and the non-contact truck were not involved in an impact in the sequence of crash events and are, therefore, non-contact vehicles and not counted in the structuring of the case.

Precrash Data Overview

Example 4

Example 4 Diagram

Vehicle 1 and Vehicle 2 are traveling in the same direction in adjacent lanes on a divided highway (with a painted median). Vehicle 1 has a tire blow out and loses control, crosses the left lane line and strikes the right rear of Vehicle 2. Vehicle 2 is redirected across the painted median, skidding and rotating clockwise, and subsequently strikes Vehicle 3. Vehicle 3 attempted to avoid Vehicle 2 by steering right and accelerating. "None" was identified by police on the crash report for all drivers in the data element for recording driver distractions.

Precrash Element	Vehicle 1	Vehicle 2	Vehicle 3
Driver Distracted By	Not Distracted	Not Distracted	Not Distracted
Pre-Event Movement	Going Straight	Going Straight	Going Straight
Critical Precrash (Category)	This Vehicle Loss Control Due To:	Other Motor Vehicle Encroaching Into Lane	Other Motor Vehicle Encroaching Into Lane
Critical Precrash (Event)	Blowout or Flat Tire	From Adjacent Lane (Same Direction) - Over Right Lane Line	From Opposite Direction - Over Left Lane Line
Attempted Avoidance Maneuver	Unknown/Not Reported	Unknown/Not Reported	Accelerating and Steering Right
Pre-Impact Stability	Tracking	Tracking	Tracking
Pre-Impact Location	Stayed on Roadway, But Left Original Travel Lane	Stayed in Original Travel Lane	Stayed in Original Travel Lane
Crash Type	45	44	98

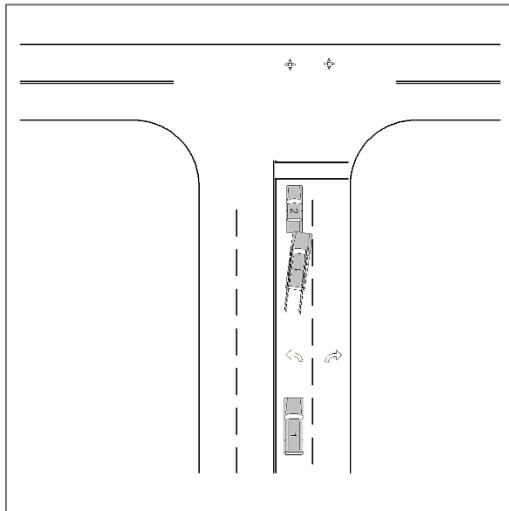

In this example, Vehicle 1 has one **Critical Crash Envelope** (V₁CCE) that begins with control loss due to the tire blowout and ends at the point of impact with Vehicle 2. The blowout is the **Critical Event - Precrash (Event)**. Vehicle 2 has two **Critical Crash Envelopes** (V₂CCE₁ and V₂CCE₂). Vehicle 2's first **Critical Crash Envelope** (V₂CCE₁) begins when Vehicle 1 enters Vehicle 2's travel lane and ends at the point of impact with Vehicle 1. The first CCE is selected because Precrash is only interested in coding the **Critical Crash Envelope** that leads to a vehicle's first harmful event. Vehicle 3 has one **Critical Crash Envelope** (V₃CCE) that begins when Driver 3 recognizes and reacts to Vehicle 2 that is in an imminent path of collision with Vehicle 3 and ends at the point of impact with Vehicle 2.

Attempted Avoidance Maneuver was coded as [Unknown/Not Reported](#) for Vehicles 1 and 2 because of a lack of information to assess attempted avoidance. The **Crash Type** for Vehicle 1 and Vehicle 2 is [45 - 44 Sideswipe/Angle: Straight Ahead](#), respectively based on their positions (i.e. left versus right) and because Vehicle 1 did not **intend** to change lanes. Situations involving vehicles that **intended** to change lanes are captured with **Crash Type** codes [46 and 47 Sideswipe/Angle: Changing lanes](#). The **Crash Type** for Vehicle 3 is [98 Other](#) since it was not involved in the first harmful event in the crash.

Precrash Data Overview

Example 5

Example 5 Diagram

Vehicle 2 is stopped waiting to turn left in a left turn lane at an intersection controlled by a traffic signal. Vehicle 1 approaches the intersection and the driver is texting. Vehicle 1's driver looks up at the last minute and brakes and steers right leaving tire marks, but cannot avoid striking the rear of Vehicle 2. There is no information on the crash report to assess distraction for the driver of Vehicle 2.

Precrash Element	Vehicle 1	Vehicle 2
Driver Distracted By	While Manipulating Cellular Phone	Not Reported
Pre-Event Movement	Going Straight	Stopped in Road
Critical Precrash (Category)	Other Vehicle In Lane	Other Vehicle In Lane
Critical Precrash (Event)	Other Vehicle Stopped	Traveling in Same Direction With Higher Speed
Attempted Avoidance Maneuver	Braking and Steering Right	No Avoidance Maneuver
Pre-Impact Stability	Skidding Longitudinally - Rotation Less Than 30 Degrees	Tracking
Pre-Impact Location	Stayed in Original Travel Lane	Stayed in Original Travel Lane
Crash Type	20	22

In this example, Vehicle 1's **Critical Crash Envelope** ($V_1\text{CCE}$) begins at the point the driver recognizes Vehicle 2 is stopped in the lane, and ends at the point of impact with Vehicle 2. Vehicle 2's **Critical Crash Envelope** ($V_2\text{CCE}$) begins and ends at the point of impact.

Vehicle 1's **Driver Distracted By** is [While Manipulating a Cellular Phone](#). Texting is captured in this attribute.

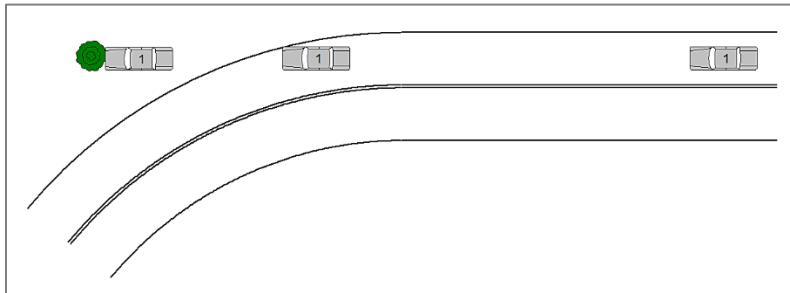

The Pre-Event Movement and Critical Event coding can be tricky in rear-end crash scenarios. Refer to the [Precrash Event Scenarios for Different Rear-End Collision Situations](#) following the Precrash Examples for additional guidance.

The **Crash Type** for Vehicle 2 is ['22,' Rear-end: Stopped Left](#) because it was stopped and **intended** to turn left at the intersection.

The **Pre-Impact Stability** for Vehicle 1 is [Skidding Longitudinally - Rotation Less Than 30 Degrees](#) as opposed to [Tracking](#) because tire marks were present and rotation was minimal.

Example 6

Example 6 Diagram

Vehicle 1 is traveling on a two-lane roadway and the driver, who is diabetic, has a hypoglycemic attack and begins to lose consciousness. The vehicle departs the right side of the road as it enters a curve and strikes a tree.

Precrash Element	Vehicle 1
Driver Distracted By	Not Distracted
Pre-Event Movement	Going Straight
Critical Precrash (Category)	This Vehicle Loss Of Control Due To
Critical Precrash (Event)	Other Cause Of Control Loss (Specify:)
Attempted Avoidance Maneuver	None
Pre-Impact Stability	Tracking
Pre-Impact Location	Departed Roadway
Crash Type	01

Vehicle 1's **Critical Crash Envelope** (V₁CCE) begins at the point where the vehicle is in imminent path of a collision with the tree and ends at impact.

Driver Distracted By is coded as [Not Distracted](#) because the driver lost consciousness just prior to the Critical Precrash Event and intoxication, illness, blackouts, falling asleep, or being fatigued are not considered distractions for the purposes of this element in FARS and CRSS.

The **Critical Event** is coded [This Vehicle Control Loss Due To: Other Cause of Control Loss \(Specify:\)](#) following [Precrash General Rule #4](#) that addresses loss of control because of driver illness.

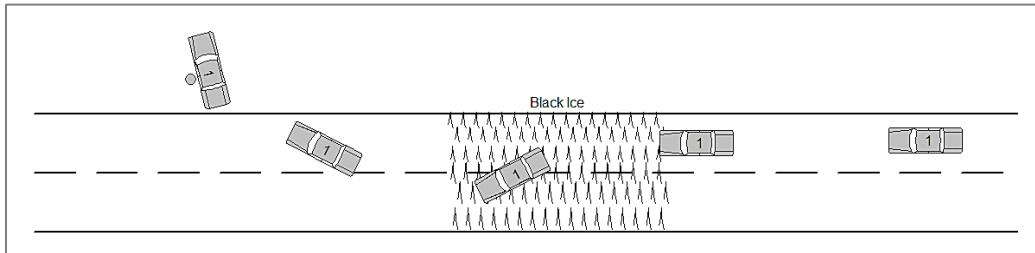

The **Pre-Event Movement** element describes the vehicle's activity just prior to the **Critical Event**, in this case, [Going Straight](#).

The **Crash Type** for Vehicle 1 is [01, Right Roadside Departure: Drive Off Road](#). Do not confuse the **Critical Event Category** coding of [This Vehicle Control Loss Due To](#) with the **Crash Type** [02, Right Roadside Departure: Control/Traction Loss](#).

Precrash Data Overview

Example 7

Example 7 Diagram

Vehicle 1 is traveling on a two-lane roadway with moderate snow falling. The driver suddenly encounters black ice on the roadway, loses control, and begins to rotate counterclockwise. The driver attempts to regain control by braking and steering right, but overcorrects and the vehicle departs the right side of the roadway and strikes a pole. The police on the crash report identify that the driver is "Not Distracted."

Precrash Element	Vehicle 1
Driver Distracted By	Not Distracted
Pre-Event Movement	Going Straight
Critical Precrash (Category)	This Vehicle Loss Of Control Due To:
Critical Precrash (Event)	Poor Road Conditions (Specify:)
Attempted Avoidance Maneuver	Braking and Steering Right
Pre-Impact Stability	Skidding Laterally Clockwise Rotation
Pre-Impact Location	Departed Roadway
Crash Type	02

Vehicle 1's **Critical Crash Envelope** (V₁CCE) begins when the vehicle encounters the black ice and ends at impact with the pole.

The **Critical Event** in this example is [This Vehicle Control Loss Due To: Poor Road Conditions \(Specify: \(Black ice\)\)](#).

It can be difficult to determine the **Critical Event** in cases when weather, road conditions, roadway alignment, and speed all potentially play a role in the crash. Examples 7 and 8 are prime examples, [Poor Road Conditions](#), [Too Fast For Conditions](#), or [This Vehicle Traveling](#) category attributes (e.g., [Off The Edge Of The Road On The Right Side](#)) could be selected based on the circumstances.

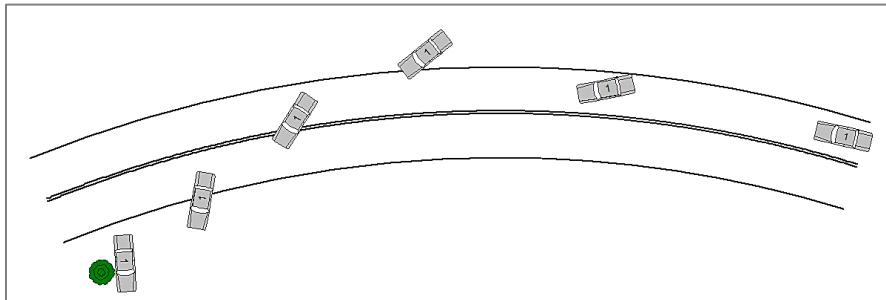

Typically, [Poor Road Conditions](#) such as ice and puddles are "suddenly" encountered by the driver and not an ongoing situation.

[Too Fast For Conditions](#) applies when the vehicle's movement and speed were not appropriate relative to the vehicle's surroundings; roadway curves are often involved.

If neither of these [Loss Of Control](#) **Critical Events** apply, then [This Vehicle Traveling](#) Category attributes are appropriate.

Example 8

Example 8 Diagram

Vehicle 1 is traveling on a two-lane roadway with heavy rain falling. Police estimate the driver was traveling 55 mph in this 35-mph speed zone. While negotiating a curve, the driver loses control on the rain-slickened road and the vehicle slides off the right edge of the road but does not sustain an impact. The driver steers left in an attempt to regain control, crosses both travel lanes, and departs the left side of the road before striking a tree with its right side. The crash report identifies “None” in a Contributing Circumstances field that includes various driver distraction attributes among the factors available.

Precrash Element	Vehicle 1
Driver Distracted By	Not Distracted
Pre-Event Movement	Negotiating a Curve
Critical Precrash (Category)	This Vehicle Loss of Control Due To
Critical Precrash (Event)	Traveling Too Fast For Conditions
Attempted Avoidance Maneuver	Steering Left
Pre-Impact Stability	Skidding Laterally Counterclockwise Rotation
Pre-Impact Location	Departed Roadway
Crash Type	07

In this example, Vehicle 1 has one **Critical Crash Envelope** (V₁CCE) that begins when the driver begins to lose control and the vehicle begins to rotate counterclockwise. The envelope ends at impact with the tree. This crash is not a multiple **Critical Crash Envelope** scenario because Vehicle 1 never regained control.

The **Critical Event** is coded [This Vehicle Control Loss Due To: Too Fast For Conditions](#) because the vehicle's movement and speed were not appropriate relative to the vehicle's surroundings (heavy rain and curve). This is applicable in this case even without the officer specifically stating “too fast for conditions.”

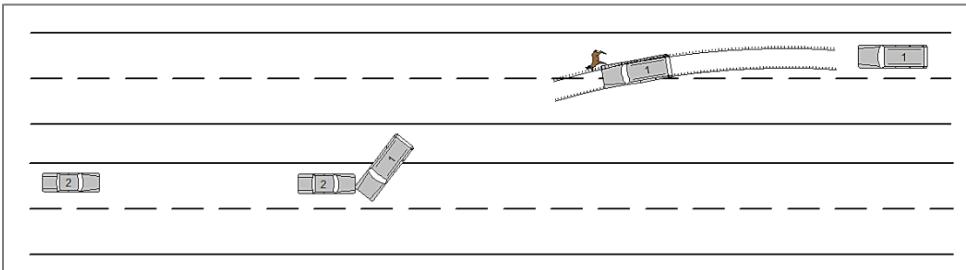

The **Pre-Impact Location** is coded [Departed Roadway](#) since the element is based on the location of the vehicle after the critical event, and immediately before the first impact.

The **Crash Type** element is based on the first harmful event and the vehicle did not strike anything when it departed the right side of the road, therefore, ['07,' Left Roadside Departure-Control/Traction Loss](#) is selected as the **Crash Type**.

Precrash Data Overview

Example 9

Example 9 Diagram

Vehicle 1 is traveling westbound on a highway with a posted speed limit of 55 mph. Vehicle 2 is traveling east on the same highway in sunny and dry conditions. A deer suddenly enters the roadway from the right and the driver of Vehicle 1 attempts to brake and steer left, leaving several meters of tire marks, but strikes the deer. Vehicle 1 then goes into a counterclockwise yaw and crosses into the oncoming lanes and strikes Vehicle 2.

The driver of Vehicle 1 had a blood alcohol concentration (BAC) of .15 and was charged with driving under the influence. There were no indications of distraction identified on the crash report for the driver of Vehicle 1. Instead, in the Contributing Factors field where the officer could assess distraction he selected "animal in road" and "had been drinking." The Contributing Factors for the driver of Vehicle 2 were coded as "Unknown." The driver of Vehicle 2 was killed.

Precrash Element	Vehicle 1	Vehicle 2
Driver Distracted By	Not Distracted	Unknown if Distracted
Pre-Event Movement	Going Straight	Going Straight
Critical Precrash (Category)	Object or Animal	Other Motor Vehicle Encroaching Into Lane
Critical Precrash (Event)	Animal in Road	From Opposite Direction Over Left Lane Line
Attempted Avoidance Maneuver	Braking and Steering Left	Unknown/Not Reported
Pre-Impact Stability	Skidding Longitudinally Rotation Less Than 30 Degrees	Tracking
Pre-Impact Location	Stayed On Roadway, But Left Original Travel Lane	Stayed in Original Travel Lane
Crash Type	13	98

Vehicle 1 has two **Critical Crash Envelopes** (V_1CCE_1 and V_1CCE_2). Vehicle 1's first **Critical Crash Envelope** (V_1CCE_1) begins when the driver recognizes the deer in the roadway and ends at the point of impact with the deer. The Precrash coding is based on the **Critical Crash Envelope** that resulted in Vehicle 1's first impact (V_1CCE_1).

Vehicle 2 has only one **Crash Envelope** (V_2CCE) that begins when it's in imminent path of collision with Vehicle 1 and ends at impact.

[Not Distracted](#) is selected for Vehicle 1 **Driver Distracted By**. The driver took evasive maneuvers to avoid the deer which identifies that the driver was attentive prior to the Critical Event. Also, there were no indications of distraction identified on the crash report for the driver of Vehicle 1 and in the Contributing Factors field, where the officer could assess distraction, he selected "animal in road" and "had been drinking." It's important to note that the BAC level or indication of alcohol as a factor in the crash for the driver of Vehicle 1 plays no role in distraction coding.

Precrash Data Overview

The **Pre-Impact Location** for Vehicle 1 is [Stayed On Roadway- But Left Original Travel Lane](#) since part of the vehicle was out of its original lane prior to impact with the deer. Similarly, vehicles that depart the road and strike a curb are coded as [Departed the roadway](#) even though the majority of the vehicle is still on the roadway.

The **Crash Type** for Vehicle 1 is ['13,' Pedestrian/Animal on Road](#).

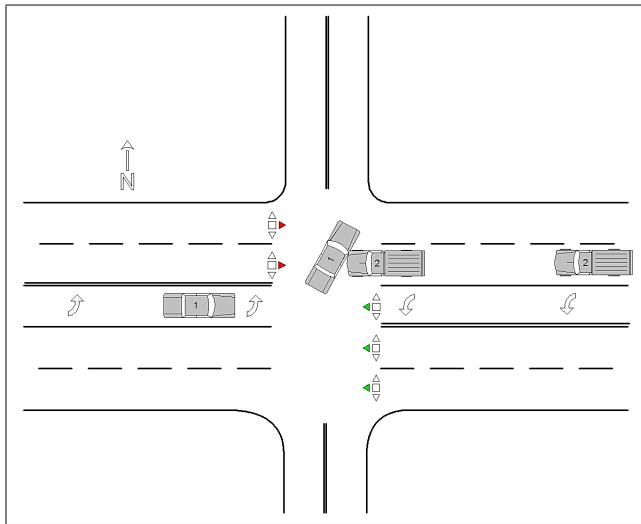

Vehicle 2 **Driver Distracted By** is coded [Unknown if Distracted](#); the deceased driver could not be interviewed by the police and the officer coded "Unknown" in the field where distraction would be assessed.

Since no information was available to assess **Attempted Avoidance Maneuver** [Unknown/Not Reported](#) was selected for Vehicle 2.

The **Crash Type** for Vehicle 2 is ['98,' Other](#) since it was not involved in the first harmful event in the crash.

Example 10

Example 10 Diagram

The crash occurred at the intersection of a five-lane east/west roadway with a center left-turn lane and a two-lane north/south roadway. The intersection was controlled by traffic signals. Vehicle 1 was eastbound in the left-turn lane of the five-lane roadway. Vehicle 2 was traveling west on the same roadway. Vehicle 1 had a green turn arrow and attempted to turn left to go north on the intersecting two lane road. Vehicle 2 passed through the intersection and its front struck the right side of Vehicle 1. The officer reported that there was no evidence of avoidance actions by either of the vehicles involved.

"Not Distracted" was identified by police on the crash report for the driver of Vehicle 1. The police crash report did not detail the circumstances regarding Vehicle 2's passing through the intersection, but the driver was cited for running a red light.

Precrash Element	Vehicle 1	Vehicle 2
Driver Distracted By	Not Distracted	Not Reported
Pre-Event Movement	Turning Left	Going Straight
Critical Precrash (Category)	Other Motor Vehicle Encroaching Into Lane	This Vehicle Traveling
Critical Precrash (Event)	From Opposite Direction Over Right Lane Line	Crossing Over (Passing Through) Junction

Precrash Data Overview

Precrash Element	Vehicle 1	Vehicle 2
<u>Attempted Avoidance Maneuver</u>	No Avoidance Maneuver	No Avoidance Maneuver
<u>Pre-Impact Stability</u>	Tracking	Tracking
<u>Pre-Impact Location</u>	Stayed in Original Travel Lane	Stayed in Original Travel Lane
<u>Crash Type</u>	68	69

In this example, the **Critical Crash Envelope** for both vehicles ($V_1\text{CCE}$) and ($V_2\text{CCE}$) begin when they are in an imminent path of collision. The **Critical Crash Envelopes** end at the point of impact.

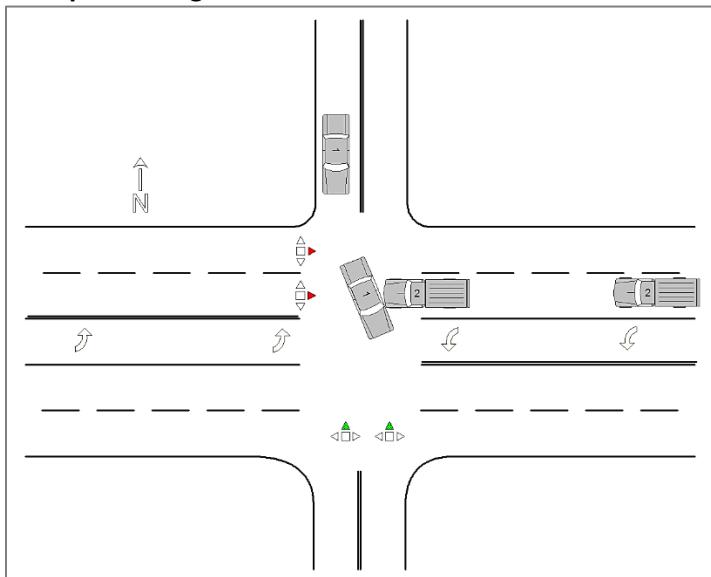

The first portion of [Precrash General Rule #7](#) applies to this crash. It states “When two vehicles are initially traveling on the **same** trafficway and one executes a left turn with the right-of-way (i.e. green arrow), use [Other Motor Vehicle Encroaching Into Lane - From Opposite Direction Over Right Lane Line](#) for the turning vehicle’s **Critical Event**.”

A similar principle applies for Vehicle 1’s **Pre-Impact Location**; it’s considered to have [Stayed in Original Travel Lane](#) while making the turn. Consider Vehicle 1’s “lane” as continuing left as they negotiate the turn through the intersection.

Vehicle 2’s **Driver Distracted By** is coded [Not Reported](#) since the police crash report did not provide any information on distractions.

Example 11

Example 11 Diagram

The crash occurred at the intersection of a five-lane east/west roadway with a center left-turn lane and a two-lane north/south roadway. The intersection was controlled by traffic signals. Vehicle 1 was southbound on the two-lane roadway. Vehicle 2 was traveling west on the five-lane roadway. Vehicle 1 had a green turn arrow and attempted to turn left to travel east on the intersecting five-lane road. Vehicle 2 passed through the intersection and its front struck the left side of Vehicle 1.

The driver of Vehicle 1 was attentive and took no avoidance actions. Vehicle 2’s driver reported that he was thinking about an issue at work and did not notice the traffic signal until the last moment. He applied his brakes, but no tire marks were present.

Precrash Data Overview

Precrash Element	Vehicle 1	Vehicle 2
Driver Distracted By	Not Distracted	Lost in Thought/Day Dreaming
Pre-Event Movement	Turning Left	Going Straight
Critical Precrash (Category)	Other Motor Vehicle Encroaching Into Lane	This Vehicle Traveling
Critical Precrash (Event)	From Crossing Street Across Path	Crossing Over (Passing Through) Junction
Attempted Avoidance Maneuver	No Avoidance Maneuver	Braking
Pre-Impact Stability	Tracking	Tracking
Pre-Impact Location	Stayed in Original Travel Lane	Stayed in Original Travel Lane
Crash Type	82	83

In this example, Vehicle 1's **Critical Crash Envelope** (V₁CCE) begins at the point where Vehicle 1 is in an imminent collision path with Vehicle 2 and ends at the point of impact.

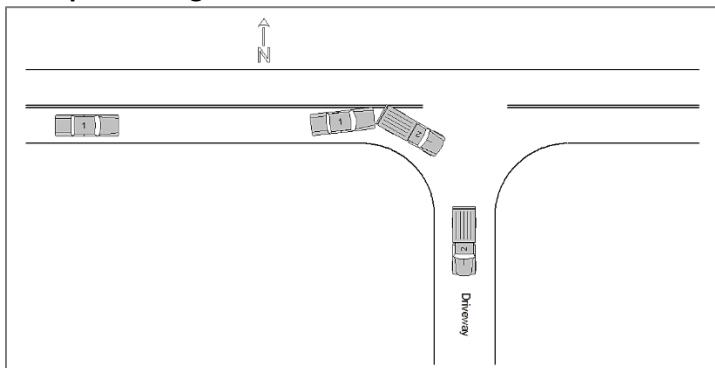

Vehicle 2's **Critical Crash Envelope** (V₂CCE) begins when the driver recognizes Vehicle 1 turning in front of it in the intersection and ends at impact.

The second portion of [Precrash General Rule #7](#) applies to this crash. It states "When two vehicles are initially traveling on **different** trafficways the **Critical Event** for the vehicle turning left with the right-of-way should be [Other Motor Vehicle Encroaching into Lane-From Crossing Street, Across Path.](#)"

Vehicles initially on **different** trafficways are captured in [Crash Type Configuration K Turn Into Path](#) (**Crash Types** 76 - 85). So, in this case, the **Crash Types** for Vehicle 1 and Vehicle 2 are 82 and 83 respectively. Turning vehicles initially on the **same** trafficway are coded in [Crash Type Configuration J Turn Across Path](#) (**Crash Types** 68 - 75). Unlike many of the other **Crash Types**, the plane contacted on the vehicle is irrelevant for the [Change Trafficway \(Category IV\) Crash Types](#).

Example 12

Example 12 Diagram

Vehicle 1 was eastbound on a two-lane roadway. Vehicle 2 was backing out of a driveway on the south side of the road, intending to travel east. Vehicle 1 braked and steered left, but was unable to avoid striking the rear of Vehicle 2. The driver of Vehicle 2 stated he saw the other vehicle approaching, but misjudged its speed and did not think they were going to collide.

Precrash Data Overview

The officer indicated that Vehicle 1 was traveling 50 mph in the 35 mph speed zone and applied the brakes just prior to impact, but did not leave tire marks. Driver distractions were identified by police for both drivers on the crash report as "None."

Precrash Element	Vehicle 1	Vehicle 2
Driver Distracted By	Not Distracted	Not Distracted
Pre-Event Movement	Going Straight	Backing Up
Critical Precrash (Category)	Other Motor Vehicle Encroaching Into Lane	This Vehicle Traveling
Critical Precrash (Event)	From Driveway, Turning into Same Direction	Backing
Attempted Avoidance Maneuver	Braking and Steering Left	No Avoidance Maneuver
Pre-Impact Stability	Tracking	Tracking
Pre-Impact Location	Stayed in Original Travel Lane	Entered Roadway
Crash Type	93	92

In this example, Vehicle 1's **Critical Crash Envelope** ($V_1\text{CCE}$) begins at the point where the driver recognizes Vehicle 2 is backing into the roadway and recognizes the danger. The **Critical Crash Envelope** for Vehicle 1 ends at impact.

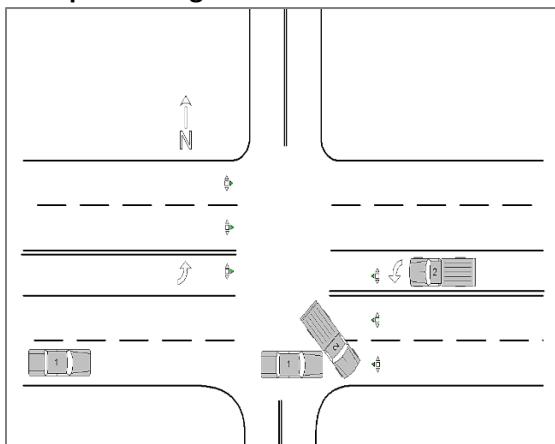

Vehicle 2's **Critical Crash Envelope** ($V_2\text{CCE}$) begins when it's in imminent path of collision with Vehicle 1 and ends at impact.

Although Vehicle 1 was traveling 15 mph over the speed limit, the **Critical Precrash Category** for Vehicle 1 is [Other Motor Vehicle Encroaching Into Lane](#). The situation that made the event critical was Vehicle 2's movement (backing out of the driveway) and not Vehicle 1's speed. The **Critical Event** for Vehicle 1 is [From Driveway Turning Into Same Direction](#), since Vehicle 2 intended to travel east in the same direction as Vehicle 1.

The **Critical Event** for Vehicle 2 is [This Vehicle Traveling- Backing](#).

Example 13

Example 13 Diagram

Vehicle 1 was eastbound on a five-lane roadway with center left-turn lanes approaching an intersection controlled by a traffic signal. Vehicle 2 was westbound on the same roadway in the left turn lane. The signal was solid green for eastbound and westbound traffic. Vehicle 2 attempted to make a U-turn at the intersection to

Precrash Data Overview

travel east and was struck in the right side by the front of Vehicle 1. The driver of Vehicle 2 stated he scanned the intersection for traffic but did not see Vehicle 1 approaching. The driver of Vehicle 1 was attentive and saw the other vehicle approaching but did not think it would attempt to turn and consequently had no time to react. Police charged the driver of Vehicle 2 with failure to yield.

Precrash Element	Vehicle 1	Vehicle 2
Driver Distracted By	Not Distracted	<i>Not Distracted</i>
Pre-Event Movement	Going Straight	Making a U-Turn
Critical Precrash (Category)	Other Motor Vehicle Encroaching Into Lane	This Vehicle Traveling
Critical Precrash (Event)	From Opposite Direction Over Left Lane Line	Making a U-Turn
Attempted Avoidance Maneuver	No Avoidance Maneuver	No Avoidance Maneuver
Pre-Impact Stability	Tracking	Tracking
Pre-Impact Location	Stayed in Original Travel Lane	Stayed on Roadway but Left Original Travel Lane
Crash Type	98	98

In this example, Vehicle 1's **Critical Crash Envelope** (V₁CCE) begins at the point where the driver recognizes Vehicle 2 is making a U-turn in front of them and ends at impact.

Vehicle 2's **Critical Crash Envelope** (V₂CCE) begins when it's in imminent path of collision with Vehicle 1 and ends at impact.

The **Critical Event** for Vehicle 1 is [Other Motor Vehicle Encroaching into Lane-From Opposite Direction Over Left Lane Line](#).

The **Pre-Event Movement** for Vehicle 2 is [Making a U-Turn](#) and the **Critical Event** for Vehicle 2 is [Making a U-Turn](#). If it is unclear if a vehicle is [Turning Left](#) or [Making a U-Turn](#), default to [Turning Left](#).

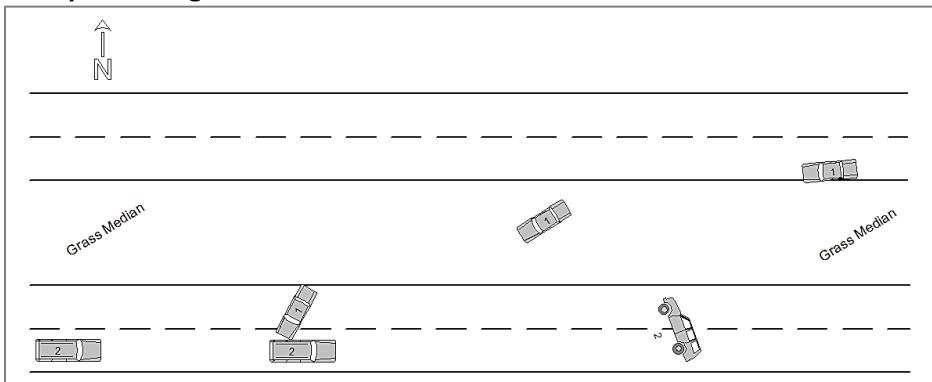

The key to the **Critical Event** coding in this case is that Vehicle 2 did **not** have the right of way while making the U-turn. If the scenario was altered such that Vehicle 2 was making a legal U-turn **with** the right of way, the first portion of [Precrash General Rule #7](#) would apply and Vehicle 2's **Critical Event** would be [Other Motor Vehicle Encroaching into Lane -From Opposite Direction Over Right Lane Line](#).

The **Crash Type** for both vehicles is, [98 Other Crash Type](#). This **Crash Type** is used for collisions that do not reasonably fit into any of the specified types. This code includes (but is not limited to): Rollovers on the road, U-turns, third or subsequent vehicles involved in a crash, or the second involved vehicle when the first harmful event involved a vehicle-to-object collision or non-collision.

Precrash Data Overview

Example 14

Example 14 Diagram

Vehicle 1 was traveling westbound on a median divided highway. Vehicle 2 was traveling east on the same highway. The driver of Vehicle 1 reportedly fell asleep and drifted off the left side of the roadway. Vehicle 1 crossed the median and entered the eastbound lanes where its front struck the left side of Vehicle 2. After initial impact Vehicle 2 rotated counterclockwise and rolled over one quarter turn, coming to rest on its right side. The field on the crash report for assessing driver distraction was coded as "Other" for the driver of Vehicle 1 and "None" for the driver of Vehicle 2.

Precrash Element	Vehicle 1	Vehicle 2
Driver Distracted By	Not Distracted	Not Distracted
Pre-Event Movement	Going Straight	Going Straight
Critical Precrash (Category)	This Vehicle Traveling	Other Motor Vehicle Encroaching Into Lane
Critical Precrash (Event)	Off the Edge of the Road on the Left Side	From Opposite Direction Over Left Lane Line
Attempted Avoidance Maneuver	No Avoidance Maneuver	Unknown/Not Reported
Pre-Impact Stability	Skidding Laterally Counterclockwise Rotation	Tracking
Pre-Impact Location	Departed Roadway	Stayed in Original Travel Lane
Crash Type	64	65

In this example, Vehicle 1's **Critical Crash Envelope** ($V_1\text{CCE}$) begins at the point where the vehicle leaves the initial roadway and ends at impact.

Vehicle 2's **Critical Crash Envelope** ($V_2\text{CCE}$) begins when the driver recognizes the other vehicle approaching and ends at impact.

Vehicle 1's **Driver Distracted By** is coded as [Not Distracted](#) because the driver was asleep just prior to the Critical Precrash Event and intoxication, illness, blackouts, falling asleep, or being fatigued are not considered distractions for the purposes of this element in FARS and CRSS.

Vehicle 1's **Attempted Avoidance Maneuver** is coded as [No Avoidance Maneuver](#) because this element identifies the driver's action/response to the Critical Event and this driver was asleep.

Precrash Data Overview

[Tracking](#) is the appropriate selection for Vehicle 2's **Pre-Impact Stability**. [Precrash General Rule #10](#) states that a vehicle is considered to be "Tracking" if the following conditions are met:

- a. No skid marks are present on the diagram or mentioned in the narrative,
- b. The case materials do not indicate skidding, and
- c. The vehicle did not rotate 30 degrees or more.

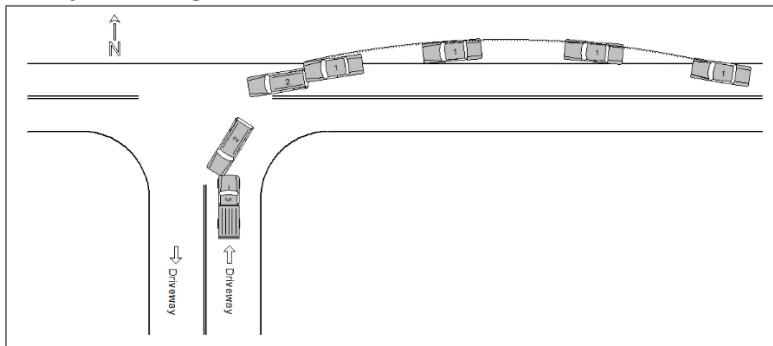

The **Pre-Impact Stability** for Vehicle 1 is [Skidding laterally-counterclockwise rotation](#) since the vehicle rotated 30 degrees or more. The driver need not make any steering inputs or leave tire marks for this attribute to be selected.

Median scenarios sometime cause confusion with the **Pre-Impact Location** element. [Departed Roadway](#) is used for vehicles crossing a median into oncoming traffic, as Vehicle 1 does in this case. A vehicle is considered to have [Returned to Roadway](#) only if it returned to the **same** roadway it was initially traveling on after the **Critical Event**.

The **Crash Type** for Vehicle 1 and Vehicle 2 is [64 and 65 Angle/Sideswipe](#) respectively since it involved the side plane of one or both of the vehicles. If the collision had involved the front plane of both vehicles, then the **Crash Type** would have been [50 and 51 Head-On](#).

Example 15

Example 15 Diagram

Vehicle 1 was traveling west on a two-lane roadway with a private driveway on the south side of the road. Vehicle 2 was westbound ahead of Vehicle 1 and was decelerating so it could turn left into the private drive. Vehicle 3 was stopped facing north on the driveway access of the private drive. The driver of Vehicle 1 was reportedly daydreaming and did not see Vehicle 2 decelerating in the lane ahead. After realizing Vehicle 2 was in its lane, the driver of Vehicle 1 braked and steered right off the right side of the road (leaving tire marks) and then steered left back into the travel lanes. The front of Vehicle 1 struck the rear of Vehicle 2 before the driver of Vehicle 2 could react. The initial impact pushed Vehicle 2 forward into Vehicle 3. The crash report identified "Not Distracted" for Vehicle 2 and Vehicle 3.

Precrash Element	Vehicle 1	Vehicle 2	Vehicle 3
Driver Distracted By	Lost in Thought/Day Dreaming	Not Distracted	Not Distracted
Pre-Event Movement	Going Straight	Going Straight	Stopped in Roadway
Critical Precrash (Category)	Other Motor Vehicle In Lane	This Vehicle Traveling	Other Motor Vehicle Encroaching Into Lane
Critical Precrash (Event)	Traveling in Same Direction While Decelerating	This Vehicle Decelerating	From Crossing Street-Turning into Opposite Direction

Precrash Data Overview

Precrash Element	Vehicle 1	Vehicle 2	Vehicle 3
Attempted Avoidance Maneuver	Braking and Steering Right	No Avoidance Maneuver	No Avoidance Maneuver
Pre-Impact Stability	Skidding Longitudinally Rotation Less Than 30 Degrees	Tracking	Tracking
Pre-Impact Location	Returned to Roadway	Stayed in Original Travel Lane	Stayed in Original Travel Lane
Crash Type	28	30	98

In this example, Vehicle 1's **Critical Crash Envelope** ($V_1\text{CCE}$) begins when the driver recognizes Vehicle 2 is decelerating ahead, and ends with impact with Vehicle 2.

Vehicle 2 has two **Critical Crash Envelopes** ($V_2\text{CCE}_1$ and $V_2\text{CCE}_2$). Vehicle 2's first **Critical Crash Envelope** ($V_2\text{CCE}_1$) begins when it is in imminent path of a collision with Vehicle 1 and ends at the point of impact with Vehicle 1. Use the **Critical Crash Envelope** that resulted in Vehicle 2's first impact ($V_2\text{CCE}_1$), because Precrash coding is associated with the **Critical Crash Envelope** that leads to a vehicle's first harmful event.

The **Critical Event** for Vehicle 1 is [Other Motor Vehicle in Lane-Traveling in Same Direction While Decelerating](#), even though the vehicle departed the right side of the roadway prior to striking Vehicle 2. Determining the **Critical Event** can be made easier by using the “**But For**” test. In this example “**But For**” Vehicle 2 being in this vehicle's lane, it would not have been involved in the crash.

Vehicle 1's **Attempted Avoidance Maneuver** is *Braking and Steering Right*, because that was the driver's initial action in response to the realization of impending danger. Vehicle 1 steering left back into the roadway is not considered in this case. Vehicle 3's **Attempted Avoidance Maneuver** is [No Avoidance Maneuver](#) because the vehicle was stopped.

The **Pre-Impact Location** for Vehicle 1 is [Returned to Roadway](#), since the vehicle returned to the **same** roadway during the Precrash motion.

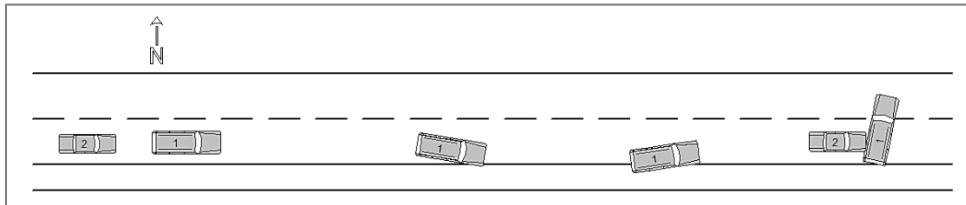

The **Crash Type** for Vehicle 1 and Vehicle 2 is [28 Rear-End: Decelerating \(Slowing\) - 30 Rear-End: Decelerating, Going Left](#) respectively based on three factors:

- The front to rear impact configuration,
- Vehicle 2's decelerating (as opposed to stopped or lower steady speed), and
- Vehicle 2's **intent** to turn left into the private drive.

Precrash Data Overview

Example 16

Example 16 Diagram

Vehicle 1 was traveling east in the right lane of a straight and level divided highway with shoulders. Vehicle 2 was eastbound in the right lane behind Vehicle 1. Conditions were daylight with rain falling and fog. All indications are that both vehicles were driving at or near the speed limit. Vehicle 1 edged off the right side of the roadway onto the shoulder and the driver overcorrected, braking and steering left, back into its original lane. The vehicle went into a counterclockwise yaw and was struck on the left side by the front of Vehicle 2.

Police indicated the driver of Vehicle 1 was "Distracted" and that the driver of Vehicle 2 was "Not Distracted."

Precrash Element	Vehicle 1	Vehicle 2
<u>Driver Distracted By</u>	Distraction (Distracted), Details Unknown	Not Distracted
<u>Pre-Event Movement</u>	Going Straight	Going Straight
<u>Critical Precrash (Category)</u>	This Vehicle Traveling	Other Motor Vehicle in Lane
<u>Critical Precrash (Event)</u>	Over the Lane Line on Right Side of Travel Lane	Traveling in Same Direction While Decelerating
<u>Attempted Avoidance Maneuver</u>	Braking and Steering Left	Unknown/Not Reported
<u>Pre-Impact Stability</u>	Skidding Laterally-Counter-Clockwise Rotation	Tracking
<u>Pre-Impact Location</u>	Returned to Roadway	Stayed in Original Travel Lane
<u>Crash Type</u>	48	48

Vehicle 1's **Critical Crash Envelope** (V₁CCE) begins when the driver realizes the vehicle is departing the travel lane and ends at impact.

The **Critical Crash Envelope** for Vehicle 2 (V₂CCE) begins when the vehicle is in imminent path of collision with Vehicle 1, and ends at impact.

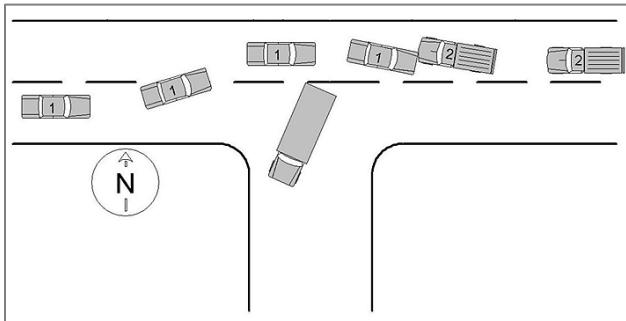

Distraction (Distracted), Details Unknown is selected for Vehicle 1 **Driver Distracted By**. Police reported the driver was distracted, although the specific distraction was not identified.

The presence of rain and fog does not affect Vehicle 1's **Critical Event** of This Vehicle Traveling-Off The Edge of the Road On the Right Side in this case. Do not assume that This Vehicle Loss of Control Critical Events such as Poor Road Conditions or Traveling Too Fast for Conditions are always selected just because the weather and/or road conditions were not optimal.

When determining **Crash Type**, it is important to keep in mind that some **Crash Configurations** are plane of impact dependent, while others are not. In this case the **Crash Type** for both vehicles are 48 Sideswipe/Angle: Specifics Other. The vehicles were traveling in the same trafficway in the same direction (Crash Type Category II) and the impact involved the side of one or both of the vehicles (Crash Type Configuration F). If the impact had been front to rear, Crash Configuration D (Rear-End) would have applied.

Example 17

Example 17 Diagram

Vehicle 1 is traveling eastbound. A noncontact vehicle (NCV) is westbound and attempts to turn left in front of Vehicle 1 into an intersecting private driveway. Vehicle 1 braked and steered left to avoid the noncontact vehicle. The driver of Vehicle 1 successfully avoided the noncontact vehicle and maintained full control, but crossed into the westbound lane. Now traveling the wrong way in the westbound lane, Vehicle 1 recognized that Vehicle 2 was in his path and attempted to steer right and return to the eastbound lane but struck Vehicle 2 head on. Vehicle 2 attempted to avoid the crash by braking and steering right. The crash report was coded as "Not Distracted" for both drivers.

Precrash Element	Vehicle 1	Vehicle 2
Driver Distracted By	Not Distracted	Not Distracted
Pre-Event Movement	Successful Avoidance Maneuver to a Previous Critical Event	Going Straight
Critical Precrash (Category)	Other Motor Vehicle in Lane	Other Motor Vehicle in Lane
Critical Precrash (Event)	Traveling in Opposite Direction	Traveling in Opposite Direction
Attempted Avoidance Maneuver	Steering Right	Braking and Steering Right
Pre-Impact Stability	Tracking	Tracking
Pre-Impact Location	Stayed in Original Travel Lane	Stayed in Original Travel Lane
Crash Type	52	52

In this example, Vehicle 1 has two **Critical Crash Envelopes** (V_1CCE_1 and V_1CCE_2). Vehicle 1's first **Critical Crash Envelope** (V_1CCE_1) ends at the point where the driver of Vehicle 1 made a successful avoidance maneuver and maintained full control of the vehicle. Vehicle 1's second **Critical Crash Envelope** (V_1CCE_2) begins shortly after the successful avoidance maneuver and ends at the point of impact with Vehicle 2. For coding purposes, use the **Critical Crash Envelope** that resulted in Vehicle 1's first impact (V_1CCE_2).

Vehicle 2 has one **Critical Crash Envelope** (V_2CCE_1), which begins at the point where the driver of Vehicle 2 recognizes Vehicle 1 in their lane, and ends at the point of impact with Vehicle 1.

The **Crash Type** for both vehicles is coded [52 Head-On: Specifics Other](#) because Vehicle 1 had full control traveling the wrong way.

Precrash Data Overview

Example 18: Precrash Event Scenarios for Different Rear-End Collision Situations

Rear-end crashes sometimes cause confusion with precrash coding. Two key points must be determined to accurately code the [Pre-Event Movement](#), [Critical Event - Precrash \(Category\)](#) and [Critical Event - Precrash \(Event\)](#):

- Was the lead vehicle stopped, decelerating, or traveling at a steady speed?
- Did the trailing vehicle decelerate prior to impact?

The following scenarios should be used as a guide.

Two-Vehicle Collisions

Scenario 1: Both vehicles in motion. Leading vehicle, traveling at steady speed, is struck from behind by trailing vehicle.

Vehicle Position	Pre-Event Movement	Critical Precrash (Category)	Critical Precrash (Event)
Trailing	Going Straight	Other Motor Vehicle in Lane	Traveling in Same Direction with Lower or Steady Speed
Lead	Going Straight	Other Motor Vehicle in Lane	Traveling in Same Direction with Higher Speed

Scenario 2: Both vehicles traveling at same speed. Lead vehicle decelerates and trailing vehicle continues at initial speed. Trailing vehicle eventually applies brakes before striking the lead vehicle that is not yet stopped.

Vehicle Position	Pre-Event Movement	Critical Precrash (Category)	Critical Precrash (Event)
Trailing	Going Straight	Other Motor Vehicle in Lane	Traveling in Same Direction While Decelerating
Lead	Going Straight	This Vehicle Traveling	This Vehicle Decelerating

Scenario 3: Both vehicles traveling at same speed. Lead vehicle stops and is immediately struck by trailing vehicle.

Vehicle Position	Pre-Event Movement	Critical Precrash (Category)	Critical Precrash (Event)
Trailing	Going Straight	Other Motor Vehicle in Lane	Traveling in Same Direction While Decelerating
Lead	Going Straight	Other Motor Vehicle in Lane	Traveling in Same Direction with Higher Speed

Scenario 4: Lead vehicle is stopped on roadway and is struck by a trailing vehicle.

Vehicle Position	Pre-Event Movement	Critical Precrash (Category)	Critical Precrash (Event)
Trailing	Going Straight	Other Motor Vehicle in Lane	Other Vehicle Stopped
Lead	Stopped in Road	Other Motor Vehicle in Lane	Traveling in Same Direction with Higher Speed

Scenario 5: Lead and trailing vehicle stopped on roadway. Lead vehicle backs into trailing vehicle.

Vehicle Position	Pre-Event Movement	Critical Precrash (Category)	Critical Precrash (Event)
Trailing	Stopped in Road	Other Motor Vehicle in Lane	Backing
Lead	Stopped in Road	This Vehicle Traveling	Backing

Precrash Data Overview

Three-Vehicle Collisions

Scenario 6: Two vehicles stopped in traffic, struck by decelerating trailing vehicle

Vehicle Position	Pre-Event Movement	Critical Precrash (Category)	Critical Precrash (Event)
Trailing	Decelerating	Other Motor Vehicle in Lane	Other Vehicle Stopped
Middle	Stopped in Road	Other Motor Vehicle in Lane	Traveling in Same Direction while Decelerating
Lead	Stopped in Road	Other Motor Vehicle in Lane	Traveling in Same Direction with Higher Speed

Scenario 7: Lead vehicle stopped in traffic, middle vehicle decelerating, trailing vehicle strikes middle vehicle that strikes lead vehicle.

Vehicle Position	Pre-Event Movement	Critical Precrash (Category)	Critical Precrash (Event)
Trailing	Going Straight	Other Motor Vehicle in Lane	Traveling in Same Direction while Decelerating
Middle	Decelerating	Other Motor Vehicle in Lane	Traveling in Same Direction with Higher Speed
Lead	Stopped in Road	Other Motor Vehicle in Lane	Traveling in Same Direction with Higher Speed

PC3 - Vehicle Number – Precrash Level

FORMAT: 3 numeric

SAS NAME: Vehicle.Veh_No

ELEMENT VALUES:

- 001-999

Definition: This element identifies the number assigned to this vehicle in the crash.

Remarks: Each motor vehicle in a crash must be assigned a unique number by the analyst. Order is not important.

Numbers assigned to vehicles must be consecutive, starting with 001 with no missing numbers.

PC4 - Contributing Circumstances, Motor Vehicle

FORMAT: 2 numeric. Select all that apply.

SAS NAME: Factor.MFACTOR

ELEMENT VALUES:

Codes	Attributes
00	None
01	Tires
02	Brake System
03	Steering
04	Suspension
05	Power Train
06	Exhaust System
07	Head Lights
08	Signal Lights
09	Other Lights
10	Wipers
11	Wheels
12	Mirrors
13	Windows/Windshield
14	Body, Doors
15	Truck Coupling/Trailer Hitch/Safety Chains
16	Safety Systems
17	Vehicle Contributing Factors - No Details
97	Other
98	Not Reported
99	Reported as Unknown

Definition: This element describes the possible pre-existing motor vehicle defects or maintenance conditions that may have contributed to the crash.

Remarks: Rationale: Important for determining the significance of pre-existing problems, including equipment and operation, in motor vehicles involved in crashes that could be useful in determining the need for improvements in manufacturing and consumer alerts.

00 (None) is used:

- when the case materials make a positive statement that the vehicle had no defects or “none” was indicated on the police crash report.
- when the case materials do not indicate a defect in an available field and not reporting a defect in that field indicates “None.”
- when the investigating officer is limited in selection and cannot select a defect in addition to another factor relevant to crash and no other indication of a defect exists in the case materials.

For omission of information see [Not Reported](#) guidance below.

01 (Tires) include any defect (e.g., lost/losing re-tread) or maintenance issue of a tire (e.g., one or more bald tires). If the contributing factor is of the wheel (e.g., a lug nut comes off), then use [11 \(Wheels\)](#). If the officer noted this driver was driving with a “donut”/spare tire, improperly sized tire(s), driving on run-flats in an air-out situation, etc., see Driver Related Factor [57 \(Driving with Tire Related Problems\)](#).

02 (Brake System) includes parking brakes.

03 (Steering) is used when the case materials indicate the following may have contributed to the crash: tie rod ends, kingpins, power steering components, and ball joints.

04 (Suspension) is used when the case materials indicate that the vehicle’s suspension components may have contributed to the crash. These include, springs, shock absorbers, struts, and control arms.

05 (Power Train) is used when the case materials indicate that the vehicles power train components may have contributed to the crash. Examples are: universal joints, drive shaft, and transmission. This also includes engine, differential, and stuck throttles.

06 (Exhaust System) includes exhaust manifold(s), headers, muffler, catalytic converter, tailpipe, etc.

09 (Other Lights) is used for an indication of missing or inoperative tail lights on the vehicle or trailer contributing to the crash. It is also used when the case materials indicated the “lights” of the vehicle contributed to the crash but the type of light is not specified.

11 (Wheels) includes loss of lug nuts.

13 (Windows/Windshield) is used when there is a pre-existing defect to the windows or windshield such as improper tinting or cracks.

14 (Body, Doors) includes trunk, hood, tailgate, rear doors of cargo vans, etc.

15 (Truck Coupling/Trailer Hitch/Safety Chains) applies to a defective trailer hitch or an improper trailer hitch.

16 (Safety Systems) is used when the case materials indicate that the air bags failed to deploy or the air bag deployed inappropriately. Also, use this when a seat belt failure is described, such as webbing that was excessively worn or came unlatched. Excludes: improper use.

17 (Vehicle Contributing Factors - No Details) is used if a vehicle “factor” or “defect” is indicated in the case materials but no information is given concerning the nature of the “factor.”

97 (Other) includes any other component described in the case materials that is not listed in the above attribute list, such as horns.

98 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks is NOT considered “**Not Reported**.”

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials)
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash

report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown) is used only if the case material specifically indicates an “unknown defect” or “unknown contributing factor.”

Consistency Checks:

Check	IF	THEN
(1L4P)	any DRIVER'S VISION OBSCURED BY equals 09,	at least one CONTRIBUTING CIRCUMSTANCES, MOTOR VEHICLE must equal 97.
(1L5P)	any DRIVER'S VISION OBSCURED BY equals 10,	at least one CONTRIBUTING CIRCUMSTANCES, MOTOR VEHICLE must equal 07 or 08 or 09.
(3D70)	CRITICAL EVENT – PRECRASH (EVENT) equals 01-04,	CONTRIBUTING CIRCUMSTANCES, MOTOR VEHICLE must not equal 00.
(3DB0)	any CONTRIBUTING CIRCUMSTANCES, MOTOR VEHICLE equals 00 or 98 or 99,	only that one code and no other must be coded for this vehicle.
(V990)	any SEQUENCE OF EVENTS equals 61,	CONTRIBUTING CIRCUMSTANCES, MOTOR VEHICLE should not equal 00.

PC5 - Trafficway Description

FORMAT: 1 numeric

SAS NAME: VEHICLE.VTRAFWAY

ELEMENT VALUES:

Codes	Attributes
0	Non-Trafficway or Driveway Access
1	Two-Way, Not Divided
2	Two-Way, Divided, Unprotected Median
3	Two-Way, Divided, Positive Median Barrier
5	Two-Way, Not Divided with a Continuous Left-Turn Lane
4	One-Way Trafficway
6	Entrance/Exit Ramp
8	Not Reported
9	Reported as Unknown

Definition: This element identifies the value indicated in the case materials that best describes the trafficway flow just prior to this vehicle's critical precrash event.

Remarks: Enter the value indicated in the case materials that best describes the trafficway flow just prior to this vehicle's critical precrash event. For vehicles departing the trafficway prior to their critical precrash events, the trafficway selected for classification is the one the vehicle departed. If this vehicle is in a junction just prior to its critical precrash event, the trafficway selected for classification is the one it is on before entering the junction.

A trafficway may include several roadways if it is a physically divided highway. Trafficways are not physically divided unless the divider is a median, barrier, or other constructed device. **Pavement markings do qualify when they meet the definition of a median.** Refer to the definition of [03 \(On Median\)](#) under Relation to Trafficway.

A channelized lane should be considered a turn lane of the roadway it is part of, not a separate one-way roadway. Therefore, crashes occurring in a channelized lane should not be coded as on a separate trafficway but should reflect the trafficway the vehicle was on before entering the channel.

0 (Non-Trafficway or Driveway Access) is used when this vehicle is entering a trafficway but was not on a trafficway prior to its critical precrash event or when the vehicle was in a driveway access prior to its critical precrash event.

1 (Two-Way, Not Divided) is used whenever there is no median. Generally, medians are not designed to legally carry traffic. Any painted markings on the roadway less than four feet wide are not medians. **NOTE:** Although gores separate roadways, and traffic islands (associated with channels) separate travel lanes, neither is involved in the determination of trafficway division.

5 (Two-Way, Not Divided, with a Continuous Left-Turn Lane) is used whenever the trafficway has a two-way left turn lane positioned between opposing straight-through travel lanes. It is designed to allow left turns to driveways, shopping centers, businesses, etc., while at the same time providing a separation of opposing straight-through travel lanes.

2 (Two-Way, Divided, Unprotected Median) is used whenever the trafficway is physically divided; however, the division is unprotected (e.g., vegetation, gravel, paved medians, trees, water, embankments, painted medians greater than 4 feet, and ravines that separate a trafficway [i.e., all non-manufactured barriers]). **NOTE: Curbs alone are not traffic barriers; therefore, raised curbed medians DO NOT constitute a positive barrier in and by themselves.** **Without a positive barrier, curbed medians are examples of 2 (Two-Way, Divided, Unprotected Medians).** The unprotected medians can be of any width; however, painted, paved, flush areas must be at least 4 feet in width to constitute a median strip. **Continuous Left-turn Lanes are not considered Unprotected Medians** (see [5 \(Two-Way, Not Divided, with a Continuous Left-Turn Lane\)](#)).

3 (Two-Way, Divided, Positive Median Barrier) is used whenever the traffic is physically divided and the division is protected by any concrete, metal, or other type of longitudinal barrier (i.e., all manufactured barriers). For underpass support structures and bridge rails acting as a barrier, use this attribute.

Traffic Barrier refers to a physical structure such as a guardrail, a concrete safety barrier, or a rock wall that has the primary function of preventing cross-median travel by deflecting and redirecting vehicles along the roadway on which they were traveling. Therefore, trees, curbing, rumble strips, and drain depressions are not barriers.

All traffic barriers are constructed on a median strip; therefore, if a traffic barrier exists on a divided highway, **3 (Two-Way, Divided, Positive Median Barrier)** must be used. If it is not known whether or not a barrier exists, assume one does and use **3 (Two-Way, Divided, Positive Median Barrier)** (that is, if a median is known to exist).

4 (One-Way Trafficway) is used whenever the trafficway is undivided and traffic flows in one direction (e.g., one-way streets).

6 (Entrance/Exit Ramp) is an auxiliary or connecting roadway used for entering or exiting through-traffic lanes of a limited access roadway.

8 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks is NOT considered "**Not Reported**."

Code **8 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

9 (Reported as Unknown) is used when police indicate unknown.

Consistency Checks:

Check	IF	THEN
(250P)	RELATION TO JUNCTION (b) equals 01, 02, 04, 06, 07, 16-19, 98, 99, and RELATION TO TRAFFICWAY equals 03,	TRAFFICWAY DESCRIPTION should equal 2, 3 for at least one vehicle involved in the first harmful event.

Check	IF	THEN
(254P)	RELATION TO TRAFFICWAY equals 01, and RELATION TO JUNCTION (b) equals 20,	TRAFFICWAY DESCRIPTION must equal 6 for at least one vehicle involved in the FIRST HARMFUL EVENT.
(740P)	RELATION TO JUNCTION (b) equals 07,	TRAFFICWAY DESCRIPTION must equal 2, 3 for at least one vehicle.
(A470)	WORK ZONE equals 0, and TRAFFICWAY DESCRIPTION equals 1-3, 5,	TOTAL LANES IN ROADWAY should not equal 1.
(A481)	TRAFFICWAY DESCRIPTION equals 6, and RELATION TO JUNCTION (b) does not equal 02, 03,	TOTAL LANES IN ROADWAY should equal 1, 2, 8, 9.
(A482)	TRAFFICWAY DESCRIPTION equals 4 or 6,	TOTAL LANES IN ROADWAY should not equal 5-7.
(A491)	TRAFFICWAY DESCRIPTION equals 2 or 3,	TOTAL LANES IN ROADWAY should not equal 7.
(A492)	TRAFFICWAY DESCRIPTION equals 2, 3, 5, 6,	SPEED LIMIT must not equal 00.
(A493)	TRAFFICWAY DESCRIPTION equals 2, 3, 5,	SPEED LIMIT should be greater than 15.
(A494)	TRAFFICWAY DESCRIPTION equals 6,	ROADWAY GRADE should not equal 3, 4.
(A495)	TRAFFICWAY DESCRIPTION equals 0,	the first event in SEQUENCE OF EVENTS for this vehicle should not equal 63, 64, 69, or 71.
(A610)	RELATION TO TRAFFICWAY equals 01, and RELATION TO JUNCTION (b) equals 05,	TRAFFICWAY DESCRIPTION should equal 6 for at least one vehicle involved in the FIRST HARMFUL EVENT.
(A611)	TRAFFICWAY DESCRIPTION equals 6 for at least one vehicle involved in the FIRST HARMFUL EVENT,	RELATION TO JUNCTION (b) should equal 02, 03, 05, 17-20.
(A620)	CRASH TYPE equals 06-10, and TRAFFICWAY DESCRIPTION equals 3,	RELATION TO TRAFFICWAY should equal 03 or 12.
(A881)	RELATION TO TRAFFICWAY equals 11,	TRAFFICWAY DESCRIPTION should equal 5 for at least one vehicle.
(AM2P)	any SEQUENCE OF EVENTS equals 25 or 57,	TRAFFICWAY DESCRIPTION should equal 3, 6.

Consistency Check (CRSS Only):

Check	IF	THEN
(A3H0)	INTERSTATE HIGHWAY equals 1, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) is not equal to 03 or 05 or 20,	TRAFFICWAY DESCRIPTION should not equal 4 for at least one vehicle involved in the FIRST HARMFUL EVENT.

Consistency Check (FARS Only):

Check	IF	THEN
(A300)	ROUTE SIGNING equals 1,	TRAFFICWAY DESCRIPTION should equal 2, 3, 6 for at least one vehicle.
(A292)	any TRAFFICWAY DESCRIPTION, TOTAL LANES IN ROADWAY, ROADWAY ALIGNMENT, ROADWAY GRADE, ROADWAY SURFACE TYPE, or ROADWAY SURFACE CONDITIONS equals 0, 00 for this vehicle,	all must equal 0, 00, and SPEED LIMIT must equal 00 for this vehicle.

Check	IF	THEN
(A490)	TRAFFICWAY DESCRIPTION equals 2, 3, 5,	ROADWAY SURFACE TYPE should not equal 4, 5, 7.
(A720)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01, 02,	TRAFFICWAY DESCRIPTION should equal 2, 3, 6 for at least one vehicle.

PC6 - Total Lanes in Roadway

FORMAT: 1 numeric

SAS NAME: Vehicle.VNUM_LAN

ELEMENT VALUES:

Codes	Attributes
0	Non-Trafficway or Driveway Access
1	One Lane
2	Two Lanes
3	Three Lanes
4	Four Lanes
5	Five Lanes
6	Six Lanes
7	Seven or More Lanes
8	Not Reported
9	Reported as Unknown

Definition: This element identifies the value indicated in the case materials that best describes the number of roadway lanes just prior to this vehicle's critical precrash event.

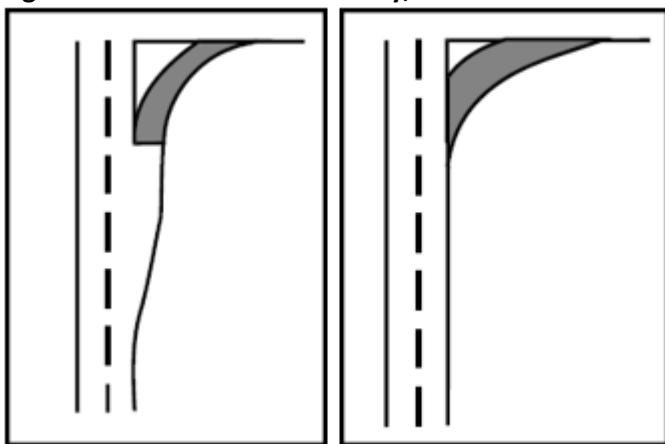

Remarks: For vehicles departing the trafficway prior to their critical precrash events, the trafficway selected for classification is the one the vehicle departed. If this vehicle is in a junction just prior to its critical precrash event, the roadway selected for classification is the one it is on before entering the junction.

A roadway is one part of a divided trafficway or, if undivided, the same as the trafficway.

The number of lanes counted does not include any of which are rendered unusable by restriction of the right-of-way (e.g., closed due to construction).

If turn bays, acceleration, deceleration, or center two-way left turn lanes exist and are physically located within the cross section of the roadway, and these lanes are the most representative of the driver's environment just prior to the critical precrash event, then they are to be included in the number of lanes. Because a channelized lane is separated, it should not be included unless it is preceded by a turn bay or turn lane and this bay or lane is felt to be most representative of the driver's environment just prior to impact.

Channelized lanes are separated from other through or turn related lanes. (**NOTE:** The separation normally will not involve a physical barrier.) If the channel is most representative of the driver's critical precrash environment, count the number of lanes in the channel for this element. (See Examples of channelized lanes [Figure 22](#).)

Figure 22: Channel with Turn Bay, Channel without Turn Bay

0 (Non-Trafficway or Driveway Access) is used when this vehicle is entering a trafficway but was not on a trafficway prior to its critical precrash event or when the vehicle was in a driveway access prior to its critical precrash event.

If traffic flows in both directions and is undivided, code the total number of lanes in both directions. If the trafficway is divided into two or more roadways, code only the number of lanes for the roadway on which this vehicle was traveling. **Be aware that the case materials may indicate the total number of lanes on the divided trafficway.**

8 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks is NOT considered "**Not Reported**."

Code **8 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

9 (Reported as Unknown) is used when police indicate unknown.

Consistency Checks:

Check	IF	THEN
(A470)	WORK ZONE equals 0, and TRAFFICWAY DESCRIPTION equals 1-3, 5,	TOTAL LANES IN ROADWAY should not equal 1.
(A481)	TRAFFICWAY DESCRIPTION equals 6, and RELATION TO JUNCTION (b) does not equal 02, 03,	TOTAL LANES IN ROADWAY should equal 1, 2, 8, 9.
(A482)	TRAFFICWAY DESCRIPTION equals 4 or 6,	TOTAL LANES IN ROADWAY should not equal 5-7.
(A491)	TRAFFICWAY DESCRIPTION equals 2 or 3,	TOTAL LANES IN ROADWAY should not equal 7.
(PC50)	PRE-IMPACT LOCATION equals 2,	TOTAL LANES IN ROADWAY should not equal 1.

Consistency Check (CRSS Only):

Check	IF	THEN
(A3G0)	INTERSTATE HIGHWAY equals 1, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) is not equal to 03 or 05 or 20,	TOTAL LANES IN ROADWAY should not equal 1 for at least one vehicle involved in the first harmful event.

Consistency Check (FARS Only):

Check	IF	THEN
(A250)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01-03, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) does not equal 03, 05, 20,	TOTAL LANES IN ROADWAY should not equal 1 for the vehicles involved in the FIRST HARMFUL EVENT.
(A292)	any TRAFFICWAY DESCRIPTION, TOTAL LANES IN ROADWAY, ROADWAY ALIGNMENT, ROADWAY GRADE, ROADWAY SURFACE TYPE, or ROADWAY SURFACE CONDITIONS equals 0, 00 for this vehicle,	all must equal 0, 00, and SPEED LIMIT must equal 00 for this vehicle.
(A310)	ROUTE SIGNING equals 1, and RELATION TO JUNCTION (a) equals 0,	TOTAL LANES IN ROADWAY should not equal 1 for any vehicle.
(A500)	TOTAL LANES IN ROADWAY equals 3-7,	ROADWAY SURFACE TYPE should not equal 4, 5, 7.

PC7 - Speed Limit

FORMAT: 2 numeric

SAS NAME: Vehicle.VSPD_LIM

ELEMENT VALUES:

Codes	Attributes
00	No Statutory Limit/Non-Trafficway or Driveway Access
05-95	Actual Speed Limit (in 5 mph increments)
98	Not Reported
99	Reported as Unknown

Definition: This element identifies the value indicated in the case materials that best represents the speed limit just prior to this vehicle's critical precrash event.

Remarks: For vehicles departing the trafficway prior to their critical precrash events, the trafficway selected for classification is the one the vehicle departed. If this vehicle is in a junction just prior to its critical precrash event, the roadway selected for classification is the one it is on before entering the junction.

Note: Refer to the highway speed limit that is operational at the time and place of the crash whether physically displayed or not. Try not to confuse advisory signs on entrance/exit ramps or near intersections with the actual legal maximum speed limit. Disregard advisory or other speed signs since they do not indicate the legal speed limit. If a State has a statute that uniformly reduces the maximum allowable speed limit within or near a construction zone, then code the indicated reduced speed limit, if known.

Acceptable speed limits are in 5 mph increments.

00 (No Statutory Limit/Non-Trafficway or Driveway Access) is used when there is no posted speed limit and no law that governs the maximum speed you can drive (dirt roads, private roads open to the public). Also use this attribute in cases when this vehicle is entering a trafficway but was not on a trafficway prior to its critical precrash event or when the vehicle was in a driveway access prior to its precrash event.

When coding speed limit for roadways with two different speed limits (for north- and south-bound lanes), use the speed limit for the direction of travel where the critical precrash event begins.

When a roadway has a different speed limit for different types of vehicles, code the speed limit that is applicable to passenger cars.

Example:

A rural Interstate highway has a speed limit of 65 mph for passenger cars, but the same road has a 55 mph speed limit for heavy trucks/buses.

- **Circumstance 1:** A single-vehicle (passenger car) crash. Speed Limit = 65 mph
- **Circumstance 2:** A single-vehicle (heavy truck/bus) crash. Speed Limit = 65 mph
- **Circumstance 3:** A two-vehicle crash, (passenger car and heavy truck/bus) crash. Speed Limit = 65 mph

Logic:

Our statisticians feel that it would be more representative to code the speed limit of the majority of the traffic, namely the passenger car. In addition, they feel that by identifying the car speed limit of 65 mph, they can then determine the truck speed limit by reviewing the State's speed limit law. (The reverse is not necessarily true.)

98 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials)
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown) is used when police indicate unknown.

Values less than 15 mph are unlikely occurrences and will raise an error flag.

FARS SPECIAL INSTRUCTION:

Accurate coding of Speed Limit is extremely important. Do not rely solely on the police crash report. Check with the State highway department as well.

When coding Speed Limit on On/Off Ramps (i.e., when the critical precrash event occurs on the ramp), consider the following:

- A. When a ramp has a posted speed limit - a regulatory (black on white) sign, not an advisory (black on yellow) one - the posted speed should be coded.
- B. When there is an advisory speed limit or no sign at all, you should:
 1. Check with your State highway department to see if there is an implicit speed limit for all unmarked ramps. If there is, code speed limit.
 2. If there is not; code the speed limit of the controlled access highway.

Consistency Checks:

Check	IF	THEN
(A492)	TRAFFICWAY DESCRIPTION equals 2, 3, 5, 6,	SPEED LIMIT must not equal 00.
(A493)	TRAFFICWAY DESCRIPTION equals 2, 3, 5,	SPEED LIMIT should be greater than 15.
(A521)	any SEQUENCE OF EVENTS equals 46,	SPEED LIMIT should equal 05-50, 98, or 99 for this vehicle.
(A830)	FIRST HARMFUL EVENT equals 46,	SPEED LIMIT should be less than 55 for the vehicle involved in the FIRST HARMFUL EVENT.

Consistency Checks (CRSS Only):

Check	IF	THEN
(A3J0)	INTERSTATE HIGHWAY equals 1, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) is not equal to 03 or 05 or 20,	SPEED LIMIT should not equal 01-40 for at least one vehicle involved in the FIRST HARMFUL EVENT.
(A965)	PSU equals MA, VT, NY, NJ, OR, WI,	maximum SPEED LIMIT (not including 98 or 99) should equal 65.
(A970)	PSU equals AL, CA, FL, GA, IA, IL, KY, MD, MI, MN, NC, OH, PA, SC, TN, VA, WA,	maximum SPEED LIMIT (not including 98 or 99) should equal 70.
(A975)	PSU equals AZ, CO, LA, ME, OK, TX, UT,	maximum SPEED LIMIT (not including 98 or 99) should equal 75.

Check	IF	THEN
(A980)	PSU equals SD,	Maximum SPEED LIMIT (not including 98 or 99) should equal 80.

Consistency Checks (FARS Only):

Check	IF	THEN
(1TOP)	SPEED LIMIT for every vehicle is greater than 55, and not equal to 98 or 99,	LAND USE AND FUNCTIONAL SYSTEM (a) should not equal 2 or 6, and LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 06, 07, or 96.
(A220)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01, 02, and RELATION TO JUNCTION (a) equals 0,	SPEED LIMIT should not equal 05-40 for any vehicle.
(A292)	any TRAFFICWAY DESCRIPTION, TOTAL LANES IN ROADWAY, ROADWAY ALIGNMENT, ROADWAY GRADE, ROADWAY SURFACE TYPE, or ROADWAY SURFACE CONDITIONS equals 0, 00 for this vehicle,	all must equal 0, 00, and SPEED LIMIT must equal 00 for this vehicle.
(A320)	ROUTE SIGNING equals 1, and RELATION TO JUNCTION (a) equals 0,	SPEED LIMIT should not equal 05-40 for any vehicle.
(A700)	SPEED LIMIT is greater than 65 for every vehicle,	ROUTE SIGNING should equal 1-4.
(A900)	SPEED LIMIT equals 60, 65 for every vehicle,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 04-07 or 96.
(A940)	STATE NUMBER equals 11,	maximum SPEED LIMIT (not including 98 or 99) should equal 55.
(A945)	STATE NUMBER equals 15,	maximum SPEED LIMIT (not including 98 or 99) should equal 60.
(A950)	STATE NUMBER equals 02, 09, 10, 25, 34, 36, 41, 43, 44, 50,	maximum SPEED LIMIT (not including 98 or 99) should equal 65.
(A955)	STATE NUMBER equals 01, 05, 06, 12, 13, 17, 18, 19, 21, 24, 26, 27, 28, 29, 33, 37, 39, 42, 45, 47, 51, 53, 54, 55,	maximum SPEED LIMIT (not including 98 or 99) should equal 70.
(A960)	STATE NUMBER equals 04, 08, 20, 22, 23, 31, 35, 38, 40, 48,	maximum SPEED LIMIT (not including 98 or 99) should equal 75.
(A961)	STATE NUMBER equals 16, 30, 32, 46, 49, 56	maximum SPEED LIMIT (not including 98 or 99) should equal 80.

PC8 - Roadway Alignment

FORMAT: 1 numeric

SAS NAME: Vehicle.VALIGN

ELEMENT VALUES:

Codes	Attributes
0	Non-Trafficway or Driveway Access
1	Straight
2	Curve-Right
3	Curve-Left
4	Curve - Unknown Direction
8	Not Reported
9	Reported as Unknown

Definition: This element identifies the value indicated in the case materials that best represents the roadway alignment prior to this vehicle's critical precrash event.

Remarks: For vehicles departing the trafficway prior to their critical precrash events, the trafficway selected for classification is the one the vehicle departed. For crashes occurring in a channel, consider the Roadway Alignment of the channel itself.

This data element is coded in accordance with the precrash protocols outlined in the [PRECRASH DATA OVERVIEW](#) section of the Coding Manual. In the precrash data elements that record the characteristics of the trafficway, the value coded should be most representative of the driver's critical precrash environment. For resolving ambiguities, the police crash report information is prioritized as follows:

1. The Narrative is used if it describes roadway alignment prior to the vehicle's critical precrash event.
2. The Diagram is used if it shows the roadway alignment prior to the vehicle's critical precrash event.
3. If the roadway alignment prior to the vehicle's critical precrash event is not described in the Narrative or shown in the Diagram, use the check-box information.
4. If the check-box does not exist, is not filled out, or is recorded at the crash level and does not apply to this vehicle's environment, then code [8 \(Not Reported\)](#).

0 (Non-Trafficway or Driveway Access) is used when this vehicle is entering a trafficway but was not on a trafficway prior to its critical precrash event or when the vehicle was in a driveway access prior to its precrash event.

1 (Straight) is selected if the case materials indicate this vehicle's roadway is straight.

2 (Curve Right) or 3 (Curve Left) is selected if the case materials indicate this vehicle's roadway is curved or there is any curvature discernable on the diagram.

4 (Curve - Unknown Direction) is selected if the case materials indicate a curve, but no curve direction (left/right) is indicated.

8 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks is NOT considered "**Not Reported**."

Code **8 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

9 (Reported as Unknown) is used when police indicate unknown.

Consistency Checks:

Check	IF	THEN
(A4D0)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 14,	ROADWAY ALIGNMENT must equal 2-4.
(A4D1)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 01,	ROADWAY ALIGNMENT should not equal 2-4.

Consistency Checks (FARS Only):

Check	IF	THEN
(A292)	any TRAFFICWAY DESCRIPTION, TOTAL LANES IN ROADWAY, ROADWAY ALIGNMENT, ROADWAY GRADE, ROADWAY SURFACE TYPE, or ROADWAY SURFACE CONDITIONS equals 0, 00 for this vehicle,	all must equal 0, 00, and SPEED LIMIT must equal 00 for this vehicle.

PC9 - Roadway Grade

FORMAT: 1 numeric

SAS NAME: Vehicle.VProfile

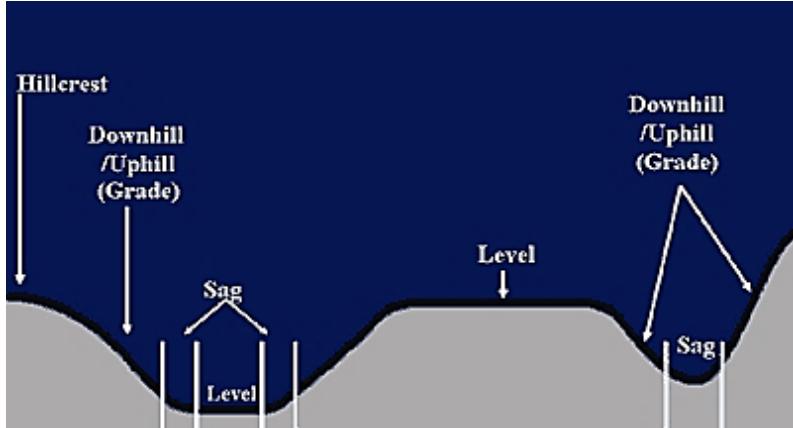

ELEMENT VALUES:

Codes	Attributes
0	Non-Trafficway or Driveway Access
1	Level
3	Hillcrest
5	Uphill
6	Downhill
2	Grade, Unknown Slope
4	Sag (Bottom)
8	Not Reported
9	Reported as Unknown

Definition: This element identifies the value indicated in the case materials that best represents the roadway grade prior to this vehicle's critical precrash event.

Remarks: For vehicles departing the trafficway prior to their critical precrash events, the trafficway selected for classification is the one the vehicle departed. If this vehicle is in a junction just prior to its critical precrash event, the roadway selected for classification is the one it is on before entering the junction. For crashes occurring in a channel, consider the Roadway Grade of the channel itself.

Figure 23: Diagram of Roadway Grades

0 (Non-Trafficway or Driveway Access) is used when this vehicle is entering a trafficway but was not on a trafficway prior to its critical precrash event or when the vehicle was in a driveway access prior to its critical precrash event.

3 (Hillcrest) refers to the area of transition between an uphill and a downhill grade.

2 (Grade, Unknown Slope) is used if the case materials indicate a grade, but uphill/downhill is not indicated.

4 (Sag [Bottom]) is a designed transition feature between a change of grade at the bottom of a hill. It is not a dip, which is a flaw.

A dip on the road is not the same as a sag. A sag is a design feature whereas a dip is a flaw. The minimum length of a sag is 100 feet.

8 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **8 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

9 (Reported as Unknown) is used when police indicate unknown.

Consistency Checks:

Check	IF	THEN
(1Z1P)	any SEQUENCE OF EVENTS equals 66,	ROADWAY GRADE should equal 6 for this vehicle.
(A494)	TRAFFICWAY DESCRIPTION equals 6,	ROADWAY GRADE should not equal 3, 4.

Consistency Checks (FARS Only):

Check	IF	THEN
(A292)	any TRAFFICWAY DESCRIPTION, TOTAL LANES IN ROADWAY, ROADWAY ALIGNMENT, ROADWAY GRADE, ROADWAY SURFACE TYPE, or ROADWAY SURFACE CONDITIONS equals 0, 00 for this vehicle,	all must equal 0, 00, and SPEED LIMIT must equal 00 for this vehicle.

PC10 - Roadway Surface Type - FARS Only

FORMAT: 1 numeric

SAS NAME: Vehicle.VPAVETYP

ELEMENT VALUES:

Codes	Attributes
0	Non-Trafficway Area or Driveway Access
1	Concrete
2	Blacktop, Bituminous, or Asphalt
3	Brick or Block
4	Slag, Gravel, or Stone
5	Dirt
7	Other
8	Not Reported
9	Reported as Unknown

Definition: This element identifies the value indicated in the case materials that best represents the roadway surface type prior to this vehicle's critical precrash event.

Remarks: For vehicles departing the trafficway prior to their critical precrash events, the trafficway selected for classification is the one the vehicle departed. If this vehicle is in a junction just prior to its critical precrash event, the roadway selected for classification is the one it is on before entering the junction.

Should be obtained from the crash report or the State highway department.

If the police crash report lists more than one type, choose the type with the lowest number. For example, if the police crash report indicates Dirt/Gravel, then use **4 (Slag, Gravel, or Stone)**.

0 (Non-Trafficway or Driveway Access) is used when this vehicle is entering a trafficway but was not on a trafficway prior to its critical precrash event or when the vehicle was in a driveway access prior to its critical precrash event.

If a police crash report data element is coded with the attribute "Other" but the officer does not specify what this refers to:

1. Code **7 (Other)** if the police crash report attribute choices can be matched to or include all the attributes in FARS/CRSS.
2. Code **8 (Not Reported)** if the police crash report choices cannot be matched to or include all the attributes in FARS/CRSS.

8 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks is NOT considered "**Not Reported**."

Code **8 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report

that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

Consistency Checks:

Check	IF	THEN
(A160)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01-06,	ROADWAY SURFACE TYPE should equal 1, 2, 8, or 9 for at least one vehicle.
(A170)	ROADWAY SURFACE TYPE equals 3-5 for every vehicle,	LAND USE AND FUNCTIONAL SYSTEM (b) should not equal 01-06.
(A292)	any TRAFFICWAY DESCRIPTION, TOTAL LANES IN ROADWAY, ROADWAY ALIGNMENT, ROADWAY GRADE, ROADWAY SURFACE TYPE, or ROADWAY SURFACE CONDITIONS equals 0, 00 for this vehicle,	all must equal 0, 00, and SPEED LIMIT must equal 00 for this vehicle.
(A330)	ROUTE SIGNING equals 1, 2,	ROADWAY SURFACE TYPE should equal 1, 2, 8 for at least one vehicle.
(A490)	TRAFFICWAY DESCRIPTION equals 2, 3, 5,	ROADWAY SURFACE TYPE should not equal 4, 5, 7.
(A500)	TOTAL LANES IN ROADWAY equals 3-7,	ROADWAY SURFACE TYPE should not equal 4, 5, 7.

PC11 - Roadway Surface Conditions

FORMAT: 2 numeric

SAS NAME: Vehicle.VSurCond

ELEMENT VALUES:

Codes	Attributes
00	Non-Trafficway or Driveway Access
01	Dry
02	Wet
03	Snow
10	Slush
04	Ice/Frost
06	Water (Standing, Moving)
05	Sand
11	Mud, Dirt, Gravel
07	Oil
08	Other
98	Not Reported
99	Reported as Unknown

Definition: This element identifies the value indicated in the case materials that best represents the roadway surface condition prior to this vehicle's critical precrash event.

Remarks: For vehicles departing the trafficway prior to their critical precrash events, the trafficway selected for classification is the one the vehicle departed. If this vehicle is in a junction just prior to its critical precrash event, the roadway selected for classification is the one it is on before entering the junction. These conditions may have been present but did not necessarily contribute to the crash.

If more than one surface condition is indicated for this vehicle (*e.g., with a combination code such as "slush/ice"*), then select the condition, *if specified in case materials*, that would have most affected the vehicle's traction. *If there is not enough information available to distinguish if one or both of the surface conditions were applicable during the time of the crash, use [98 \(Not Reported\)](#).*

00 (Non-Trafficway or Driveway Access) is used when this vehicle is entering a trafficway but was not on a trafficway prior to its critical precrash event or when the vehicle was in a driveway access prior to its critical precrash event.

A road made of sand or dirt would be coded **01 (Dry)** under normal conditions, not **05 (Sand)**, **11 (Mud, Dirt, Oil)**.

02 (Wet) describes a roadway surface that is covered with water from rain or melted snow.

03 (Snow) describes a roadway surface that is covered with snow.

10 (Slush) describes a roadway surface that is covered with melting snow.

04 (Ice/Frost) includes a roadway covered with ice from freezing rain or water runoff that has pooled on the roadway and turned to ice.

06 (Water [Standing, Moving]) describes a roadway surface that is covered with water and typically localized.

FARS SPECIAL INSTRUCTION: See Related Factors-Crash Level [05 \(Surface Under Water\)](#) to see if it applies.

05 (Sand) includes sand on the roadway as a result of sand blown by wind or sand discharged on the roadway by highway trucks.

11 (Mud, Dirt, Gravel) indicates these substances present on the surface of the roadway at the crash location, not the surface type of the roadway by design.

07 (Oil) includes fuel spilled on the roadway.

08 (Other) is used for roadway surface conditions not described above.

If a police crash report data element is coded with the attribute “Other” but the officer does not specify what this refers to:

1. Code **08 (Other)** if the police crash report attribute choices can be matched to or include all the attributes in FARS/CRSS.
2. Code **98 (Not Reported)** if the police crash report choices cannot be matched to or include all the attributes in FARS/CRSS.

98 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials)
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown) is used when police indicate unknown.

Consistency Checks:

Check	IF	THEN
(1A1P)	RELATED FACTORS-CRASH LEVEL equals 05,	ROADWAY SURFACE CONDITIONS must equal 06 for at least one vehicle.
(A040)	CRASH MONTH equals 05-09,	ROADWAY SURFACE CONDITIONS should not equal 03, 04, 10.
(A1A0)	ROADWAY SURFACE CONDITIONS equals 01 for a vehicle involved in the FIRST HARMFUL EVENT,	ATMOSPHERIC CONDITIONS should not equal 02-04, 11, 12.
(A1C0)	ROADWAY SURFACE CONDITIONS equals 01,	DRIVER’S VISION OBSCURED BY should not equal 08.
(A510)	any ATMOSPHERIC CONDITIONS equals 02-04, 11, 12,	ROADWAY SURFACE CONDITIONS should not equal 01, 07, 08, 99 for any vehicle.

Consistency Checks (FARS Only):

Check	IF	THEN
(A292)	any TRAFFICWAY DESCRIPTION, TOTAL LANES IN ROADWAY, ROADWAY ALIGNMENT, ROADWAY GRADE, ROADWAY SURFACE TYPE, or ROADWAY SURFACE CONDITIONS equals 0, 00 for this vehicle,	all must equal 0, 00, and SPEED LIMIT must equal 00 for this vehicle.

PC12 - Traffic Control Device

FORMAT: 2 numeric

SAS NAME: Vehicle.VTrafCon

ELEMENT VALUES:

Codes	Attributes
00	No Controls

Traffic Signals

Codes	Attributes
01	Traffic Control Signal (on colors) without Pedestrian Signal
02	Traffic Control Signal (on colors) with Pedestrian Signal
03	Traffic Control Signal (on colors) not known whether or not Pedestrian Signal
07	Lane Use Control Signal
08	Other Highway Traffic Signal
09	Unknown Highway Traffic Signal
04	Flashing Traffic Control Signal

Regulatory Signs

Codes	Attributes
20	Stop Sign
21	Yield Sign
28	Other Regulatory Sign
29	Unknown Regulatory Sign
23	School Zone Sign/Device

Other Signs and Signals

Codes	Attributes
40	Warning Sign
65	Railway Crossing Device
50	Person
98	Other

Not Reported and Unknown

Codes	Attributes
97	Not Reported
99	Reported as Unknown

Definition: This element identifies the **sign or signal** indicated in the case materials that best describes the traffic controls in the vehicle's environment just prior to this vehicle's critical precrash event.

Remarks: The roadway used for coding this element is the one this vehicle departed if it is off the roadway just prior to its critical precrash event. If this vehicle is in a junction just prior to its critical precrash event, this element is coded based on the roadway this vehicle was on before entering the junction.

Code the attribute indicated in the case materials if it directly matches.

Code this element whether the device was functioning or not. If more than one device is present, code the highest device (lowest number on list) most related to the crash.

There are two exceptions:

1. One exception is **50 (Person)** that includes a law enforcement officer, crossing guard, flagman, etc. **50 (Person)** takes precedence over the entire list.
2. The other exception is a **28 (Other Regulatory Sign)**. You may have a Regulatory Speed Limit Sign along with another Traffic Control Device (for example, a Warning Sign for a dangerous condition in which the Warning Sign is more relevant in the crash). In this case, the **40 (Warning Sign)** is more appropriate to code.

MUTCD Notes:

- Traffic calming devices:
 - Although some highway design features, such as curbs, median barriers, guardrails, speed humps or tables, and textured pavement have a significant impact on traffic operations and safety, they are not considered to be traffic control devices and provisions regarding their design and use are generally not included.
- Pavement markings:
 - While pavement markings are considered Traffic Control Devices in MUTCD, this element should only be used to identify Signs and Signals.

00 (No Controls) is used if, at the time of the crash, there was no intent to control (regulate or warn) vehicle traffic. Use this attribute if statutory controls apply (e.g., State law requires that when two vehicles meet at an uncontrolled intersection, the one on the right has the right-of-way).

When a traffic control is deactivated (e.g., traffic signal that emits no signals) during certain times of the day and was deactivated at the time of the crash, code **00 (No Controls)**. A traffic control that has just been installed and not yet activated is also coded **00 (No Controls)**.

However, a traffic control that is out (e.g., due to a power failure) and was reported as such in the case materials is coded, unless a temporary control (e.g., stop sign, police officer, etc.) has been inserted, in which case the temporary control should be coded.

Traffic Signals

01 (Traffic Control Signal [on colors] without Pedestrian Signal) refers to any highway traffic signal by which traffic is alternatively directed to stop and permitted to proceed, using the colors of red, yellow, and green. This traffic control signal does not have a pedestrian control signal. The source of actuation is of no concern.

02 (Traffic Control Signal [on colors] with Pedestrian Signal) refers to any highway traffic signal by which traffic is alternatively directed to stop and permitted to proceed, using the colors of red, yellow, and green. This traffic control signal does have a pedestrian control signal. The source of actuation is of no concern.

03 (Traffic Control Signal [on colors] not known whether or not Pedestrian Signal) any highway traffic signal by which traffic is alternatively directed to stop and permitted to proceed, using the colors of red, yellow, and green. It is unknown if this traffic control signal has a pedestrian control signal. The source of actuation is of no concern.

07 (Lane Use Control Signal) is for permanent lane control electronic devices (i.e., overhead lights or "X" indicating lane open or closed for rush hour lanes, bridges, or at tollbooths).

08 (Other Highway Traffic Signal) should be coded for traffic signals that are not covered in the preceding attributes. Use this attribute when a School Bus uses flashing lights to control traffic around the bus, regardless of any additional signs the school bus uses. For example, a school bus uses flashing lights and a stop sign on an arm to stop traffic around the school bus. This should only be used if the crash occurred during the time the sign was in effect.

09 (Unknown Highway Traffic Signal) is used with the investigating officer reported that the highway traffic signal was unknown at the time of crash.

04 (Flashing Traffic Control Signal) usually has a single colored head and flashes. Use this attribute if it is a Highway Traffic Signal that is flashing. This includes a flashing beacon. If a flashing red beacon appears with a stop sign, use this attribute.

Guide signs do not constitute traffic controls.

You may have a Regulatory Speed Limit Sign along with another Traffic Control Device (for example, a Warning Sign for a dangerous condition in which the Warning Sign is more relevant in the crash). In this case, the Warning Sign is more appropriate to code.

Another set of questions arises from the issue of proximity of the device to the crash. Judgment must be applied in these situations. Typical signs that create such problems are:

- Speed limit signs where a party to the crash may be speeding
- “Do Not Pass” signs where a no passing zone extends for miles but is only marked at the beginning of the zone
- Pedestrians Prohibited signs at entrances to freeways but a pedestrian crash occurs on the freeway between interchanges
- And other such signs that may pertain to a significant length of road.

In these instances, if the crash occurs within reasonably close proximity of the sign and the sign type is relevant to the crash then it may be appropriate to code the sign.

If there is a question which type a sign is, consult the Manual of Uniform Traffic Control Devices. Generally, the appropriate code should be used if a party to the crash failed to heed the sign, was in a position to be controlled by the sign, or the sign has some relationship to the crash. For example, for a crash at a four-legged, two-way stop intersection where a driver fails to stop at the stop sign and collides with another vehicle, use the attribute **20 (Stop Sign)**. Conversely, at the same intersection, a driver on an approach not controlled by a stop sign loses control and strikes a utility pole. In this case, **20 (Stop Sign)** would not be appropriate.

Pavement markings are not considered as traffic control devices.

Regulatory Signs

20 (Stop Sign) is a traffic sign used to control vehicular traffic, usually erected at road junctions, that instructs drivers to stop and then to proceed only if the way ahead is clear. This attribute does not include Stop Signs at Rail Grade Crossings. Stop Signs at Rail Grade Crossings are coded [**65 \(Railway Crossing Device\)**](#).

21 (Yield Sign) indicates that a vehicle driver must slow down and prepare to stop if necessary usually while merging into traffic on another road but needn't stop if the way is clear. This attribute does not include Yield Signs at Rail Grade Crossings. Yield Signs at Rail Grade Crossings are coded [**65 \(Railway Crossing Device\)**](#).

28 (Other Regulatory Sign)

Regulatory signs inform highway users of traffic laws or regulations and indicate the applicability of legal requirements that would not otherwise be apparent.

Examples of Regulatory Signs other than [20 \(Stop Sign\)](#) or [21 \(Yield Sign\)](#) are:

- Regulatory Speed Limit signs (black numbers on a white background),
- Turn Prohibition signs,
- Do Not Pass,
- Do Not Enter signs,
- Wrong-way,
- One-way signs,
- Road Closed signs, and
- Hazardous Cargo signs.

29 (Unknown Regulatory Sign) is used when the investigating officer reported that the regulatory sign was unknown at the time of crash.

23 (School Zone Sign/Device) is used when the first harmful event occurred during the time the sign was in effect. If the sign was in effect, it does not matter whether or not children were present. Some **23 (School Zone Signs/Devices)** can be flashing, if this is the case, use this attribute before using [04 \(Flashing Traffic Control Signal\)](#).

Other Signs and Signals

40 (Warning Sign) is used when it is deemed necessary to warn traffic of existing or potentially hazardous conditions on or adjacent to a highway or street.

Examples of Warning Signs:

- Work/Construction Zone related signs (Lane Shift, Uneven Surface, Workers Ahead, etc.)
- Changes in Horizontal Alignment signs (Hill, Curve, etc.)
- Road Narrows
- Divided Road/Divided Road Ends
- Low Clearance
- Road Surface Condition signs (Bump, Slippery When Wet, etc.)
- Traffic Flow signs (Merge, Two-way Traffic, No Passing Zone etc.)
- This includes electronic warning signs such as portable signs (i.e., attached to a vehicle) or stationary devices
- Flashing lights on an approaching train
- Advisory Speed signs (often black-on-yellow)

65 (Railway Crossing Device) is used to control or warn vehicular traffic at a railway crossing.

Examples:

- Flashing Lights
- Wigwags
- Bells
- Cross Bucks
- Stop Signs at Rail Grade Crossing
- Yield Signs at Rail Grade Crossings

50 (Person) is someone (e.g., police officer, crossing guard, flagman, or officially designated person) who is in the act of controlling both vehicular and pedestrian traffic.

98 (Other) includes: any other device, which (a) functions as a traffic control device that is not listed as an attribute of this data element and (b) is not excluded by the manual and (c) is related to the crash. Some examples are barricades, cones, drums, and object markers.

If a police crash report data element is coded with the attribute “Other” but the officer does not specify what this refers to:

1. Code **98 (Other)** if the police crash report attribute choices can be matched to or include all the attributes in FARS/CRSS.
2. Code **97 (Not Reported)** if the police crash report choices cannot be matched to or include all the attributes in FARS/CRSS.

Not Reported and Unknown

97 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks is NOT considered “**Not Reported**.”

Code **97 (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials)
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown) is used if the investigating officer reported that the traffic control device at the time of crash was not known.

Consistency Checks:

Check	IF	THEN
(4LOP)	any RELATED FACTORS-DRIVER LEVEL equals 39 for this vehicle,	TRAFFIC CONTROL DEVICE should not equal 00 for this vehicle.
(520F)	FIRST HARMFUL EVENT equals 10,	TRAFFIC CONTROL DEVICE must not equal 01-04, 07-09, 20-50, 98 for the vehicle involved in the first harmful event.
(610P)	TRAFFIC CONTROL DEVICE equals 00,	DEVICE FUNCTIONING must equal 0.
(640F)	TRAFFIC CONTROL DEVICE equals 23 for any vehicle,	RELATED FACTORS-CRASH LEVEL should equal 21.
(641F)	RELATED FACTORS-CRASH LEVEL equals 21,	TRAFFIC CONTROL DEVICE should not equal 00 for every vehicle.
(642F)	TRAFFIC CONTROL DEVICE equals 00 for any vehicle,	RELATED FACTORS-CRASH LEVEL should not equal 21.
(660P)	TRAFFIC CONTROL DEVICE is not equal to 00,	DEVICE FUNCTIONING must not equal 0.
(660Q)	TRAFFIC CONTROL DEVICE does not equal 97,	it is unlikely that DEVICE FUNCTIONING equals 8.
(661P)	TRAFFIC CONTROL DEVICE equals 97,	DEVICE FUNCTIONING must equal 8.
(A1B0)	TRAFFIC CONTROL DEVICE equals 20-21 for a vehicle involved in the FIRST HARMFUL EVENT,	RELATION TO JUNCTION (b) should not equal 01, 18.
(A270)	any VIOLATIONS CHARGED equals 31-35, 37,	TRAFFIC CONTROL DEVICE should equal 01-20, 98.

Check	IF	THEN
(A293)	WORK ZONE equals 1-3, and RELATION TO JUNCTION (b) equals 02, 03,	TRAFFIC CONTROL DEVICE should equal 01-03, 20, 40, 97, or 98 for the vehicle(s) involved in the FIRST HARMFUL EVENT.
(A294)	WORK ZONE equals 1-3, and RELATION TO JUNCTION (b) equals 01, 04, 05, 08, 17-19,	TRAFFIC CONTROL DEVICE should equal 00, 21, 28, 40, 50, 97, or 98 for the vehicle(s) involved in the FIRST HARMFUL EVENT.
(A440)	RELATION TO JUNCTION (b) equals 06,	TRAFFIC CONTROL DEVICE should equal 65 for any vehicle involved in the FIRST HARMFUL EVENT.
(A520)	SEQUENCE OF EVENTS equals 10,	TRAFFIC CONTROL DEVICE should not equal 01-09, 20-29, 40-50, 98.
(A770)	FIRST HARMFUL EVENT equals 46,	TRAFFIC CONTROL DEVICE should equal 01-04 for the vehicle involved in the FIRST HARMFUL EVENT.
(A780)	FIRST HARMFUL EVENT equals 46,	TRAFFIC CONTROL DEVICE should not equal 00 for the vehicle involved in the FIRST HARMFUL EVENT.
(A890)	RELATION TO JUNCTION (b) equals 01,	TRAFFIC CONTROL DEVICE should not equal 01-03 for any vehicle involved in the FIRST HARMFUL EVENT.
(PB06)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 730,	TRAFFIC CONTROL DEVICE for the striking vehicle must equal 01-03.
(PB09)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 141, 143, 151-158, 217, or 218,	TRAFFIC CONTROL DEVICE for the striking vehicle must not equal 00.
(PB10)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 151, 156, 157, 217, or 218,	TRAFFIC CONTROL DEVICE for the striking vehicle must equal 01-04.
(PB11)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 143 or 154,	TRAFFIC CONTROL DEVICE for the striking vehicle must equal 01-04, 20, 21, 28, or 29.
(PB21)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 160,	TRAFFIC CONTROL DEVICE for the striking vehicle should equal 00.

Consistency Check (CRSS Only):

Check	IF	THEN
(A930)	INTERSTATE HIGHWAY equals 1, and RELATION TO JUNCTION (a) equals 1, and RELATION TO JUNCTION (b) is not equal to 03 or 05 or 20,	TRAFFIC CONTROL DEVICE should not equal 01-03, 20, 23, or 65 for at least one vehicle involved in the FIRST HARMFUL EVENT.

Consistency Check (FARS Only):

Check	IF	THEN
(650P)	TRAFFIC CONTROL DEVICE equals 65 for any vehicle,	RAIL GRADE CROSSING IDENTIFIER must not equal 0000000.
(A210)	LAND USE AND FUNCTIONAL SYSTEM (b) equals 01, 02, and RELATION TO JUNCTION (a) equals 0,	TRAFFIC CONTROL DEVICE should not equal 01-04, 07, 20, 23, 40, 50, 65.

PC13 - Device Functioning

FORMAT: 1 numeric

SAS NAME: Vehicle.VTCONT_F

ELEMENT VALUES:

Codes	Attributes
0	No Controls
1	Device Not Functioning
2	Device Functioning - Functioning Improperly
3	Device Functioning Properly
8	Not Reported
9	Reported as Unknown

Definition: This element identifies the functionality of the traffic control device recorded for this vehicle in the element [Traffic Control Device](#).

Remarks: This data element is coded with respect to the control selected in the element [Traffic Control Device](#).

1 (Device Not Functioning) is used when the device is not functioning at all (e.g., signal out, sign knocked down).

2 (Device Functioning - Functioning Improperly) is used when the device was functioning to an extent but not as intended (e.g., red signal lamp burned out, sign twisted, or obscured by vegetation).

3 (Device Functioning Properly) is used when the traffic control device was functioning as designed at the time of the crash. As a default rule, if the device is listed as present, code **3 (Device Functioning Properly)** unless specified otherwise. For example, the police crash report indicates a stop sign is applicable to a vehicle at intersection crash and there is no mention of it functioning improperly, it is assumed the stop sign was functional.

8 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks is NOT considered "**Not Reported**."

Code **8 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

9 (Reported as Unknown) is used if the investigating officer reported that it was unknown if the traffic control device was functioning at the time of crash.

Consistency Checks:

Check	IF	THEN
(610P)	TRAFFIC CONTROL DEVICE equals 00,	DEVICE FUNCTIONING must equal 0.
(660P)	TRAFFIC CONTROL DEVICE is not equal to 00,	DEVICE FUNCTIONING must not equal 0.
(661P)	TRAFFIC CONTROL DEVICE equals 97,	DEVICE FUNCTIONING must equal 8.
(660Q)	TRAFFIC CONTROL DEVICE does not equal 97,	it is unlikely that DEVICE FUNCTIONING equals 8.

PC14 - Driver's Vision Obscured By

FORMAT: 2 numeric. Select all that apply.

SAS NAME: Vision.MVISOBSC

ELEMENT VALUES:

Codes	Attributes
00	No Obstruction Noted
01	Rain, Snow, Fog, Smoke, Sand, Dust
02	Reflected Glare, Bright Sunlight, Headlights
03	Curve, Hill, or Other Roadway Design Feature
04	Building, Billboard, Other Structure
05	Trees, Crops, Vegetation
06	In-Transport Motor Vehicle (including load)
07	Not In-Transport Motor Vehicle (parked/working)
08	Splash or Spray of Passing Vehicle
09	Inadequate Defrost or Defog System
10	Inadequate Vehicle Lighting System
11	Obstruction Interior to the Vehicle
12	External Mirrors
13	Broken or Improperly Cleaned Windshield
14	Obstructing Angles on Vehicle
95	No Driver Present/Unknown if Driver Present
97	Vision Obscured – No Details
98	Other Visual Obstruction
99	Reported as Unknown

Definition: This data element records impediments to a driver's visual field that were noted in the case materials.

Remarks: These "visual obstructions" can appear anywhere in the case materials. Examples include a field on the police crash report (e.g., "Contributing Factors"), in the narrative section, in the violations section, or in witness statements. *See clarification on the use of information provided by witnesses in section [103. Data Sources](#).*

00 (No Obstruction Noted) is used when the case materials give no indication of a visual obstruction for this driver.

01 (Rain, Snow, Fog, Smoke, Sand, Dust) is used when one or more of these conditions exist AND are noted to have obstructed the view of the driver. Do not use this attribute when only the vehicle windshield is described as "fogged." (See [09 \(Inadequate Defrost or Defog System\)](#) or [13 \(Broken or Improperly Cleaned Windshield\)](#).)

02 (Reflected Glare, Bright Sunlight, Headlights) is used when one or more of these conditions are noted to have obstructed the view of the driver.

03 (Curve, Hill, or Other Roadway Design Feature) is used when any of these roadway features or design elements is noted to have obstructed the view of the driver (including embankment, sag, etc.).

04 (Building, Billboard, Other Structure) is used when any of these man-made structures are noted to have obstructed the view of the driver (including traffic signs, poles, signals, etc.).

05 (Trees, Crops, Vegetation) is used when any of these natural features are noted to have obstructed the view of the driver.

06 (In-Transport Motor Vehicle [including load]) is used when a vehicle that is in motion or stopped on the roadway is noted to have obstructed the view of the driver. The vehicle may be but does not have to be a contact vehicle in the case.

07 (Not In-Transport Motor Vehicle [parked, working]) is used when a vehicle that is parked in a designated parking area or space, stopped in an area off the roadway, or is a working motor vehicle is noted to have obstructed the view of the driver. The vehicle may be but does not have to be a contact vehicle in the case.

08 (Splash or Spray of Passing Vehicle) is used when this condition is noted to have obstructed the view of the driver. The splash or spray can come from water or mud; however, the use of this attribute does not require it to be raining at the time of the crash.

09 (Inadequate Defrost or Defog System) is used when the presence of frost or fog on the windshield was noted as being due to an inadequate system. The case materials must state specifically that the system was not operating properly. If the case materials state the presence of frost or fog alone on the windshield, you should use [**13 \(Broken or Improperly Cleaned Windshield\)**](#).

10 (Inadequate Vehicle Lighting System) is used when the case materials indicate this driver's vision was impaired because the exterior lighting system (including headlights, foglights, etc.) of the driver's vehicle was deficient in some way. This would include being turned off or not operating properly. This response should not be used to describe inadequate lighting systems of other vehicles (e.g., oncoming motor vehicles) or for inadequate highway lighting.

11 (Obstruction Interior to the Vehicle) is used when the case materials indicate this driver's vision was impaired because of a feature in the interior of their vehicle (including head restraint, rear-view mirror, window stickers, sun shades, ornaments, windshield tinting).

12 (External Mirrors) is used when the case materials indicate that an exterior mirror on this driver's vehicle created a visual obstruction.

13 (Broken or Improperly Cleaned Windshield) is used when this condition is noted to have obstructed the view of the driver. The presence of frost or fog on the windshield would apply. For a "fogged" or "frosted" windshield due to an inadequate or inoperable system see [**09 \(Inadequate Defrost or Defog System\)**](#).

14 (Obstructing Angles on Vehicle) is used when the case materials indicate that the size or shape of a driver's own vehicle created a visual obstruction (including trailer, vehicle height, blind spot). Not to be confused with visual obstructions from other vehicles or a vehicle's interior components such as head restraints, sun shades, etc.

95 (No Driver Present/Unknown if Driver Present) is used when there is no driver in this vehicle or when it is unknown if there is a driver present in this vehicle at the time of the crash.

97 (Vision Obscured - No Details) is used when the case materials indicate that a vision impediment exists but does not clearly indicate the nature of the impediment.

98 (Other Visual Obstruction) is used when the case materials indicate the nature of a vision impediment that cannot be attributed to one of the other attributes above. For example, an unattached trailer left on the road shoulder.

99 (Reported as Unknown) is used when the case materials specifically indicate unknown.

Consistency Checks:

Check	IF	THEN
(1HJF)	DRIVER'S VISION OBSCURED BY equals 95,	DRIVER PRESENCE must equal 0 or 9.
(1L2P)	any DRIVER'S VISION OBSCURED BY equals 00 or 95 or 99,	only that one code and no other must be coded for this vehicle.
(1L4P)	any DRIVER'S VISION OBSCURED BY equals 09,	at least one CONTRIBUTING CIRCUMSTANCES, MOTOR VEHICLE must equal 97.
(1L5P)	any DRIVER'S VISION OBSCURED BY equals 10,	at least one CONTRIBUTING CIRCUMSTANCES, MOTOR VEHICLE must equal 07 or 08 or 09.
(2H1F)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 0 or 9,	DRIVER'S VISION OBSCURED BY must equal 95.
(A1C0)	ROADWAY SURFACE CONDITIONS equals 01,	DRIVER'S VISION OBSCURED BY should not equal 08.
(PB31)	PEDESTRIAN/BIKE TYPING -BICYCLIST CRASH TYPE equals 147, 157, or 357,	at least one DRIVER'S VISION OBSCURED BY must equal 06 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PB32)	PEDESTRIAN/BIKE TYPING -PEDESTRIAN CRASH TYPE equals 742,	at least one DRIVER'S VISION OBSCURED BY must not equal 00 or 95 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PB33)	PEDESTRIAN/BIKE TYPING -BICYCLIST CRASH TYPE equals 156,	DRIVER'S VISION OBSCURED BY for the striking vehicle must not equal 06.

PC15 - Driver Maneuvered to Avoid

FORMAT: 2 numeric. Select all that apply

SAS NAME: Maneuver.MDRMANAV

ELEMENT VALUES:

Codes	Attributes
00	Driver Did Not Maneuver to Avoid
01	Object
02	Poor Road Conditions (Puddle, Ice, Pothole, etc.)
03	Live Animal
04	Motor Vehicle
05	Pedestrian, Pedalcyclist, or Other Non-Motorist
92	Phantom/Non-Contact Motor Vehicle
95	No Driver Present/Unknown if Driver Present
98	Not Reported
99	Reported as Unknown

Definition: This data element identifies the thing(s) the driver attempted to avoid while the vehicle was on the road portion of the trafficway, just prior to the [First Harmful Event](#) for this vehicle.

Remarks: The “road” by definition includes the roadway and shoulder/parking lane portions, when a shoulder/parking lane is present. The source for this data is the crash report narrative or related crash report form fields as completed by the investigating officer. It is the officer’s assessment. *See clarification on the use of information provided by witnesses in section [103. Data Sources](#).*

Code the thing(s) the driver tried to avoid whether the maneuver was successful or not (i.e., whether or not the driver was able to avoid the object, poor road condition, animal, vehicle, or non-motorist).

00 (Driver Did Not Maneuver to Avoid) is used when:

- The crash report indicates that no avoidance maneuvers were taken by the driver.
- The avoidance maneuver(s) occurred after the first harmful event for the vehicle.
- The avoidance maneuver occurred when the vehicle was not on a roadway, shoulder, or parking lane.

01 (Object) is used when the driver attempted to avoid a non-fixed object such as; an animal carcass, an unattached trailer, a bicycle without a rider, downed tree limbs or power lines, debris from a previous crash, rocks that fall from an adjacent hillside, a load that fell from another vehicle, debris left from a tire blowout, etc.

02 (Poor Road Conditions [Puddle, Ice, Pothole, etc.]) is used when the driver maneuvered to avoid the location of a road condition. Treat the condition as if it were an object. Do not use this attribute if the driver lost control while traveling on/over the road condition but made no maneuver to avoid it.

03 (Live Animal) is used when the driver attempted to avoid a live animal that is stationary or moving. A dead animal carcass is considered debris and coded as [01 \(Object\)](#).

04 (Motor Vehicle) is used when the driver attempted to avoid another **contact** motor vehicle in the crash (receives a vehicle form). This includes in-transport, parked, or working motor vehicles. A trailer not connected to a motor vehicle would be considered a [01 \(Object\)](#).

05 (Pedestrian, Pedalcyclist, or Other Non-Motorist) is used when the driver attempts to avoid a pedestrian, pedalcyclist, or other non-motorist. Other Non-motorist would include persons riding on an animal, or in an animal drawn conveyance or on a personal conveyance. A person killed in a previous crash or an unoccupied pedalcycle or personal conveyance would be considered a [01 \(Object\)](#).

92 (Phantom/Non-Contact Motor Vehicle) is used when the driver attempted to avoid another motor vehicle in the crash that was reported as a **non-contact** or phantom vehicle (**does not receive a vehicle form**). This includes in-transport, parked, or working motor vehicles. A trailer not connected to a motor vehicle would be considered a [01 \(Object\)](#).

95 (No Driver Present/Unknown if Driver Present) is used when there is no driver in this vehicle or when it is unknown if there is a driver present in this vehicle at the time of the crash.

98 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks is NOT considered "**Not Reported**."

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials)
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown) is used when the information about a particular vehicle's circumstances are reported as "unknown."

Consistency Checks:

Check	IF	THEN
(3BCP)	CRASH TYPE equals 34, 36, 38, 40, 54, 56, 58, or 60,	DRIVER MANEUVERED TO AVOID must not equal 00.
(9C4P)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 0 or 9,	DRIVER MANEUVERED TO AVOID must only equal 95.
(9C5P)	DRIVER MANEUVERED TO AVOID equals 95,	DRIVER PRESENCE must equal 0 or 9.
(AZ6P)	any DRIVER MANEUVERED TO AVOID equals 00,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must not equal 17.
(AZ7P)	any DRIVER MANEUVERED TO AVOID equals 00 or 95 or 98, or 99,	only that one code and no other must be coded for this vehicle.
(AZBP)	any DRIVER MANEUVERED TO AVOID equals 03,	CRITICAL EVENT – PRECRASH (EVENT) should equal 87-89.
(AZCP)	any DRIVER MANEUVERED TO AVOID equals 05,	CRITICAL EVENT – PRECRASH (EVENT) should equal 80-85.
(AZEP)	any DRIVER MANEUVERED TO AVOID equals 01,	CRITICAL EVENT – PRECRASH (EVENT) should equal 90-92.
(AZDQ)	DRIVER MANEUVERED TO AVOID equals 04,	NUMBER OF VEHICLE FORMS SUBMITTED must be greater than 001.

Check	IF	THEN
(B10P)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) does not equal 17, ATTEMPTED AVOIDANCE MANEUVER equals 01,	DRIVER MANEUVERED TO AVOID should equal 00.
(V59Q)	ATTEMPTED AVOIDANCE MANEUVER equals 99,	DRIVER MANEUVERED TO AVOID should equal 00, 98, or 99.

PC16 - Driver Distracted By

FORMAT: 2 numeric. Select all that apply.

SAS NAME: Distract.MDRDSTRD

ELEMENT VALUES:

Codes	Attributes
00	Not Distracted
16	No Driver Present/Unknown if Driver Present
96	Not Reported

Distractions

Codes	Attributes
03	By Other Occupant(s)
04	By a Moving Object in Vehicle
05	While Talking or Listening to Cellular Phone
06	While Manipulating Cellular Phone
07	Adjusting Audio or Climate Controls
09	While Using Other Component/Controls Integral to Vehicle
10	While Using or Reaching For Device/Object Brought Into Vehicle
12	Distracted by Outside Person, Object, or Event
13	Eating or Drinking
14	Smoking Related
15	Other Cellular Phone Related
17	Distraction/Inattention
18	Distraction/Careless
19	Careless/Inattentive
92	Distraction (Distracted), Details Unknown
93	Inattention (Inattentive), Details Unknown
97	Lost in Thought/Day Dreaming
98	Other Distraction
99	Reported as Unknown if Distracted

Definition: This element identifies the attribute(s) that best describe this driver's attention to driving prior to the driver's realization of an impending critical event or just prior to impact if realization of an impending critical event does not occur. Distraction from the primary task of driving occurs when drivers divert their attention from the driving task to some other activity. Also, driving while daydreaming or lost in thought is identified as distracted driving by NHTSA. Physical conditions/impairments (e.g., fatigue, alcohol, medical condition, etc.) or psychological states (e.g., anger, emotional, depressed, etc.) are not identified as distractions by NHTSA.

Analytical Note: The attributes in this element are presented to provide selections that most unambiguously match what can be encountered in various presentations on State crash report forms. They are not all considered "distractions" as defined by NHTSA. Data in the public output files for Driver Distracted By will not be presented exactly as displayed in this element's attribute listing.

Remarks: Record the attribute(s) that best describe this driver's attention to driving prior to the driver's realization of an impending critical event or just prior to impact if realization of an impending critical event does not occur. If this driver's vehicle has two critical crash envelopes, record the attribute(s) that best describe the

driver's attention prior to the first Critical Precrash Event (i.e., prior to realization of the impending danger that the driver successfully avoided). Intoxication, Ill, Blackout, Asleep, or Fatigued are not considered distractions. This information is captured under the data element [Condition \(Impairment\) At Time of Crash](#).

Driver Distracted By is a "Select all that apply" element. If the element values [00 \(Not Distracted\)](#), [16 \(No Driver Present\)](#), [17 \(Distraction/ Inattention\)](#), [18 \(Distraction/Careless\)](#), [19 \(Careless/Inattentive\)](#), [92 \(Distraction \[Distracted\], Details Unknown\)](#), [93 \(Inattention \[Inattentive\], Details Unknown\)](#), [96 \(Not Reported\)](#), or [99 \(Reported as Unknown if Distracted\)](#) are selected, then only that one element value may be used.

Witness Statements:

See clarification on the use of information provided by witnesses in section [103. Data Sources](#).

00 (Not Distracted)

- When the case materials indicate that the individual was completely attentive to **driving**.
- When the case materials do not indicate a distraction in an available field, and not reporting a distraction in that field indicates **00 (Not Distracted)**.
- For omission of information see [96 \(Not Reported\)](#) guidance below.

16 (No Driver Present/Unknown if Driver Present) is used when there is no driver in this vehicle or when it is unknown if there is a driver present in this vehicle at the time of the crash.

96 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **96 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials)
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

Distractions:

03 (By Other Occupant[s]) is used when the driver was distracted by another occupant in this driver's vehicle prior to realization of impending danger. Examples of other occupant distraction include conversing with or looking at another occupant (e.g., baby/child in back seat, rowdy teenager, argumentative spouse, etc.).

04 (By a Moving Object in Vehicle) is used when the driver was distracted by a moving object in this driver's vehicle prior to realization of impending danger. Examples include a dropped object, a moving pet, insect, or cargo.

05 (While Talking or Listening to Cell Phone) is used when the driver is talking or listening on a cell phone. This attribute includes talking or listening on a "hands-free" or Bluetooth-enabled phone.

06 (While Manipulating Cell Phone) is used when the driver is dialing or text messaging (texting) on a cell phone. Any manual button/control actuation on the phone qualifies. This includes dialing or text messaging on any wireless e-mail device.

07 (Adjusting Audio or Climate Controls) is used when someone is distracted from the driving task while adjusting the air conditioner, heater, radio, cassette, using the radio, using the cassette, or CD that are mounted in the vehicle.

09 (While Using Other Component/Controls Integral to Vehicle) is used when the driver is distracted while manipulating a control in the vehicle including adjusting headlamps or interior lights, controlling windows (power or manual), manipulating door locks (power or manual), adjusting side view mirrors (power or manual), adjusting rear view mirror, adjusting seat (power or manual), adjusting steering wheel, adjusting seat belt, on-board navigational devices, etc. (original equipment).

10 (While Using or Reaching for Device/Object Brought into Vehicle) is used when the driver is distracted while using or reaching for a device in the vehicle including a radar detector, CDs, razors, music portable CD player, headphones, a navigational device, laptop or tablet PC, etc. This attribute is also used when it cannot be determined if the involved device was OEM, brought into the vehicle, or a function of a cell phone (i.e., GPS).

If it is unknown if the device or object was brought into the vehicle or was original equipment on this vehicle, default to brought into vehicle and use attribute **10 (While Using or Reaching for Device/Object Brought Into Vehicle)**.

12 (Distracted by Outside Person, Object, or Event) is used when the driver was distracted by an outside person, object, or event prior to realization of impending danger. Examples include animals on the roadside, a previous crash, or non-traffic related signs (advertisements, electronic billboards, etc.). Do not use this attribute for a person, object, or event that the driver has recognized and for which the driver has taken some action (e.g., avoiding a pedestrian on the roadway).

13 (Eating or Drinking) is used when the driver is eating or drinking or involved in an activity related to these actions (e.g., picking food from carton placed on passenger seat, reaching to throw out used food wrapper, etc.)

14 (Smoking Related) is used when the driver is smoking or involved in an activity related to smoking, such as lighting a cigarette, putting ashes in the ash tray, etc. Any method of lighting the cigarette would be coded **14 (Smoking Related)**.

15 (Other Cell Phone Related) is used when the case material indicates the driver is distracted from the driving task due to cell phone involvement, but none of the specified codes are applicable (reaching for cell phone, etc.). This attribute is also applied when specific details regarding cell phone distraction/usage are not provided.

17 (Distraction/Inattention) is used **exclusively** when “Distraction/Inattention” or “Inattention/Distraction” are noted in the case materials as one combined attribute and it cannot be determined which Driver Distracted By attribute is intended, [**92 \(Distraction \[Distracted\], Details Unknown\)**](#) or [**93 \(Inattention \[Inattentive\], Details Unknown\)**](#).

18 (Distraction/Careless) is used **exclusively** when “Distraction/Careless” or “Careless/Distraction” are noted in the case materials as one combined attribute and it cannot be determined which Driver Distracted By attribute applies.

19 (Careless/Inattentive) is used **exclusively** when “Careless/Inattentive” or “Inattentive/ Careless” are noted in the case materials as one combined attribute and it cannot be determined which Driver Distracted By attribute applies.

92 (Distraction [Distracted], Details Unknown) is used when “distraction” or “distracted” are noted in the case materials, but specific distraction(s) cannot be identified. For non-specific “inattention” see attribute **93 (Inattention [Inattentive], Details Unknown)**.

93 (Inattention [Inattentive], Details Unknown) is used when “inattention” or “inattentive” are noted in the case materials, but it cannot be identified if this refers to a distraction(s).

97 (Lost in Thought/Day Dreaming) is used when the driver is not completely attentive to driving because he/she is thinking about items other than the driving task. For non-specific “distraction” see element value **92 (Distraction [Distracted], Details Unknown)**. For non-specific “inattention” see element value **93 (Inattention [Inattentive], Details Unknown)**.

98 (Other Distraction) is used when details regarding this driver’s distraction are known but none of the specified codes are applicable.

99 (Reported as Unknown if Distracted) is used when the case materials specifically indicate unknown.

Consistency Checks:

Check	IF	THEN
(BJ1P)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 0 or 9,	DRIVER DISTRACTED BY must equal 16.
(BJ2P)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 1,	DRIVER DISTRACTED BY must not equal 16 or blank.
(BJ3P)	UNIT TYPE equals 1, and DRIVER DISTRACTED BY equals 16,	DRIVER PRESENCE must equal 0 or 9.
(BJ4P)	any DRIVER DISTRACTED BY equals 03,	NUMBER OF OCCUPANTS must be greater than 01.
(BJ7P)	any DRIVER DISTRACTED BY equals 00 or 16 or 17 or 18 or 19 or 92 or 93 or 96 or 99,	only that one code and no other must be used.

PC17 - Pre-Event Movement (Prior to Recognition of Critical Event)

FORMAT: 2 numeric

SAS NAME: Vehicle.P_Crash1

ELEMENT VALUES:

Codes	Attributes
00	No Driver Present/Unknown if Driver Present
01	Going Straight
02	Decelerating in Road
03	Accelerating in Road
04	Starting in Road
05	Stopped in Roadway
06	Passing or Overtaking Another Vehicle
07	Disabled or "Parked" In Travel Lane
08	Leaving A Parking Position
09	Entering A Parking Position
10	Turning Right
11	Turning Left
12	Making A U-Turn
13	Backing Up (Other Than for Parking Position)
14	Negotiating A Curve
15	Changing Lanes
16	Merging
17	Successful Avoidance Maneuver to A Previous Critical Event
98	Other (Specify:)
99	Unknown

Definition: This element identifies the attribute that best describes this vehicle's activity prior to the driver's realization of an impending critical event or just prior to impact if the driver took no action or had no time to attempt any evasive maneuvers.

Remarks: Record the attribute that best describes this vehicle's activity **prior** to the driver's realization of an impending critical event or just **prior** to impact if the driver took no action or had no time to attempt any evasive maneuvers.

Actions taken by the driver, of this vehicle, **after realization** of an impending danger are captured in [Attempted Avoidance Maneuver](#).

00 (No Driver Present/Unknown if Driver Present) is pre-coded for in-transport motor vehicles when the element [Driver Presence](#) is coded as [0 \(No Driver Present/Not Applicable\)](#).

01 (Going Straight) is used when this vehicle's path of travel was straight ahead without any attempted or intended changes. The coding of this attribute is not always dependent on the roadway alignment.

02 (Decelerating in Road) is used when this vehicle was traveling straight ahead within the road portion of the trafficway and was decelerating.

03 (Accelerating in Road) is used when this vehicle was traveling straight ahead within the road portion of the trafficway and was accelerating. **03 (Accelerating in Road)** must be explicitly stated by officer.

04 (Starting in Road) is used when this vehicle was in the process of starting forward from a stopped position within the road portion of the trafficway (e.g., start up from traffic signal).

05 (Stopped in Roadway) is used when this vehicle was stopped momentarily, with the motor running within the roadway portion of the trafficway (e.g., stopped for traffic signal).

06 (Passing or Overtaking Another Vehicle) is used when this vehicle was traveling straight ahead and was in the process of passing or overtaking another vehicle on the left or right. **Note:** This attribute is not used in rear-end collisions. (See Tables - [Precrash Event Scenarios for Different Rear-End Situations](#).)

07 (Disabled or “Parked” In Travel Lane) is used when this vehicle was “parked” in a travel lane (e.g., double parked, disabled) with a driver present in the vehicle.

08 (Leaving A Parking Position) is used when this vehicle was entering the travel lane from a parking area adjacent to the traffic lanes (*i.e., in the process of leaving the parking position*). This attribute includes vehicles that were previously stopped/parked on the shoulder, roadside, median, etc. For vehicles backing from a driveway use attribute [13 \(Backing Up \[Other Than for Parking Position\]\)](#).

09 (Entering A Parking Position) is used when this vehicle was leaving the travel lane to a parking area adjacent to the traffic lanes (*i.e., in the process of parking*). This attribute includes vehicles that are stopping/parking on the shoulder, roadside, median, etc. For vehicle backing into a driveway use [13 \(Backing Up \[Other Than for Parking Position\]\)](#).

10 (Turning Right) is used when this vehicle was moving forward and turned right, changing lanes from one roadway to a different roadway (e.g., from or to a driveway, parking lot, or intersection). Excludes situations where the vehicle was leaving a parking position.

11 (Turning Left) is used when this vehicle was moving forward and turned left, changing lanes from one roadway to a different roadway (e.g., from or to a driveway, parking lot, or intersection). Excludes situations where the vehicle was leaving a parking position.

12 (Making a U-Turn) is used when this vehicle was moving forward making a U-turn on the trafficway. Excludes situations where the vehicle was leaving a parking position.

13 (Backing Up [Other Than for Parking Position]) is used when this vehicle was *intentionally* traveling backwards within the trafficway. *Vehicles backing into or from a driveway are included in this attribute. If the backward movement is unintentional (e.g., the vehicle rolls or drifts backward) do not use this attribute (see 98 (Other /Specify:)). Also, do not use this attribute if the vehicle was backing into or out of a parking space.* (See [09 \(Entering a Parking Position\)](#) or [08 \(Leaving A Parking Position\)](#) respectively.) Vehicles backing into or from a driveway are included in this attribute.

14 (Negotiating A Curve) is used when this vehicle was continuing along a road that curved to the right or left.

15 (Changing Lanes) is used when this vehicle was traveling straight ahead and changed travel lanes to the right or left while on the same roadway.

16 (Merging) is used when this vehicle was moving forward and merging from the left or right into a traffic lane (e.g., roadway narrows, exit/entrance ramps).

17 (Successful Avoidance Maneuver to A Previous Critical Event) is used when this vehicle responded to a previous critical event and successfully avoided an impact. However, this maneuver precipitated a subsequent critical crash envelope, which resulted in this vehicle's first impact.

98 (Other [Specify:J]) is used when this vehicle's pre-event movement is known but none of the specified attributes are applicable. *An example would be a vehicle that unintentionally travels (e.g., rolls or drifts) backward.* The movement must be specified in the "specify box."

***Note:** For attributes with a "Specify:" designation, a fill-in text box will open in MDE. This text box should be used to provide additional detail about the attribute selection. Please include a specific reason for this selection.

99 (Unknown) is used when the vehicle's movement prior to the driver's realization of an impending critical event is unknown.

Consistency Checks:

Check	IF	THEN
(3B4P)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 10,	CRASH TYPE must not equal 44-69, 71-73, 76, 77, 79, 81-83, 86-92.
(3B5P)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 11,	CRASH TYPE must not equal 44-67, 69-71, 73, 77-81, 83, 86-92.
(3BDP)	CRASH TYPE equals 46, 47, and ATTEMPTED AVOIDANCE MANEUVER equals 01 or 99,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must not equal 01.
(3BFP)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 08 or 09,	CRASH TYPE must not equal 46 or 47.
(3BGP)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 00,	DRIVER PRESENCE must equal 0 or 9.
(3C00)	CRASH TYPE equals 68, 72, 76, or 82,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 11 or 98.
(3C10)	CRASH TYPE equals 70, 78, or 80,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 10 or 98.
(3C20)	this vehicle is involved in the FIRST HARMFUL EVENT and its CRASH TYPE equals 29-31,	this vehicle's PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 02.
(3C30)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 12,	CRASH TYPE should equal 98.
(3C40)	CRASH TYPE equals 46,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 06, 15, 16, or ATTEMPTED AVOIDANCE MANEUVER should equal 07, 09, or 12.
(3C50)	CRASH TYPE equals 92,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 08, 09, 13, 99.

Check	IF	THEN
(3C60)	CRASH TYPE equals 25-27, 29-31,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should not equal 05 or 07.
(3C70)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 13,	CRASH TYPE should equal 92 or 98.
(3C80)	CRASH TYPE equals 47,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 06, 15, 16, or ATTEMPTED AVOIDANCE MANEUVER should equal 06, 08, or 11.
(3D60)	CRASH TYPE equals 46 or 47,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should not equal 01.
(9BAP)	MANNER OF COLLISION equals 07, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 10 or 11 for neither one of the vehicles involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 44-49, 98, 99 for the vehicles involved in the FIRST HARMFUL EVENT.
(9BCP)	MANNER OF COLLISION equals 08, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 10 or 11 for neither one of the vehicles involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 64-67, 98, 99 for the vehicles involved in the FIRST HARMFUL EVENT.
(A430)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 10, 11 for a vehicle involved in the FIRST HARMFUL EVENT,	RELATION TO JUNCTION (b) should not equal 01, 18.
(A4C0)	RELATION TO JUNCTION (b) equals 04,	at least one PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) for the vehicles involved in the FIRST HARMFUL EVENT should equal 10, 11, 13, or 98.
(A4D0)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 14,	ROADWAY ALIGNMENT must equal 2-4.
(A4D1)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 01,	ROADWAY ALIGNMENT should not equal 2-4.
(A61F)	FIRST HARMFUL EVENT equals 08, 09, 11, 15, 49, and RELATION TO TRAFFICWAY equals 01, 02, 07, 11, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) is not equal to 00, 13 for the vehicle involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 13 for the vehicle involved in the FIRST HARMFUL EVENT.
(AZ20)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 0 or 9,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 00.
(AZ30)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 00,	ATTEMPTED AVOIDANCE MANEUVER must equal 00.

Check	IF	THEN
(AZ50)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 00,	PRE-IMPACT STABILITY must equal 0.
(AZ60)	PRE-IMPACT STABILITY equals 0,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 00.
(AZ6P)	any DRIVER MANEUVERED TO AVOID equals 00,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must not equal 17.
(AZ70)	PRE-IMPACT LOCATION equals 0,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 00.
(AZ80)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 00,	PRE-IMPACT LOCATION must equal 0.
(AZA0)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 05 or 07,	TRAVEL SPEED should equal 000 for this vehicle.
(AZA2)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) does not equal 10, 11, or 12,	then RELATED FACTORS – DRIVER LEVEL should not equal 48.
(AZA3)	RELATED FACTORS – DRIVER LEVEL equals 48,	then PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 10, 11, or 12.
(B10P)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) does not equal 17, and ATTEMPTED AVOIDANCE MANEUVER 01,	DRIVER MANEUVERED TO AVOID should equal 00.
(PB17)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN for a person involved in the first harmful event equals 211-214 or 219,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 08, 09, 13, or 98. Note: This edit is restricted to vehicles that are involved in only one event with pedestrian(s).
(PB40)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 610,	at least one PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 08, 09, or 13 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PB41)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 215,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 08 or 09 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PB42)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 111, 211, or 212,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 11, 16, or 17 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.

Check	IF	THEN
(PB43)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 112, 151, 213, 214, 217, or 218,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 10, 16, or 17 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PB45)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 781 or 782,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 11 or 17 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PB46)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 221-225,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 01 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PB49)	PERSON TYPE equals 05 or 08, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 13 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST,	at least one PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN should equal 211-214 or 219.
(PB50)	PERSON TYPE equals 05 or 08, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 10-12 or 16 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST,	at least one PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN should equal 461, 465, 469, 510, 781, 782, 791, 792, 794, 795, or 799.
(PB52)	PERSON TYPE equals 06 or 07, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 13 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST,	at least one PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE should equal 610.
(PB56)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 791, 792, 794, 795,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 10 or 17 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PBA0)	PEDESTRIAN/ BIKE TYPING - CRASH TYPE - BICYCLE equals 111, 211, 212, and VEHICLE NUMBER - VEHICLE LEVEL equals VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 11.

Check	IF	THEN
(PBA1)	PEDESTRIAN/ BIKE TYPING - CRASH TYPE - BICYCLE equals 112, 151, 213, 214, 217, or 218, and VEHICLE NUMBER - VEHICLE LEVEL equals VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 10.
(PBA5)	PEDESTRIAN SCENARIO equals 1a, 1b, 1c, 1d, 2a, 2b, 2c, 2d, 3a, 3b, 3c, 3d, 4a, 4b, 4c, 4d,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 01, 02, 03, 04, 06, 08, 09, 12, 13, 14, 15, 16, or 17 for the vehicle number that struck this non-motorist.
(PBA6)	PEDESTRIAN SCENARIO equals 5a, 5b, 5c, 5d, 6a, 6b, 6c, 6d, 7a, 7b, 7c, 7d, 8a, 8b, 8c, 8d,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 10 for the vehicle number that struck this non-motorist.
(PBA7)	PEDESTRIAN SCENARIO equals 9a, 9b, 9c, 9d, 10a, 10b, 10c, 10d, 11a, 11b, 11c, 11d, 12a, 12b, 12c, 12d,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 11 for the vehicle number that struck this non-motorist.
(V535)	ATTEMPTED AVOIDANCE MANEUVER equals 00,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 00.
(V538)	JACKKNIFE equals 2,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must not equal 04, 05, 07-09, or 13 for this vehicle.

PC18 - Critical Event – Precrash (Category)

FORMAT: 1 numeric

SAS NAME: none

ELEMENT VALUES:

Codes	Attributes
1	This Vehicle Loss of Control Due to:
2	This Vehicle Traveling
3	Other Motor Vehicle in Lane
4	Other Motor Vehicle Encroaching into Lane
5	Pedestrian or Pedalcyclist or Other Non-Motorist
6	Object or Animal
7	Other
9	Unknown

Definition: This element identifies the category of the event that was critical to this vehicle being involved in the crash.

Remarks: When more than one condition applies and it cannot be determined which one had a greater effect, choose the higher listed attribute (e.g., [1 \(This Vehicle Loss of Control Due to:\)](#) takes precedence over [2 \(This Vehicle Traveling\)](#)).

If you do not know from available sources which driver had the right-of-way at a controlled or uncontrolled intersection, follow the guidelines under [Pprecrash General Rule #6](#).

1 (This Vehicle Loss of Control Due to:) is used to identify situations where the critical factor leading to the collision involved control loss of this vehicle. Control loss can be related to either mechanical failure or environmentally induced vehicle instability. (See [Pprecrash General Rule #5](#) for additional guidance.)

2 (This Vehicle Traveling) is used to identify situations where the critical factor leading to the collision involves the travel path of this vehicle.

3 (Other Motor Vehicle in Lane) is used to identify situations where the critical factor leading to the collision involved the travel of the other vehicle in the same lane as this vehicle.

4 (Other Motor Vehicle Encroaching into Lane) is used to identify situations where the critical factor leading to the collision involves the other vehicle's movement into or across this vehicle's travel lane from another lane, intersection, driveway, or ramp.

5 (Pedestrian or Pedalcyclist or Other Non-Motorist) is used to identify situations where the critical factor leading to the collision for this vehicle involved a pedestrian, pedalcyclist, or other non-motorist. A pedalcyclist is defined as a person riding a pedal power conveyance (bicycle, tricycle, etc.). Other non-motorists include persons on personal conveyances (baby carriage, skate board, roller blades, motorized wheelchair, etc.) and any person riding on an animal or in an animal-drawn conveyance (on horseback, in a horse-drawn carriage, etc.).

6 (Object or Animal) is used to identify situations where the critical factor leading to the collision for this vehicle involved an object or animal.

7 (Other) is used when a critical factor not previously listed resulted in the collision for this vehicle. Previous impacts in the crash are not considered as other critical precrash events.

9 (Unknown) is used when the critical precrash event that resulted in the collision is unknown.

Consistency Check:

Check	Language
(FP6F)	UNIT TYPE equals 1, and CRITICAL EVENT – PRECRASH (CATEGORY) equals blank, case status is flawed.

PC19 - Critical Event – Precrash (Event)

FORMAT: 2 numeric

SAS NAME: Vehicle.P_Crash2

ELEMENT VALUES:

THIS VEHICLE LOSS OF CONTROL DUE TO:

Codes	Attributes
01	Blow Out/Flat Tire
02	Stalled Engine
03	Disabling Vehicle Failure (e.g., Wheel Fell Off) (Specify:)
04	Non-Disabling Vehicle Problem (e.g., Hood Flew Up) (Specify:)
05	Poor Road Conditions (Puddle, Pothole, Ice, Etc.) (Specify:)
06	Traveling Too Fast for Conditions
08	Other Cause of Control Loss (Specify:)
09	Unknown Cause of Control Loss

THIS VEHICLE TRAVELING

Codes	Attributes
10	Over the Lane Line on Left Side of Travel Lane
11	Over the Lane Line on Right Side of Travel Lane
12	Off the Edge of the Road on the Left Side
13	Off the Edge of the Road on the Right Side
14	End Departure
15	Turning Left
16	Turning Right
17	Crossing Over (Passing Through) Junction
18	This Vehicle Decelerating
19	Unknown Travel Direction
20	Backing
21	Making a U-Turn

OTHER MOTOR VEHICLE IN LANE

Codes	Attributes
50	Other Vehicle Stopped
51	Traveling in Same Direction with Lower Steady Speed
52	Traveling in Same Direction While Decelerating
53	Traveling in Same Direction with Higher Speed
54	Traveling in Opposite Direction
55	In Crossover
56	Backing
59	Unknown Travel Direction of the Other Motor Vehicle in Lane

OTHER MOTOR VEHICLE ENCROACHING INTO LANE

Codes	Attributes
60	From Adjacent Lane (Same Direction) Over Left Lane Line
61	From Adjacent Lane (Same Direction) Over Right Lane Line
62	From Opposite Direction Over Left Lane Line
63	From Opposite Direction Over Right Lane Line
64	From Parking Lane/Shoulder, Median/Crossover, Roadside
65	From Crossing Street, Turning into Same Direction
66	From Crossing Street, Across Path
67	From Crossing Street, Turning into Opposite Direction
68	From Crossing Street, Intended Path Not Known
70	From Driveway, Turning into Same Direction
71	From Driveway, Across Path
72	From Driveway, Turning into Opposite Direction
73	From Driveway, Intended Path Not Known
74	From Entrance to Limited Access Highway
78	Encroachment by Other Vehicle - Details Unknown

PEDESTRIAN OR PEDALCYCLIST OR OTHER NON-MOTORIST

Codes	Attributes
80	Pedestrian in Road
81	Pedestrian Approaching Road
82	Pedestrian Unknown Location
83	Pedalcyclist or Other Non-Motorist in Road
84	Pedalcyclist or Other Non-Motorist Approaching Road
85	Pedalcyclist or Other Non-Motorist Unknown Location

OBJECT OR ANIMAL

Codes	Attributes
87	Animal in Road
88	Animal Approaching Road
89	Animal - Unknown Location
90	Object in Road
91	Object Approaching Road
92	Object Unknown Location

OTHER (SPECIFY:)

Code	Attribute
98	Other Critical Precrash Event (Specify:)

UNKNOWN:

Code	Attribute
99	Unknown

Definition: This element identifies the critical event that made the crash imminent (i.e., something occurred that made the collision possible).

Remarks:

The selection of the [Critical Precrash Category](#) will determine what Critical Precrash Events are available to select.

When you know the Critical Precrash Category, but are unable to select a specific Critical Precrash Event, use the following guideline:

Default to one of the “Other” or “Unknown” attributes within each Critical Precrash Event category, rather than coding the entire Critical Precrash Category as “Other critical precrash event.” ([P�cprash General Rule #3](#))

***Note:** For attributes with a “Specify:” designation, a fill-in text box will open in MDE. This text box should be used to provide additional detail about the attribute selection. Please include a **specific** reason for this selection.

Responsive actions to this situation, if any, are coded under [Attempted Avoidance Maneuver](#).

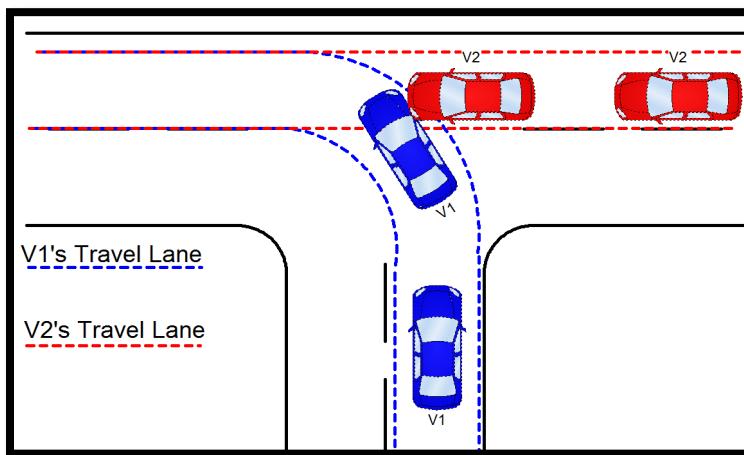

A Critical Precrash Event is coded for each vehicle and identifies the circumstances leading to this vehicle's first impact in the crash.

Do not refer to culpability. Many crash scenarios will suggest fault, but this should be coincidental rather than by design. As an example, vehicle 1 was speeding when vehicle 2 crossed vehicle 1's path from a driveway. The situation that made the precrash event critical for vehicle 1 (since it did not lose control) was vehicle 2's movement across vehicle 1's path **and not** vehicle 1's speed.

The mere presence of a traffic control signal/sign typically does not make the situation critical when determining Critical Precrash Event. (See example under [P�cprash General Rule #2](#))

When selecting events within the categories of [THIS VEHICLE TRAVELING](#) and [OTHER MOTOR VEHICLE ENCROACHING INTO LANE](#) for Critical Events occurring in intersections, a vehicle's “travel lane” extends through the intersection area even if no lane line markings are present within the intersection. For example, for a vehicle that is turning left, its original travel lane extends through the intersection to the lane into which it is turning. (See [Figure 24](#) below).

Figure 24: Diagram of a Vehicle Turning Left and its Extended Travel Lane

A motor vehicle is stopped in a travel lane and is struck by another motor vehicle ricocheting off a vehicle. The Critical Precrash Event for the vehicle struck by the ricochetting vehicle is in the category of either: [Other Motor Vehicle In Lane](#) or [Other Motor Vehicle Encroaching Into Lane](#). ([Prcrash General Rule #9](#))

This Vehicle Loss of Control Due to:

01 (Blowout or Flat Tire) is used when a vehicle in motion loses control as the result of an immediate tire disruption. Examples include blowout, rapid air loss, tread separation, etc.

02 (Stalled Engine) refers to a vehicle that is in motion and loses engine power. A stalled engine situation must precipitate a collision to be coded in this element. A vehicle that is stopped as the result of an engine malfunction does not take this attribute.

03 (Disabling Vehicle Failure [e.g., Wheel Fell Off] [Specify:J]) is selected when a mechanical malfunction, such as a component of the vehicle suspension or steering system, leads to the critical reason for the collision. (See “[Note: For attributes with “specify:” designation](#)” at the beginning of Remarks section for this element.)

04 (Non-Disabling Vehicle Problem [e.g., Hood Flew Up] [Specify:J]) is selected when some mechanical abnormality suddenly occurred to this vehicle that leads to the critical reason for the collision. The abnormality must not be disabling damage. For bald tires, see [06 \(Traveling Too Fast for Conditions\)](#). (See “[Note: For attributes with “specify:” designation](#)” at the beginning of Remarks section for this element.)

05 (Poor Road Conditions [Puddle, Pot Hole, Ice, Etc.] [Specify:J]) captures control loss due to suddenly encountered environmental conditions of the roadway and not ongoing situations. These conditions must have initiated the precrash event that resulted in the collision. (See “[Note: For attributes with “specify:” designation](#)” at the beginning of Remarks section for this element.).

06 (Traveling Too Fast for Conditions) identifies this vehicle’s movement and speed were not appropriate relative to its surroundings in which the subsequent loss of control lead to the collision. This attribute applies when the loss of control is due to a vehicle traveling at a speed that was unsafe for the road configuration or conditions, and has no bearing on the speed limit. The officer does not necessarily have to indicate that speed was a factor in the crash, and therefore this attribute is independent of [D22 Speeding Related](#). This attribute may also be used in situations where there are no adverse weather and/or road surface conditions.

Examples include:

- A roadway departure on a curve where the driver failed to negotiate and departed the roadway resulting in an impact. If the driver merely steered straight while in a curve and departed the roadway, then the category [This Vehicle Traveling](#) may apply.
- The vehicle loses control (hydroplanes) on a wet roadway (can be due to bald tires).

08 (Other Cause of Control Loss [Specify:J]) is selected when it was determined that this vehicle's loss of control was the primary reason that made the event critical and the above attributes do not adequately identify the control loss condition. If control is lost due to driver illness such as heart attacks, diabetic comas, etc., then Critical Event - Precrash (Event) should be coded as **08 (Other cause of control loss [specify:J])**. This attribute should not be used for drivers who are impaired by alcohol and/or drugs unless the driver's [Condition \(Impairment\) At Time Of Crash](#) equals [01 \(III, Blackout\)](#). (See “[Note: For attributes with “specify:” designation](#)” at the beginning of Remarks section for this element.).

09 (Unknown Cause of Control Loss) is selected when it is known control loss made the situation critical, but it is unknown whether the vehicle or the environment caused the control loss.

This Vehicle Traveling

These attributes identify situations where the critical factor leading to the collision involved the travel path of **this vehicle**.

10 (Over the Lane Line on Left Side of Travel Lane) is selected when this vehicle departs its lane to the left and is entering or had entered the adjoining lane, shoulder, or designated bike lane. The change of travel path by this vehicle must precipitate the critical event for the collision. As an example, this vehicle attempts to pass another vehicle on the other vehicle's left and is struck by a vehicle traveling within its travel lane in the opposite direction.

However, by modifying the scenario slightly, the lane change may not always be the factor leading to the precrash event. Consider the same situation where this vehicle is passing to the left of the lead vehicle. If an animal runs into the roadway and is struck by this vehicle, then the correct choice would be [**87 \(Animal in Road\)**](#).

11 (Over the Lane Line on Right Side of Travel Lane) is selected when this vehicle departs its lane to the right and is entering or had entered the adjoining lane, shoulder, or designated bike lane. To use this attribute, change of travel path by this vehicle must precipitate the critical event for the collision. As an example, this vehicle attempts to pass another vehicle on the other vehicle's right and is struck in the rear by a vehicle traveling within its travel lane in the same direction. The correct choice for this vehicle would be **11 (Over the Lane Line on Right Side of Travel Lane)**.

However, by modifying the scenario slightly the lane change may not always be the factor leading to the precrash event. Consider the same situation where this vehicle is passing to the right of the lead vehicle. If an animal runs into the road and is struck by this vehicle, then the correct choice would be [**87 \(Animal in Road\)**](#).

12 (Off the Edge of the Road on the Left Side) identifies a situation where the initial precrash event occurred beyond the left side shoulder area. This also includes departure into a median.

13 (Off the Edge of the Road on the Right Side) identifies a situation where the initial precrash event occurred beyond the right side shoulder area.

14 (End Departure) is used when the vehicle departs the end of the roadway (e.g., "T" intersection).

15 (Turning Left) is used when this vehicle attempts a left turn to or from its roadway or driveway to another roadway or driveway.

16 (Turning Right) is used when this vehicle attempts a right turn to or from its roadway or driveway to another roadway or driveway.

17 (Crossing Over [Passing Through] Junction) identifies this vehicle's travel as proceeding through the junction without any planned turning.

18 (This Vehicle Decelerating) is used when the vehicle is decelerating.

19 (Unknown Travel Direction) is used for those occasions where this vehicle's travel made the situation critical, but it is unknown which travel direction this vehicle was moving.

20 (Backing) is used when this vehicle was backing in a travel lane or backing into the roadway from a driveway, shoulder, or parking lane. ***This attribute excludes unintentional backward movement of the vehicle such as a vehicle that rolls or drifts backward, see 98 (Other Critical Precrash Event [Specify:]).***

21 (Making a U-Turn) is used when this vehicle attempts to make a U-turn. When it cannot be determined if the vehicle is making a left or a U-turn, default to left turn.

Other Motor Vehicle in Lane

These attributes identify situations where the critical factor leading to the collision involved the travel of the **other** vehicle in the same lane as **this** vehicle. **Note:** For Rear-End collision situations involving three vehicles see tables [Precrash Event Scenarios for Different Rear-End Collision Situations](#).

50 (Other Vehicle Stopped) identifies a situation where the other vehicle is not in motion (i.e., stopped, parked, disabled) and in this vehicle's travel lane.

51 (Traveling in Same Direction with Lower Steady Speed) is used when the other vehicle was the lead vehicle in the same travel lane, traveling in the same direction, and was traveling slower than this vehicle

52 (Traveling in Same Direction While Decelerating) is used when the other vehicle was the lead vehicle in the same travel lane, traveling in the same direction, and was decelerating. Deceleration can include intentional deceleration by braking or unintended deceleration caused by a prior event (e.g., tire blowout, prior collision).

53 (Traveling in Same Direction with Higher Speed) is used when the speed of the other vehicle was higher than this vehicle or accelerating. The other vehicle must be overtaking this vehicle.

54 (Traveling in Opposite Direction) is used when the other vehicle was in this vehicle's travel lane and traveling head-on in the opposite direction of this vehicle.

55 (In Crossover) is used when the other vehicle enters a crossover already occupied by this vehicle. A crossover is defined as a designated opening within a median used primarily for "U-turns."

56 (Backing) identifies a situation where the other vehicle was in the process of backing up while in this vehicle's travel lane. *This attribute also includes unintentional backward movement of the other vehicle. For example, a vehicle that rolls or drifts backward in this vehicle's lane.*

59 (Unknown Travel Direction of Other Motor Vehicle in Lane) is used for situations where the other vehicle's activity (while in the same lane as this vehicle) precipitated the precrash event, but the travel direction and/or speed could not be determined.

Other Motor Vehicle Encroaching into Lane

These attributes identify situations where the critical factor leading to the collision involved the **other** vehicle's movement into or across **this** vehicle's travel lane from another lane, intersection, driveway, or ramp.

When two vehicles are initially traveling on the same trafficway and one executes a left turn with the right-of-way (i.e. green arrow), use **Other Motor Vehicle Encroaching Into Lane - [From opposite direction-over right lane line](#)** for the turning vehicle's critical event. This applies to [Crash Types 68, 69](#).

If the vehicles were initially on different trafficways (Crash Types [76, 77](#) and [82, 83](#)) the critical event for the vehicle turning left with the right-of-way should be **Other Motor Vehicle Encroaching - [From crossing street across path. \(Precrash General Rule #7\)](#)**

60 (From Adjacent Lane (Same Direction) Over Left Lane Line) is used when the other vehicle was traveling in the same direction as this vehicle and crosses the left lane line with respect to this vehicle's travel lane (i.e., other vehicle crosses its right lane line).

61 (From Adjacent Lane [Same Direction] Over Right Lane Line) is used when the other vehicle was traveling in the same direction as this vehicle and crosses the right lane line with respect to this vehicle's travel lane (i.e., other vehicle crosses its left lane line).

62 (From Opposite Direction Over Left Lane Line) identifies a situation where the other vehicle crosses the left lane line while traveling in the opposite direction from this vehicle.

63 (From Opposite Direction Over Right Lane Line) identifies a situation where the other vehicle crosses the right lane line while traveling in the opposite direction from this vehicle.

64 (From Parking Lane/Shoulder, Median/Crossover, Roadside) is selected when the other vehicle was departing one of these trafficway components and entering the travel lane of this vehicle.

65 (From Crossing Street, Turning into Same Direction) is used when the other vehicle was turning from another roadway onto this vehicle's roadway and attempted to travel in the same direction as this vehicle.

66 (From Crossing Street, Across Path) is used when the other vehicle was continuing straight through the intersection and attempted to cross over this vehicle's roadway.

67 (From Crossing Street, Turning into Opposite Direction) is used when the other vehicle was entering an intersection from another roadway and was turning or attempting to turn onto this vehicle's roadway in the opposite travel direction of this vehicle.

68 (From Crossing Street, Intended Path Not Known) is used when the other vehicle's entrance into the intersection was the critical factor that led to the collision; however, the other vehicle's travel direction could not be determined.

70 (From Driveway, Turning into Same Direction) is used when the other vehicle was turning from a driveway onto this vehicle's roadway and attempted to travel in the same direction as this vehicle.

71 (From Driveway, Across Path) is used when the other vehicle was entering this vehicle's roadway from a driveway and was continuing straight across to another driveway or roadway.

72 (From Driveway, Turning into Opposite Direction) is used when the other vehicle was entering this vehicle's roadway from a driveway and was attempting to turn into the opposite travel direction of this vehicle.

73 (From Driveway, Intended Path Not Known) is used to identify driveway-related precrash events where details surrounding the other vehicle's intended path are not known.

74 (From Entrance to Limited Access Highway) is used for entrance ramp situations where the other vehicle was attempting to enter (merge) onto the limited access highway that was being traveled by this vehicle.

78 (Encroachment by Other Vehicle Details Unknown) is used for situations where the other vehicle initiated the critical precrash event, but circumstances surrounding the other vehicle's encroachment are unknown.

Pedestrian or Pedalcyclist or Other Non-Motorist

These attributes identify situations where the critical factor leading to the collision for this vehicle involved a pedestrian, pedalcyclist, or other non-motorist. These selections include situations where a vehicle was exiting a driveway. A pedalcyclist is defined as a person riding a pedal powered conveyance (bicycle, tricycle, etc.). Other non-motorists include persons on personal conveyances (baby carriage, skate board, roller blades, motorized wheelchair, etc.) and any person riding on an animal or in an animal-drawn conveyance (on horseback, in a horse-drawn carriage, etc.).

80 (Pedestrian in Road) is used when a pedestrian was present (sitting, standing, walking, or running, etc.) in the road. For people not on foot (e.g., person on a skateboard or in a motorized wheelchair), use [83 \(Pedalcyclist or Other Non-Motorist in Road\)](#).

81 (Pedestrian Approaching Road) identifies situations where a pedestrian was within the trafficway and moving toward the road or attempting to enter the road, but was not on the road.

82 (Pedestrian Unknown Location) is used when it was determined the presence or action of a pedestrian was the critical factor that lead to this vehicle's collision, but the location or action of the pedestrian was not known.

83 (Pedalcyclist or Other Non-Motorist in Road) is selected when a pedalcyclist or other non-motorist was present in the road (irrespective of relative motion). Other non-motorists include persons on personal conveyances (baby carriage, skate board, roller blades, motorized wheelchair, etc.) and any person riding on an animal or in an animal-drawn conveyance (on horseback, in a horse-drawn carriage, etc.).

84 (Pedalcyclist or Other Non-Motorist Approaching Road) identifies situations where the pedalcyclist or other non-motorist was within the trafficway and moving toward the road or attempting to enter the road, but was not on the road.

85 (Pedalcyclist or Other Non-Motorist Unknown Location) is used when it was determined the presence or action of a pedalcyclist or other non-motorist was the critical factor that led to this vehicle's collision, but the action of the pedalcyclist or other non-motorist was not known.

Object or Animal

These attributes identify situations where the critical factor leading to the collision for this vehicle involved an object or animal.

87 (Animal in Road) is used when an animal was present (stationary or moving) in the road.

88 (Animal Approaching Road) identifies situations where an animal was within the trafficway and moving toward the road or attempting to enter the road, but not on the road.

89 (Animal - Unknown Location) is used when it was determined the presence or action of an animal was the critical factor that led to this vehicle's collision, but the action of the animal was not known.

90 (Object in Road) is used when an object was present in the road. An object is defined as being either fixed or non-fixed (only non-fixed objects are captured in this attribute). "Fixed" objects (trees, poles, fire hydrants, etc.) cannot be in the roadway. ([Precrash General Rule #8](#))

91 (Object Approaching Road) identifies situations where an object was within the trafficway and moving toward the road, but not on the road.

92 (Object Unknown Location) is selected when it was determined the presence or movement of an object was the critical factor that led to this vehicle's collision, but details surrounding the location of the object were not known.

Treat trains as “objects not fixed.”

For example, a [simple single CCE](#) involving a train (car hits train or train hits car in crossing):

- If driver recognized impending danger of approaching train and tried to avoid - [91 \(Object Approaching Road\)](#)
- If driver recognized impending danger of train in his path or didn't and hits the train in the crossing - [90 \(Object in Road\)](#)
- If there are doubts/unclear circumstances - [98 \(Other Critical Precrash Event \[specify:\]\).](#)

Other (Specify):

These attributes identify situations where the critical factor leading to the collision for this vehicle was not previously listed.

98 (Other Critical Precrash Event [Specify:]) is used when a critical factor not previously listed resulted in the collision for this vehicle. Previous impacts in the crash are not considered as “other critical precrash events.”

Examples include:

- The **first harmful event** for this vehicle is a non-collision harmful event.
- the vehicle is a driverless motor vehicle in-transport.
- a MVIT that becomes a contact vehicle by being struck by a “load” from another MVIT
- the vehicle was disabled in a previous crash
- an in-transport vehicle strikes or is struck by the door of a parked motor vehicle that is opened into the travel lane or some portion of the equipment of the parked motor vehicle (excluding the primary outline), e.g., extended mirrors used when hauling a camper or trailer. **NOTE:** This should not be used for **loads** of vehicles extending into the travel lane, e.g., attached trailers or oversized cargo. In these cases, the vehicle is **in-transport** and not parked.
- Unintentional rolling backward
- Height clearance
- Mechanical problem with no control loss (stopped in the roadway with a stalled engine or broken axle, etc.).
- Vehicle stuck or stranded on the track and is struck by a train
- This vehicle is backing into a driveway/parking stall

(See “[Note: For attributes with “specify:” designation](#)” at the beginning of Remarks section for this element.)

Unknown:

99 (Unknown) is used when the critical precrash event that resulted in the collision is not known.

Consistency Checks:

Check	IF	THEN
(3B8P)	CRITICAL EVENT – PRECRASH (EVENT) equals 20,	CRASH TYPE for this vehicle should equal 92.
(3D00)	CRASH TYPE equals 20-49, and ATTEMPTED AVOIDANCE MANEUVER equals 00, 01,	CRITICAL EVENT – PRECRASH (EVENT) should not equal 12-14, 54, 66-68, 71-73, or 80-85.
(3D10)	CRASH TYPE equals 50-67, and ATTEMPTED AVOIDANCE MANEUVER equals 00, 01,	CRITICAL EVENT – PRECRASH (EVENT) should not equal 12-14, 51-53, 60, 61, 65, 66, 70, 71, 80-85, or 87-92.
(3D70)	CRITICAL EVENT – PRECRASH (EVENT) equals 01-04,	CONTRIBUTING CIRCUMSTANCES, MOTOR VEHICLE must not equal 00.
(3E00)	CRITICAL EVENT – PRECRASH (EVENT) equals 65-68 or 70-73 for a vehicle involved in the first harmful event,	RELATION TO JUNCTION (b) should not equal 01 or 18.
(42AP)	NUMBER OF MOTOR VEHICLES FORMS SUBMITTED equals 001, and RELATION TO TRAFFICWAY equals 02, 04, 06-08, 12 , and ATTEMPTED AVOIDANCE MANEUVER equals 00 or 01,	CRITICAL EVENT – PRECRASH (EVENT) should equal 01-06, 08-14, or 19.
(671F)	the only harmful event in the SEQUENCE OF EVENTS for this vehicle equals 02 or 04,	CRITICAL EVENT – PRECRASH (EVENT) must equal 98.
(AZ2P)	FIRST HARMFUL EVENT does not equal 02-07, 16, 44, 51, 72, and CRITICAL EVENT – PRECRASH (EVENT) equals 14, and ATTEMPTED AVOIDANCE MANEUVER equals 01,	CRASH TYPE must equal 14 for the vehicle involved in the first harmful event.
(AZ5P)	CRITICAL EVENT – PRECRASH (EVENT) equals 70-73 for a vehicle involved in the FIRST HARMFUL EVENT,	RELATION TO JUNCTION (b) should equal 04 or 08.
(AZBP)	any DRIVER MANEUVERED TO AVOID equals 03,	CRITICAL EVENT – PRECRASH (EVENT) should equal 87-89.
(AZCP)	any DRIVER MANEUVERED TO AVOID equals 05,	CRITICAL EVENT – PRECRASH (EVENT) should equal 80-85.
(AZEP)	any DRIVER MANEUVERED TO AVOID equals 01,	CRITICAL EVENT – PRECRASH (EVENT) should equal 90-92.
(A41A)	FIRST HARMFUL EVENT equals 02, 04, 07, 16, 44, or 54,	CRITICAL EVENT - PRECRASH (EVENT) should equal 98 for the vehicles involved in the FIRST HARMFUL EVENT.
(B13P)	CRASH TYPE equals 20-49, and ATTEMPTED AVOIDANCE MANEUVER equals 00-01,	CRITICAL EVENT-PRECRASH (EVENT) should not equal 12-14, 54, 66-68, 71-73, or 80-85.
(B15P)	CRITICAL EVENT – PRECRASH (EVENT) equals 91, and ATTEMPTED AVOIDANCE MANEUVER equals 00, 01, and the vehicle is involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 15.

Check	IF	THEN
(B16P)	CRITICAL EVENT – PRECRASH (EVENT) equals 90, and ATTEMPTED AVOIDANCE MANEUVER equals 01, and the vehicle is involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 12 or 15.
(B17P)	CONDITION (IMPAIRMENT) AT TIME OF CRASH equals 09 for this driver,	CRITICAL EVENT: PRECRASH (EVENT) should not equal 08 for this driver's vehicle.
(BZ10)	CRITICAL EVENT – PRECRASH (EVENT) equals 53,	AREAS OF IMPACT-INITIAL CONTACT POINT should not equal 12 for this vehicle.
(BZ20)	CRITICAL EVENT – PRECRASH (EVENT) equals 51, 52,	AREAS OF IMPACT-INITIAL CONTACT POINT should not equal 06 for this vehicle.
(BZ40)	CRITICAL EVENT - PRECRASH (EVENT) equals 01,	at least one SEQUENCE OF EVENTS must equal 61 for this vehicle.
(BZ50)	CRITICAL EVENT - PRECRASH (EVENT) equals 12, and PRE-IMPACT LOCATION is not equal to 5,	at least one SEQUENCE OF EVENTS must equal 64 for this vehicle.
(BZ51)	CRITICAL PRECRASH EVENT equals 80 and PRE-IMPACT LOCATION does not equal 4,	at least one PERSON TYPE should equal 5.
(BZ60)	CRITICAL EVENT - PRECRASH (EVENT) equals 13, and PRE-IMPACT LOCATION is not equal to 5,	at least one SEQUENCE OF EVENTS must equal 63 for this vehicle.
(BZ70)	CRITICAL EVENT - PRECRASH (EVENT) equals 14,	at least one SEQUENCE OF EVENTS must equal 71 for this vehicle.
(FP7F)	UNIT TYPE equals 1, and CRITICAL EVENT – PRECRASH (EVENT) equals blank, case status is flawed.	--
(U682)	UNLIKELY: CRITICAL EVENT: PRECRASH (EVENT) equals 08 for this vehicle and CONDITION (IMPAIRMENT) AT TIME OF CRASH (D23) does not equal 01 for this vehicle's driver.	--

PC20 - Attempted Avoidance Maneuver

FORMAT: 2 numeric

SAS NAME: Vehicle.P_Crash3

ELEMENT VALUES:

Codes	Attributes
00	No Driver Present/Unknown if Driver Present
01	No Avoidance Maneuver
05	Releasing Brakes
06	Steering Left
07	Steering Right
08	Braking and Steering Left
09	Braking and Steering Right
10	Accelerating
11	Accelerating and Steering Left
12	Accelerating and Steering Right
15	Braking and Unknown Steering Direction
16	Braking
98	Other Actions (Specify:)
99	Unknown/Not Reported

Definition: This element identifies movements/actions taken by the driver, within a critical crash envelope, in response to a [Critical Precrash Event](#).

Remarks: Attempted avoidance maneuvers are movements/actions taken by the driver, within a critical crash envelope, in response to a Critical Precrash Event. See [Prcrash Data Overview](#) for an expanded discussion on precrash definitions. Attempted avoidance maneuvers occur **after** the driver has realization of an impending danger. This element assesses what the driver's action(s) was in response to his/her realization.

First determine the Critical Precrash Event (for the appropriate Critical Crash Envelope) and select the attribute that best describes the actions taken by the driver in response to that Critical Precrash Event. Most crashes have only one critical crash envelope and thus only one Critical Precrash Event; however, multiple critical crash envelopes with their respective Critical Precrash Events, can exist. ***In the case of multiple critical precrash envelopes, select the attribute that best describes the actions taken by the driver in response to the Critical Precrash Event, within the appropriate critical crash envelope that occurred just prior to this vehicle's first harmful event.***

This element may be used independently: (1) of any maneuvers associated with this driver's Crash Type, and (2) this vehicle's first associated crash event.

When there was a known action (e.g., braking), but you cannot determine whether there was more than one action (e.g., braking and steering left), default to the known action (e.g., braking).

Witness Statements:

See clarification on the use of information provided by witnesses in section [103. Data Sources](#).

00 (No Driver Present/Unknown if Driver Present) is pre-coded for in-transport motor vehicles when the element [Driver Presence](#) is coded as **0 (No Driver Present/Not Applicable)**.

01 (No Avoidance Maneuver) is selected whenever the driver did not attempt any evasive (pre-impact) maneuvers, i.e., the case materials indicate that there was no realization of danger or realization without time/ability to react or there is some indication on a field or within the narrative statements (supported by the diagram if present) that identifies no avoidance maneuver was attempted. **Note: This attribute should not be assessed solely by the diagram.**

16 (Braking) is used when there is indication that the brakes were applied.

98 (Other Actions, [Specify:]), is used when the police crash report indicates the driver took certain avoidance actions, but none of the specified attributes apply. This value also applies when there are reported movements/actions taken by the driver with no information provided about the driver's specific actions. (e.g., "The driver of Vehicle 2 attempted to avoid the collision, but was unsuccessful").

***Note: For attributes with a "Specify:" designation,** a fill-in text box will open in MDE. This text box should be used to provide additional detail about the attribute selection. Please include a specific reason for this selection.

99 (Unknown/Not Reported) is used when:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials); or
2. a field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials); or
3. police indicate unknown.

Note: If a State's crash report manual instructs to leave data blocks blank when there is no avoidance maneuver, then a blank in those data blocks are NOT considered **99 (Unknown/Not Reported).**

Consistency Checks:

Check	IF	THEN
(3BDP)	CRASH TYPE equals 46, 47, and ATTEMPTED AVOIDANCE MANEUVER equals 01 or 99,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must not equal 01.
(3BEP)	CRASH TYPE equals 01 or 06, and ATTEMPTED AVOIDANCE MANEUVER equals 01,	PRE-IMPACT STABILITY should not equal 2-5 or 7.
(3BHP)	ATTEMPTED AVOIDANCE MANEUVER does not equal 05-12, 15, 16, 98,	PRE-IMPACT STABILITY must not equal 7.
(3C40)	CRASH TYPE equals 46,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 06, 15, 16, or ATTEMPTED AVOIDANCE MANEUVER should equal 07, 09, or 12.
(3C80)	CRASH TYPE equals 47,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 06, 15, 16, or ATTEMPTED AVOIDANCE MANEUVER should equal 06, 08, or 11.
(3D00)	CRASH TYPE equals 20-49, and ATTEMPTED AVOIDANCE MANEUVER equals 00, 01,	CRITICAL EVENT – PRECRASH (EVENT) should not equal 12-14, 54, 66-68, 71-73, or 80-85.

Check	IF	THEN
(3D10)	CRASH TYPE equals 50-67, and ATTEMPTED AVOIDANCE MANEUVER equals 00, 01,	CRITICAL EVENT – PRECRASH (EVENT) should not equal 12-14, 51-53, 60, 61, 65, 66, 70, 71, 80-85, or 87-92.
(42AP)	NUMBER OF MOTOR VEHICLES FORMS SUBMITTED equals 001, and RELATION TO TRAFFICWAY equals 02, 04, 06-08, 12 , and ATTEMPTED AVOIDANCE MANEUVER equals 00 or 01,	CRITICAL EVENT – PRECRASH (EVENT) should equal 01-06, 08-14, or 19.
(AZ2P)	FIRST HARMFUL EVENT does not equal 02-07, 16, 44, 51, 72, and CRITICAL EVENT-PRECRASH (EVENT) equals 14, and ATTEMPTED AVOIDANCE MANEUVER equals 01,	CRASH TYPE must equal 14 for the vehicle involved in the first harmful event.
(AZ30)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 00,	ATTEMPTED AVOIDANCE MANEUVER must equal 00.
(B10P)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) does not equal 17, ATTEMPTED AVOIDANCE MANEUVER equals 01,	DRIVER MANEUVERED TO AVOID should equal 00.
(B13P)	CRASH TYPE equals 20-49, and ATTEMPTED AVOIDANCE MANEUVER equals 00, 01,	CRITICAL EVENT-PRECRASH (EVENT) should not equal 12-14, 54, 66-68, 71-73, or 80-85.
(B15P)	CRITICAL EVENT-PRECRASH (EVENT) equals 91, and ATTEMPTED AVOIDANCE MANEUVER equals 00, 01 and the vehicle is involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 15.
(B16P)	CRITICAL EVENT-PRECRASH (EVENT) equals 90, and ATTEMPTED AVOIDANCE MANEUVER equals 01, and the vehicle is involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 12 or 15.
(V533)	CRASH TYPE equals 03, 08, 38, 40, 58, or 60,	ATTEMPTED AVOIDANCE MANEUVER must not equal 00 or 01.
(V535)	ATTEMPTED AVOIDANCE MANEUVER equals 00,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 00.
(V59Q)	ATTEMPTED AVOIDANCE MANEUVER equals 99,	DRIVER MANEUVERED TO AVOID should equal 00, 98, or 99.
(VH10)	PRE-IMPACT LOCATION equals 0,	ATTEMPTED AVOIDANCE MANEUVER must equal 00.
(VH20)	ATTEMPTED AVOIDANCE MANEUVER equals 00,	PRE-IMPACT LOCATION must equal 0.

PC21 - Pre-Impact Stability

FORMAT: 1 numeric

SAS NAME: Vehicle.PCrash4

ELEMENT VALUES:

Codes	Attributes
0	No Driver Present/Unknown if Driver Present
1	Tracking
2	Skidding Longitudinally Rotation Less Than 30 Degrees
3	Skidding Laterally Clockwise Rotation
4	Skidding Laterally Counterclockwise Rotation
5	Skidding Laterally, Rotation Direction Unknown
7	Other Vehicle Loss-of-Control (Specify:)
9	Precrash Stability Unknown

Definition: This element assesses the stability of the vehicle **after** the critical event, but **before** the impact.

Remarks: The stability of the vehicle **prior** to an avoidance action is **not** considered except in the following situation:

A vehicle that is out of control (e.g., yawing clockwise) prior to an avoidance maneuver is coded as [7 \(Other Vehicle Loss-of Control \[Specify:\]\)](#) only if an avoidance action was taken in response to an impending danger.

Thus, this element focuses upon this vehicle's dynamics **after the critical event**.

0 (No Driver Present/Unknown if Driver Present) is pre-coded for in-transport motor vehicles when the element [Driver Presence](#) is coded as **0 (No Driver Present/Not Applicable)**.

1 (Tracking) is used when there is no brake lockup and the vehicle continued along its intended path without rotation. Stopped, slowing, turning, or accelerating to avoid a rear-end collision are examples. Only if the case materials include enough detail to determine all of the items from [Precrash General Rule #10](#), code **1 (Tracking)** can be applied.

Even when the officer does not specifically mention "skidding" or "braking," narrative statements such as "the vehicle began to rotate," "the back end slid out," "the vehicle was sliding," etc., are valid for selecting attributes 2 to 5.

2 (Skidding Longitudinally Rotation Less Than 30 degrees) is selected when there is brake lockup or whenever tire marks are apparent without brake lockup (braking or non-braking) and rotation is less than 30 degrees clockwise or counterclockwise. If there is no information to support rotation greater than or equal to 30 degrees, then use this attribute. Also use this attribute when there is indication in the case materials that the vehicle was not tracking (e.g., sliding) but tire marks are not present, (wet, ice, snow covered, etc.).

3 (Skidding Laterally Clockwise Rotation) is selected when the vehicle rotates clockwise, relative to the driver's seating position. The vehicle must rotate 30 degrees or more. This attribute also applies when the driver attempts a steering input (e.g., steers right), but the vehicle rotates clockwise.

4 (Skidding Laterally Counterclockwise Rotation) is selected when the vehicle rotates counterclockwise, relative to the driver's seating position. The vehicle must rotate 30 degrees or more. This attribute also applies when the driver attempts a steering input (e.g., swerves left), but the vehicle rotates counterclockwise.

5 (Skidding Laterally, Rotation Direction Unknown) is used when the vehicle rotates 30 degrees or more but it cannot be determined from the case materials whether it was clockwise or counterclockwise rotation.

7 (Other Vehicle Loss-of-Control [Specify:]) is selected when a driver loses control of a vehicle prior to the critical event.

***Note: For attributes with a “Specify:” designation,** a fill-in text box will open in MDE. This text box should be used to provide additional detail about the attribute selection. Please include a specific reason for this selection.

9 (Precrash Stability Unknown) is selected when the stability of the vehicle cannot be determined. If the case materials do not provide enough information (e.g., in the diagram, narrative, etc.) to determine precrash stability, code **9 (Precrash Stability Unknown)**.

Consistency Checks:

Check	IF	THEN
(3BEP)	CRASH TYPE equals 01 or 06, and ATTEMPTED AVOIDANCE MANEUVER equals 01,	PRE-IMPACT STABILITY should not equal 2-5 or 7.
(3BHP)	ATTEMPTED AVOIDANCE MANEUVER does not equal 05-12, 15, 16, 98,	PRE-IMPACT STABILITY must not equal 7.
(3D50)	PRE-IMPACT STABILITY equals 1,	CRASH TYPE should not equal 02, 07, 34, 36, 54, or 56.
(AZ50)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 00,	PRE-IMPACT STABILITY must equal 0.
(AZ60)	PRE-IMPACT STABILITY equals 0,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 00.
(VB60)	PRE-IMPACT STABILITY equals 0,	PRE-IMPACT LOCATION must equal 0.
(VB70)	PRE-IMPACT STABILITY is not equal to 0,	PRE-IMPACT LOCATION must not equal 0.
(VBA0)	PRE-IMPACT LOCATION equals 1,	PRE-IMPACT STABILITY should equal 1, 2, or 9.

PC22 - Pre-Impact Location

FORMAT: 1 numeric

SAS NAME: Vehicle.PCrash5

ELEMENT VALUES:

Codes	Attributes
0	No Driver Present/Unknown if Driver Present
1	Stayed in Original Travel Lane
2	Stayed on Roadway, but Left Original Travel Lane
3	Stayed on Roadway, Not Known if Left Original Travel Lane
4	Departed Roadway
5	Remained off Roadway
6	Returned to Roadway
7	Entered Roadway
9	Unknown

Definition: This element assesses the location of the vehicle after the critical event, and immediately before the [First Harmful Event](#) for this vehicle.

Remarks: When determining Pre-Impact Location for crashes occurring in intersections, a vehicle's "travel lane" extends through the intersection area even if no lane line markings are present within the intersection. Additionally, for a vehicle that is turning, its original travel lane extends through the junction to the lane or driveway access into which it is turning.

Select the attribute that best describes the location of the vehicle (i.e., perimeter of the vehicle from the case diagram).

0 (No Driver Present/Unknown if Driver Present) is used when there is no driver in this vehicle.

1 (Stayed in Original Travel Lane) is selected when the vehicle remained within the boundaries of its initial travel lane.

2 (Stayed on Roadway but Left Original Travel Lane) is selected when the perimeter of the vehicle departed its initial travel lane; however, the vehicle remained within the boundaries of the roadway (travel lanes).

3 (Stayed on Roadway, Not Known if Left Original Travel Lane) is selected when it cannot be ascertained whether the vehicle remained within its initial travel lane. To use this attribute, the vehicle must have remained within the boundaries of the roadway.

4 (Departed Roadway) is selected when the vehicle departed the roadway as a result of a precrash motion. The roadway departure must not be related to the post-impact trajectory of a crash within the roadway. Use this attribute for vehicles crossing a median into oncoming traffic. This attribute is selected when any part of the vehicle departed the roadway edge. (See the coding of Pre-Impact Location in [Example 9](#) under the [Prcrash Data Overview Examples](#).)

5 (Remained off Roadway) the precrash motion occurred outside the boundaries of the roadway. This includes traveling on the shoulders, within the median, on the roadside, or off the trafficway.

6 (Returned to Roadway) is selected when the vehicle was on the roadway, went off the roadway and then returned to the same roadway during precrash motion.

7 (Entered Roadway) is selected when the vehicle was not previously on the roadway and then the vehicle enters the roadway during precrash motion.

9 (Unknown) the precrash motion of the vehicle cannot be determined.

Consistency Checks:

Check	IF	THEN
(AZ70)	PRE-IMPACT LOCATION equals 0,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 00.
(AZ80)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 00,	PRE-IMPACT LOCATION must equal 0.
(BZ50)	CRITICAL EVENT - PRECRASH (EVENT) equals 12, and PRE-IMPACT LOCATION is not equal to 5,	at least one SEQUENCE OF EVENTS must equal 64 for this vehicle.
(BZ51)	CRITICAL PRECRASH EVENT equals 80 and PRE-IMPACT LOCATION does not equal 4,	at least one PERSON TYPE should equal 5.
(BZ60)	CRITICAL EVENT - PRECRASH (EVENT) equals 13, and PRE-IMPACT LOCATION is not equal to 5,	at least one SEQUENCE OF EVENTS must equal 63 for this vehicle.
(BZ90)	CRASH TYPE equals 01-05, and PRE-IMPACT LOCATION is not equal to 0 or 5,	at least one SEQUENCE OF EVENTS prior to the FIRST HARMFUL EVENT must equal 63.
(BZ91)	CRASH TYPE equals 06-10, and PRE-IMPACT LOCATION is not equal to 0 or 5,	at least one SEQUENCE OF EVENTS prior to the FIRST HARMFUL EVENT must equal 64.
(PC20)	RELATION TO TRAFFICWAY equals 02-08, 10, or 12 ,	PRE-IMPACT LOCATION of the vehicle(s) involved in the FIRST HARMFUL EVENT should equal 0, 4, 5, or 9.
(PC30)	PRE-IMPACT LOCATION for a vehicle involved in the first harmful event equals 4, 5, and RELATION TO JUNCTION (b) does not equal 04,05,	RELATION TO TRAFFICWAY should not equal 01 or 11.
(PC40)	PRE-IMPACT LOCATION for a vehicle involved in the first harmful event equals 1-3, 6,	RELATION TO TRAFFICWAY should equal 01 or 11.
(PC50)	PRE-IMPACT LOCATION equals 2,	TOTAL LANES IN ROADWAY should not equal 1.
(VB60)	PRE-IMPACT STABILITY equals 0,	PRE-IMPACT LOCATION must equal 0.
(VB70)	PRE-IMPACT STABILITY is not equal to 0,	PRE-IMPACT LOCATION must not equal 0.
(VBA0)	PRE-IMPACT LOCATION equals 1,	PRE-IMPACT STABILITY should equal 1, 2, or 9.
(VH10)	PRE-IMPACT LOCATION equals 0,	ATTEMPTED AVOIDANCE MANEUVER must equal 00.
(VH20)	ATTEMPTED AVOIDANCE MANEUVER equals 00,	PRE-IMPACT LOCATION must equal 0.

PC23 - Crash Type

FORMAT: 2 numeric

SAS NAME: Vehicle.Acc_Type

ELEMENT VALUES:

As assigned by the selection on the next screens

Codes	Attributes
00	No Impact
01-93	Crash Types
98	Other Crash Type
99	Unknown

Definition: This element describes the type of crash this in-transport vehicle was involved in based on the [First Harmful Event](#) and the precrash circumstances.

Remarks: The Crash Type is a numeric value assigned by selecting the **Crash Category** and the **Crash Configuration** on the next screens/pages. The number can be directly entered or edited here; however, the two-step process of selecting the Crash Category and Crash Configuration is preferred to visualize the crash scenario.

The first harmful event may include a collision between a vehicle and some object, accompanied by property damage or human injury. The object may be another vehicle, a person, an animal, a fixed object, the road surface, or the ground. If the first collision is a rollover, the impact is with the ground or road surface. The collision may also involve plowing into soft ground, if severe vehicle deceleration results in damage or injury. A road departure without damage or injury is **not** defined as a harmful event.

Please see [The following crash types require clarification](#) for guidance on a few specific crash types.

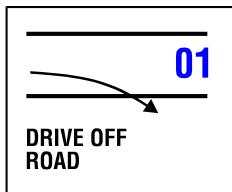

Crash Type Table

Category	Configuration	CRASH TYPES (includes intent)					
I Single Driver	A Right Roadside Departure	 01 DRIVE OFF ROAD	 02 CONTROL/ TRACTION LOSS	 03 AVOID COLLISION WITH VEH., PED., ANIM.	04 SPECIFICS OTHER	05 SPECIFICS UNKNOWN

Category I. Single Driver

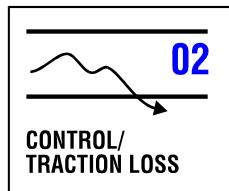

Configuration A. Right Roadside Departure

The vehicle departed the right side of the road with the first harmful event occurring off the road.

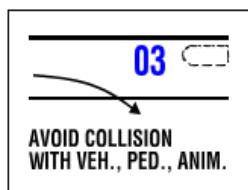

01 Right Roadside Departure: Drive Off Road

Use **Right Roadside Departure: Drive Off Road** when the vehicle departed the road under a controlled situation (the driver was distracted, fell asleep, intentionally departed, etc.)

02 Right Roadside Departure: Control/Traction Loss

Use **Right Roadside Departure: Control/Traction** when there is evidence that the vehicle lost traction or "got away" from the driver in some other way (e.g., the vehicle spun off the road as a result of surface conditions, oversteer phenomena, or mechanical malfunctions). If doubt exists, use [01 \(Right Roadside Departure, Drive Off Road\)](#). If the control/traction loss occurs as a result of an avoidance of something in the road, see remarks for CRASH TYPE [03 \(Right Roadside Departure: Avoid Collision with Vehicle, Pedestrian, Animal\)](#) and [04 \(Right Roadside Departure: Specifics Other\)](#) to establish which attribute applies.

03 Right Roadside Departure: Avoid Collision with Vehicle, Pedestrian, Animal

Use **Right Roadside Departure: Avoid Collision with Vehicle, Pedestrian, Animal** when the vehicle departed the road to avoid something on the road. Phantom vehicle situations, pedestrians, bicyclists, and other cyclists and non-motorists are included here.

04
**SPECIFICS
OTHER**

04 Right Roadside Departure: Specifics Other

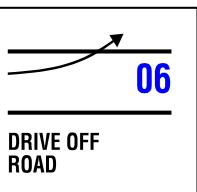

Use **Right Roadside Departure: Specifics Other** if the vehicle departed the road to avoid something on the road other than a vehicle, pedestrian, or animal. Also use “Specifics Other” for crashes involving a driverless in-transport vehicle.

05
**SPECIFICS
UNKNOWN**

05 Right Roadside Departure: Specifics Unknown

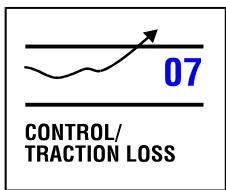

Use **Right Roadside Departure: Specifics Unknown** if the vehicle departed the right side of the road for unknown reasons.

Configuration B. Left Roadside Departure

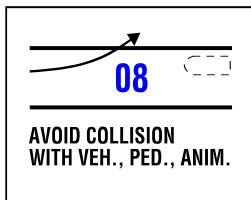

06 Left Roadside Departure: Drive Off Road

Use **Left Roadside Departure: Drive Off Road** when the vehicle departed the road under a controlled situation (the driver was distracted, fell asleep, intentionally departed, etc.).

07 Left Roadside Departure: Control/Traction Loss

Use **Left Roadside Departure: Control/Traction Loss** if there is evidence that the vehicle lost traction or “got away” from the driver in some other way (e.g., the vehicle spun off the road as a result of surface conditions, oversteer phenomena, or mechanical malfunctions.) If doubt exists, use [**06 \(Left Roadside Departure, Drive Off Road\)**](#). If the control/traction loss occurs as a result of an avoidance of something in the road, see remarks for CRASH TYPE [**08 \(Left Roadside Departure: Avoid Collision with Vehicle, Pedestrian, Animal\)**](#) and [**09 \(Left Roadside Departure: Specifics Other\)**](#) to establish which attribute applies.

**08 Left Roadside Departure: Avoid Collision with Vehicle, Pedestrian, Animal**

Use **Left Roadside Departure: Avoid Collision with Vehicle, Pedestrian, Animal** when the vehicle departed the road to avoid something on the road. Phantom vehicle situations, pedestrians, bicyclists, and other cyclists and non-motorists are included here.

**09 Left Roadside Departure: Specifics Other**

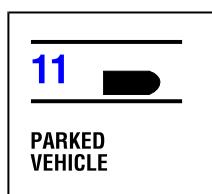

Use **Left Roadside Departure: Specifics Other** if the vehicle departed the road to avoid something on the road other than a vehicle, pedestrian, or animal. Also, use "Specifics Other" for crashes involving a driverless in-transport vehicle.

**10 Left Roadside Departure: Specifics Unknown**

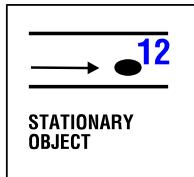

Use **Left Roadside Departure: Specifics Unknown** if the vehicle departed the left side of the road for unknown reasons.

Configuration C. Forward Impact

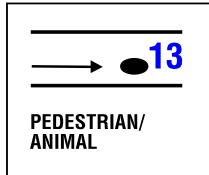

The vehicle struck an object on the road or off the end of a trafficway while moving forward. Vehicle plane of contact is NOT a consideration.

**11 Forward Impact: Parked Vehicle**

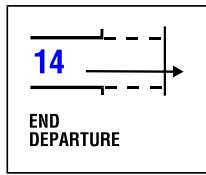

Use **Forward Impact: Parked Vehicle** if the crash involves an impact with a parked vehicle anywhere on the road while moving forward. Vehicle plane of contact is NOT a consideration. For cases involving a parked vehicle opening a door into moving traffic or extended mirrors into the travel lane use [15 \(Forward Impact: Specifics Other\)](#).

**12 Forward Impact: Stationary Object**

Use **Forward Impact: Stationary Object** if the crash involves an impact with a stationary object anywhere on the road while moving forward. Vehicle plane of contact is NOT a consideration.

**13 Forward Impact: Pedestrian/Animal**

Use **Forward Impact: Pedestrian/Animal** if the first harmful event involves an impact with a pedestrian or animal anywhere on the road while moving forward. Pedestrians, bicyclists, and other cyclists and non-motorists are included here. Vehicle plane of contact is NOT a consideration. However, if a vehicle is backing up when it contacts a non-motorist select [**CRASH TYPE 92 \(Backing, Etc.: Backing Vehicle\)**](#).

**14 Forward Impact: End Departure**

Use **Forward Impact: End Departure** when the vehicle ran off the end of the road and crashed into something while moving forward. Vehicle plane of contact is NOT a consideration.

**15 Forward Impact: Specifics Other**

Use **Forward Impact: Specifics Other** for impacted (striking or struck) trains and non-stationary objects anywhere on the road while moving forward. Vehicle plane of contact is NOT a consideration. Also use "Specifics Other" for crashes involving a driverless in-transport vehicle. Use this attribute for cases involving a parked vehicle opening a door into moving traffic, extended mirrors into the travel lane, or an object hanging over the road.

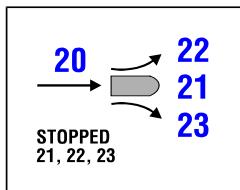

16 Forward Impact: Specifics Unknown

Use **Forward Impact: Specifics Unknown** when the case materials indicate a single driver was involved in a forward impact collision, but no further classification is possible. Vehicle plane of contact is NOT a consideration.

Category II. Same Trafficway, Same Direction

Configuration D. Rear-End

The front of the overtaking vehicle struck the rear of the other vehicle. Note, even if the rear-impacted vehicle had started to make a turn, code here (not in Category IV - Change in Trafficway, Vehicle Turning).

20 Rear-End: Stopped

Use **Rear-End: Stopped** for a vehicle that strikes another vehicle from the rear when the impacted vehicle was stopped in the trafficway.

21 Rear-End: Stopped, Straight

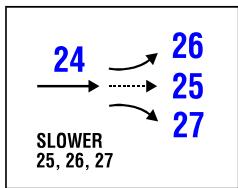

Use **Rear-End: Stopped, Straight** for a rear-impacted vehicle that was stopped in the trafficway, and was intending to proceed straight ahead.

22 Rear-End: Stopped, Left

Use **Rear-End: Stopped, Left** for a rear-impacted vehicle that was stopped in the trafficway, intending to make a left turn.

23 Rear-End: Stopped, Right

Use **Rear-End: Stopped, Right** for a rear-impacted vehicle that was stopped in the trafficway, intending to make a right turn.

24 Rear-End: Slower

Use **Rear-End: Slower** for a vehicle that strikes another vehicle from the rear when the impacted vehicle was going slower than the striking vehicle.

25 Rear-End: Slower, Going Straight

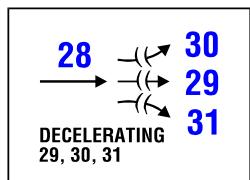

Use **Rear-End: Slower, Going Straight** for a rear-impacted vehicle that was going slower than the other vehicle while proceeding straight ahead.

26 Rear-End: Slower, Going Left

Use **Rear-End: Slower, Going Left** for a rear-impacted vehicle that was going slower than the other vehicle while intending to turn left.

27 Rear-End: Slower, Going Right

Use **Rear-End: Slower, Going Right** for a rear-impacted vehicle that was going slower than the other vehicle while intending to turn right.

28 Rear-End: Decelerating (Slowing)

Use **Rear-End: Decelerating (Slowing)** for a vehicle that strikes another vehicle from the rear when the impacted vehicle was slowing down.

29 Rear-End: Decelerating (Slowing), Going Straight

Use **Rear-End: Decelerating (Slowing), Going Straight** for a rear-impacted vehicle that was slowing down while proceeding straight ahead.

30 Rear-End: Decelerating (Slowing), Going Left

Use Rear-End: Decelerating (Slowing), Going Left for a rear-impacted vehicle that was slowing down while intending to turn left.

31 Rear-End: Decelerating (Slowing), Going Right

Use **Rear-End: Decelerating (Slowing), Going Right** for a rear-impacted vehicle that was slowing down while intending to turn right.

EACH: **32**
**SPECIFICS
OTHER**

32 Rear-End: Specifics Other

Use **Rear-End: Specifics Other** for rear-end collisions that cannot be described in “20-31.” Enter “Specifics Other” for crashes involving a driverless in-transport vehicle.

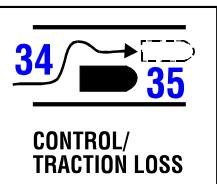

EACH: **33**
**SPECIFICS
UNKNOWN**

33 Rear-End: Specifics Unknown

Use **Rear-End: Specifics Unknown** when the case materials indicate a rear-end collision occurred, but no further classification is possible.

Configuration E. Forward Impact

The front of the overtaking vehicle struck the rear of the other vehicle, following a steering maneuver around a noninvolved vehicle or object.

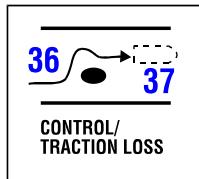

34 Forward Impact: Control/Traction Loss

Use **Forward Impact: Control/Traction Loss** for a collision in which a vehicle’s frontal area strikes another vehicle due to loss of control or traction (during a maneuver to avoid a collision with a non-involved vehicle) while both are traveling on the same trafficway in the same direction.

35 Forward Impact: Control/Traction Loss

Use **Forward Impact: Control/Traction Loss** for a vehicle that is struck by the frontal area of another vehicle due to loss of control or traction (during a maneuver to avoid a collision with a non-involved vehicle) while both are traveling on the same trafficway in the same direction.

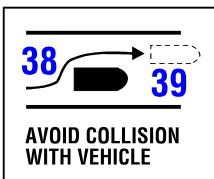

36 Forward Impact: Control/Traction Loss

Use **Forward Impact: Control/Traction Loss** for a collision in which a vehicle's frontal area strikes another vehicle due to loss of control or traction (during a maneuver to avoid a collision with *a non-fixed* object (*garbage can, person, animal, etc.*) *in the road*) while both are traveling on the same trafficway in the same direction.

37 Forward Impact: Control/Traction Loss

Use **Forward Impact: Control/Traction Loss** for a vehicle that is struck by the frontal area of another vehicle due to loss of control or traction (during a maneuver to avoid a collision with *a non-fixed* object (*garbage can, person, animal, etc.*) *in the road*) while both are traveling on the same trafficway in the same direction.

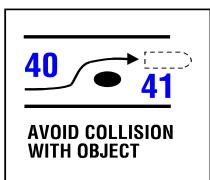

38 Forward Impact: Avoid Collision with Vehicle

Use **Forward Impact: Avoid Collision with Vehicle** for a vehicle that struck the rear of another vehicle with its front plane while maneuvering to avoid collision with a non-involved vehicle, when loss of control or traction was not a factor, and both were traveling on the same trafficway, in the same direction.

39 Forward Impact: Avoid Collision with Vehicle

Use **Forward Impact: Avoid Collision with Vehicle** for a vehicle that was struck by the frontal area of another vehicle that was maneuvering to avoid a collision with a non-involved vehicle, when loss of control or traction was not a factor, and both were traveling on the same trafficway, in the same direction.

40 Forward Impact: Avoid Collision with Object

Use **Forward Impact: Avoid Collision with Object** for a vehicle that struck the rear of another vehicle with its front plane while maneuvering to avoid *a* collision with *a non-fixed* object (*garbage can, person, animal, etc.*) *in the road*, when loss of control or traction was not a factor, and both were traveling on the same trafficway, in the same direction.

41 Forward Impact: Avoid Collision with Object

Use **Forward Impact: Avoid Collision with Object** for a vehicle that was struck by the frontal area of another vehicle that was maneuvering to avoid a collision with *a non-fixed* object (*garbage can, person, animal, etc.*) *in the road*, when loss of control or traction was not a factor, and both were traveling on the same trafficway, in the same direction.

EACH: **42**
SPECIFICS
OTHER

42 Forward Impact: Specifics Other

Use **Forward Impact: Specifics Other** (for both vehicles) for a forward impact collision that occurred while both vehicles were traveling on the same trafficway, in the same direction, and the striking vehicle was attempting to avoid a vehicle or an object that cannot be described by "34 - 40."

Also, use this code for crashes involving a driverless in-transport vehicle that would otherwise qualify for this configuration.

EACH: **43**
SPECIFICS
UNKNOWN

43 Forward Impact: Specifics Unknown

Use **Forward Impact: Specifics Unknown** when the case materials indicate that a forward impact collision occurred while both vehicles were traveling on the same trafficway and in the same direction, but no further classification was possible.

Configuration F. Sideswipe/Angle

The two vehicles are involved in an impact involving the side of one or both vehicles.

The following four attributes, **Sideswipe/Angle, Straight Ahead On Left**, **Sideswipe/Angle, Straight Ahead On Left/Right**, **Sideswipe/Angle, Changing Lanes To The Right** and **Sideswipe/Angle, Changing Lanes To The Left** identify relative vehicle positions (left versus right) and lane of travel intentions (straight ahead versus changing lanes). From these four codes, four combinations are permitted. They are:

1. **44 (Sideswipe/Angle, Straight Ahead On Left)** and **45 (Sideswipe/Angle, Straight Ahead On Left/Right)**.
2. **46 (Sideswipe/Angle, Changing Lanes To The Right)** and **45 (Sideswipe/Angle, Straight Ahead On Left/Right)**.
3. **45 (Sideswipe/Angle, Straight Ahead On Left/Right)** and **47 (Sideswipe/Angle, Changing Lanes To The Left)**.
4. **46 (Sideswipe/Angle, Changing Lanes To The Right)** and **47 (Sideswipe/Angle, Changing Lanes To The Left)**.

When used in combination, these codes refer to a sideswipe or angle collision that involved a vehicle to the left of a vehicle to the right where:

1. neither vehicle (**Sideswipe/Angle, Straight Ahead On Left** and **Sideswipe/Angle, Straight Ahead On Left/Right**) intended to change its lane;
2. the vehicle on the left (**Sideswipe/Angle, Changing Lanes To The Right**) was changing lanes to the right, and the vehicle on the right (**Sideswipe/Angle, Straight Ahead On Left/Right**) was not intending to change its lane;
3. the vehicle on the left (**Sideswipe/Angle, Straight Ahead On Left/Right**) was not intending to change its lane, and the vehicle on the right (**Sideswipe/Angle, Changing Lanes To The Left**) was changing lanes to the left, and

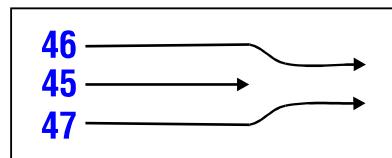

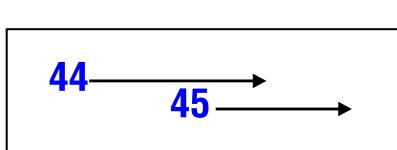

4. the vehicle on the left (**Sideswipe/Angle, Changing Lanes To The Right**) was changing lanes to the right, and the vehicle on the right (**Sideswipe/Angle, Changing Lanes To The Left**) was changing lanes to the left.

In addition, when:

1. the right sides of the two vehicles impact following a 180-degree rotation of the vehicle on the right, or
2. the left sides of the two vehicles impact following a 180-degree rotation of the vehicle on the left.

Select the appropriate combination depending upon:

1. their positions (i.e., left versus right) and
2. the intended lane of travel (straight ahead versus changing lanes) of their drivers.

44 Sideswipe/Angle: Straight Ahead on Left

See discussion under [Configuration F. Sideswipe/Angle](#), above for an explanation of when this attribute applies.

45 Sideswipe/Angle: Straight Ahead on Left/Right

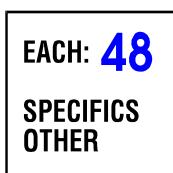

See discussion under [Configuration F. Sideswipe/Angle](#), above for an explanation of when this attribute applies.

46 Sideswipe/Angle: Changing Lanes to the Right

See discussion under [Configuration F. Sideswipe/Angle](#), above for an explanation of when this attribute applies.

47 Sideswipe/Angle: Changing Lanes to the Left

See discussion under [Configuration F. Sideswipe/Angle](#), above for an explanation of when this attribute applies.

48 Sideswipe/Angle: Specifics Other

Use **Sideswipe/Angle: Specifics Other** if one vehicle was behind the other prior to a sideswipe/angle collision occurring while both vehicles were traveling on the same trafficway and in the same direction.

For example, use this code when two vehicles are on the same trafficway and going the same direction, and one loses control and is struck in the side by the front of the other vehicle. However, if one vehicle rotates such that the impact is front to front, then use code [98 \(Other crash type\)](#).

Use **Sideswipe/Angle: Specifics Other** for crashes involving a driverless in-transport vehicle.

EACH: **49**
SPECIFICS UNKNOWN

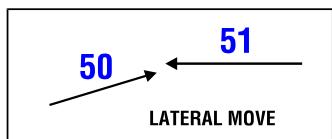

49 Sideswipe/Angle: Specifics Unknown

Use **Sideswipe/Angle: Specifics Unknown** for sideswipe/angle collisions that occur while both vehicles are traveling on the same trafficway and in the same direction, when no further classification is possible.

Category III. Same Trafficway, Opposite Direction

Configuration G. Head-On

The frontal area of one vehicle struck the frontal area of another.

50 Head-On: Lateral Move (Left/Right)

Use **Head-On: Lateral Move (Left/Right)** for a vehicle that LEAVES ITS LANE (moves laterally [sideways]) immediately before colliding head-on with another vehicle, when the vehicles are traveling on the same trafficway in opposite directions.

51 Head-On: Lateral Move (Going Straight)

Use **Head-On: Lateral Move (Going Straight)** for a vehicle that collides head-on with another vehicle that has IMMEDIATELY LEFT ITS LANE (moved laterally), when the vehicles are traveling on the same trafficway in opposite directions.

EACH: **52**
SPECIFICS OTHER

52 Head-On: Specifics Other

Use **Head-On: Specifics Other** for a head-on collision that cannot be described by "50-51," when the vehicles are traveling on the same trafficway in opposite directions. Clarification: Enter "52" for both vehicles involved in a head-on collision when one is traveling the wrong way on a one-way roadway.

Enter "Specifics Other" for crashes involving a driverless in-transport vehicle.

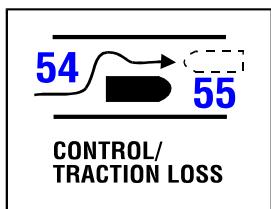

53 Head-On: Specifics Unknown

Use **Head-On: Specifics Unknown** when the case materials indicate a head-on collision occurred between two vehicles traveling on the same trafficway in opposite directions, when no further classification is possible.

Configuration H. Forward Impact

The frontal area of one vehicle struck the frontal area of another following a steering maneuver around a noninvolved vehicle or an object.

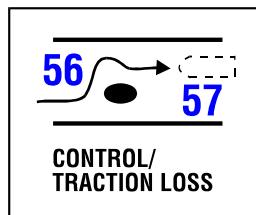

54 Forward Impact: Control/Traction Loss

Use **Forward Impact: Control/Traction Loss** for a vehicle whose frontal area strikes another vehicle due to loss of control or traction (during a maneuver to avoid a collision with a third vehicle) while the vehicles are traveling on the same trafficway in opposite directions.

55 Forward Impact: Control/Traction Loss

Use **Forward Impact: Control/Traction Loss** for a vehicle that is struck by the frontal area of another vehicle due to loss of control or traction (during a maneuver to avoid a collision with a third vehicle) while the vehicles are traveling on the same trafficway in opposite directions.

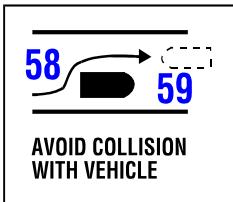

56 Forward Impact: Control/Traction Loss

Use **Forward Impact: Control/Traction Loss** for a vehicle whose frontal area strikes another vehicle due to loss of control or traction (during a maneuver to avoid a collision with *a non-fixed* object (**garbage can, person, animal, etc.**) *in the road*) while the vehicles are traveling on the same trafficway in opposite directions.

57 Forward Impact: Control/Traction Loss

Use **Forward Impact: Control/Traction Loss** for a vehicle that is struck by the frontal area of another vehicle due to loss of control or traction (during a maneuver to avoid a collision with *a non-fixed* object (**garbage can, person, animal, etc.**) *in the road*) while the vehicles are traveling on the same trafficway in opposite directions.

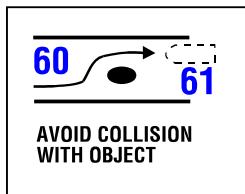

58 Forward Impact: Avoid Collision with Vehicle

Use **Forward Impact: Avoid Collision with Vehicle** for a vehicle whose frontal area strikes another vehicle while maneuvering to avoid a collision with a non-involved vehicle, when loss of control or traction was not a factor, and the vehicles were traveling on the same trafficway, in opposite directions.

59 Forward Impact: Avoid Collision with Vehicle

Use **Forward Impact: Avoid Collision with Vehicle** for a vehicle that was struck by the frontal area of another vehicle that was maneuvering to avoid collision with a non-involved vehicle, when loss of control or traction was not a factor, and the vehicles were traveling on the same trafficway, in opposite directions.

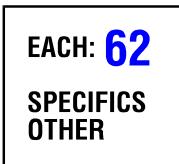

60 Forward Impact: Avoid Collision with Object

Use **Forward Impact: Avoid Collision with Object** for a vehicle that struck the front of another vehicle with the frontal plane while maneuvering to avoid collision with *a non-fixed object (garbage can, person, animal, etc.) in the road*, when loss of control or traction was not a factor, and the vehicles were traveling on the same trafficway, in opposite directions.

61 Forward Impact: Avoid Collision with Object

Use **Forward Impact: Avoid Collision with Object** for a vehicle that was struck by the frontal area of another vehicle that was maneuvering to avoid collision with *a non-fixed object (garbage can, person, animal, etc.) in the road*, when loss of control or traction was not a factor, and the vehicles were traveling on the same trafficway, in opposite directions.

62 Forward Impact: Specifics Other

Use **Forward Impact: Specifics Other** for forward impact collisions occurring while the vehicles were traveling on the same trafficway in opposite directions that cannot be described by "[54-61](#)." Enter "Specifics Other" for crashes involving a "driverless in-transport vehicle."

EACH: **63**
SPECIFICS UNKNOWN

63 Forward Impact: Specifics Unknown

Use **Forward Impact: Specifics Unknown** when the case materials indicate a forward impact collision occurred while the vehicles were traveling on the same trafficway in opposite directions, but no further classification is possible.

Configuration I. Sideswipe/Angle

The two vehicles are involved in an impact involving the side of one or both vehicles.

A diagram illustrating a lateral move collision. It shows two horizontal arrows pointing towards each other from opposite sides. The arrow on the left is labeled "64" and has a curved line above it. The arrow on the right is labeled "65". Below the arrows, the text "LATERAL MOVE" is written.

64 Sideswipe/Angle: Lateral Move (Left/Right)

Use **Sideswipe/Angle: Lateral Move (Left/Right)** identifies the vehicle that infringed upon the other vehicle (code "65") in a Category III, Configuration I collision; i.e., enter "64" for the vehicle that left its lane (moved laterally) leading to the collision.

65 Sideswipe/Angle: Lateral Move (Going Straight)

Use **Sideswipe/Angle: Lateral Move (Going Straight)** for the vehicle that was infringed upon by the other vehicle (code "64") in a Category III, Configuration I collision.

EACH: **66**
SPECIFICS OTHER

66 Sideswipe/Angle: Specifics Other

Use **Sideswipe/Angle: Specifics Other** for sideswipe/angle collisions occurring while both vehicles were traveling on the same trafficway in opposite directions that cannot be described by "64-65." Enter "Specifics Other" for crashes involving a "driverless in-transport vehicle." However, if one vehicle rotates such that the impact is front to front or front to rear, and did not result from a steering maneuver around a noninvolved vehicle or an object ([Configuration H](#)) then use code [**98 \(Other Crash Type\)**](#).

EACH: **67**
SPECIFICS UNKNOWN

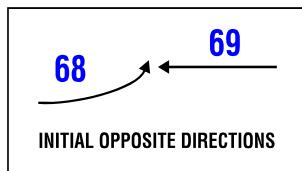

67 Sideswipe/Angle: Specifics Unknown

Use **Sideswipe/Angle: Specifics Unknown** when the case materials indicate a sideswipe/angle collision occurred while both vehicles were traveling on the same trafficway in opposite directions, but no further classification is possible.

Category IV. Changing Trafficway, Vehicle Turning

Configuration J. Turn Across Path

The two vehicles were initially on the same trafficway when one vehicle tried to turn onto another trafficway, a driveway, or parking lot and pulled in front of the other vehicle. Vehicles making a U-turn are identified in [Category VI. Miscellaneous](#).

68 Turn Across Path: Initial Opposite Directions (Left/Right)

Use **Turn Across Path: Initial Opposite Directions (Left/Right)** identifies the vehicle that turned across the path of another vehicle (**Turn Across Path: Initial Opposite Directions [Going Straight]**) in a Category IV, Configuration J collision, in which the vehicles were initially traveling in opposite directions.

69 Turn Across Path: Initial Opposite Directions (Going Straight)

Use **Turn Across Path: Initial Opposite Directions (Going Straight)** for a vehicle involved in a collision in which another vehicle (**Turn Across Path: Initial Opposite Directions [Left/Right]**) across its path, and in which the vehicles were initially traveling in opposite directions.

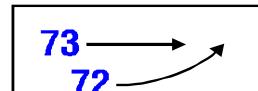

70 Turn Across Path: Initial Same Directions (Turning Right)

Use **Turn Across Path: Initial Same Directions (Turning Right)** for a vehicle that turned right, across the path of another vehicle (**Turn Across Path: Initial Same Directions [Going Straight]**), when both vehicles were initially traveling in the same direction.

71 Turn Across Path: Initial Same Directions (Going Straight)

Turn Across Path: Initial Same Directions (Going Straight) for a vehicle whose path was crossed by a vehicle turning right (**Turn Across Path: Initial Same Directions (Turning Right)**), when both vehicles were initially traveling in the same direction.

72 Turn Across Path: Initial Same Directions (Turning Left)

Use **Turn Across Path: Initial Same Directions (Turning Left)** for a vehicle that turned left, across the path of another vehicle (**Turn Across Path: Initial Same Directions [Going Straight]**), when both vehicles were initially traveling in the same direction.

73 Turn Across Path: Initial Same Directions (Going Straight)

Use **Turn Across Path: Initial Same Directions (Going Straight)** for a vehicle whose path was crossed by a vehicle turning left (**Turn Across Path: Initial Same Directions [Turning Left]**), when both vehicles were initially traveling in the same direction.

EACH: 74**SPECIFICS
OTHER****74 Turn Across Path: Specifics Other**

Use **Turn Across Path: Specifics Other** for collisions in which one vehicle turned across another's path, which cannot be described by "68-72." Enter "Specifics Other" for crashes involving a driverless in-transport vehicle.

EACH: 75**SPECIFICS
UNKNOWN****75 Turn Across Path: Specifics Unknown**

Use **Turn Across Path: Specifics Unknown** when the case materials indicate one vehicle turned across another's path, causing a collision, but no further classification is possible.

Configuration K. Turn Into Path

The two vehicles were initially on different trafficways when one attempted to turn into the same trafficway as the other vehicle. For the purposes of Crash Typing, "trafficway" as used here includes a driveway or parking lot.

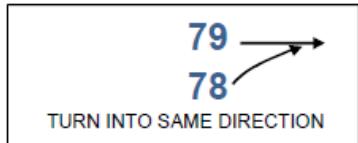

Note: The focus of this configuration is on the turning maneuver from one trafficway to another and not on the vehicles' plane of contact.

**TURN INTO SAME DIRECTION****76 Turn into Same Direction (Turning Left)**

Use **Turn into Same Direction (Turning Left)** for a vehicle that turned left, into the path of another vehicle (**Turn into Same Direction [Going Straight]**), so that both vehicles were traveling in the same direction at the time of the collision.

77 Turn into Same Direction (Going Straight)

Use **Turn into Same Direction (Going Straight)** for a vehicle involved in a collision in which another vehicle (**Turn into Same Direction [Turning Left]**) turned left, into its path, so that both vehicles were traveling in the same direction at the time of the collision.

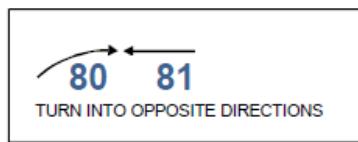

78 Turn into Same Direction (Turning Right)

Use **Turn into Same Direction (Turning Right)** for a vehicle that turned right, into the path of another vehicle (**Turn into Same Direction [Going Straight]**), so that both vehicles were traveling in the same direction at the time of the collision.

79 Turn into Same Direction (Going Straight)

Use **Turn into Same Direction (Going Straight)** for a vehicle involved in a collision in which another vehicle (**Turn into Same Direction [Turning Right]**) turned right, into its path, so that both vehicles were traveling in the same direction at the time of the collision.

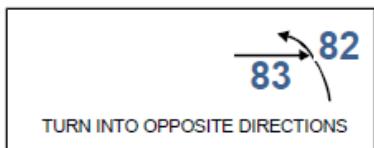

80 Turn into Opposite Directions (Turning Right)

Use **Turn into Opposite Directions (Turning Right)** for a vehicle that turned right, into the path of another vehicle (**Into Opposite Directions [Going Straight]**), so that the vehicles were traveling in opposite directions at the time of the collision.

81 Turn into Opposite Directions (Going Straight)

Use **Turn into Opposite Directions (Going Straight)** for a vehicle involved in a collision in which another vehicle (**Turn into Opposite Directions [Turning Right]**) turned right, into its path, so that the vehicles were traveling in opposite directions at the time of the collision.

82 Turn into Opposite Directions (Turning Left)

Use **Turn into Opposite Directions (Turning Left)** for a vehicle that turned left, into the path of another vehicle (**Turn into Opposite Directions [Going Straight]**), so that the vehicles were traveling in opposite directions at the time of the collision.

Turn into Opposite Directions (Turning Left) is used when the driver's vehicle was in the act of making a left turn (e.g., from a driveway, parking lot, or intersection). Do not confuse this situation with "[Configuration L - Straight Paths](#)." The driver's intended path is the prime concern.

83 Turn into Opposite Directions (Going Straight)

Use **Turn into Opposite Directions (Going Straight)** for a vehicle involved in a collision in which another vehicle (**Turn into Opposite Directions [Turning Left]**) turned left, into its path, so that the vehicles were traveling in opposite directions at the time of the collision.

EACH: **84**
SPECIFICS
OTHER

84 Turn into Path: Specifics Other

Use **Turn into Path: Specifics Other** for collisions in which one vehicle turned into another's path, which cannot be described by "76-83." Enter "Specifics Other" for crashes involving a driverless in-transport vehicle.

EACH: **85**
SPECIFICS
UNKNOWN

85 Turn into Path: Specifics Unknown

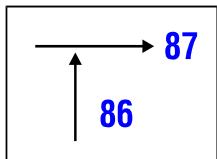

Use **Turn into Path: Specifics Unknown** when the case materials indicate one vehicle turned into another's path, causing a collision, but no further classification is possible.

Category V. Intersecting Paths

(Vehicle Damage)

Configuration L. Straight Paths

The two vehicles were proceeding (or attempting to proceed) straight ahead.

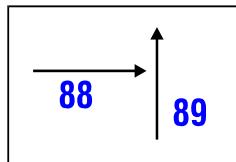

86 Straight Paths: Striking from the Right

Use **Straight Paths: Striking from the Right** for a vehicle that strikes the right side of another vehicle (code "87") from the right when both vehicles were going straight at the time of the collision, i.e., right side damage to 87, front damage to 86.

87 Straight Paths: Struck on the Right

Use **Straight Paths: Struck on the Right** for a vehicle that is struck on the right side by another vehicle (**Straight Paths: Striking from the Right**) from the right when both vehicles were going straight at the time of the collision, i.e., right side damage to 87, front damage to 86.

**88 Straight Paths: Striking from the Left**

Use **Straight Paths: Striking from the Left** for a vehicle that strikes another vehicle (**Straight Paths: Struck on the Left**) from the left when both vehicles were going straight at the time of the collision, i.e., left side damage to 89, front damage to 88.

89 Straight Paths: Struck on the Left

Use **Straight Paths: Struck on the Left** for a vehicle that is struck on the left side by another vehicle (**Straight Paths: Striking from the Left**) from the left when both vehicles were going straight at the time of the collision, i.e., left side damage to 89, front damage to 88.

EACH: **90**

SPECIFICS
OTHER

90 Straight Paths: Specifics Other

Use **Straight Paths: Specifics Other** for collisions in which two vehicles, both going straight, collide when their paths intersect, which cannot be described by "86-89." Enter "Specifics Other" for crashes involving a driverless in-transport vehicle.

EACH: **91**

SPECIFICS
UNKNOWN

91 Straight Paths: Specifics Unknown

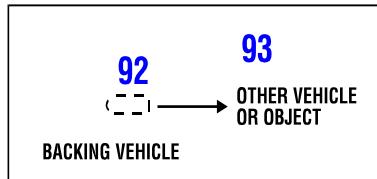

Use **Straight Paths: Specifics Unknown** when the case materials indicate two vehicles, both going straight, collided when their paths intersected, but no further classification is possible.

Category VI. Miscellaneous

Configuration M. Backing, Etc.

One of the two vehicles involved was a backing vehicle, regardless of its location on the trafficway or the damage location on the vehicles.

Any crash configuration that cannot be described in Category I. through V. is included here.

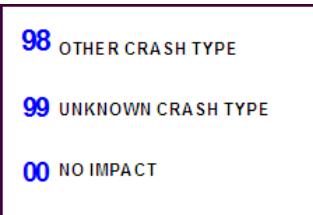

92 Backing, Etc.: Backing Vehicle

Use **Backing, Etc.: Backing Vehicle** for a backing vehicle that was involved with another vehicle, object, or non-motorist. If both vehicles were backing, then code 92 for both vehicles. If the vehicle was driverless *or unintentionally* rolling backwards, use [98 \(Other Crash Type\)](#).

93 Backing, Etc.: Other Vehicle

Use **Backing, Etc.: Other Vehicle** for the in-transport vehicle that was involved with the backing vehicle (code 92). Attribute 93 can only apply when there are two motor vehicles in-transport.

98 Other Crash Type

Other Crash Type is used for those events and collisions that do not reasonably fit any of the specified types. This code includes (but is not limited to): rollovers on the road; U-turns; crashes initiated by objects set-in-motion by an in-transport motor vehicle; third or subsequent vehicles involved in a crash; or the second involved vehicle, when the first harmful event involves a vehicle-to-object collision or a non-collision.

99 Unknown Crash Type

Use **Unknown Crash Type** when the crash category or configuration is unknown.

00 No Impact

No Impact identifies the non-collision events fire, immersion, gas inhalation, jackknife, injured in vehicle, pavement surface irregularity, other non-collision, thrown or falling object, cargo equipment loss or shift, or fell/jumped from vehicle. Rollovers on the road should be coded **98 Other Crash Type**.

The following crash types require clarification:

No impact identifies non-collision events (i.e., fire, immersion, gas inhalation, jackknife, non-collision injury, other non-collision or non-collision - no details). Rollovers on the road should be coded as [98 \(Other Crash Type\)](#).

Right roadside departure, drive off road and **Left roadside departure, drive off road** are used when the vehicle departed the road under a controlled situation (the driver was distracted, fell asleep, intentionally departed, etc.).

Right roadside departure, control/traction loss and **Left roadside departure, control/traction loss** are used if there is some evidence that the vehicle lost traction or in some other manner “got away” from the driver (i.e., the vehicle spun off the road as a result of surface conditions, oversteer phenomena, or mechanical malfunctions). If doubt exists, use **Right roadside departure, drive off road** or **Left roadside departure, drive off road** respectively.

Right roadside departure; avoid collision with vehicle, pedestrian, animal and **Left roadside departure; avoid collision with vehicle, pedestrian, animal** are used when the vehicle departed the road as a result of avoiding something in the road. “Phantom” situations are included here.

Right roadside departure, specifics other and **Left roadside departure, specifics other** are used for any other stationary or nonstationary objects if the avoidance characteristics of codes “03” or “08” are present.

Forward impact, parked vehicle, **Forward impact, stationary object**, and **Forward impact, pedestrian/animal** involves an impact with an object that can be located on either side of the road.

Forward impact, stationary object includes a hole in the road, an overhead object (e.g., overpass), or an object projecting over the road edge (e.g., support column of elevated railway).

Forward impact, pedestrian/animal is used when a pedestrian, non-motorist, or animal is involved with the first harmful event. Vehicle plane of contact is not a consideration.

Forward impact, specifics other is used for impacted (striking or struck) trains and nonstationary objects on the road.

Sideswipe/Angle, straight ahead on left, **Sideswipe/Angle, straight ahead on left/right**, **Sideswipe/Angle, changing lanes to the right**, and **Sideswipe/Angle, changing lanes to the left** identify relative vehicle positions (left versus right) and lane of travel intentions (straight ahead versus changing lanes).

From these four codes, four combinations are permitted. They are:

1. “44” and “45,”
2. “46” and “45,”
3. “45” and “47,” and
4. “46” and “47.”

When used as a combination these codes refer to a sideswipe or angle collision that involved a vehicle to the left of a vehicle to the right where:

1. neither vehicle (codes "44" and "45") intended to change its lane;
2. the vehicle on the left (code "46") was changing lanes to the right, and the vehicle on the right (code "45") was not intending to change its lane;
3. the vehicle on the left (code "45") was not intending to change its lane, and the vehicle on the right (code "47") was changing lanes to the left; and
4. the vehicle on the left (code "46") was changing lanes to the right, and the vehicle on the right (code "47") was changing lanes to the left.

In addition, when:

1. the right sides of the two vehicles impact following a 180-degree rotation of the vehicle on the right, or
2. the left sides of the two vehicles impact following a 180-degree rotation of the vehicle on the left; select the appropriate combination ("44-45," "46-45," "45-47," or "46-47") depending upon:
3. their positions (i.e., left versus right), and
4. the intended lane of travel (straight ahead versus changing lanes) of their drivers.

Sideswipe/Angle, specifics other is used if one vehicle was behind the other prior to their Category II, Configuration F collision. For example, use this code when two vehicles are on the same trafficway and going the same direction, and one loses control and is struck in the side by the front of the other vehicle. However, if one vehicle rotates such that the impact is front to front, then use code [98 \(Other crash type\)](#).

Sideswipe/Angle, lateral move (Left/Right) identifies the vehicle that infringed upon the other (code 65) in a Category III, Configuration I collision.

Codes 68 through 85 ([Turn Across Path](#) and [Turn into Path](#)) are used in Configurations J and K where the vehicle's action is the controlling factor, and the plane of contact is irrelevant.

Turn into Opposite Direction (Turning Left) is used when the driver's vehicle was in the act of making a left turn (e.g., from a driveway, parking lot, or intersection). Do not confuse this situation with [Configuration L. Straight Paths](#). The driver's intended path is the prime concern.

Codes 86 through 89 ([Straight Paths](#)) must not be confused with crash types in [Configuration K. Turn into Path](#). For these codes the vehicles are proceeding (or attempting to proceed) straight ahead, usually at a junction.

Other Crash Type is used for those events and collisions that do not reasonably fit any of the specified types. This code includes (but is not limited to): rollovers on the road, U-turns, crashes initiated by objects set-in-motion by an in-transport motor vehicle, third or subsequent vehicles involved in a crash, or the second involved vehicle when the first harmful event involved a vehicle-to-object collision.

Consistency Checks:

Check	IF	THEN
(253P)	RELATION TO TRAFFICWAY equals 03,	CRASH TYPE should equal 06-10, 98, or 99 for the in-transport vehicles involved in the FIRST HARMFUL EVENT.
(3B1P)	CRASH TYPE equals 21-23,	TRAVEL SPEED must equal 000 for this vehicle.
(3B2P)	CRASH TYPE equals 20, 24, 28, 34, 36, 38, 40, 50-54, 56, 58, or 60,	AREA OF IMPACT-INITIAL CONTACT POINT must equal 12 for this vehicle.
(3B3P)	CRASH TYPE equals 21-23, 25-27, 29-31, 35, 37, 39, or 41,	AREAS OF IMPACT-INITIAL CONTACT POINT must equal 6 for this vehicle.
(3B4P)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 10,	CRASH TYPE must not equal 44-69, 71-73, 76, 77, 79, 81-83, 86-92.
(3B5P)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 11,	CRASH TYPE must not equal 44-67, 69-71, 73, 77-81, 83, 86-92.
(3B6P)	CRASH TYPE equals 87,	AREAS OF IMPACT-INITIAL CONTACT POINT must equal 01-05, 81-83 for this vehicle.
(3B7P)	CRASH TYPE equals 89,	AREAS OF IMPACT-INITIAL CONTACT POINT must equal 07-11, 61-63 for this vehicle.
(3B8P)	CRITICAL EVENT – PRECRASH (EVENT) equals 20,	CRASH TYPE for this vehicle should equal 92.
(3BAP)	UNIT TYPE equals 1, and DRIVER PRESENCE equals 0,	CRASH TYPE must equal 00, 04, 09, 15, 32, 42, 48, 52, 62, 66, 74, 84, 90, 93, or 98.
(3BCP)	CRASH TYPE equals 34, 36, 38, 40, 54, 56, 58, or 60,	DRIVER MANEUVERED TO AVOID must not equal 00.
(3BDP)	CRASH TYPE equals 46, 47, and ATTEMPTED AVOIDANCE MANEUVER equals 01 or 99,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must not equal 01.
(3BEP)	CRASH TYPE equals 01 or 06, and ATTEMPTED AVOIDANCE MANEUVER equals 01,	PRE-IMPACT STABILITY should not equal 2-5 or 7.
(3BFP)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 08 or 09,	CRASH TYPE must not equal 46 or 47.
(3C00)	CRASH TYPE equals 68, 72, 76, or 82,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 11 or 98.
(3C10)	CRASH TYPE equals 70, 78, or 80,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 10 or 98.
(3C20)	this vehicle is involved in the FIRST HARMFUL EVENT and its CRASH TYPE equals 29-31,	this vehicle's PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 02.
(3C30)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 12,	CRASH TYPE should equal 98.
(3C40)	CRASH TYPE equals 46,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 06, 15, 16, or ATTEMPTED AVOIDANCE MANEUVER should equal 07, 09, or 12.

Check	IF	THEN
(3C50)	CRASH TYPE equals 92,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 08, 09, 13, 99.
(3C60)	CRASH TYPE equals 25-27, 29-31,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should not equal 05 or 07.
(3C70)	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 13,	CRASH TYPE should equal 92 or 98.
(3C80)	CRASH TYPE equals 47,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 06, 15, 16, or ATTEMPTED AVOIDANCE MANEUVER should equal 06, 08, or 11.
(3D00)	CRASH TYPE equals 20-49, and ATTEMPTED AVOIDANCE MANEUVER equals 00, 01,	CRITICAL EVENT – PRECRASH (EVENT) should not equal 12-14, 54, 66-68, 71-73, or 80-85.
(3D10)	CRASH TYPE equals 50-67, and ATTEMPTED AVOIDANCE MANEUVER equals 00, 01,	CRITICAL EVENT – PRECRASH (EVENT) should not equal 12-14, 51-53, 60, 61, 65, 66, 70, 71, 80-85, or 87-92.
(3D50)	PRE-IMPACT STABILITY equals 1,	CRASH TYPE should not equal 02, 07, 34, 36, 54, or 56.
(3D60)	CRASH TYPE equals 46 or 47,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should not equal 01.
(426P)	MANNER OF COLLISION equals 02,	CRASH TYPE must not equal 64-67 for the vehicles involved in the FIRST HARMFUL EVENT.
(427P)	MANNER OF COLLISION equals 06,	CRASH TYPE must not equal 20-43 or 50-53 for the vehicles involved in the FIRST HARMFUL EVENT.
(428P)	CRASH TYPE equals 20-91,	NUMBER OF VEHICLE FORMS SUBMITTED must be greater than 001.
(429P)	NUMBER OF VEHICLE FORMS SUBMITTED equals 001,	CRASH TYPE must equal 00, 01-16, 92, 98, 99.
(42BP)	there is only one vehicle involved in the FIRST HARMFUL EVENT where UNIT TYPE equals 1,	the number of vehicles where CRASH TYPE is coded 00, 1-16, 92, 93, or 99 (excluding from the vehicles being counted, those where CRASH TYPE equals 98) must not equal 0 or be greater than 1.
(77AP)	CRASH TYPE equals 14,	RELATION TO JUNCTION (b) must not equal 02.
(77BP)	CRASH TYPE equals 68-91,	RELATION TO JUNCTION (b) should not equal 01.
(77CP)	CRASH TYPE equals 14,	RELATION TO JUNCTION (b) should equal 01, 03, 19.
(9BAP)	MANNER OF COLLISION equals 07, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 10 or 11 for neither one of the vehicles involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 44-49, 98, 99 for the vehicles involved in the FIRST HARMFUL EVENT.

Check	IF	THEN
(9BCP)	MANNER OF COLLISION equals 08, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 10 or 11 for neither one of the vehicles involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 64-67, 98, 99 for the vehicles involved in the FIRST HARMFUL EVENT.
(9BDP)	MANNER OF COLLISION equals 01,	CRASH TYPE should not equal 44-49 for the vehicles involved in the FIRST HARMFUL EVENT.
(A3C0)	FIRST HARMFUL EVENT equals 02-07, 16, 44, 51, 72,	CRASH TYPE must equal 00 for the vehicle involved in the FIRST HARMFUL EVENT.
(A3D0)	FIRST HARMFUL EVENT equals 01-07, 16, 44, 51, 72,	CRASH TYPE must not equal 20-91.
(A3E0)	CRASH TYPE equals 13,	FIRST HARMFUL EVENT must equal 08, 09, 11, 15, or 49.
(A480)	CRASH TYPE equals 00,	FIRST HARMFUL EVENT must equal 02-07, 16, 44, 51, 72.
(A4A0)	CRASH TYPE equals 01-16,	FIRST HARMFUL EVENT must not equal 12.
(A4B0)	CRASH TYPE equals 01-10 or 14,	RELATION TO TRAFFICWAY must not equal 01, 02, 07, or 11. If the FIRST HARMFUL EVENT occurs on a different road than the road it departed, see 98 (Other Crash Type) .
(A4B2)	CRASH TYPE equals 11,	RELATION TO TRAFFICWAY must not equal 01, 03, 04, 05, 08, 10, 11, or 12 .
(A4B3)	CRASH TYPE equals 12 or 13,	RELATION TO TRAFFICWAY must not equal 03, 05, 08, 10, or 12 .
(A4B4)	CRASH TYPE equals 12 or 13,	RELATION TO TRAFFICWAY should not equal 4 unless the FIRST HARMFUL EVENT occurs in a bicycle lane.
(A4BP)	FIRST HARMFUL EVENT equals 54 or 55,	CRASH TYPE must equal 98 for the vehicles involved in the FIRST HARMFUL EVENT.
(A4DP)	CRASH TYPE equals 20-91,	FIRST HARMFUL EVENT must equal 12.
(A4EP)	CRASH TYPE equals 11,	FIRST HARMFUL EVENT must equal 14.
(A60F)	FIRST HARMFUL EVENT equals 14,	CRASH TYPE should equal 01-11, 14, 15, 92, 98, 99.
(A61F)	FIRST HARMFUL EVENT equals 08, 09, 11, 15, 49, and RELATION TO TRAFFICWAY equals 01, 02, 07, 11, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) is not equal to 00, 13 for the vehicle involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 13 for the vehicle involved in the FIRST HARMFUL EVENT.
(A61G)	the FIRST HARMFUL EVENT equals 08, and PERSON TYPE equals 05, and NON-MOTORIST LOCATION AT THE TIME OF CRASH equals 21, 22, 24, 25, 28, and the VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is involved in the FIRST HARMFUL EVENT,	CRASH TYPE should not equal 13 for this vehicle.

Check	IF	THEN
(A61H)	the FIRST HARMFUL EVENT equals 09, and PERSON TYPE equals 06, 07, and NON-MOTORIST LOCATION AT THE TIME OF CRASH equals 21, 22, 24, 25, 28, and the VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is involved in the FIRST HARMFUL EVENT,	CRASH TYPE should not equal 13 for this vehicle.
(A61J)	the FIRST HARMFUL EVENT equals 15, and PERSON TYPE equals 08, and NON-MOTORIST LOCATION AT THE TIME OF CRASH equals 21, 22, 24, 25, 28, and the VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is involved in the FIRST HARMFUL EVENT,	CRASH TYPE should not equal 13 for this vehicle.
(A61K)	the FIRST HARMFUL EVENT equals 49, and PERSON TYPE equals 04, and NON-MOTORIST LOCATION AT THE TIME OF CRASH equals 21, 22, 24, 25, 28, and the VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is involved in the FIRST HARMFUL EVENT,	CRASH TYPE should not equal 13 for this vehicle.
(A620)	CRASH TYPE equals 06-10, and TRAFFICWAY DESCRIPTION equals 3,	RELATION TO TRAFFICWAY should equal 03 or 12.
(A62F)	FIRST HARMFUL EVENT equals 18, 43, 73, 91, or 93, and RELATION TO TRAFFICWAY equals 01 or 11,	CRASH TYPE should equal 12 or 15 for the vehicle involved in the FIRST HARMFUL EVENT.
(A63F)	FIRST HARMFUL EVENT equals 01,	CRASH TYPE should equal 01-10, 98, 99 for the vehicle involved in the FIRST HARMFUL EVENT.
(A65F)	FIRST HARMFUL EVENT equals 14, and RELATED FACTORS - PERSON (MV OCCUPANT) LEVEL equals 32 or 89 for an occupant of the parked vehicle involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 15, 92, or 98 for the in-transport vehicle involved in the FIRST HARMFUL EVENT.
(A66F)	FIRST HARMFUL EVENT equals 14, and CRASH TYPE equals 01-10 or 14,	RELATED FACTORS - PERSON (MV OCCUPANT) LEVEL must not equal 32 or 89 for any occupant of the parked vehicle involved in the FIRST HARMFUL EVENT.
(AZ2P)	FIRST HARMFUL EVENT does not equal 02-07, 16, 44, 51, 72, and CRITICAL EVENT-PRECRASH (EVENT) equals 14, and ATTEMPTED AVOIDANCE MANEUVER equals 01,	CRASH TYPE must equal 14 for the vehicle involved in the FIRST HARMFUL EVENT.
(B13P)	CRASH TYPE equals 20-49, and ATTEMPTED AVOIDANCE MANEUVER equals 00-01,	CRITICAL EVENT-PRECRASH (EVENT) should not equal 12-14, 54, 66-68, 71-73, or 80-85.
(B15P)	CRITICAL EVENT-PRECRASH (EVENT) equals 91, and ATTEMPTED AVOIDANCE MANEUVER equals 00, 01, and the vehicle is involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 15.

Check	IF	THEN
(B16P)	CRITICAL EVENT-PRECRASH (EVENT) equals 90, and ATTEMPTED AVOIDANCE MANEUVER equals 01, and the vehicle is involved in the FIRST HARMFUL EVENT,	CRASH TYPE should equal 12 or 15.
(BZ80)	MANNER OF COLLISION equals 00,	CRASH TYPE must equal 00, 01-16, 92, 98, 99 for the vehicle in the FIRST HARMFUL EVENT.
(BZ90)	CRASH TYPE equals 01-05, and PRE-IMPACT LOCATION is not equal to 0 or 5,	at least one SEQUENCE OF EVENTS prior to the FIRST HARMFUL EVENT must equal 63.
(BZ91)	CRASH TYPE equals 06-10, and PRE-IMPACT LOCATION is not equal to 0 or 5,	at least one SEQUENCE OF EVENTS prior to the FIRST HARMFUL EVENT must equal 64.
(FA1F)	CRASH TYPE for all in-transport vehicles not involved in the FIRST HARMFUL EVENT must equal 98.	--
(FP2F)	UNIT TYPE equals 1, and CRASH TYPE equals blank, case status is flawed.	--
(V533)	CRASH TYPE equals 03, 08, 38, 40, 58, or 60,	ATTEMPTED AVOIDANCE MANEUVER must not equal 00 or 01.
(V700)	ROLLOVER equals 2,	CRASH TYPE should equal 01-10, 14, 98, or 99 for this vehicle.
(V79P)	ROLLOVER equals 2, and FIRST HARMFUL EVENT equals 01,	CRASH TYPE must equal 01-10, 14, 15, or 98 for the vehicle involved in the FIRST HARMFUL EVENT.

P3 - Vehicle Number – Person Level (Motor Vehicle Occupant)

FORMAT: 3 numeric

SAS NAME: Vehicle.VEH_NO; Person.VEH_NO; Parkwork.VEH_NO

ELEMENT VALUES:

- 001-999

Definition: This element identifies the vehicle number associated with this motor vehicle occupant.

Remarks: 001-999 is used for motor vehicle occupants (In-Transport, Parked/Stopped Off Roadway/ Working Motor Vehicles, and Motor Vehicles in Motion Outside the Trafficway).

Persons ejected or who fall from a motor vehicle in-transport are still considered occupants of that vehicle for the duration of the unstabilized situation.

Consistency Check:

Check	IF	THEN
(CS15)	VEHICLE NUMBER at the Person Level is greater than 000,	VEHICLE NUMBER at the Person Level must equal a VEHICLE NUMBER at the Vehicle Level.

P4/NM3 - Person Number

FORMAT: 3 numeric

SAS NAME: Person.PER_NO

ELEMENT VALUES:

Codes	Attributes
001-999	Assigned Number/ Computer Assigned

Definition: This element identifies a number for the motor vehicle occupant in consecutive order for the vehicle they occupied.

Remarks: Person Number is assigned using the police crash report's person number.

Person Level (Motor Vehicle Occupant) must be numbered consecutively beginning with 001 for each motor vehicle occupant. Drivers do not have to be 001. Numbers must not be skipped.

Person Level (Not a Motor Vehicle Occupant) must be numbered consecutively beginning with 001 for persons not in motor vehicles. Numbers must not be skipped.

Consistency Check:

Check	Language
(CSI6)	For each VEHICLE NUMBER, PERSON NUMBERS must be consecutive, beginning with 001 and with no gaps.

P5/NM5 - Age

FORMAT: 3 numeric

SAS NAME: Person.Age

ELEMENT VALUES:

Codes	Attributes
000	Less than One Year
001-120	Actual Age*
998	Not Reported
999	Reported as Unknown

Definition: This element identifies the person's age in years with respect to the person's last birthday.

Remarks: If the case materials do not show the age of injured or uninjured drivers or passengers and there is no other information about age, e.g., in the narrative/diagram, then use **998 (Not Reported)**.

998 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **998 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

999 (Reported as Unknown) is used if the investigating officer indicates that this occupant's age is unknown.

* Values greater than "094" are unlikely occurrences, and they will raise an error flag.

* Values greater than "120" are not permitted.

FARS SPECIAL INSTRUCTION:

For drivers, verify age with data on Licensing File. Licensing data takes precedence over crash report data.

Consistency Checks:

Check	IF	THEN
(7POF)	PERSON TYPE equals 01,	AGE must not be less than 002.
(8POP)	PERSON TYPE equals 01, and AGE is less than 008,	BODY TYPE must not equal 01-17, 19-22, 28-34, 39-42, 45, 48-52, 55, 58-67, 71, 72, 78-83, 89, 92, 93.
(P010)	PERSON TYPE equals 01,	AGE should not be less than 012.
(P020)	PERSON TYPE equals 02, 03, 09, and RESTRAINT SYSTEM/HELMET USE equals 04, 10-12,	AGE should be less than 010, or equal to 998 or 999.
(U120)	UNLIKELY: AGE should not be greater than 094, unless equal to 998, 999.	--

Check	IF	THEN
(U360)	UNLIKELY: AGE equals 999 and HIT AND RUN is not equal to 1.	--

Consistency Check (FARS Only):

Check	IF	THEN
(5W0P)	RELATED FACTORS-PERSON LEVEL equals 18,	SEX must equal 2, and AGE must be greater than 012.
(9LOF)	PERSON TYPE equals 01, and RELATED FACTORS-DRIVER LEVEL equals 12,	SEX must equal 2, and AGE must be greater than 012.
(D060)	NON-CDL LICENSE STATUS equals 1-4, 6, or COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 1-8, and PERSON TYPE equals 01,	AGE should not be less than 015.
(D620)	NON-CDL LICENSE TYPE equals 7,	AGE (for the driver) should equal 014-016.
(D630)	NON-CDL LICENSE TYPE equals 2,	AGE (for the driver) should equal 015-017.
(D640)	AGE equals 014-017, and PERSON TYPE equals 01,	NON-CDL LICENSE TYPE should equal 2, 7.
(D650)	AGE equals 018-120, and PERSON TYPE equals 01,	NON-CDL LICENSE TYPE should equal 1.
(P1A0)	AGE is less than 012, and INJURY SEVERITY equals 4,	FATAL INJURY AT WORK should equal 0.

P6/NM6 - Sex

FORMAT: 1 numeric

SAS NAME: Person.Sex

ELEMENT VALUES:

Codes	Attributes
1	Male
2	Female
8	Not Reported
9	Reported as Unknown

Definition: This element identifies the sex of the person involved in the crash.

Remarks: If the case materials do not show the sex of injured or uninjured drivers or passengers and there is no other information about sex, e.g., in the narrative/diagram, then use **8 (Not Reported)**.

8 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **8 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

9 (Reported as Unknown) is used if the investigating officer indicates that this occupant's sex is unknown.

Consistency Checks:

Check	IF	THEN
(U340)	UNLIKELY: HIT-AND-RUN equals 0 or 9, and SEX equals 9.	--

Consistency Checks (FARS Only):

Check	IF	THEN
(5WOP)	RELATED FACTORS-PERSON LEVEL equals 18,	SEX must equal 2, and AGE must be greater than 012.
(9LOF)	PERSON TYPE equals 01, and RELATED FACTORS-DRIVER LEVEL equals 12,	SEX must equal 2, and AGE must be greater than 012.

P7 - Person Type

FORMAT: 2 numeric

SAS NAME: Person.PER_TYP

ELEMENT VALUES:

Codes	Attributes
01	Driver of a Motor Vehicle In-Transport
02	Passenger of a Motor Vehicle In-Transport
03	Occupant of a Motor Vehicle Not In-Transport
09	Unknown Occupant Type in a Motor Vehicle In-Transport

Definition: This element describes the role of this person involved in the crash.

Remarks: An involved person in a crash must maintain Person Type during the crash. Once the unstabilized situation begins, a driver, passenger, or non-motorist/non-occupant cannot change Person Type until the situation stabilizes.

If a person is entering or exiting a vehicle before the unstabilized situation begins, try to determine if the person has successfully changed type before control is lost. (a pedestrian getting into an automobile that begins to move, a passenger stepping off of a bus as it begins to pull away, etc.).

Attributes 01, 02, and 09 are used for occupants of a motor vehicle in-transport. This includes occupants of motor vehicles that are in motion outside the trafficway.

01 (Driver of a Motor Vehicle In-Transport) is used for a person who is in actual physical control of a motor vehicle or in the case of an out of control vehicle the person that was in control just prior to the unstabilized situation.

In FARS and CRSS, persons less than 12 years of age will raise an edit check. Persons less than 8 years of age are forbidden from operating motor vehicles except for **V11 Body Types 88, 90, 91**. In these circumstances the vehicles are classified as [0 \(no Driver Present/Not Applicable\)](#) in the element [D4 Driver Presence](#) and any underage occupant seated in the driver's position on the crash report is coded as [Person Type 2 \(Passenger of a Motor Vehicle In-Transport\)](#) with [P9 Seating Position](#) value [11 \(Front Seat, Left Side\)](#). Persons who are less than 2 years of age are forbidden in FARS/CRSS from being a driver of any motor vehicle.

02 (Passenger of a Motor Vehicle In-Transport) is used for any occupant of a motor vehicle in transport other than the driver.

03 (Occupant of a Motor Vehicle Not In-Transport) is used for any occupant of a motor vehicle not in transport including someone sitting in the driver's seat position.

09 (Unknown Occupant Type in a Motor Vehicle In-Transport) is used when it cannot be determined if the person was the driver or passenger, but it is known that the person was an occupant of a motor vehicle in-transport.

Consistency Checks:

Check	IF	THEN
(1Q0F)	PERSON TYPE equals 01, and BODY TYPE equals 80-84, 88, 89,	SEATING POSITION must not equal 12-55, 99.
(2M0F)	PERSON TYPE equals 01,	SEATING POSITION must not equal 21-55.
(2Q0F)	PERSON TYPE equals 02, 03, 09, and BODY TYPE equals 01, 02, 04, 08, 10, 17, 33-34, 39-41, 45, 48, 90, 91,	SEATING POSITION must not equal 31-50.
(3H0F)	DRIVER PRESENCE equals 1,	there must be one and only one Person Level form for that vehicle with PERSON TYPE equal to 01, or there must be no Person Level form for that vehicle with PERSON TYPE equal to 01 and at least two Person Level forms for that vehicle with PERSON TYPE equal to 09.
(3M0F)	PERSON TYPE equals 01,	RESTRAINT SYSTEM/HELMET USE must not equal 04, 10-12.
(3P0F)	PERSON TYPE equals 03-08, 10, 19	INJURY SEVERITY should not equal 6.
(3Q0F)	PERSON TYPE equals 02, 03, 09, and BODY TYPE equals 01-17, 19, 20, 22, 28-34, 39, 41, 42, 50-52, 55, 58, 59, 65, 80-97,	SEATING POSITION must not equal 50.
(4H0F)	DRIVER PRESENCE equals 0, 9,	there must not be a Person Level form for that vehicle with PERSON TYPE equal to 01.
(4Q0F)	PERSON TYPE equals 02, 03, 09, and BODY TYPE equals 80-84, 88, 89,	SEATING POSITION must not equal 12, 14-19, 22-50.
(4Q1F)	PERSON TYPE equals 02, 03, and BODY TYPE equals 21,	SEATING POSITION must not equal 50, 52.
(570F)	FIRST HARMFUL EVENT equals 05, 06,	at least one PERSON TYPE equal to 01-03, 09 must have INJURY SEVERITY equal to 1-5 or blank.
(5M0F)	PERSON TYPE equals 01,	all RELATED FACTORS-PERSON LEVEL must equal 00.
(5M0G)	SPECIAL USE equals 06, and PERSON TYPE equals 02 or 09,	RELATED FACTORS - PERSON (MV OCCUPANT) LEVEL should equal 86 or 92.
(5M0H)	PERSON TYPE equals 1,	RELATED FACTORS – PERSON (MV OCCUPANT) LEVEL must equal 0.
(5N0F)	PERSON TYPE equals 02,	RELATED FACTORS-PERSON LEVEL (MV Occupant) must not equal 21, 26, 28, 29, 33, 37, 40-42, 44, 45, 47, 51-53, 57-70, 72-78, 80-83, 91.
(5Q0F)	PERSON TYPE equals 02, and BODY TYPE equals 50-52, 55, 58, 59,	SEATING POSITION must not equal 11, 21-50, 98, 99.
(5Z0F)	SEQUENCE OF EVENTS equals 08,	at least one person must have PERSON TYPE equal to 05, 10.
(6Q0F)	PERSON TYPE equals 02, 03, 09, and BODY TYPE equals 60-67, 71, 72, 78, 79,	SEATING POSITION must not equal 31-49.

Check	IF	THEN
(7M0F)	PERSON TYPE equals 03,	RELATED FACTORS-PERSON LEVEL (MV Occupant) must not equal 21, 26, 28, 29, 33, 37, 40-42, 44, 45, 47, 51, 52, 57-70, 72-78, 80-83, 91.
(7P0F)	PERSON TYPE equals 01,	AGE must not be less than 002.
(7Q0F)	PERSON TYPE equals 09, and BODY TYPE equals 50-52, 55, 58, 59,	SEATING POSITION must not equal 12-50, 52-54.
(7Z0F)	any SEQUENCE OF EVENTS equals 05, 06,	at least one occupant of this vehicle (PERSON TYPES 01, 02, 09) must have INJURY SEVERITY equal to 1-5, or blank.
(8P0P)	PERSON TYPE equals 01, and AGE is less than 008,	BODY TYPE must not equal 01-17, 19-22, 28-34, 39-42, 45, 48-52, 55, 58-67, 71, 72, 78-83, 89, 92, 93.
(9A5P)	PERSON TYPE equals 03,	UNIT TYPE must equal 2-4.
(9B7P)	UNIT TYPE equals 2-4,	PERSON TYPE of all occupants of this vehicle must equal 03.
(CLOP)	PERSON TYPE equals 09,	RELATED FACTORS-PERSON LEVEL (MV Occupant) must not equal 21, 26, 28, 29, 33, 37, 40-42, 44, 45, 47, 51, 52, 56-70, 72-78, 80-83, 91.
(D090)	VIOLATIONS CHARGED equals 11-19, and PERSON TYPE equals 01, 03,	POLICE REPORTED ALCOHOL INVOLVEMENT should equal 1, or POLICE REPORTED DRUG INVOLVEMENT should equal 1.
(FP0F)	PERSON TYPE is blank; case status is flawed.	--
(P010)	PERSON TYPE equals 01,	AGE should not be less than 012.
(P01F)	PERSON TYPE equals 01-03, 09, and RESTRAINT SYSTEM/HELMET USE equals 01-04, 08, 10-12, and BODY TYPE does not equal 80-89,	EJECTION should equal 0 or 7.
(P020)	PERSON TYPE equals 02, 03, 09, and RESTRAINT SYSTEM/HELMET USE equals 04, 10-12,	AGE should be less than 010, or equal to 998 or 999.
(P030)	PERSON TYPE equals 01,	SEATING POSITION should not equal 12-19.

(P075)	PERSON TYPE equals 02, 04-08, 10 or 19, and INJURY SEVERITY does not equal 4,	DRUG TEST STATUS must not equal 8, any DRUG SPECIMEN must not equal 96 , and any DRUG TEST RESULTS must not equal 9995 .
(P130)	BODY TYPE equals 60-67, 71, 72, 78, 79, and PERSON TYPE equals 01, 03, and INJURY SEVERITY equals 4,	FATAL INJURY AT WORK should equal 1.

P8/NM8 - Injury Severity

FORMAT: 1 numeric

SAS NAME: Person.Inj_Sev

ELEMENT VALUES:

Codes	Attributes
0	No Apparent Injury (O)
1	Possible Injury (C)
2	Suspected Minor Injury (B)
3	Suspected Serious Injury (A)
4	Fatal Injury (K)
5	Injured, Severity Unknown
6	Died Prior to Crash*
9	Unknown/Not Reported

Definition: This element describes the severity of the injury to this person in the crash.

Remarks: Enter the most severe police reported injury severity for this person (i.e., occupant, pedestrian or non-motorist). Most jurisdictions use the KABCO injury coding scheme.

K = Fatal Injury (Killed)

A = Suspected Serious Injury (Incapacitating Injury)

B = Suspected Minor Injury (Non-incapacitating Injury)

C = Possible Injury

O = No Apparent Injury (No Injury)

If there are discrepancies between the injury severity reported in the police report fields and the narrative, use the following guidance.

Report Field	Narrative	Guidance
Contains Coded Response	No Conflict with Coded Report Field	USE CODED REPORT FIELD
Not Coded	Silent on injuries	INJURY SEVERITY, 9 (Unknown/Not Reported)
Contains Coded Response	Silent on injuries	USE CODED REPORT FIELD
Contains Coded Response	Includes clear descriptions of injuries more severe than Coded Response	USE NARRATIVE
Not Coded	Includes some injury information. Unknown if information is complete.	USE NARRATIVE
Contains Coded Response	Includes clear descriptions only of injuries less severe than Coded Response. Unknown if information is complete.	USE CODED REPORT FIELD

0 (No Apparent Injury) is a situation where there is no reason to believe that the person received any bodily harm from the motor vehicle crash. There is no physical evidence of injury and the person does not report any change in normal function.

1 (Possible Injury) is any injury reported or claimed that is not a fatal injury, suspected serious injury, or suspected minor injury. Examples include momentary loss of consciousness, possible concussion, claim of injury limping, complaint of pain, or nausea. Possible injuries are those that are reported by the person or are indicated by his/her behavior, but no wounds or injuries are readily evident.

2 (Suspected Minor Injury) is any injury that is evident at the scene of the crash, other than fatal or serious injuries. Examples include lump on the head, abrasions, bruises, minor lacerations (cuts on the skin surface with minimal bleeding and no exposure of deeper tissue/muscle). This does not include momentary unconsciousness. (See [1 \(Possible Injury\)](#)).

3 (Suspected Serious Injury) is any injury other than fatal that results in one or more of the following:

- Severe laceration resulting in exposure of underlying tissues/muscle/organs or resulting in significant loss of blood
- Broken or distorted extremity (arm or leg)
- Crush injuries
- Suspected skull, chest, or abdominal injury other than bruises or minor lacerations
- Significant burns (second and third degree burns over 10% or more of the body)
- Unconsciousness when taken from the crash scene
- Paralysis

This does not include limping (the injury cannot be seen). (See [1 \(Possible Injury\)](#)).

4 (Fatal Injury) A fatal injury is any injury that results in death within 30 days after the motor vehicle crash in which the injury occurred. If the person did not die at the scene but died within 30 days of the motor vehicle crash in which the injury occurred, the injury classification should be changed from the attribute previously assigned to the attribute **4 (Fatal Injury)**.

5 (Injured, Severity Unknown) It is known the person was injured but the severity of the injury is not known.

6 (Died Prior to Crash)* refers to non-motor vehicle fatalities (e.g., a heart attack victim, a homicide victim, a suicide, or person involved in a legal intervention) that are involved in a motor vehicle traffic crash.

This attribute is used only if the police explicitly states the person died prior to the crash and the police report indicates the person died as a result of natural causes (e.g., heart attack), disease, drug overdose or alcohol poisoning, suicide, homicide, and legal intervention.

This attribute also applies if the police report indicates that the person died as a result of natural causes (e.g., heart attack) or disease but is silent about the time of on-set or if on-set is the result of injuries sustained in the crash.

In suicide incidents, use the following criteria:

1. If the only fatality is the suicide victim and it can be ascertained that the crash was a suicide, do not code the case.
2. If other fatalities occur, code the case as appropriate. The suicide victim's Injury Severity should be coded **6 (Died Prior to Crash)** if the death occurred at the time of the crash (or prior) or [**0 \(No Apparent Injury\)**](#) if the death occurred after the crash.

This attribute does not apply if the police report specifically states that the cause of death is a result of crash-related injury or that on-set occurred after the crash.

* This value is an unlikely occurrence and will raise an edit flag.

9 (Unknown/Not Reported) is used when:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials); or
2. a field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials); or
3. police indicate unknown.

Note: If a State's crash report manual instructs to leave data blocks blank when there is no injury, then a blank in those data blocks are NOT considered **9 (Unknown/Not Reported)**.

FARS SPECIAL INSTRUCTION:

Each case must have at least one Person Level form with Injury Severity attribute [4 \(Fatal injury\)](#). See Definition: [ANSI D16.1](#); 2.3.1 and 2.3.2

Consistency Checks:

Check	IF	THEN
(1ROP)	SEATING POSITION equals 51, and BODY TYPE equals 50-52, 55, 58, 59,	INJURY SEVERITY must not equal 0, 9.
(2U3F)	INJURY SEVERITY equals 3,	TRANSPORTED TO FIRST MEDICAL FACILITY BY should not equal 0.
(3POF)	PERSON TYPE equals 03-08, 10, 19,	INJURY SEVERITY should not equal 6.
(570F)	FIRST HARMFUL EVENT equals 05, 06,	at least one PERSON TYPE equal to 01-03, 09 must have INJURY SEVERITY equal to 1-5, or blank.
(7ZOF)	any SEQUENCE OF EVENTS equals 05, 06,	at least one occupant of this vehicle (PERSON TYPES 01, 02, 09) must have INJURY SEVERITY equal to 1-5, or blank.
(FP8F)	INJURY SEVERITY is blank; case status is flawed.	--
(P071)	PERSON TYPE equals 02, 04-08, 10, and INJURY SEVERITY does not equal 4,	ALCOHOL TEST STATUS should not equal 9, ALCOHOL TEST TYPE should not equal 99, and ALCOHOL TEST RESULT should not equal 999.
(P072)	PERSON TYPE equals 02, 03, and INJURY SEVERITY equals 0, and ALCOHOL TEST RESULT equals 996,	POLICE REPORTED ALCOHOL INVOLVEMENT should equal 0, 8.
(P074)	PERSON TYPE equals 02, 04-08, 10, and INJURY SEVERITY does not equal 4,	ALCOHOL TEST STATUS must not equal 8, ALCOHOL TEST TYPE must not equal 95, and ALCOHOL TEST RESULT must not equal 995.
(P090)	INJURY SEVERITY equals 0,	TRANSPORTED TO FIRST MEDICAL FACILITY BY must equal 0.
(P300)	POLICE REPORTED ALCOHOL INVOLVEMENT equals 1, and INJURY SEVERITY equals 4,	ALCOHOL TEST STATUS should not equal 0.
(U160)	UNLIKELY: INJURY SEVERITY equals 6.	--
(U350)	UNLIKELY: INJURY SEVERITY equals 1-6, and SEATING POSITION equals 98.	--

Consistency Checks (FARS Only):

Check	IF	THEN
(1R1P)	If DIED AT SCENE/EN ROUTE equals 7, 8,	INJURY SEVERITY must equal 4.
(1U1F)	INJURY SEVERITY equals 4,	DEATH DATE must not equal 88888888.
(1U2F)	INJURY SEVERITY equals 4,	DEATH TIME must not equal 8888.
(2U1F)	INJURY SEVERITY is not equal to 4,	DEATH DATE must equal 88888888.
(2U2F)	INJURY SEVERITY is not equal to 4,	DEATH TIME must equal 8888.
(4V1F)	INJURY SEVERITY equals 4,	DEATH DATE and DEATH TIME for this person must be within 720 hours of the CRASH DATE and CRASH TIME.
(4U0F)	Each original submission must have at least one Person Level form with INJURY SEVERITY coded 4.	--
(7EOP)	INJURY SEVERITY equals 4,	DEATH CERTIFICATE NUMBER must NOT equal 0000-00-000000.
(7E1P)	INJURY SEVERITY equals 4,	RACE must not equal 00.
(7E2P)	INJURY SEVERITY equals 4,	HISPANIC ORIGIN must not equal 00.
(7E3P)	INJURY SEVERITY is not equal to 4,	RACE must equal 00 AND HISPANIC ORIGIN must equal 00.
(7F0P)	DEATH CERTIFICATE NUMBER is not blank or 0000-00-000000,	INJURY SEVERITY must equal 4.
(7F1P)	RACE equals 00,	INJURY SEVERITY must not equal 4.
(7F2P)	HISPANIC ORIGIN equals 00,	INJURY SEVERITY must not equal 4.
(7F3P)	RACE is not equal to 00, and HISPANIC ORIGIN is not equal to 00,	INJURY SEVERITY must equal 4.
(7M1F)	PERSON TYPE equals 03, and SEATING POSITION is not equal to 11 or 13, and INJURY SEVERITY does not equal 4,	DRUG TEST STATUS must not equal 8, any DRUG SPECIMEN must not equal 96 , and any DRUG TEST RESULTS must not equal 9995 .
(7ROP)	FATAL INJURY AT WORK equals 0, 1, 9,	INJURY SEVERITY must equal 4.
(7WOP)	FATAL INJURY AT WORK equals 8,	INJURY SEVERITY must not equal 4.
(P073)	PERSON TYPE equals 02, 04-08, 10, and INJURY SEVERITY does not equal 4,	DRUG TEST STATUS should not equal 9, and any DRUG SPECIMEN should not equal 99 , and any DRUG TEST RESULTS should not equal 9999 .
(P075)	PERSON TYPE equals 02, 04-08, 10 or 19, and INJURY SEVERITY does not equal 4,	DRUG TEST STATUS must not equal 8, any DRUG SPECIMEN must not equal 96 , and any DRUG TEST RESULTS must not equal 9995 .
(P130)	BODY TYPE equals 60-67, 71, 72, 78, 79, and PERSON TYPE equals 01, 03, and INJURY SEVERITY equals 4,	FATAL INJURY AT WORK should equal 1.
(P1A0)	AGE is less than 012, and INJURY SEVERITY equals 4,	FATAL INJURY AT WORK should equal 0.
(P53P)	INJURY SEVERITY equals 0-3, 5, 6,	DIED AT SCENE/EN ROUTE must equal 0.

99	Reported as Unknown

Definition: This element identifies the location of this person in or on the vehicle.

Remarks: Seating Position is determined by the location of the occupant in relation to the seat row and the forward longitudinal axis of the vehicle. (See [Figure 25](#))

More than one person may be assigned the same seating position; however, this is allowed only when a person is sitting on someone's lap (e.g., child on mother's lap). See Remarks under [Any Indication of Mis-Use of Restraint System/Helmet Use](#) and [Driver Level - Related Factors](#) for situations where the case materials identify improper usage of seating or restraints (e.g., two people sharing the same restraint, two people sitting abreast in the same seat, or on one another's lap, etc.).

If the case materials do not specifically state that one person was on the lap of another, then see the discussion and tables below to address these situations.

In seating rows designated for only two passengers, use **11 (Front Seat, Left Side)**, **13 (Front Seat, Right Side)**, **21 (Second Seat, Left Side)**, **23 (Second Seat, Right Side)**, **31 (Third Seat, Left Side)**, **33 (Third Seat, Right Side)**, **41 (Fourth Seat, Left Side)**, **43 (Fourth Seat, Right Side)**, or **51 (Other Passenger in enclosed passenger or cargo area)**.

11 (Front Seat, Left Side) is typically thought of as the driver seating position. This is also used for an assumed driver of a hit-and-run vehicle unless evidence indicates a different position for the person or persons. [Note: For motorcycle occupants, see passage below.](#)

18 (Front Seat, Other), **28 (Second Seat, Other)**, **38 (Third Seat, Other)**, and **48 (Fourth Seat, Other)** are used to record the position of someone sitting on the floor or lying across the seat. In addition, enter these attributes when two or more persons are sitting abreast of one another in the same seating location (as opposed to on or in someone's lap), since only one occupant can be assigned the seat's position. These attributes are also used if there is only one seat in the seating row (e.g., bucket, pedestal, etc.), and the occupant was in the area but not in the seat. This situation could occur because of vehicle design or seat removal.

19 (Front Seat, Unknown), **29 (Second Seat, Unknown)**, **39 (Third Seat, Unknown)**, and **49 (Fourth Seat, Unknown)** are used to record the position of someone when the seating row is known; but, the seat position is not known and **18 (Front Seat, Other)**, **28 (Second Seat, Other)**, **38 (Third Seat, Other)**, and **48 (Fourth Seat, Other)** do not apply. The tables below provide coding guidance for situations when more than one person is reported as occupying the same seat position. Note that if the report identifies that one person is sitting in another's lap (e.g., child on mother's lap) both occupants may be assigned the same seat position.

Multiple People in Front Left (Driver's Seat)

Situation: You know who is the driver; however, it is unknown if other person is seated side-by-side with driver or on the driver's lap:

Person	Seating Position
The Driver	Front, Left (11)
Other Person	Front, Unknown (19)

Situation: You don't know who is the driver and it is unknown if side-by-side or on another's lap:

Person	Seating Position
Unknown	Front, Unknown (19)
Unknown	Front, Unknown (19)

Multiple People in Other Seats

Situation: If you know one is in another's lap – Both get same Seating Position.

Situation: If you don't know if they are sitting side-by-side or in another's lap – Both get that row, unknown.

Situation: If you know they are sitting side-by-side and only one had a restraint:

Person	Seating Position
Person with restraint	As indicated
Other Person	That row, other

Situation: If you know they are sitting side-by-side and both had restraints:

Person	Seating Position
Oldest Person	As indicated
Other Person	That row, other

Situation: If you know they are sitting side-by-side and neither had restraints:

Person	Seating Position
Oldest Person	As indicated
Other Person	That row, other

50 (Sleeper Section of Cab [Truck]) is used if the occupant's vehicle is a medium or heavy truck and has a cab sleeper, and this occupant is in the sleeper section at the time of the crash.

51 (Other Passenger in Enclosed Passenger or Cargo Area) is used when an occupant is in the fifth or higher numbered seat row, in an enclosed area where no defined seating exists or using a fold-down type seat in its folded-down position. This attribute is also used for bus passengers in undetermined seating (not driver) and for bus occupants that fall from an open door.

Note: Persons in treatment compartment of an ambulance, code as **51 (Other Passenger in Enclosed Passenger or Cargo Area)**. (See examples under Related Factors - Person (MV Occupant) Level attribute [92 \(Person in Ambulance Treatment Compartment\)](#).)

52 (Other Passenger in Unenclosed Passenger or Cargo Area) is used when an occupant is in the fifth or higher numbered seat row, in an unenclosed area where no defined seating exists or using a fold-down type seat in its folded-down position. Examples include passenger riding in an open pickup bed, top of open double-decker bus, etc.

If seating in the vehicle is longitudinal rather than lateral, use the basic idea of a vehicle interior being divided laterally into roughly equal thirds and visualize lateral rows of seats to determine what seat position is the best descriptor.

For rearward facing seats, use the basic idea described in the previous paragraph to describe the occupant's seat position.

If a seat row has more than three designated seat positions, the occupants should have their positions assigned as usual for the left and right positions, while the two center positions would be entered as Other [i.e., **18 (Front Seat, Other)**, **28 (Second Seat, Other)**, **38 (Third Seat, Other)**, **48 (Fourth Seat, Other)**, or **51 (Other Passenger in Enclosed Passenger or Cargo Area)**] depending upon the seat row.

Guidance for Body Type 80-90

For **BODY TYPE 80-90** (e.g., Motorcycles, ATV/ATC) enter the driver as **11 (Front Seat, Left Side)**; sidecar passengers as **13 (Front Seat, Right Side)**; any seated passengers behind the driver as **21 (Second Seat, Left Side)**, and a passenger on the lap of the driver (in front of) as **11 (Front Seat, Left Side)**. **55 (Riding on Exterior of Vehicle)** is applicable to a motorcycle or ATC occupant riding on the fenders or handlebars.

54 (Trailing Unit) is used when an occupant is in or on a trailing unit (i.e., [Vehicle Trailing](#), for this occupant's vehicle must be coded ≥ 1 , one or more trailing units).

55 (Riding on Exterior of Vehicle) is used when an occupant is riding on a fender, the boot of a convertible, etc.

If the case materials do not show the seating row of a passenger and there is no other information about seating position, (e.g., in the narrative/diagram), then use **98 (Not Reported)**.

98 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown) is used if the investigating officer indicates that this occupant's seating position is unknown.

Consistency Checks:

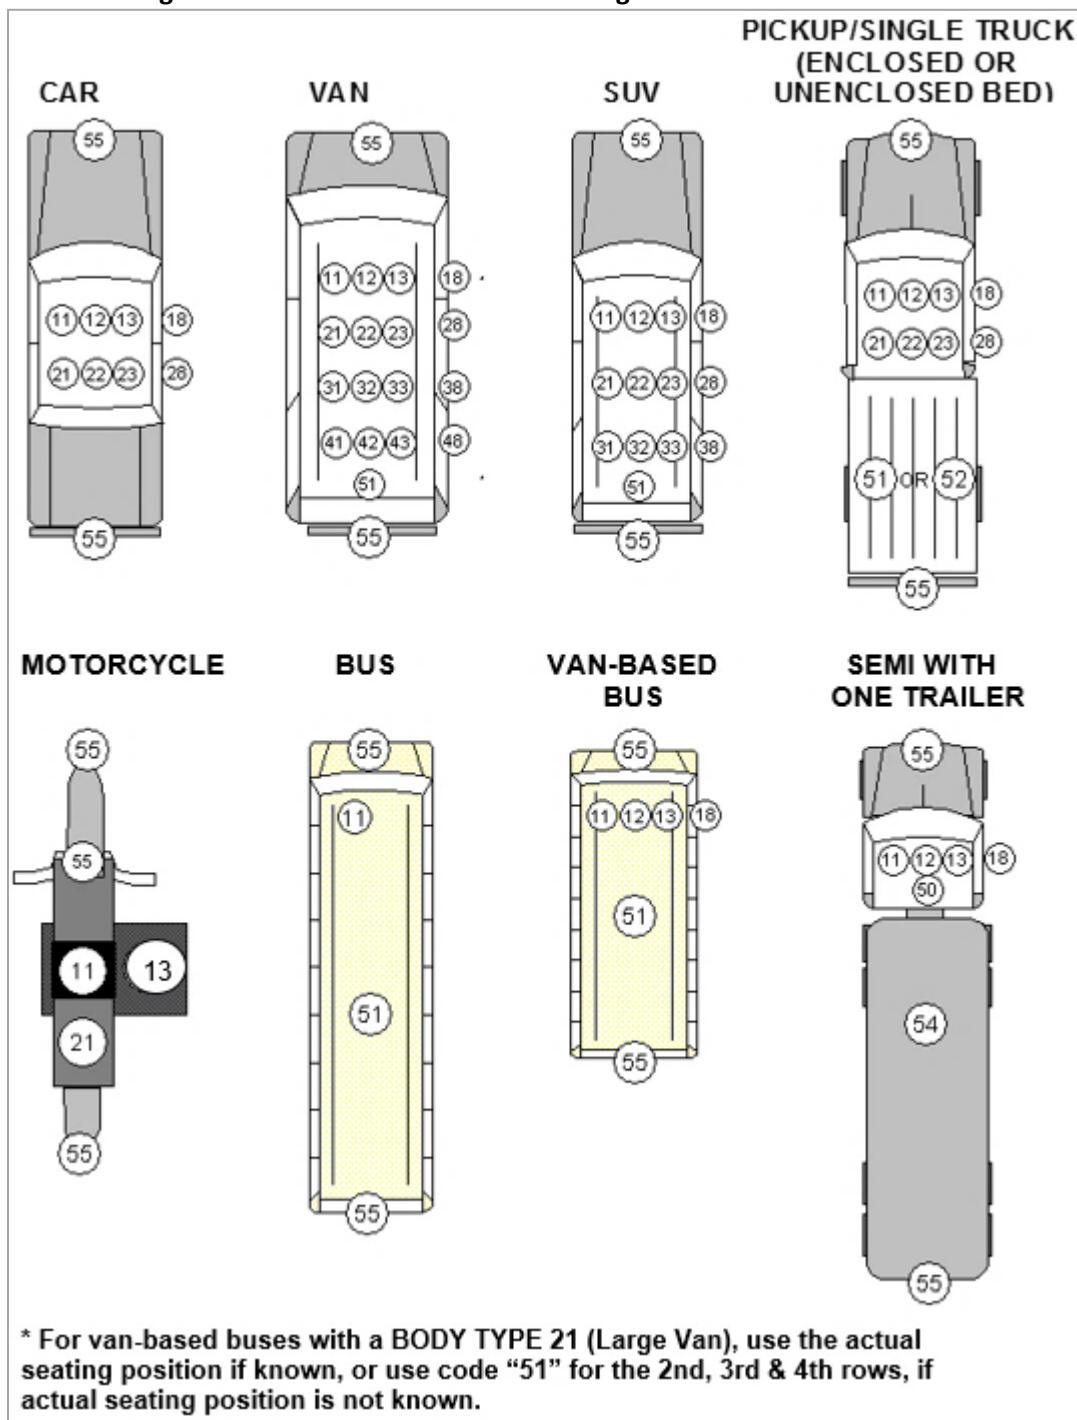

Check	IF	THEN
(1Q0F)	PERSON TYPE equals 01, and BODY TYPE equals 80-84, 88, 89,	SEATING POSITION must not equal 12-55, 99.
(1ROP)	SEATING POSITION equals 51, and BODY TYPE equals 50-52, 55, 58, 59,	INJURY SEVERITY must not equal 0, 9.
(2M0F)	PERSON TYPE equals 01,	SEATING POSITION must not equal 21-55.
(2Q0F)	PERSON TYPE equals 02, 03, 09, and BODY TYPE equals 01, 02, 04, 08, 10, 17, 33-34, 39-41, 45, 48, 90, 91,	SEATING POSITION must not equal 31-50.
(3Q0F)	PERSON TYPE equals 02, 03, 09, and BODY TYPE equals 01-17, 19, 20, 22, 28-34, 39, 41, 42, 50-52, 55, 58, 59, 65, 80-97,	SEATING POSITION must not equal 50.
(3ROP)	AIR BAG DEPLOYED does not equal 20, 98, or 99,	SEATING POSITION should not equal 12, 22, 32, 41-55.
(3SOP)	SEATING POSITION equals 55,	EJECTION must equal 8.
(4Q0F)	PERSON TYPE equals 02, 03, 09, and BODY TYPE equals 80-84, 88, 89,	SEATING POSITION must not equal 12, 14-19, 22-50.
(4Q1F)	PERSON TYPE equals 02, 03, and BODY TYPE equals 21,	SEATING POSITION must not equal 50, 52.
(4ROP)	SEATING POSITION equals 54,	VEHICLE TRAILING must not equal 0 or 9.
(5Q0F)	PERSON TYPE equals 02, and BODY TYPE equals 50-52, 55, 58, 59,	SEATING POSITION must not equal 11, 21-50, 98, 99.
(6Q0F)	PERSON TYPE equals 02, 03, 09, and BODY TYPE equals 60-67, 71, 72, 78, 79,	SEATING POSITION must not equal 31-49.
(7M0F)	PERSON TYPE equals 03,	RELATED FACTORS-PERSON LEVEL (MV Occupant) must not equal 21, 26, 28, 29, 33, 37, 40-42, 44, 45, 47, 51, 52, 57-70, 72-78, 80-83, 91
(7Q0F)	PERSON TYPE equals 09, and BODY TYPE equals 50-52, 55, 58, 59,	SEATING POSITION must not equal 12-50, 52-54.

Check	IF	THEN
(P030)	PERSON TYPE equals 01,	SEATING POSITION should not equal 12-19.
(P040)	PERSON TYPE equals 02, 09,	SEATING POSITION should not equal 11.
(P060)	SEATING POSITION equals 18, 28, 38, 48, 50-55,	RESTRAINT SYSTEM/HELMET USE should not equal 01, 03.
(P094)	EJECTION equals 8,	SEATING POSITION must equal 55, or BODY TYPE must equal 80-85, 87-89.
(P260)	SEATING POSITION equals 18, 19, or 99	AIR BAG DEPLOYED should equal 20, 98, 99.
(P290)	AIR BAG DEPLOYED equals 01-03, 07-09, and BODY TYPE equals 01-49, and MODEL YEAR equals 1998 or newer,	SEATING POSITION should equal 11, 13, 21, 23, 31 or 33.
(P320)	SEATING POSITION equals 22, 23, 31-53,	RESTRAINT SYSTEM/HELMET USE must not equal 05, 16, 17, 19, 29.
(P340)	SEATING POSITION equals 50, 52-55,	RESTRAINT SYSTEM/HELMET USE should equal 20.
(U130)	UNLIKELY: SEATING POSITION equals 41-43, 48.	--
(U350)	UNLIKELY: INJURY SEVERITY equals 1-6, and SEATING POSITION equals 98.	--
(V310)	SEATING POSITION equals 54 and VEHICLE TRAILING equals 1-4,	AIR BAG DEPLOYED must equal 20.
(V320)	BODY TYPE equals 42, 50-79, and SEATING POSITION does not equal 11, 13, 98,	AIR BAG DEPLOYED should equal 20, 98.
(V950)	VEHICLE MODEL YEAR is less than 1994, and SEATING POSITION equals 31, 33, 39,	RESTRAINT SYSTEM/HELMET USE should not equal 01, 03, and BODY TYPE should equal 12, 15, 16, 19-21.

Consistency Checks (FARS Only):

Check	IF	THEN
(7M1F)	PERSON TYPE equals 03, and SEATING POSITION is not equal to 11 or 13, and INJURY SEVERITY does not equal 4,	DRUG TEST STATUS must not equal 8, any DRUG SPECIMEN must not equal 96 , and any DRUG TEST RESULTS must not equal 9995 .

Figure 25: Seating Positions for Different Vehicle Configurations

P10 - Restraint System/Helmet Use

FORMAT: 2 numeric

SAS NAME: Person.REST_USE

ELEMENT VALUES:

Codes	Attributes
20	None Used/Not Applicable
03	Shoulder and Lap Belt Used
01	Shoulder Belt Only Used
02	Lap Belt Only Used
08	Restraint Used - Type Unknown
10	Child Restraint System - Forward Facing
11	Child Restraint System - Rear Facing
12	Booster Seat
04	Child Restraint Type Unknown
05	DOT-Compliant Motorcycle Helmet
16	Helmet, Other than DOT-Compliant Motorcycle Helmet
19	Helmet, Unknown if DOT-Compliant
17	No Helmet
29	Unknown if Helmet Worn
97	Other
98	Not Reported
99	Reported as Unknown

Definition: This element records the restraint equipment in use by the occupant, or the helmet in use by a motorcyclist, at the time of the crash.

Remarks: Code this element regardless of whether the vehicle is equipped with manual systems, automatic belts or harnesses, air bags, or any combination of these. Whether the restraint was manual or automatic will be determined via the VIN. Even if the VIN is unknown, use this rule.

The child restraints/booster seats take precedence over the belt use. For a child in a child restraint system not using the 5-point harness or in a booster not using the belt restraint, code the child restraint system or booster and [indicate mis-use](#).

20 (None Used/Not Applicable) is used when the case materials indicate that the occupant did not use a restraint. This includes situations where the occupant of that seat position did not use the available restraint, and that no restraint was available in the seat position of this occupant.

Use this attribute for persons who are riding in the sleeper section of the cab of a truck, for persons who are riding on the exterior of the vehicle, and for persons in unenclosed cargo areas, such as a bed of a pickup truck where a restraint would not be present to use, even if the corresponding police crash report field is blank. In the case of a motorcycle occupant without a helmet, use [17 \(No Helmet\)](#).

03 (Shoulder and Lap Belt Used) is used when the occupant restraint system consists of both the shoulder belt and lap belt portions and is connected to a buckle.

01 (Shoulder Belt Only Used) is used for a two-part occupant restraint system and only the shoulder belt portion is connected to a buckle.

Example:

You are coding a driver in the vehicle that is indicated by the case materials to have an automatic shoulder harness and a manual belt. The police state that the shoulder harness was used at the time of the crash, but the lap belt was not. Code as **01 (Shoulder Belt Only Used)**.

02 (Lap Belt Only Used) is used when the occupant is using a lap safety belt either because the motor vehicle is equipped only with a lap belt or because the shoulder belt is not in use.

08 (Restraint Used - Type Unknown) is used when the investigating officer indicates that some type of restraint was in use but the type of restraint is not clear.

The attribute scheme on some police crash reports may offer a choice, such as “seatbelt/harness” or “lap/shoulder” but does not distinguish between “lap belt only,” “shoulder belt only,” or “combination lap and shoulder belt.” If your police crash report has such a coding scheme and the officer checks, for example, “seat belt/harness,” then the attribute should be **08 (Restraint Used - Type Unknown)** unless the narrative clarifies which type of restraint was used.

10 (Child Restraint System - Forward Facing) is used when a child passenger is seated in a forward-facing child safety seat. This does not imply correct use or placement of the seat.

11 (Child Restraint System - Rear Facing) is used when a child passenger is seated in a rearward facing child safety seat. This does not imply correct use or placement of the seat.

12 (Booster Seat) is used when a child passenger is seated in a “belt-positioning seat” that positions a child on a vehicle seat to improve the fit of the child in a lap and shoulder seat belt system.

04 (Child Restraint Type Unknown) is used when a child passenger is seated in a child safety seat; however, the type used (e.g., forward, rear, or booster, etc.) is not known.

Note About Motorcycle Helmets

Motorcycle helmets that are compliant With Federal Motor Vehicle Safety Standards typically weigh approximately 3 pounds, have an inner liner at least one-inch thick of firm polystyrene foam, have an inside label that states the manufacturer, model and date of manufacture, and have a DOT sticker on the back of the helmet.

05 (DOT-Compliant Motorcycle Helmet) is a motorcycle helmet that is compliant With Federal Motor Vehicle Safety Standards. It must be specifically indicated to be “DOT-Compliant” in the case materials to code this attribute, otherwise use [**19 \(Helmet, Unknown if DOT-Compliant\)**](#).

16 (Helmet, Other than DOT-Compliant Motorcycle Helmet) is a motorcycle helmet that is not a DOT-compliant helmet. This also would include bicycle helmets, skateboard helmets, and novelty helmets.

19 (Helmet, Unknown if DOT-Compliant). A motorcycle helmet was indicated to be worn by the motorcycle rider, but the investigating officer did not identify if it is a DOT-compliant motorcycle helmet.

17 (No Helmet) is used when the investigating officer indicates that the occupant of a motorcycle was not wearing a helmet.

29 (Unknown if Helmet Worn) is used when the case materials specifically indicate helmet use is unknown for a motorcycle, moped, ATV/ATC, or snowmobile occupant.

97 (Other) is used when the case materials indicated that some other type of restraint not listed was being used at the time of the crash.

If the case materials do not show the restraint system or helmet use of injured or uninjured driver or passengers and there is no other information about restraint system or helmet use (e.g., in the narrative/diagram), then use **98 (Not Reported)**.

If a police crash report data element is coded with the attribute “Other” but the officer does not specify what this refers to:

1. Code **97 (Other)** if the police crash report attribute choices can be matched to or include all the attributes in FARS/CRSS.
2. Code **98 (Not Reported)** if the police crash report choices cannot be matched to or include all the attributes in FARS/CRSS.

98 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown) is used when the investigating officer indicates that the restraint system use was unknown for vehicle occupants other than motorcycle, moped, ATV/ATC, or snowmobile occupants.

Guidelines When Police and EMS/M.E. Differ:

Occasionally, information from EMS personnel or medical examiners (M.E.) includes statements about protection/restraint use or presence. If these people were in a position to have information when the investigating officer(s) could not (e.g., EMS arrived and removed victims from vehicles before police arrived or the medical examiner reports definite indications of belt usage), then the EMS/M.E. assessment may override the police crash report assessment of Restraint System/Helmet Use. **Make sure to note the arrival times of Police and EMS before making a decision.**

Rules of thumb are as follows, unless you have information to the contrary:

If the M.E./EMS report that a restraint was used but the Police report “NOT USED” or “UNKNOWN,” then accept the M.E./EMS assessment. On the other hand, if the M.E./EMS report “NOT USED” but the Police report that a restraint was used, then try to verify the police assessment that a restraint was used. If the Police report that a restraint was used or was not used but the M.E./EMS report “UNKNOWN,” then accept the Police assessment.

The vehicle’s decoded VIN data provided in MDE may be used as a source to assist in coding this element when paired with reported information on the police crash report.

Consistency Checks:

Check	IF	THEN
(2ROP)	RESTRAINT SYSTEM/HELMET USE equals 01-04, 08-12, 20,	BODY TYPE must not equal 80-83, 88, 89, 90, 91.
(2R1P)	ANY INDICATION OF MIS-USE OF RESTRAINT SYSTEM /HELMET USE equals 1,	RESTRAINT SYSTEM/HELMET USE must equal 01-05, 08-12, 19, 97.
(2SOP)	RESTRAINT SYSTEM/HELMET USE equals 05, 16, 17, 19, or 29,	AIR BAG DEPLOYED should equal 20, 98.
(2S1P)	RESTRAINT SYSTEM/HELMET USE equals 16, 17, 20,	ANY INDICATION OF MIS-USE OF RESTRAINT SYSTEM/HELMET USE must equal 0.
(3M0F)	PERSON TYPE equals 01,	RESTRAINT SYSTEM/HELMET USE must not equal 04, 10-12.
(981P)	BODY TYPE equals 80-84, 88, 89, 90, 91,	RESTRAINT SYSTEM/HELMET USE must equal 05, 16, 17, 19, 29, 97, 98.
(982P)	BODY TYPE does not equal 80-91,	RESTRAINT SYSTEM/HELMET USE must not equal 05, 16, 17, 19, 29.
(D570)	any VIOLATIONS CHARGED equals 83,	not all occupants of this vehicle should have RESTRAINT SYSTEM/HELMET USE equal to 01-05, 08, 10-12, 16, 19.
(P01F)	PERSON TYPE equals 01-03, 09, and RESTRAINT SYSTEM/HELMET USE equals 01-04, 08, 10-12, and BODY TYPE does not equal 80-89,	EJECTION should equal 0 or 7.
(P020)	PERSON TYPE equals 02, 03, 09, and RESTRAINT SYSTEM/HELMET USE equals 04, 10-12,	AGE should be less than 010, or equal to 998 or 999.
(P050)	EJECTION equals 1,	RESTRAINT SYSTEM/HELMET USE should not equal 01-04, 08, 10-12.
(P060)	SEATING POSITION equals 18, 28, 38, 48, 50-55,	RESTRAINT SYSTEM/HELMET USE should not equal 01, 03.
(P310)	EJECTION equals 1-3, and BODY TYPE does not equal 90, 91, 96, 97,	RESTRAINT SYSTEM/HELMET USE must not equal 05, 16, 17, 19, 29.
(P320)	SEATING POSITION equals 22, 23, 31-53,	RESTRAINT SYSTEM/HELMET USE must not equal 05, 16, 17, 19, 29.
(P340)	SEATING POSITION equals 50, 52-55,	RESTRAINT SYSTEM/HELMET USE should equal 20.
(U170)	UNLIKELY: RESTRAINT SYSTEM/HELMET USE equals 01.	--
(V050)	RESTRAINT SYSTEM/HELMET USE equals 05, 16, 17, 19, 29,	BODY TYPE must equal 80-91.
(V950)	VEHICLE MODEL YEAR is less than 1994, and SEATING POSITION equals 31, 33, 39,	RESTRAINT SYSTEM/HELMET USE should not equal 01, 03, and BODY TYPE should equal 12, 15, 16, 19-21.

Consistency Check (FARS Only):

Check	Language
(U520)	UNLIKELY: RESTRAINT SYSTEM/HELMET USE equals 98 if HIT AND RUN does not equal 1.

P11 - Any Indication of Mis-Use of Restraint System/Helmet Use

FORMAT: 1 numeric

SAS NAME: Person.REST_MIS

ELEMENT VALUES:

Codes	Attributes
0	No
1	Yes

Definition: This element indicates any mis-use of the restraint system or helmet used by this person.

Remarks:

0 (No) is used when the case materials indicate that the restraints or helmet use were not mis-used. Also, included in **0 (No)** is Unknown. If the investigating officer states that the restraints were being used but it couldn't be determined if they were mis-used, use this attribute. This attribute also applies when this person was not using any type of restraint system or helmet.

1 (Yes) is used when the case materials indicate that the restraints or helmet use were mis-used at the time of the crash. Do not use this attribute when the restraints or helmet were not used.

Examples:

- The investigating officer states in the crash report that the driver of Vehicle 1 had the shoulder belt portion of the seatbelt behind his back.
- The investigating officer states the operator of the motorcycle had the helmet on backwards.
- The investigating officer states in the crash report that two persons were secured in one restraint.
- The investigating officer states the child was in a booster seat but not using the vehicles restraint system.
- The investigating officer states the child restraint system was properly secured; however, the child was not using the 5-point harness system.
- The investigating officer states the child restraint system was not properly secured in the vehicle.

An indication of [1 \(Yes\)](#) requires a positive response in the case materials, if not default to [0 \(No\)](#).

Consistency Checks:

Check	IF	THEN
(2R1P)	ANY INDICATION OF MIS-USE OF RESTRAINT SYSTEM /HELMET USE equals 1,	RESTRAINT SYSTEM/HELMET USE must equal 01-05, 08-12, 19, 97.
(2S1P)	RESTRAINT SYSTEM/HELMET USE equals 16, 17, 20,	ANY INDICATION OF MIS-USE OF RESTRAINT SYSTEM/HELMET USE must equal 0.

P12 - Air Bag Deployed

FORMAT: 2 numeric

SAS NAME: Person.AIR_BAG

ELEMENT VALUES:

Codes	Attributes
01	Deployed-Front
02	Deployed-Side (door, seatback)
03	Deployed-Curtain (roof)
07	Deployed-Other (knee, air belt, etc.)
08	Deployed-Combination
09	Deployment-Unknown Location
20	Not Deployed
98	Not Reported
99	Reported as Deployment Unknown

Definition: This element is used to record air bag deployment for this person as reported in the case materials.

Remarks: Code this element regardless of the motor vehicle's Body Type or the age of the motor vehicle. When an air bag deployment is reported somewhere in the vehicle, and the narrative or other case materials do not specify/clarify a seating position or occupant associated with the deployment, then code [98 \(Not Reported\)](#) is applied.

Air Bag(s) Deployed for This Seat Position

[01 \(Deployed-Front\)](#), [02 \(Deployed-Side\)](#), [03 \(Deployed-Curtain\)](#), [07 \(Deployed-Other\)](#), [08 \(Deployed-Combination\)](#), and [09 \(Deployment-Unknown Location\)](#) are used only if you have indication in the available information that an air bag deployed for this occupant's seat position (not for others in the vehicle.) There may be multiple air bags available for this occupant's seat position.

[01 \(Deployed-Front\)](#), [02 \(Deployed-Side\)](#), [03 \(Deployed-Curtain\)](#), and [07 \(Deployed-Other\)](#) are used if case materials indicate that an air bag deployed for this person from only one of these locations.

01 (Deployed-Front) refers to an air bag forward of a first row occupant. The driver frontal air bag is located in the hub of the steering wheel. The right front passenger frontal air bag is located in the dashboard (instrument panel).

02 (Deployed-Side [door, seatback]) refers to an air bag mounted in the outboard side of the seat or in the door. Side impact air bags located between [seating positions](#) 11 and 13 within the inboard seatbacks or center console designed to mitigate occupant versus occupant injury are also collected in this attribute.

In a [convertible body type](#), a head impact curtain may deploy upward from the top of the door panel near the lower edge of the side glazing. This type of head protection is coded 03 (Deployed-Curtain [roof]), even though the air bag is located in the side door panel.

03 (Deployed-Curtain [roof]) refers to a head only, side impact air bag for outboard occupants. These are usually mounted in the roof rail above the side windows, deploying between the glazing and the occupant. These look like a curtain when deployed and are designed to help protect an adult's head in a side-impact crash. This includes a head impact curtain in a [convertible car body type](#), which deploys upward from the door panel

near the lower edge of the side glazing. A single curtain may cover one or all rows, or, a vehicle may have one for the first row with another covering multiple rearward rows.

The narrative may refer to these as a rollover curtain, roof bag, roof-rail bag, roof curtain, anti-ejection curtain, or a safety canopy. These rollover curtains are a special type of side curtain air bag with sensors that measure vehicle tilting and protect occupants from injury and ejection during a rollover crash.

07 (Deployed-Other [knee, air belt, etc.]) is used if the case materials indicate the air bag type that deployed is other than the ones listed above. If multiple “other” types of air bags deploy, use code [**08 \(Deployed-Combination\)**](#) for this person.

Examples include:

- Inflatable Seat Belt/Air Belts – Inflatable seat belts are currently available for outboard passengers beyond the first row. Some air belts will deploy in either front or side collisions.
- Rear Impact Curtain – This curtain helps protect the last row occupants during a rearward impact.
- Knee Air Bags/Knee Bolsters –This deploys from the lower instrument panel/dashboard.
- Anti-slide/Anti-submarine/Seat Cushion Air Bag – This inflates in the seat cushion to help maintain the occupant’s seating position.

08 (Deployed-Combination) is used if case materials indicate that multiple air bags deployed for this seat position.

09 (Deployment-Unknown Location) is used if an air bag did deploy for this seat position, but the origin of the air bag is not known.

20 (Not Deployed) is used if the available information indicates that no air bags deployed for this seat position.

This includes when the case materials indicate there was no air bag available for this person. Crash Report terms that might be encountered include the following: Not Applicable, No Air Bag, Not Equipped, Not Present, None, Not Available/Unavailable, Not Installed, Prior Deployment – Not Replaced

98 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code 98 (Not Reported) in these situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).
3. When an air bag deployment is reported somewhere in the vehicle and the narrative or other case materials do not specify/clarify a seating position or occupant associated with the deployment, then code 98 (Not Reported) is applied.

99 (Reported as Deployment Unknown) is used if the investigating officer indicates that deployment of an air bag was unknown for this person or for the vehicle and there is no further information in the case materials.

Consistency Checks:

Check	IF	THEN
(2SOP)	RESTRAINT SYSTEM/HELMET USE equals 05, 16, 17, 19, or 29,	AIR BAG DEPLOYED should equal 20, 98.
(2UOP)	BODY TYPE equals 80-97,	AIR BAG DEPLOYED should equal 20, 98.
(3ROP)	AIR BAG DEPLOYED does not equal 20, 98, or 99,	SEATING POSITION should not equal 12, 22, 32, 41-55.
(P260)	SEATING POSITION equals 18, 19, or 99	AIR BAG DEPLOYED should equal 20, 98, 99.
(P290)	AIR BAG DEPLOYED equals 01-03, 07-09, and BODY TYPE equals 01-49, and MODEL YEAR equals 1998 or newer,	SEATING POSITION should equal 11, 13, 21, 23, 31 or 33.
(V310)	SEATING POSITION equals 54 and VEHICLE TRAILING equals 1-4,	AIR BAG DEPLOYED must equal 20.
(V320)	BODY TYPE equals 42, 50-79, and SEATING POSITION does not equal 11, 13, 98,	AIR BAG DEPLOYED should equal 20, 98.

P13 - Ejection

FORMAT: 1 numeric

SAS NAME: Person.Ejection

ELEMENT VALUES:

Codes	Attributes
0	Not Ejected
1	Totally Ejected
2	Partially Ejected
3	Ejected - Unknown Degree
7	Not Reported
8	Not Applicable
9	Reported as Unknown if Ejected

Definition: This element describes the ejection status and degree of ejection for this person, excluding motorcycle occupants.

Remarks: Ejection refers to situations where forces from a crash cause occupants to be totally or partially thrown from the vehicle (including the bed of pickup trucks) during the course of the crash. This includes occupants of jeeps, go carts, snowmobiles, 3- or 4-wheel ATVs. **Note:** This variable excludes occupants of motorcycles.

Partial ejection refers to those instances where some part but not all of an occupant's body is, at some time during the crash sequence, outside the occupant compartment.

0 (Not Ejected) is used if the case materials specifically so state for a given occupant.

If the case materials do not show the ejection status of uninjured drivers or passengers, and there is no other information about ejection (e.g., in the narrative/diagram), then use [7 \(Not Reported\)](#).

1 (Totally Ejected) is used when the occupant's body is entirely outside the vehicle but may be in contact with the vehicle. This includes occupants who are not initially in the seating compartment of the vehicle (e.g., pickup beds, boot of a convertible, and persons riding on open tailgates).

2 (Partially Ejected) refers to those instances where some part but not all of an occupant's body is, at some time during the crash sequence, outside the occupant compartment. This does not apply to occupants who are not initially in the seating compartment of the vehicle (e.g., pickup beds, boot of a convertible, and persons riding on open tailgates), since any ejection for them is coded as [1 \(Totally Ejected\)](#).

3 (Ejected - Unknown Degree) is used when the case materials indicate that an occupant is ejected but fails to discriminate between total and partial ejection.

7 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **7 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

8 (Not Applicable) is used for persons who are riding on the exterior of a vehicle or for motorcycle occupants. Exterior of the vehicle includes running boards, roof, fenders and bumpers, but not the bed of pickup trucks, open tail gate or boot of a convertible.

9 (Reported as Unknown if Ejected) is used when the case materials specifically indicate unknown.

Consistency Checks:

Check	IF	THEN
(3SOP)	SEATING POSITION equals 55,	EJECTION must equal 8.
(4SOP)	BODY TYPE equals 80-84, 88, 89,	EJECTION must equal 8.
(BFOF)	PERSON TYPE equals 04-08, 10, 19,	EJECTION must equal 8.
(P01F)	PERSON TYPE equals 01-03, 09, and RESTRAINT SYSTEM/HELMET USE equals 01-04, 08, 10-12, and BODY TYPE does not equal 80-89,	EJECTION should equal 0 or 7.
(P050)	EJECTION equals 1,	RESTRAINT SYSTEM/HELMET USE should not equal 01-04, 08, 10-12.
(P094)	EJECTION equals 8,	SEATING POSITION must equal 55, or BODY TYPE must equal 80-85, 87-89.
(P310)	EJECTION equals 1-3, and BODY TYPE does not equal 90, 91, 96, 97,	RESTRAINT SYSTEM/HELMET USE must not equal 05, 16, 17, 19, 29.

Consistency Checks (FARS Only):

Check	IF	THEN
(6SOP)	EJECTION equals 1,	EXTRICATION must not equal 1, 9.
(BAOP)	EJECTION equals 0, 7, 8, or 9,	EJECTION PATH must equal 0.
(BBOP)	EJECTION equals 1-3,	EJECTION PATH must equal 1-9.

P14 - Ejection Path - FARS Only

FORMAT: 1 numeric

SAS Name: Person.EJ_PATH

ELEMENT VALUES:

Codes	Attributes
0	Ejection Path Not Applicable
1	Through Side Door Opening
2	Through Side Window
3	Through Windshield
4	Through Back Window
5	Through Back Door/Tailgate Opening
6	Through Roof Opening (sun-roof, convertible top down)
7	Through Roof (convertible top up)
8	Other Path (e.g., back of pickup truck)
9	Ejection Path Unknown

Definition: This element identifies the path by which this person was [ejected](#) from the vehicle.

Remarks:

0 (Ejection Path Not Applicable) is used when the element [EJECTION](#) is coded [0 \(Not Ejected\)](#), [7 \(Not Reported\)](#), [8 \(Not Applicable\)](#), or [9 \(Unknown if Ejected\)](#). This attribute is an auto-fill in MDE.

9 (Ejection Path Unknown) is used for [ejected](#) occupants when:

1. No field or coding block exists on the State's crash report to provide information to code ejection path AND no other information is available to code the element (e.g., narrative, diagram, case materials); or
2. a field or coding block exists on the State's crash report that would provide the information needed to code ejection path, but it has been left blank, AND no other information is available to code the element (e.g., narrative, diagram, case materials); or
3. the police indicate ejection path is unknown.

Use the following table as a guideline:

Path	Guideline
Through side door opening	all side doors
Through side window	all side windows, bus side windows
Through windshield	front windshield only
Through back window	standard rear window, back window of bronco, van
Through back door/tailgate opening	station wagon tailgate, back door of truck, back door of bronco, van
Through roof opening	(sun-roof, convertible top down) t-top, targa top
Through roof	(convertible top up)
Other path	(back of pickup truck) torn-off roof, car cut in half
Ejection path Unknown	driver's side, unspecified; passenger's side unspecified

Consistency Checks:

Check	IF	THEN
(BAOP)	EJECTION equals 0, 7, 8, or 9,	EJECTION PATH must equal 0.
(BBOP)	EJECTION equals 1-3,	EJECTION PATH must equal 1-9.

P15 - Extrication - FARS Only

FORMAT: 1 numeric

SAS NAME: Person.EXTRICAT

ELEMENT VALUES:

Codes	Attributes
0	Not Extricated or Not Applicable
1	Extricated
9	Unknown

Definition: This element identifies if equipment or other force was used to remove this person from the vehicle.

Remarks: Extrication refers to the use of equipment or other force to remove persons from the vehicles; i.e., more than just lifting or carrying person out of wreckage.

0 (Not Extricated or Not Applicable) is used if there is no reason to believe an occupant was extricated. Do not assume **0 (Not Extricated or Not Applicable)** when the officer references “pinned,” “wedged,” or “trapped.” See [9 \(Unknown\)](#). This field is not applicable to motorcycle and ATV/ATC riders.

1 (Extricated) is used when the police officer uses the word “extricated” to indicate occupant removal. Use of the term “extricated” is sufficient information to use **1 (Extricated)** even if no mention of equipment is made. The only exception to this is if the analyst knows the officer used the term “extrication” not as intended for the purpose of this element. If the officer uses the term “pinned” or “wedged” or something similar, then the officer must indicate that equipment was used to remove the occupant in order to code attribute **1 (Extricated)**.

9 (Unknown) is to be used when the officer states that the occupant is “pinned” or “wedged,” etc., and suggests that the occupant may have been removed with force, but does not make it clear whether equipment was used or not.

Consistency Checks:

Check	IF	THEN
(5SOP)	BODY TYPE equals 80-84, 88, 89, or 90,	EXTRICATION must equal 0.
(6SOP)	EJECTION equals 1,	EXTRICATION must not equal 1, 9.

P16/NM15 – Police-Reported Alcohol Involvement

FORMAT: 1 numeric

SAS NAME: Person.DRINKING

ELEMENT VALUES:

Codes	Attributes
0	No (Alcohol Not Involved)
1	Yes (Alcohol Involved)
8	Not Reported
9	Reported as Unknown

Definition: This data element reflects only **the judgment of law enforcement** as to whether alcohol was involved or not for this person.

Remarks: The phrase “alcohol involved” means that alcohol is present in the person or presumed to be present **by the police**. Consequently, this data element may not agree with the alcohol test results for this person. Involvement is not an indication that alcohol was in any way a cause of the crash.

If the case materials indicate that open or unopened alcoholic beverages were found in the vehicle, then this information does not by itself constitute involvement unless the police indicate that this was the basis for a determination of involvement. If the case materials indicate that a preliminary breath test (PBT) was given and the officer’s judgment contradicts the preliminary test, the officer’s judgment will be the determining factor.

0 (No [Alcohol Not Involved]) applies if **the judgment of law enforcement** is that alcohol is not present.

In some circumstances, it is possible for the police to give sufficient information in the report fields (such as contributing circumstances, driver/pedestrian condition, alcohol presence or use, alcohol test, etc.) or narrative to indicate that they believe alcohol is not involved without specifically mentioning “no” alcohol. In such cases, use **0 (No [Alcohol Not Involved])**. However, if there is any question that the officer’s position on alcohol involvement is “no alcohol” because of lack of information, then use [**8 \(Not Reported\)**](#).

1 (Yes [Alcohol Involved]) applies only if **the judgment of the law enforcement** is that alcohol was present. For example, the police indicate alcohol involvement via:

- a specific data element on the police report form such as Driver Condition,
- the police charge the driver with an alcohol-related offense,
- the police mention in the narrative section of the report that the person had been drinking,
- the police report has a positive BAC test result (BAC>.00).

Some police crash reports have a block labeled “Alcohol/Drugs.” If use is indicated, and it cannot be determined which was used (e.g., narrative, arrest/charged section, etc.), then assume alcohol is present. If the police report indicates that a driver was charged with DWI/DUI (driving while intoxicated, driving while impaired or driving under the influence), and no clarification is offered to indicate if the DWI/DUI was alcohol-related or other drug-related (e.g., a specific data element; mentioned in the narrative section; BAC results), then assume alcohol presence.

8 (Not Reported) applies when law enforcement makes no mention of alcohol involvement in either narrative or data fields. For example, there is a specific location on the police report for assessment of alcohol but the investigating officer fails to make either a positive or negative assessment by leaving the field blank. Also use **8**

(Not Reported) if no block exists on the police crash report for reporting alcohol presence and no other information is available.

There are instances when the police do not indicate in the police crash report whether alcohol was involved or not, but they do mention that a test was given or ordered. For example, the police may only say that an evidential test was ordered for a driver without indicating that they suspected alcohol or providing a result. The use of passive alcohol sensors (PAS) may also be mentioned as used by the police, without mention of the result. Use **8 (Not Reported)** for these instances.

9 (Reported as Unknown) applies when law enforcement indicates in either narrative or data fields that alcohol involvement is “unknown” for this person. In general, crash reports have blocks to indicate either positive or negative alcohol involvement. However, if a crash report has a provision for the investigating officer to respond “unknown involvement,” then enter this attribute.

FARS SPECIAL INSTRUCTION:

Important Guidelines:

- Do not change the coding of this element because a positive alcohol test is obtained from the coroner, medical examiner, or state toxicology lab. A positive or negative BAC test submitted from the toxicology lab or coroner directly to the FARS analyst is not evidence of the officer’s judgment.
- The police crash report, including any supplemental reports or direct contact with the police are the only valid sources.

When Police-Reported Alcohol Involvement is **8 (Not Reported)** or **9 (Reported as Unknown)**, Method of Alcohol by Police Determination attributes “1-8” are allowed. However, this should only happen when the method is stated by the police, but the involvement is not mentioned at all or stated as unknown.

Consistency Checks:

Check	IF	THEN
(4X4F)	any CONDITION (IMPAIRMENT) AT TIME OF CRASH (D23) equals 09,	POLICE REPORTED ALCOHOL INVOLVEMENT (P16), or POLICE REPORTED DRUG INVOLVEMENT (P19) should equal 1 for this person.
(D090)	VIOLATIONS CHARGED equals 11-19, and PERSON TYPE equals 01, 03,	POLICE REPORTED ALCOHOL INVOLVEMENT should equal 1, or POLICE REPORTED DRUG INVOLVEMENT should equal 1.
(P072)	PERSON TYPE equals 02, 03, and INJURY SEVERITY equals 0, and ALCOHOL TEST RESULT equals 996,	POLICE REPORTED ALCOHOL INVOLVEMENT should equal 0, 8.
(P300)	POLICE REPORTED ALCOHOL INVOLVEMENT equals 1, and INJURY SEVERITY equals 4,	ALCOHOL TEST STATUS should not equal 0.

Consistency Checks (FARS Only):

Check	IF	THEN
(P110)	METHOD OF ALCOHOL DETERMINATION BY POLICE equals 1-5, 8,	POLICE REPORTED ALCOHOL INVOLVEMENT should equal 0, 1.
(P200)	POLICE REPORTED ALCOHOL INVOLVEMENT equals 8, 9,	METHOD OF ALCOHOL DETERMINATION BY POLICE should equal 9.

P17/NM16 - Method of Alcohol Determination by Police - FARS Only

FORMAT: 1 numeric

SAS NAME: Person.ALC_DET

ELEMENT VALUES:

Codes	Attributes
1	Evidential Test (breath, blood, urine)
2	Preliminary Breath Test (PBT)
3	Behavioral
4	Passive Alcohol Sensor (PAS)
5	Observed
8	Other (e.g., Saliva test)
9	Not Reported

Definition: This element describes **the method by which the police made the determination** as to whether alcohol was involved or not for this person.

Remarks: This variable is coded for each person involved in the crash. The police crash report and supplements are the source of information.

The purpose of this variable is to record the method by which the police made the determination in [Police-Reported Alcohol Involvement](#) as to whether alcohol was involved or not.

It is used primarily when the [Police-Reported Alcohol Involvement](#) variable is coded as [0 \(No \[Alcohol Not Involved\]\)](#) or [1 \(Yes \[Alcohol Involved\]\)](#).

Whenever [Police-Reported Alcohol Involvement](#) is [0 \(No \[Alcohol Not Involved\]\)](#), try to find out how the police knew this. When Police-Reported Alcohol Involvement is [1 \(Yes \[Alcohol Involved\]\)](#), try to determine how the police knew this.

If [Police-Reported Alcohol Involvement](#) is [8 \(Not Reported\)](#) or [9 \(Unknown \[Police Reported\]\)](#), then Method of Alcohol Determination **by Police** is [9 \(Not Reported\)](#). If more than one method is used by the police to determine alcohol involvement, choose the method the police refer to when they record their assessment. If more than one method is used and they do not state which method was the basis for their alcohol determination, code the highest-ranking method used from the hierarchy (the highest ranking is “1”; the lowest is “5”).

1 (Evidential Test [breath, blood, urine]) is used if [Police-Reported Alcohol Involvement](#) is [0 \(No \[Alcohol Not Involved\]\)](#) or [1 \(Yes \[Alcohol Involved\]\)](#) and the police indicate that they ordered an evidential test and their determination of alcohol involvement was based on the results of that test.

An evidential test can be a breath test on a State-approved breath test device, a blood test, or a urine test. No other tests are considered evidential.

Ordering a test is not the same as knowing the results of that test.

In order to code that the police determined their opinion based on an evidential test, there must be information that the officer had received the test results. If they haven't received test results (e.g., results are pending), then their method of determination of alcohol or drug presence was made using some method other than an evidential test.

2 (Preliminary Breath Test [PBT]) is used if [Police-Reported Alcohol Involvement](#) is [0 \(No \[Alcohol Not Involved\]\)](#) or [1 \(Yes \[Alcohol Involved\]\)](#) and the police indicate that alcohol involvement was based upon the results of a preliminary breath test, or PBT. Preliminary breath testing devices are not yet considered evidential tests, but merely as tools for the police to help them determine whether alcohol is present or not. Many PBTs only indicate whether alcohol is present in the breath by pass (green) or fail (red) lights. Other PBTs indicate the approximate BAC in numbers. Some PBTs are of evidential quality in some States. But if the device was used only as a preliminary test and not the evidential test, then this value should be coded.

The key to coding this is the definite indication **by the police** that a PBT **was used** and was the basis (or the clinching evidence) that a driver had been drinking or not.

3 (Behavioral) is used if [Police-Reported Alcohol Involvement](#) is [0 \(No \[Alcohol Not Involved\]\)](#) or [1 \(Yes \[Alcohol Involved\]\)](#) and the police indicate that the basis for that alcohol assessment was the behavior by the driver during a field sobriety test.

Examples of field sobriety tests include the gaze nystagmus test, walking in a straight line, one-leg stand, etc.
Do not confuse 3 (Behavioral) with [5 \(Observed\)](#).

4 (Passive Alcohol Sensor [PAS]) is used if [Police-Reported Alcohol Involvement](#) is [0 \(No \[Alcohol Not Involved\]\)](#) or [1 \(Yes \[Alcohol Involved\]\)](#) and the police indicate that alcohol involvement was based upon the results of a passive alcohol sensor, or "sniffer."

The PAS devices available and in use by police are devices that look like flashlights and when held within 6 inches of the driver's mouth will detect alcohol in the breath while the driver is talking. The PAS is not considered an evidential test nor a PBT. It is not really a test, but a detector or an extension of the police officer's senses. The PAS devices are usually PASS/FAIL indicators with a red light indicating alcohol on the breath.

The key to coding this attribute is the indication by the police that a PAS was used and was the basis for coding [0 \(No \[Alcohol Not Involved\]\)](#) or [1 \(Yes \[Alcohol Involved\]\)](#) for [Police-Reported Alcohol Involvement](#).

5 (Observed) is used if [Police-Reported Alcohol Involvement](#) is [0 \(No \[Alcohol Not Involved\]\)](#) or [1 \(Yes \[Alcohol Involved\]\)](#) and the police indicate that the basis for their alcohol assessment was some observation of the driver. Do Not Confuse [5 \(Observed\)](#) with [3 \(Behavioral\)](#).

Examples of observations would be:

- smelling alcohol on the driver's breath
- staggering, slurring of speech
- the driver admitting he had been drinking
- other observations described by the police that would **not** be considered field sobriety tests

Be careful not to simply assume that this is the appropriate code when some other method may have been used (e.g., breath test, PBT, PAS).

8 (Other [e.g., Saliva test]) is used if [Police-Reported Alcohol Involvement](#) is **0 (No [Alcohol Not Involved])** or **1 (Yes [Alcohol Involved])** and the police indicate that the basis for alcohol determination was something other than the codes “1, 2, 3, 4, and 5” described above.

Examples of Other methods include:

1. results of a saliva test
2. results of other tissue tests

The key to coding this attribute is the description by the police of some other method of alcohol determination that does not fall into codes “1-5.”

If a police crash report data element is coded with the attribute “Other” but the officer does not specify what this refers to:

1. Code **8 (Other [e.g., Saliva test])** if the police crash report attribute choices can be matched to or include all the attributes in FARS/CRSS.
2. Code **9 (Not Reported)** if the police crash report choices cannot be matched to or include all the attributes in FARS/CRSS.

9 (Not Reported) is coded if [Police-Reported Alcohol Involvement](#) is **8 (Not Reported)** or **9 (Unknown [Police Reported])**. It is also coded if [Police-Reported Alcohol Involvement](#) is **0 (No [Alcohol Not Involved])** or **1 (Yes [Alcohol Involved])** and there is no indication in the police report or any documents as to how the police made the alcohol assessment.

Witness Statements:

Witness Statements may or may not be used by the police to make a determination of alcohol involvement. *See clarification on the use of information provided by witnesses in section [103. Data Sources](#).* If the police did use witness statements alone to make a determination of alcohol involvement, use **8 (Other)**.

If the police mention, but did not use witness statements and there is no other indication of how a determination was made, use **9 (Not Reported)**.

There are instances when the police do not indicate in the police crash report whether alcohol was involved or not, but they do mention that a test was given or ordered.

FOR EXAMPLE: The police may only say that an evidential test was ordered for a driver without indicating that they suspected alcohol or what the result was. The use of passive alcohol sensors (PAS) may also be mentioned as used by the police, without mention of the result.

Codes 1-8 may be used for Method of Alcohol Determination by Police when [Police-Reported Alcohol Involvement](#) is coded as **8 (Not Reported)** or **9 (Unknown [Police Reported])**, if this fits the case.

This should only happen when the method is stated by the police, but the involvement is not mentioned at all or stated as unknown.

Consistency Checks:

Check	IF	THEN
(P110)	METHOD OF ALCOHOL DETERMINATION BY POLICE equals 1-5, 8,	POLICE REPORTED ALCOHOL INVOLVEMENT should equal 0, 1.
(P200)	POLICE REPORTED ALCOHOL INVOLVEMENT equals 8, 9,	METHOD OF ALCOHOL DETERMINATION BY POLICE should equal 9.

Check	IF	THEN
(U681)	UNLIKELY: METHOD OF ALCOHOL DETERMINATION BY POLICE equals 8.	--

P18/NM17 - Alcohol Test

FORMAT: 3 sets, 1 set, 1 numeric, 1 set, 2 numeric, 1 set, 3 numeric

SAS NAME: Person.ALC_STATUS, Person.ATST_TYP, Person.ALC_RES

ELEMENT VALUES:

Subfield 1 – Test Status

CRSS Codes	FARS Codes	Attributes
0	0	Test Not Given
2	2	Test Given
8	8	Not Reported
9	9	Reported as Unknown if Tested

Subfield 2 – Test Type

CRSS Codes	FARS Codes	Attributes
00	00	Test Not Given
01	01	Blood
02	02	Breath Test (AC)
10	10	Preliminary Breath Test (PBT)
11	11	Breath Test, Unknown Type
03	03	Urine
XX	04	Vitreous
XX	05	Blood Plasma/Serum
XX	06	Blood Clot
XX	07	Liver
08	08	Other Test Type
98	98	Unknown Test Type
95	95	Not Reported
99	99	Reported as Unknown if Tested

Subfield 3 – Test Result

CRSS Codes	FARS Codes	Attributes
000-939	000-939	Actual Value
940	940	.94 or Greater
996	996	Test Not Given
997	997	AC Test Performed, Results Unknown
998	998	Positive Reading with No Actual Value
995	995	Not Reported
999	999	Reported as Unknown if Tested

Definition for Alcohol Test Status: This element identifies if an alcohol (ethanol) test was given to this person.

Definition for Alcohol Test Type: This element identifies the type of the alcohol (ethanol) test that was used for this person.

Definition for Alcohol Test Result: This element identifies the alcohol (ethanol) test result for this person.

Remarks: When completing this element, you must have the data to fill **ALL** three subfields. Otherwise, leave all three subfields **blank** until all the data has been acquired to complete all three subfields.

For alcohol tests that were initiated but not completed because of a contaminated or insufficient sample, code:

- Test Status as [2 \(Test Given\)](#)
- the applicable Test Type,
- and code Test Results as [997 \(AC Test Performed, Results Unknown\)](#).

In a circumstance where the crash report provides results from a lower order test (e.g., breath or urine) and blood was also drawn to be tested, but blood test results will not be received, it is preferred that we record the known result from the breath or urine test rather than [997 \(AC Test Performed, Results Unknown\)](#).

Subfield 1 – Test Status

Indicates whether or not a test was performed on this person to detect the presence of alcohol (ethanol).

0 (Test Not Given) is used when the case materials indicate an alcohol test was not given.

NOTE: Most States' practice is that "live" non-drivers are not routinely tested for alcohol. Consequently, for live non-drivers MDE will auto-fill Test Status, Test Type, and Test Result as **0 (Test Not Given)**. If you happen to obtain an alcohol test result for a "live" non-driver, enter **Test Status** as **2 (Test Given)** and the appropriate test type and results.

2 (Test Given) is used when the case materials indicate an alcohol test was given.

8 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **8 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

9 (Reported as Unknown if Tested) is used when the case materials specifically indicated "Unknown if Tested."

Subfield 2 – Test Type

Coding Hierarchy:

When more than one alcohol test exists, use the following hierarchy for Test Type:

Breath Test Types (Presumed Live Subject)

- [02 \(Breath Test\(AC\)\)](#) or Evidential Breath Test
- [10 \(Preliminary Breath Test \(PBT\)\)](#) See Note
- [11 \(Breath Test, Unknown Type\)](#)

Blood Test Types

- [01 \(Blood\)](#) or Whole Blood

- **05 (Blood Plasma)***
- **05 (Blood Serum)***
- **06 (Blood Clot)***

Other Test Types

- **04 (Vitreous)***
- **03 (Urine)**
- **07 (Liver)***
- **08 (Other Test Type)**

*Attributes 04 - 07 do not apply for CRSS coding purposes.

Note:

The rationale is that a preliminary breath test will be performed on a live subject prior to any other test type and, therefore, will automatically be closer in time to the crash. If a preliminary breath test was performed on-scene while a blood test was performed much later on a live subject, then the preliminary breath test is preferred. If the blood test is performed on a sample that is drawn at the scene or close to the crash time, whether the subject is living or dead, then the usual procedure applies to update a PBT result with an evidential blood test result (See [10 \(Preliminary Breath Test\)](#) below). ***Without information to determine which type of Breath test reported the results, (i.e., only "breath" test is reported) code 11 (Breath Test, Unknown Type).***

In a circumstance where the crash report identifies results from a test (e.g., urine or other) but blood was also drawn to be tested, but blood test results will not be received, it is preferred that we record the known result from the urine or other test rather than [997 \(AC Test Performed, Results Unknown\)](#).

The same is correct in a circumstance where you have information that casts clear doubt on the validity or reliability of the blood test and you have results from a test of another type. For example, the blood test was spoiled or contaminated.

01 (Blood) is used when the case materials indicate this was the type of test used to obtain a BAC.

Note that there are test types for **01 (Blood)**, **05 (Blood Plasma/Serum)**, and **06 (Blood Clot)**. If the coroner, medical examiner, or State lab reports that the test was a “blood” test (whole blood), this most likely does not refer to blood plasma, blood serum, or blood clot, but you should try to verify this. If the test was performed on blood, or if you know the results are already converted to a BLOOD ALCOHOL CONCENTRATION (BAC), then code TEST TYPE as **01 (Blood)**.

02 (Breath Test [AC]) is used when the case materials indicate this was the type of test used to obtain a BAC.

02 (Breath Test [AC]) is used if you have a result from an **evidential** breath test (a breath test performed on a State-approved breath test device).

Evidential breath test devices may be stationary or portable (handheld).

Usually, results from a [Preliminary Breath Test \(PBT\) device](#) are not considered evidential. These are always handheld devices. If the device was used only as a preliminary test and not an evidential test, then do not use code **02 (Breath Test [AC])**. ***Without information to determine which type of Breath test reported the results, (i.e., only "breath" test is reported) code 11 (Breath Test, Unknown Type).***

03 (Urine) is used when the case materials indicate this was the type of test used to obtain a BAC.

08 (Other Test Type) is used when the case materials indicate a type of test used to obtain a BAC was recorded as “Other” or is indicated to be of a type other than the available attributes. This attribute would not apply to behavioral tests (field sobriety) or observations.

If a police crash report data element is coded with the attribute “Other” but the officer does not specify what this refers to:

1. Code **08 (Other Test Type)** if the police crash report attribute choices can be matched to or include all the attributes in FARS/CRSS.
2. Code **95 (Not Reported)** if the police crash report choices cannot be matched to or include all the attributes in FARS/CRSS.

10 (Preliminary Breath Test [PBT]) is used when the case materials indicate this was the type of test used to obtain a BAC and no other test is available. Update **Test Type** and corresponding **Result** if a PBT is followed by an evidential test, other than a PBT. A negative result from a PBT (no alcohol detected) is coded as **000**. **Without information to determine which type of Breath test reported the results, (i.e., only “breath” test is reported) code 11 (Breath Test, Unknown Type).**

11 (Breath Test, Unknown Type) is used when the case materials indicate that a breath test was administered, but it cannot be determined from the case materials whether it was a preliminary test or an evidential test.

98 (Unknown Test Type) is used when the case materials indicate a test was given and the type of test is reported as unknown or pending and the type is unobtainable.

95 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **95 (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown if Tested) is used when the case materials specifically indicated “Unknown if Tested.”

Subfield 3 – Test Result

All three decimal places should be coded in this field. Blood, urine, and vitreous test results should be represented as **g/dL** (grams per deciliter, the NHTSA and North American standard). If three decimal places are not available, code the first two digits and zero fill the remaining place. For example, a reported BAC of .09 becomes .090.

Example Test Results are in g/dL

g/dL	Translate to g/dL with 3 digits	Record in FARS/CRSS
.2 g/dL	.200 g/dL	200
.17 g/dL	.170 g/dL	170

Example Test Results are in mg/dL (1mg = .001g)

mg/dL (1mg = .001g)	Translate to g/dL with 3 digits	Record in FARS/CRSS
86 mg/dL	.086 g/dL	086
140 mg/dL	.140 g/dL	140

Example Test Results are in Other or No Units

Other Units	Translate to g/dL with 3 digits	Record in FARS/CRSS
.08 is considered g/dl	.080	080
.1% is considered g/dl	.100	100

997 (AC Test Performed, Results Unknown) refers to alcohol content tests that were performed but the results are reported as unknown or pending and are unobtainable (includes a “Contaminated Sample” or “Insufficient Sample”). AC Test Performed, Results Unknown can be used for any Test Type.

FARS SPECIAL INSTRUCTION:

As a general coding guideline, **do not** prematurely use Test Result “AC Test Performed, Results Unknown.” It is recommended that you leave the information blank for drivers and non-motorists until the test results are received from the State lab, coroner or police. You need to be reasonably certain that you will **never** receive the test results to use attribute “**997**” at the time of the initial coding and case entry.

995 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **995 (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

999 (Reported as Unknown if Tested) is used when the case materials specifically indicate “Unknown if Tested.”

998 (Positive Reading with No Actual Value) can be used for any Test Type code where the result is indicated to be positive without a numeric value to record. This should only be used when a final test result is returned as “positive” with no actual result to record. This can occur when a screening test is used and it is the only test result available. **This attribute is also used for a positive BAC expressed as a range or as less than some specific value (e.g., less than .020g/100ml.)**

Some portable (hand held) breath-test devices are only preliminary breath tests (PBTs) and indicate whether alcohol is present in the breath by positive (green) or negative (red) lights. Other portable breath test devices indicate the approximate BAC in numbers. When a PBT result only indicates “positive” for alcohol, with no actual BAC value, **998 (Positive Reading with No Actual Value)** should be used. A negative PBT result should be interpreted as **.000**.

Before recording this value make sure that this is the appropriate value based on the [hierarchy](#) outlined under **Subfield 2 Test Type**.

State Law Versus Practice:

You may be aware that your State laws require testing of certain classes of crash victims. However, you may also know that the practice in your State is that the law is not observed. In such cases, you are not bound only by what the law says. You may consider State practices in your coding decisions.

Example 1: Your State law may require all fatalities to be tested for BAC, but you know that this does not happen in your State and you are unable to locate alcohol test information for this person:

- In such a case, you cannot rely on the law for your coding decisions. Therefore, you should use **999 (Reported as Unknown If Tested)** rather than **997 (AC Test Performed, Results Unknown)**, or **996 (Test Not Given)**. (Test Status equals **9 (Reported as Unknown if Tested)** and Test Type equals **99 (Reported as Unknown if Tested)**).

Example 2: Most States' practice is that "live" non-drivers are not routinely tested for alcohol. Consequently, for live non-drivers when there is no mention of a test ordered by the police in the police crash report:

- Code Test Status as **0 (Test Not Given)** and MDE will auto-fill Test Type as **00 (Test Not Given)** and Test Result as **996 (Test Not Given)**. However, if you happen to obtain an alcohol test result later, you may enter the appropriate test type and results.

Computed Estimates of BACs:

An expert may calculate an estimate of what the BAC would have been at the time of the crash (i.e., toxicologist uses the lapse time from crash and the victim's weight to calculate the BAC). You may accept these results if the following are **all** true:

- Results were reported by someone with the authority in your State to make this determination; and
- the result is considered official in your State; and
- you can support the result with official documentation or it is reported on the police crash report (may vary from State-to-State).

Consistency Checks:

Check	IF	THEN
(5T7P)	ALCOHOL TEST STATUS equals 0,	ALCOHOL TEST TYPE must equal 00, and ALCOHOL TEST RESULT must equal 996.
(5T8P)	ALCOHOL TEST STATUS equals 9,	ALCOHOL TEST TYPE must equal 99, and ALCOHOL TEST RESULT must equal 999.
(5T9P)	ALCOHOL TEST STATUS equals 2,	ALCOHOL TEST TYPE must equal 01-11 , 95, 98, and ALCOHOL TEST RESULT must equal 000-940, 997, 998.
(5TCP)	ALCOHOL TEST STATUS equals 8,	ALCOHOL TEST TYPE must equal 95, and ALCOHOL TEST RESULT must equal 995.
(P071)	PERSON TYPE equals 02, 04-08, 10, and INJURY SEVERITY does not equal 4,	ALCOHOL TEST STATUS should not equal 9, ALCOHOL TEST TYPE should not equal 99, and ALCOHOL TEST RESULT should not equal 999.
(P074)	PERSON TYPE equals 02, 04-08, 10, and INJURY SEVERITY does not equal 4,	ALCOHOL TEST STATUS must not equal 8, ALCOHOL TEST TYPE must not equal 95, and ALCOHOL TEST RESULT must not equal 995.
(P080)	ALCOHOL TEST RESULTS should not equal 340-940.	--
(P300)	POLICE REPORTED ALCOHOL INVOLVEMENT equals 1, and INJURY SEVERITY equals 4,	ALCOHOL TEST STATUS should not equal 0.

Check	IF	THEN
(U689)	UNLIKELY: ALCOHOL TEST Subfield 3-Test Result equals 001-009.	--

P19/NM18 – Police-Reported Drug Involvement

FORMAT: 1 numeric

SAS NAME: Person.DRUGS

ELEMENT VALUES:

Codes	Attributes
0	No (Drugs Not Involved)
1	Yes (Drugs Involved)
8	Not Reported
9	Reported as Unknown

Definition: This data element reflects only the **judgment of law enforcement** as to whether drugs were involved or not for this person.

Remarks: This data element reflects only the **judgment of law enforcement** as to whether drugs were involved or not for this person.

The phrase “drug involvement” means that drugs are present in the person or presumed to be present by the police. This includes prescription and over-the-counter medications, as well as illicit substances (e.g., marijuana, cocaine, heroin, etc.). It is not an indication that the drug usage was in any way a cause of the crash.

If case materials indicate that drugs were found in the vehicle, then this information does not by itself constitute involvement unless the police indicate that this was the basis for a determination of involvement.

Some police crash reports have a block labeled “Alcohol/Drugs.” If use is indicated, and it cannot be determined which was used (e.g., narrative, arrest/charged section, etc.), then assume alcohol, not drugs. If the police report indicates that a driver was charged with DWI (driving while intoxicated or driving while impaired) and no clarification is offered to indicate if the DWI was alcohol-related or drug-related (e.g., a specific data element, mentioned in the narrative section, BAC results), then interpret as alcohol presence.

0 (No [Drugs Not Involved]) applies if the judgment of law enforcement is that drugs are not present.

In some circumstances, it is possible for the police to give sufficient information in the report fields (such as contributing circumstances, driver/pedestrian condition, substance use, drug test) or narrative to indicate that they believe drugs are not involved without specifically mentioning no drugs. In such cases, you may use **0 (No [Drugs Not Involved])**. However, if there is any question that the officer’s position on drug involvement is No because of a lack of information, then it is best to use **8 (Not Reported)**.

1 (Yes [Drugs Involved]) applies only if the police assessment is that drugs were present. For example, the police indicate drug involvement via:

- a specific data element on the police report form such as driver condition,
- the police charge the driver with a drug-related offense,
- the police mention in the narrative section of the report that the person had been under the influence of a drug,
- the police report has a positive test result reported for drugs.

8 (Not Reported) applies when law enforcement makes no mention of drug involvement in either narrative or data fields. For example, there is a specific location on the police report for assessment of drugs but the investigating officer fails to make either a positive or negative assessment by leaving the field blank. Also, use **8**

(Not Reported) if no block exists on the police crash report for reporting drug presence and no other information is available.

There are instances when law enforcement does not indicate in the police crash report whether drugs were involved or not, but they do mention that a test was given or ordered. For example, the police may only say that an evidential test was ordered for a driver without indicating that they suspected drugs or providing a result. Use **8 (Not Reported)** for these instances.

9 (Reported as Unknown) applies when law enforcement indicates in either narrative or data fields that drug involvement is “unknown” for this person. In general, police reports have blocks to indicate either positive or negative drug involvement. However, if a crash report has a provision for the investigating officer to respond “unknown involvement,” then enter this attribute.

FARS SPECIAL INSTRUCTION:

Important Guidelines:

- Do not change the coding of this element because a positive drug test is obtained from the coroner, medical examiner or State toxicology lab. A positive or negative test result submitted from the toxicology lab or coroner directly to the FARS analyst is **not** evidence of the officer’s judgment.
- The crash report, including any supplemental reports or direct contact with law enforcement, are the only valid sources.

When Police Reported Drug Involvement is **8 (Not Reported)** or **9 (Reported as Unknown)**, all Method of Drug Determination attributes are allowed. However, this should only happen when the method is stated by the police, but the involvement is not mentioned at all or stated as unknown.

Consistency Checks:

Check	IF	THEN
(4X4F)	any CONDITION (IMPAIRMENT) AT TIME OF CRASH (D23) equals 09,	POLICE REPORTED ALCOHOL INVOLVEMENT (P16), or POLICE REPORTED DRUG INVOLVEMENT (P19) should equal 1 for this person.
(D090)	VIOLATIONS CHARGED equals 11-19, and PERSON TYPE equals 01, 03,	POLICE REPORTED ALCOHOL INVOLVEMENT should equal 1, or POLICE REPORTED DRUG INVOLVEMENT should equal 1.

Consistency Checks (FARS Only):

Check	IF	THEN
(BQOP)	METHOD OF DRUG DETERMINATION BY POLICE equals 8,	POLICE REPORTED DRUG INVOLVEMENT must equal 0, 1, 8, 9.
(BROP)	METHOD OF DRUG DETERMINATION BY POLICE equals 1-7,	POLICE REPORTED DRUG INVOLVEMENT must equal 0, 1, 8.
(P140)	POLICE REPORTED DRUG INVOLVEMENT equals 8, 9,	METHOD OF DRUG DETERMINATION BY POLICE should equal 8.
(P150)	POLICE REPORTED DRUG INVOLVEMENT equals 1, and METHOD OF DRUG DETERMINATION BY POLICE equals 2,	DRUG TEST STATUS should not equal 0.
(P160)	POLICE REPORTED DRUG INVOLVEMENT equals 1, and METHOD OF DRUG DETERMINATION BY POLICE equals 2,	not all DRUG TEST RESULTS should equal 0001.

Check	IF	THEN
(P170)	METHOD OF DRUG DETERMINATION BY POLICE equals 1-7,	POLICE REPORTED DRUG INVOLVEMENT should equal 0, 1.

P20/NM19 - Method of Drug Determination by Police - FARS Only

FORMAT: 1 numeric

SAS NAME: Person.DRUG_DET

ELEMENT VALUES:

Codes	Attributes
1	Evidential Test (Blood, Urine)
2	Drug Recognition Expert (or Evaluator) (DRE) determination
3	Behavioral
7	Other
8	Not Reported

Definition: This element identifies the method by which the police made the determination as to whether drugs were involved or not for this person.

Remarks: This element is coded for each person involved in the crash. The police crash report and supplements are the source of information.

The purpose of this element is to record the method by which the police made the determination as to whether drugs were involved or not.

It is used primarily when the [Police Reported Drug Involvement](#) element is coded as [0 \(No \[Drugs Not Involved\]\)](#) or [1 \(Yes \[Drugs Involved\]\)](#).

Whenever [Police Reported Drug Involvement](#) is [0 \(No \[Drugs Not Involved\]\)](#), try to find out how the police knew this. When [Police Reported Drug Involvement](#) is [1 \(Yes \[Drugs Involved\]\)](#), try to determine how the police knew this.

If [Police Reported Drug Involvement](#) is [8 \(Not Reported\)](#) or [9 \(Unknown \[Police Reported\]\)](#), then Method of Drug Determination by Police is [8 \(Not Reported\)](#). If more than one method is used by the police to determine drug involvement, choose the method the police refer to when they record their assessment. If more than one method is used and they do not state which method was the basis for their determination, code the highest-ranking method used from the hierarchy (the highest ranking is “1”; the lowest is “7”).

1 (Evidential Test [Blood, Urine]) is used if [Police Reported Drug Involvement](#) is [0 \(No \[Drugs Not Involved\]\)](#) or [1 \(Yes \[Drugs Involved\]\)](#) and the police indicate that they ordered an evidential test and their determination of drug involvement was based on the results of that test.

Ordering a test is not the same as knowing the results of that test. In order to code that the police determined their opinion based on an evidential test, there must be information that the officer had received the test results. If they haven’t received test results (e.g., results are pending), then their method of determination of alcohol or drug presence was made using some method other than an evidential test.

2 (Drug Recognition Expert (or Evaluator) [DRE] determination) is used if [Police Reported Drug Involvement](#) is **0 (No [Drugs Not Involved])** or **1 (Yes [Drugs Involved])** and the police indicate that drug involvement was based upon the results of expert opinion of a person trained to recognize impairment in drivers under the influence of drugs other than, or in addition to, alcohol.

The key to coding this attribute is the definite indication **by the police** that a **DRE was used** and was the basis (or the clinching evidence) that a driver had been using drugs or not.

3 (Behavioral) is used if [Police Reported Drug Involvement](#) is **0 (No [Drugs Not Involved])** or **1 (Yes [Drugs Involved])** and the police indicate that the basis for that drug assessment was the behavior by the driver during their contact with the person such as a field sobriety test.

7 (Other) is used if [Police Reported Drug Involvement](#) is **0 (No [Drugs Not Involved])** or **1 (Yes [Drugs Involved])** and the police indicate that the basis for Drug determination was something other than the codes “1, 2, or 3” described above.

Examples of **7 (Other)** include:

1. Observations of drugs or drug use paraphernalia,
2. Detecting the odor of marijuana, or
3. Admission by the person that they used drugs.

If a police crash report data element is coded with the attribute “Other” but the officer does not specify what this refers to:

1. Code **7 (Other)** if the police crash report attribute choices can be matched to or include all the attributes in FARS/CRSS.
2. Code **8 (Not Reported)** if the police crash report choices cannot be matched to or include all the attributes in FARS/CRSS.

8 (Not Reported) is coded if [Police Reported Drug Involvement](#) is **8 (Not Reported)** or **9 (Unknown [Police Reported])**. It is also coded if [Police Reported Drug Involvement](#) is **0 (No [Drugs Not Involved])** or **1 (Yes [Drugs Involved])** and there is no indication in the police report or any documents as to how the police made the drug assessment.

Witness Statements:

Witness Statements may or may not be used by the police to make a determination of drug involvement. If the police did use witness statements alone to make a determination of drug involvement, use **7 (Other)**. See *clarification on the use of information provided by witnesses in section 103. Data Sources*.

If the police mention, but did not use witness statements and there is no other indication of how a determination was made, use **8 (Not Reported)**.

There are instances when the police do not indicate in the police crash report whether drugs were involved or not, but they do mention that a test was given or ordered.

FOR EXAMPLE: The police may only say that an evidential test was ordered for a driver without indicating that they suspected drugs or what the result was.

Codes 1-7 may be used for Method of Drug Determination by Police when [Police Reported Drug Involvement](#) is coded as **8 (Not Reported)** or **9 (Unknown [Police Reported])**, if this fits the case.

This should only happen when the method is stated by the police, but the Involvement is not mentioned at all or stated as unknown.

Consistency Checks:

Check	IF	THEN
(BQOP)	METHOD OF DRUG DETERMINATION BY POLICE equals 8,	POLICE REPORTED DRUG INVOLVEMENT must equal 0, 1, 8, 9.
(BROP)	METHOD OF DRUG DETERMINATION BY POLICE equals 1-7,	POLICE REPORTED DRUG INVOLVEMENT must equal 0, 1, 8.
(P140)	POLICE REPORTED DRUG INVOLVEMENT equals 8, 9,	METHOD OF DRUG DETERMINATION BY POLICE should equal 8.
(P160)	POLICE REPORTED DRUG INVOLVEMENT equals 1, and METHOD OF DRUG DETERMINATION BY POLICE equals 2,	not all DRUG TEST RESULTS should equal 0001 .
(P170)	METHOD OF DRUG DETERMINATION BY POLICE equals 1-7,	POLICE REPORTED DRUG INVOLVEMENT should equal 0, 1.

P21/NM20 - Drug Toxicology Results – FARS Only

FORMAT: 1 set 1 numeric; ***Unlimited, 2 numeric; Unlimited, 3 numeric***

SAS NAME: Person.DSTATUS, Person.DRUGTST1, Person.DRUGTST2, Person.DRUGTST3, Person.DRUGRES1, Person.DRUGRES2, Person.DRUGRES3

ELEMENT VALUES:

Subfield 1 – Drug Test Status

FARS Codes	Attributes
0	Test Not Given
2	Test Given
8	Not Reported
9	Reported as Unknown if Tested

Subfield 2 – Drug Specimen

FARS Codes	Attributes
00	Test Not Given
01	Whole Blood
02	Urine
11	Blood Plasma/Serum
12	Blood Clot
13	Oral Fluids
14	Vitreous
15	Liver
97	Unknown Specimen
98	Other Specimen
96	Not Reported
99	Reported as Unknown if Tested

Subfield 3 – Drug Test Result**

FARS Codes	Attributes
000	Test Not Given
001	Tested, No Drugs Found/Negative
100-295	Narcotic*
300-399	Depressant*
400-495	Stimulant*
500-595	Hallucinogen*
600-695	Cannabinoid*
700-795	Phencyclidine (PCP)*
800-895	Anabolic Steroid*
900-995	Inhalant*
996	Other Drug
997	Tested for Drugs, Results Unknown
998	Tested for Drugs, Drugs Found, Type Unknown/Positive
095	Not Reported
999	Reported as Unknown If Tested for Drugs

* See Specific Drug Listings

**** Test Result does not include aspirin, nicotine, or ethanol. Alcohols reported other than ethanol would be classified under [996 \(Other Drug\)](#). In addition, exclude drugs explicitly indicated to have been administered after the crash.**

Remarks: When completing this element, you must have the data to fill **ALL** three subfields. Otherwise, leave all three subfields **blank** until all the data has been acquired to complete all three subfields.

For drug tests that were initiated but not completed because of a contaminated or insufficient sample, code:

- Test Status as [2 \(Test Given\)](#)
- the applicable [Specimen](#),
- and code Test Results as [997 \(Tested for Drugs, Results Unknown\)](#).

Subfield 1 - Drug Test Status

Definition for Drug Test Status: This element identifies if a chemical test for the presence of drugs was given to this person.

0 (Test Not Given) is used when the case materials indicate a drug test was not given. If Test Status is **0 (Test Not Given)** then **Specimen** and Test Result will also be **00 (Test Not Given)** and **000 (Test Not Given)**.

Most States' practice is that "live" non-drivers are not routinely tested for drugs. Consequently, for live non-drivers MDE will auto-fill **Test Status**, **Specimen**, and **Test Result** as **Test Not Given**. If you happen to obtain a drug test result for a "live" non-driver, enter **Test Status** as **2 (Test Given)** and the appropriate **specimen** and results.

2 (Test Given) is used when the case materials indicate **at least one specimen was tested for drugs**.

8 (Not Reported)

If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **8 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash report that does not map to any FARS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

9 (Reported as Unknown if Tested) is used when the case materials specifically indicate "Unknown if Tested."

Subfield 2 - Drug Specimen:

You may record **all reported toxicology lab specimen** and their corresponding results.

Definition for Drug Specimen: This element identifies the **bodily tissue or fluid used to perform a** chemical test for the presence of drugs **in** this person.

01 (Whole Blood) is used when the case materials indicate this was the **specimen** used to detect the presence of drugs.

Note that there are samples for 01 (Whole Blood), 11 (Blood Plasma/Serum), and 12 (Blood Clot). If the coroner, medical examiner, or State lab reports that the test was a “blood” test (whole blood), this most likely does not refer to blood plasma, blood serum, or blood clot, but you should try to verify this.

02 (Urine) is used when the case materials indicate this was the **specimen** used to detect the presence of drugs.

11 (Blood Plasma/Serum) is used when the case materials indicate this was the **specimen** used to detect the presence of drugs.

12 (Blood Clot) is used when the case materials indicate this was the **specimen** used to detect the presence of drugs.

13 (Oral Fluids) is used when the case materials indicate this was the **specimen** used to detect the presence of drugs.

14 (Vitreous) is used when the case materials indicate this was the **specimen** used to detect the presence of drugs.

15 (Liver) is used when the case materials indicate this was the **specimen** used to detect the presence of drugs.

97 (Unknown Specimen) is used when the case materials indicate a test was given and the **specimen** is reported as unknown or pending and unobtainable.

98 (Other Specimen) is used when the case materials indicate a **specimen** used to detect the presence of drugs is indicated to be a **specimen** other than the available attributes.

If a police crash report data element is coded with the attribute “Other” but the officer does not specify what this refers to:

1. Code **98 (Other Specimen)** if the police crash report attribute choices can be matched to or include all the attributes in FARS.
2. Code **96 (Not Reported)** if the police crash report choices cannot be matched to or include all the attributes in FARS.

96 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **96 (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown if Tested) is used when the case materials specifically indicate “Unknown if Tested.”

Subfield 3 - Drug Test Result

Definition for Drug Test Result: This element **records** the result of a chemical test for the presence of drugs **in** this person.

****NOTE:** This element excludes nicotine, aspirin and ethanol. In addition, exclude drugs explicitly indicated to have been administered after the crash. Alcohols reported other than ethanol would be classified under [996 \(Other Drug\)](#).

NOTE: You may record **as many** separate drug test results and their corresponding **specimen as are reported**. Use the translation table to assign the three-digit code. If the drug is not on the list, use [996 \(Other Drug\)](#), except for confirmed as “post-crash” administered. Caffeine and mild analgesics are coded [996 \(Other Drug\)](#).

000 (Test Not Given) is used when the case materials indicate a drug test was not given. If Test Status is **0 (Test Not Given)** then **Specimen** and Test Result will also be **00 (Test Not Given)** and **000 (Test Not Given)**.

001 (Tested, No Drugs Found/Negative) is used when the case materials indicate that a test for the presence of drugs was “negative” or that no drugs were found.

997 (Tested for Drugs, Results Unknown) refers to drug tests that were performed but the results are reported as unknown or pending and are unobtainable. **997 (Tested for Drugs, Results Unknown)** can be used for any **Specimen**.

NOTE: As a general coding guideline, do not prematurely use Test Result **997 (Tested for Drugs, Results Unknown)**. It is recommended that you leave the information **blank** until the test results are received from the State lab, **M.E.**, coroner, or police. You need to be reasonably certain that you will never receive the test results to use **code “997”** at the time of the initial coding and case entry. Examples of this situation would be if the test results are returned indicating a “Contaminated Sample” or “Insufficient Sample.”

998 (Tested for Drugs, Drugs Found, Type Unknown/Positive) can be used for any **Specimen** code where the result is indicated to be positive without an actual drug identified to record. **This value may be used more than once to record multiple substances found.**

NOTE: This should only be used when a final test result is returned as “positive” with no actual result to record. This can occur when a test is used **to identify the presence of any one of several substances without identifying which substances are presumed present and this** is the only test result available. Before recording this value make sure that this is the **final** test result.

095 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **095 (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

999 (Reported as Unknown if Tested for Drugs) is used when the case materials specifically indicated “Unknown if Tested.”

Examples for Interpreting Drug Tests

IF YOU HAVE:	Status	Specimen 1	Result 1	Specimen 2	Result 2	Specimen 3	Result 3	Specimen 4	Result 4
Blood and urine tests and the results are the same for both. <i>Example: Blood – Fentanyl; Urine – Fentanyl</i>	2	01	151	02					
Blood and urine tests and the results are different for both. <i>Example: Blood – Hexobarbital, Benzoyllecgonine, Morphine; Urine – Cocaine</i>	2	01	333	01	402	01	177	02	407
Both blood and urine tests and the results are given but not linked to either tests. <i>Example: Results – Codeine and Ibogaine</i>	2	96	128	96	509				
Blood and vitreous tests. <i>Example: Blood – Diazepam; Vitreous – Cocaine</i>	2	01	321	14	407				
Urine test only and the results: <i>Example: Urine – Benzodiazepines</i>	2	02	304						
Oral Fluid Test only. <i>Example: Oral Fluid – Amphetamine</i>	2	13	401						
Not tested for drugs.	0	00	000						
Not Reported for drugs	8	96	095						
Reported as Unknown if tested for drugs.	9	99	999						
Tested for Drugs, Results Unknown. <i>Example: Blood test – Yes; Results – Unavailable</i>	2	01	997						
Tested for Drugs, Drugs Found, Type of Drug Unknown. <i>Example: Urine test – Yes; Drugs found – Yes</i>	2	02	998						
Both whole blood and urine tests, one negative and one positive. <i>Example: Blood – Negative; Urine - Benzoyllecgonine</i>	2	01	001	02	402				

Consistency Checks:

Check	IF	THEN
(7M1F)	PERSON TYPE equals 03, and SEATING POSITION is not equal to 11 or 13, and INJURY SEVERITY does not equal 4,	DRUG TEST STATUS must not equal 8, any DRUG SPECIMEN must not equal 96, and any DRUG TEST RESULTS must not equal 095.
(BTOP)	DRUG TEST STATUS equals 2,	<i>any DRUG SPECIMEN must not equal 00 or 99 and any DRUG TEST RESULT must not equal 000 or 999.</i>
(BT1P)	DRUG TEST STATUS equals 0,	<i>there must exist only one DRUG SPECIMEN equal to 00 and one DRUG TEST RESULT equal to 000 for this person.</i>
(BT2P)	DRUG TEST STATUS equals 8,	<i>there must exist only one DRUG SPECIMEN equal to 96 and one DRUG TEST RESULT equal to 095 for this person.</i>
(BT3P)	DRUG TEST STATUS equals 2,	at least one DRUG SPECIMEN must equal 01, 02, 11-15, 97, 98 , and one corresponding DRUG TEST RESULT must equal 001, 095, 100-295, 300-395, 400-495, 500-595, 600-695, 700-795, 800-895, 900-995, 996-998.
(BT6P)	DRUG TEST STATUS equals 9,	<i>there must exist only one DRUG SPECIMEN equal to 99 and one DRUG TEST RESULT equal to 999 for this person.</i>
(BT8P)	Only one record with the same DRUG SPECIMEN and DRUG TEST RESULT must exist.	--
(P073)	PERSON TYPE equals 02, 04-08, 10, and INJURY SEVERITY does not equal 4,	DRUG TEST STATUS should not equal 9, and any DRUG SPECIMEN should not equal 99, and any DRUG TEST RESULTS should not equal 999.
(P075)	PERSON TYPE equals 02, 04-08, 10 or 19, and INJURY SEVERITY does not equal 4,	DRUG TEST STATUS must not equal 8, any DRUG SPECIMEN must not equal 96, and any DRUG TEST RESULTS must not equal 095.
(P150)	POLICE REPORTED DRUG INVOLVEMENT equals 1 and METHOD OF DRUG DETERMINATION BY POLICE equals 2,,	DRUG TEST STATUS should not equal 0.
(P160)	POLICE REPORTED DRUG INVOLVEMENT equals 1, and METHOD OF DRUG DETERMINATION BY POLICE equals 2,	not all DRUG TEST RESULTS should equal 001.

Chlordiazepoxide	313
Chlorhexadol	314
Chloroform	926
Chlorotestosterone	801
Chlorphentermine	405

Drug	Code
Clobazam	315
Clonazepam	316
Clonitazene	126
Clorazepate Dipotassium	317
Clortermine	406
Clostebol	827
Clotiazepam	318
Cloxazolam	319
Coca Leaves	430
Cocaine	407
Codeine	128
Codeine combination product 90 mg/du	240
Codeine preparations – 200 mg/100 ml or 100 gm	241
Codeine & Isoquinoline	222
Codeine methylbromide	127
Codeine-N-oxide	223
Cyprenorphine	129
Dehydrochloromethyltestosterone	803
Delorazepam	320
Delta 1-dihydrotestosterone	840
Delta 9	600
“Depressants, Type Unknown”	395
Desomorphine	130
Dexfenfluramine	383
Dextroamphetamine	408
Dextromoramide	131
Dextropropoxyphene (dosage forms)	224
Diampromide	133
Diazepam	321
Dichloralphenazone	431
Diethylpropion	409
Diethylthiambutene	134
Diethyltryptamine (DET)	503
Difenoxin	135
Difenoxin 1 mg/25ug AtSO4/du	242
Difenoxion preparations – 0.5 mg/25 ug AtSO4/du	243
Dihydrocodeine	136
Dihydrocodeine combination product 90 mg/du	244
Dihydrocodeine preparations 10 mg/100 ml or 100 gm	245
Dihydroetorphine	226

Drug	Code
Dihydromorphine	137
Dihydrotestosterone	804
Dimenoxadol	138
Dimepheptanol (Racemethadol)	139
Dimethoxyamphetamine (DMA)	504
Dimethoxyethylamphetamine	535
Dimethoxy-(n)-propyl-thiophenethylamine	536
Dimethylthiambutene	140
Dimethyltryptamine (DMT)	505
Dioxaphetyl Butyrate	141
Diphenoxylate	142
Diphenoxylate preparations 2.5 mg/25 ug AtSO4	246
Dipipanone	143
Diprenorphine	227
Diprenorphine Hydrochloride	144
Dronabinol	507
Drostanolone	805
Drotebanol	145
Ecgonine	410
Embutramide	390
Estazolam	322
Ethchlorvynol	323
Ether	925
Ethinamate	324
Ethyl Ioflazepate	325
Ethylmorphine combination product 15 mg/du	247
Ethylmorphine preparations 100 mg/100 ml or 100 gm	248
Ethylamine	700
Ethylestrenol	806
Ethylmethylthiambutene	146
Ethylmorphine	147
Etonitazene	148
Etorphine	149
Etoxeridine	150
Fencamfamin	411
Fenethylline	412
Fenfluramine	413
Fenproporex	414
Fentanyl	151
Fiorinal + Codeine	152
Fiorinal	326
Fludiazepam	327

Drug	Code
Flunitrazepam	328
Fluoxymesterone	807
Flurazepam	384
Formebulone (Formebolone)	808
Frying Pan Lubricants	944
Furazabol	841
Furethidine	153
Gamma Hydroxybutyric (GHB)	377
Gamma Hydroxybutyric Acid preparations	391
Glass Chillers	943
Glutethimide	330
Hair spray	941
Halazepam	331
“Hallucinogens, Type Unknown”	595
Haloxazolam	332
Hashish	602
Hashish Oil	601
Heroin (Diacetylmorphine)	154
Hexobarbital	333
Hydrocodone	155
Hydrocodone & isoquinoline alkaloid<15 mg/du	249
Hydrocodone combination product<15 mg/du	250
Hydromorphenol	156
Hydromorphone	157
Hydroxy-Nortestosterone	842
Hydroxypethidine	158
Hydroxytestosterone	843
Hydroxyzine	334
Ibogaine	509
“Inhalants, Type Unknown”	995
Insecticides	942
Isomethadone	159
Ketamine	522
Ketazolam	335
Ketobemidone	160
Lacquer Thinners	904
Levo-alphacetylmethadol	228
Levomoramide	161
Levophenacylmorphan	162
Levomethorphan	163
Levorphanol	229
Levorphanol Tartrate	164
Lisdexamfetamine	436

Drug	Code
Loprazolam	336
Lorazepam	337
Lormetazepam	338
Lysergic Acid	511
Lysergic Acid Amide	527
Lysergic Acid Diethylamide (LSD)	528
Marijuana/Marihuana	603
Marinol	604
Mazindol	415
Mebutamate	339
Mecloqualone	340
Medazepam	341
Mefenorex	416
Meperidine (Pethidine)	165
Meperidine intermediate-A	251
Meperidine intermediate-B	252
Meperidine intermediate-C	253
Mephobarbital (Methylphenobarbital)	342
Meprobamate	343
Mescaline	512
Mestanolone	844
Mesterolone	809
Metazocine	166
Methadone	167
Methadone intermediate	254
Methamphetamine	417
Methandienone	810
Methandranone	811
Methandriol	812
Methandrostenolone	813
Methaqualone	344
Metharbital	345
Methcathinone	432
Methenolone	814
Methohexital	346
Methoxyamphetamine (PMA)	514
Methoxy-Methylenedioxy-amphetamine	437
Methoxy-NN-disopropyltryptamine	537
Methylaminorex	442
Methyldesorphine	168
Methyldienolone	845
Methyldihydromorphine	169
Methyl-dimethoxyamphetamine	530

Drug	Code
Methylenedioxy-N-ethylamphetamine	531
Methylenedioxymphetamine (MDA)	515
Methylenedioxymethamphetamine (MDMA)	513
Methylfentanyl	170
Methylone	435
Methylphenidate	418
Methyl-phenyl-propionoxyphiperidine (MPPP)	171
Methyltestosterone	815
Methylthiofentanyl	230
Methyltrienolone	846
Methyprylon	347
Metopon	172
Mibolerone	816
Midazolam	348
Modafinil	433
Moramide - intermediate	173
Morpheridine	174
Morphine	177
Morphine combination product/ 50 mg/ 100 ml or gm	255
Morphine methylbromide	176
Morphine methylsulfonate	175
Morphine-N-oxide	231
Myrophine	178
Nabilone	516
Nalorphine	179
Nandrolone	817
“Narcotics, Type Unknown”	295
N-Benzylpiperazine	439
N-Ethyl-1-phenylcyclohexylamine	533
N-Ethyl-3piperidyl benzilate	508
N-Ethylamphetamine	419
N-Hydroxymethylenedioxyamphetamine	538
Nicocodeine	180
Nicomorphine	181
Nimetazepam	349
Nitrazepam	350
Nitrous Oxide	924
N-Methylpiperidyl benzilate	539
N, N-Dimethylamphetamine (Dimethylamphetamine)	438

Drug	Code
Noracymethadol	182
Norandrostenediol	847
Norandrostenedione	848
Norbolethone	849
Norclostebol	850
Nordiazepam	351
Norethandrolone	818
Norlevorphanol	183
Normethadone	184
Normethandrolone	851
Normorphine	185
Norpipanone	186
Opium	187
Opium combination product 25 mg/du	256
Opium extract	232
Opium fluid extract	233
Opium, granulated	258
Opium Poppy	234
Opium, powdered	259
Opium preparations – 100 mg/ 100 ml or 100 gm	257
Opium Tincture	235
Oripavine	260
“Other”	996
Oxandrolone	819
Oxazepam	352
Oxazolam	353
Oxycodone	189
Oxymesterone	820
Oxymetholone	821
Oxymorphone	188
Paint and Paint Removers	902
Para-fluorofentanyl	190
Parahexyl (Synhexyl)	701
Paraldehyde	354
Paregoric	191
Parepectolin	192
“PCP, Type Unknown”	795
Pemoline	420
Pentazocine	193
Pentobarbital	355
Pentobarbital & noncontrolled active ingred.	393
Pentobarbital suppository dosage form	394

Drug	Code
Petrichloral	356
“Petroleum Products (gasoline, kerosene)”	903
Peyote	517
Phenadoxone	195
Phenampromide	196
Phenanthrine	197
Phenazocine	198
Phencyclidine	702
Phencyclidine Analogs	703
Phenylcyclohexyl-Pyrrolidine	709
Phenylethyl-phenyl-acetoxypiperidine (PEPAP)	236
Phencyclohexylamine	357
Phendimetrazine	421
Phenmetrazine	422
Phenobarbital	358
Phenomorphan	199
Phenoperidine	200
Phentermine	423
Phenylacetone (P2P)	518
Phenylcyclohexylamine	704
Pholcodine	202
Piminodine	203
Pinazepam	359
Piperidinocyclohexane-carbonitrile (PCC)	705
Pipradrol	424
Piritramide	204
Plastic Cement (airplane glue)	901
Poppy Straw	237
Poppy Straw Concentrate	238
Prazepam	360
Pregabalin	396
Proheptazine	205
Properidine	206
Propiram	207
Propoxyphene (Dextropropoxyphene, bulk (non-dosage forms))	208
Propylhexedrine	425
Psilocybin	519
Psilocyn	520
Pyrovalerone	426
“Pyrrolidine (PCPy, PHP, TCPy)”	706
Quazepam	361
Racemethorphan	209

Drug	Code
Racemoramide	210
Racemorphan	211
Remifentanil	239
Secobarbital	362
Secobarbital & noncontrolled active ingred.	397
Secobarbital suppository dosage form	398
Sibutramine	385
SPA	427
Stanolone	822
Stanozolol	823
Stenbolone	852
Stimulant compounds previously excepted	440
“Stimulants, Type Unknown”	495
Sufentanil	212
Sulfondiethylmethane	363
Sulfonethylmethane	364
Sulfonmethane	365
Talbutal	366
Temazepam	367
Tested; Drugs Found; Type Unknown/Positive	998
Tested; Results unknown	997
Testolactone	824
Testosterone	825
Tetrahydrocannabinols (THC)	605
Tetrahydrogestrinone	853
Tetrazepam	368
Thebacon	213
Thebaine	214
Thenylfentanyl	369
Thiamylal	370
Thienyl-cyclohexyl-piperidine	708
Thienyl Cyclohexyl Pyrrolidine	710
Thiofentanyl	215
Thiopental (Pentothal)	371
Thiophene	707
Tiletamine/Zolazepam (Telazol)	372
Tilidine	216
Traizolam	373
Trenbolone	826
Trimeperidine	217
Trimethoxy amphetamine	521
Tybamate	374

Drug	Code
Unknown if Tested for Drugs	999
Vinbarbital	434
Volatile Solvents (toluene)	900
Zaleplon	386
Zolpidem	387
Zopiclone	399

P22/NM21 - Transported to First Medical Facility by

FORMAT: 1 numeric

SAS NAME: Person.Hospital

ELEMENT VALUES:

Codes	Attributes
0	Not Transported
1	EMS Air
5	EMS Ground
3	EMS Unknown Mode
2	Law Enforcement
4	Transported Unknown Source
6	Other
8	Not Reported
9	Reported as Unknown

Definition: This element identifies the method of transportation this person was provided to receive treatment or be evaluated for a possible injury at the first hospital or medical facility.

Remarks: Medical Facility refers to an injury treatment facility. The treatment facility is the first medical facility to which the person is taken. Use appropriate attribute, even if the person dies en route to the treatment facility. A morgue is not an injury treatment facility.

0 (Not Transported) is used for victims who are dead on the scene and for those who are not taken (or do not go) to a treatment facility or hospital for treatment. For example, an uninjured occupant rides along with an injured person to a treatment facility. **0 (Not Transported)** would be used if the person did not go to a treatment facility directly from the scene, but was transported at a later time for injuries sustained in this crash. If the case materials state the person was transported but does not specifically state that the transport was from the scene, then consider the person transported directly from the scene of the crash.

If a person is moved from the crash scene by emergency services personnel (EMS, rescue squad, fire department, law enforcement) as part of the transport process, consider the person as transported. For example, an injured person that is driven by emergency services to a location to be air-lifted should be coded as [1 \(EMS Air\)](#).

There can also be situations where a person leaves the crash scene (e.g., walks for help) or is moved from a crash scene by a party other than emergency services. For example, in a remote or inaccessible location a private citizen drives an injured person to an accessible location before obtaining help and acquiring emergency services assistance from this new location. Consider these situations as [0 \(Not Transported\)](#) for treatment even if the person was eventually transported for treatment from this new location.

1 (EMS Air) includes any air transport device. This code would be used any time air transport was used for this person. For example, if there is an indication that both air and ground transportation were used, code **1 (EMS Air)**.

5 (EMS Ground) includes transport by private and county/city-owned ambulance or rescue squad vehicles.

3 (EMS Unknown Mode) is used when a person is transported to a treatment facility by EMS, but the mode of transportation is not known.

2 (Law Enforcement) includes transport by State, county, or local law enforcement agency vehicles.

4 (Transported Unknown Source) is used if you know the person was transported to a treatment facility, but you do not know the source.

6 (Other) includes transport by private citizens or individuals who drive themselves to the hospital or treatment facility. May be indicated on your crash report as “POV” (Privately/Personally Owned Vehicle).

If a police crash report data element is coded with the attribute “Other” but the officer does not specify what this refers to:

1. Code **6 (Other)** if the police crash report attribute choices can be matched to or include all the attributes in FARS/CRSS.
2. Code **8 (Not Reported)** if the police crash report choices cannot be matched to or include all the attributes in FARS/CRSS.

8 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered “**Not Reported**.”

Code **8 (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials).
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

9 (Reported as Unknown) is used when it is reported as “unknown” whether or not this victim was taken (or went) to a hospital/treatment facility for treatment.

Consistency Checks:

Check	IF	THEN
(2U3F)	INJURY SEVERITY equals 3,	TRANSPORTED TO FIRST MEDICAL FACILITY BY should not equal 0.
(P090)	INJURY SEVERITY equals 0,	TRANSPORTED TO FIRST MEDICAL FACILITY BY must equal 0.

Consistency Checks (FARS Only):

Check	IF	THEN
(A551)	EMS TIME AT HOSPITAL equals 8888, 9997, 9998,	TRANSPORTED TO FIRST MEDICAL FACILITY BY should not equal 1, 3, 5 for any PERSON.
(P091)	TRANSPORTED TO FIRST MEDICAL FACILITY BY equals 1, 3, 5,	EMS TIME AT HOSPITAL should not equal 8888, 9997, 9998.
(P093)	all persons TRANSPORTED TO FIRST MEDICAL FACILITY BY equals 2, 4,	NOTIFICATION TIME EMS, ARRIVAL TIME EMS, EMS TIME AT HOSPITAL must equal 8888.

Check	IF	THEN
(P095)	TRANSPORTED TO FIRST MEDICAL FACILITY BY equals 0 for every person in the case,	EMS TIME AT HOSPITAL must not equal 0000-2399, 9999.
(P520)	CRASH DATE and DEATH DATE are the same, and CRASH TIME and DEATH TIME are the same,	TRANSPORTED TO FIRST MEDICAL FACILITY BY should equal 0, and DIED AT SCENE/EN ROUTE should equal 7.
(P50P)	DIED AT SCENE/EN ROUTE equals 7,	TRANSPORTED TO FIRST MEDICAL FACILITY BY must equal 0.
(P51P)	DIED AT SCENE/EN ROUTE equals 8,	TRANSPORTED TO FIRST MEDICAL FACILITY BY must equal 1-6.
(P52P)	DIED AT SCENE/EN ROUTE equals 9,	TRANSPORTED TO FIRST MEDICAL FACILITY BY must equal 8 or 9.
(P55P)	TRANSPORTED TO FIRST MEDICAL FACILITY BY equals 9,	DIED AT SCENE/EN ROUTE must equal 0, 9.

P23/NM22 - Died at Scene/En Route - FARS Only

FORMAT: 1 numeric

SAS NAME: Person.DOA

ELEMENT VALUES:

Codes	Attributes
0	Not Applicable
7	Died at Scene
8	Died En Route
9	Unknown

Definition: This element identifies if this person died at the scene of the crash or en route to a hospital or treatment facility.

Remarks:

0 (Not Applicable) is used for non-fatalities and victims dying at locations other than the scene or en route (e.g., hospital, at home, etc.).

7 (Died at Scene) is used for victims who are dead on the scene of the crash.

8 (Died En Route) is used for victims who die en route to a hospital or treatment facility by EMS or other transport.

9 (Unknown) is used when you know the victim is a fatality, but you don't know if the victim died at the scene, en route, or at another location (e.g., home).

Consistency Checks:

Check	IF	THEN
(1R1P)	If DIED AT SCENE/EN ROUTE equals 7, 8,	INJURY SEVERITY must equal 4.
(P50P)	DIED AT SCENE/EN ROUTE equals 7,	TRANSPORTED TO FIRST MEDICAL FACILITY BY must equal 0.
(P510)	EMS TIME AT HOSPITAL equals 8888, 9997, 9998,	DIED AT SCENE/EN ROUTE should not equal 8 for any PERSON.
(P51P)	DIED AT SCENE/EN ROUTE equals 8,	TRANSPORTED TO FIRST MEDICAL FACILITY BY must equal 1-6.
(P52P)	DIED AT SCENE/EN ROUTE equals 9,	TRANSPORTED TO FIRST MEDICAL FACILITY BY must equal 8 or 9.
(P55P)	TRANSPORTED TO FIRST MEDICAL FACILITY BY equals 9,	DIED AT SCENE/EN ROUTE must equal 0, 9.
(P56P)	DIED AT SCENE/EN ROUTE equals 7,	DEATH TIME should be within 30 minutes of the CRASH TIME.
(P520)	CRASH DATE and DEATH DATE are the same, and CRASH TIME and DEATH TIME are the same,	TRANSPORTED TO FIRST MEDICAL FACILITY BY should equal 0, and DIED AT SCENE/EN ROUTE should equal 7.
(P530)	EMS TIME AT HOSPITAL equals 9996,	DIED AT SCENE/EN ROUTE must equal 8 for at least one person.
(P53P)	INJURY SEVERITY equals 0-3, 5, 6,	DIED AT SCENE/EN ROUTE must equal 0.

Check	IF	THEN
(P54P)	DIED AT SCENE/EN ROUTE equals 8,	EMS TIME AT HOSPITAL should not equal 8888, 9997, 9998.

P24/NM23 - Death Date - FARS Only

FORMAT: 2 sets of 2 numeric, 1 set of 4 numeric

SAS NAME: Person.DEATH_DA; Person.DEATH_MO; Person.DEATH_YR

ELEMENT VALUES:

Month:

Codes	Attributes
88	Not Applicable (Non-fatal)
01-12	Month of the Year
99	Unknown

Day:

Codes	Attributes
88	Not Applicable (Non-fatal)
01-31	Day of the Month
99	Unknown

Year:

Codes	Attributes
8888	Not Applicable (Non-fatal)
--	Actual Year of Death
9999	Unknown

Definition: This element records the month, day, and year of this person's death.

Remarks: The death must occur within **thirty 24-hour time periods** from time of the crash in order to be an applicable FARS death.

This element, although it contains three pieces of information, should be treated as one element. Therefore, never leave any one portion blank when another is not.

Normally, the medical examiner or coroner is source of data for death date. If there are no data inconsistencies or errors, use the official death date as recorded on the death certificate. Do not change the official death date without good cause.

Consistency Checks:

Check	IF	THEN
(1U1F)	INJURY SEVERITY equals 4,	DEATH DATE must not equal 88888888.
(1V0P)	DEATH MONTH or DAY equals 88, or DEATH YEAR equals 8888,	all must equal 8s.
(2U1F)	INJURY SEVERITY is not equal to 4,	DEATH DATE must equal 88888888.
(2V0P)	DEATH DAY is 01-31, and DEATH MONTH is 01-12,	DEATH DAY must be a valid day for DEATH MONTH.
(3U0P)	DEATH DATE equals CRASH DATE, and CRASH TIME is not equal to 9999,	DEATH TIME must not be less than CRASH TIME.

Check	IF	THEN
(4V1F)	INJURY SEVERITY equals 4,	DEATH DATE and DEATH TIME for this person must be within 720 hours of the CRASH DATE and CRASH TIME.
(4V2F)	CRASH MONTH equals 12, and DEATH MONTH equals 01,	DEATH YEAR must equal CRASH YEAR plus 1.
(4V3F)	CRASH MONTH equals 12,	DEATH MONTH must equal 01, 12, 88, 99.
(4V4F)	CRASH MONTH equals 02-11, and DEATH MONTH is not equal to 88 or 99,	DEATH MONTH must equal CRASH MONTH or CRASH MONTH plus 1.
(4V5F)	CRASH MONTH equals 01, and DEATH MONTH is not equal to 88 or 99,	DEATH MONTH must equal CRASH MONTH or CRASH MONTH plus 1 or CRASH MONTH plus 2.
(4V6P)	DEATH MONTH is not equal to blanks,	DEATH DAY and DEATH YEAR must not equal blanks.
(4V7P)	DEATH DAY is not equal to blanks,	DEATH MONTH and DEATH YEAR must not equal blanks.
(4V8P)	DEATH YEAR is not equal to blanks,	DEATH MONTH and DEATH DAY must not equal blanks.
(6V0P)	DEATH DATE must not be less than CRASH DATE.	--
(7V0F)	DEATH YEAR equals 9999,	CRASH MONTH must not be 01-11.
(8V0P)	DEATH YEAR equals 9999,	DEATH MONTH and DEATH DAY must equal 99.
(9V0P)	DEATH MONTH equals 99,	DEATH DAY must equal 99.
(P520)	CRASH DATE and DEATH DATE are the same, and CRASH TIME AND DEATH TIME are the same,	TRANSPORTED TO FIRST MEDICAL FACILITY BY should equal 0, and DIED AT SCENE/EN ROUTE should equal 7.

P25/NM24 - Death Time - FARS Only

FORMAT: 4 numeric

SAS NAME: Person.DEATH_HR; Person.DEATH_MN; Person.DEATH_TM

ELEMENT VALUES:

Codes	Attributes
8888	Not Applicable (Non-fatal)
0000-2359	Valid Military Time
0099-2399	Known Hour but Unknown Minutes
9999	Unknown

Definition: This element identifies the hour and minute of this person's death using the 24-hour clock format.

Remarks: If minutes are unknown, code the actual hour and "99" for the minutes. One minute after midnight is coded **0001**.

Normally, the medical examiner or coroner is the source of data for death time. If there are no data inconsistencies or errors, use the official death time as recorded on the death certificate. Do not change the official death time without good cause.

If it is known that the person died at the scene and the official death time or "pronounced death time" (on the death certificate) is known to be in error, or is greater than 30 minutes after the crash time then [CRASH TIME](#) is the appropriate DEATH TIME to be used.

0099-2399 (Known Hour but Unknown Minutes) *If minutes are unknown, code the actual hour and "99" for the minutes. One minute after midnight is coded 0001.*

9999 (Unknown) *If the Death certificate indicates the hour of death is unknown or provides a range greater than an hour, enter 9999 (Unknown).*

How to Code Midnight:

In general, code midnight as **0000**. However, there may be confusion over which day midnight falls into. Crash Time is recorded between 00:00-23:59. Midnight is coded as 00:00 to represent the beginning of a new day. This may not be the practice followed in your sources. Therefore, you have to determine which part of the day is being considered in your sources.

End of Day

If your data sources give you a Crash Date and are consistent in talking about the end of that day, when they give the time of the crash as "midnight," "12:00-midnight," "24:00," or "00:00," then you should code Crash Time as **2359**.

Beginning of Day

If your sources give a Crash Date and are consistent in referring to the beginning or early moments of that day when they give a crash time, code midnight as **0000**.

Consistency Checks:

Check	IF	THEN
(1U2F)	INJURY SEVERITY equals 4,	DEATH TIME must not equal 8888.
(2U2F)	INJURY SEVERITY is not equal to 4,	DEATH TIME must equal 8888.
(3U0P)	DEATH DATE equals CRASH DATE, and CRASH TIME is not equal to 9999,	DEATH TIME must not be less than CRASH TIME.
(4V1F)	INJURY SEVERITY equals 4,	DEATH DATE and DEATH TIME for this person must be within 720 hours of the CRASH DATE and CRASH TIME.
(P56P)	DIED AT SCENE/EN ROUTE equals 7,	DEATH TIME should be within 30 minutes of the CRASH TIME.
(P520)	CRASH DATE and DEATH DATE are the same, and CRASH TIME AND DEATH TIME are the same,	TRANSPORTED TO FIRST MEDICAL FACILITY BY should equal 0, and DIED AT SCENE/EN ROUTE should equal 7.

P26 - Related Factors – Person (Motor Vehicle Occupant) Level

FORMAT: 2 numeric occurring 3 times

SAS NAME: Person.P_SF1, Person.P_SF2, Person.P_SF3

ELEMENT VALUES:

Codes	Attributes

*88	Seat Back Not in Normal Upright Position, Seat Back Reclined
91	Portable Electronic Devices
92	Person in Ambulance Treatment Compartment
99	Reported as Unknown

***FARS ONLY ATTRIBUTES**

Definition: This element identifies factors related to motor vehicle occupants other than drivers expressed by the investigating officer.

Remarks: Code information provided by the investigating officer associated with this person from the narrative, contributing factors/circumstances field, or citations/violations section of the case materials.

In addition to passengers in motor vehicles in-transport ([Unit Type](#) 1), this element includes any occupants in motor vehicles that are not in-transport (Unit Types 2, 3, 4). The attributes that are applicable to each is limited by [Person Type \(P7\)](#).

The following lists those related factors that may be used for each [PERSON TYPE \(P7\)](#):

Person Type	Valid Related Factors
01 (Driver of a Motor Vehicle In-Transport)	00
02 (Passenger of a Motor Vehicle In-Transport)	00, 05, 08, 09, 10, 18, 32, 56, 86-89, 92, 99
03 (Occupant of a Motor Vehicle Not In-Transport)	00, 05, 08, 09, 10, 18, 21, 26, 28, 29, 32, 33, 37, 40-42, 44, 45, 47, 51, 52, 56-70, 72-78, 80-83, 86-89, 91, 92, 99
09 (Unknown Occupant Type in a Motor Vehicle In-Transport)	00, 05, 08, 09, 10, 18, 32, 86-89, 92, 99

For forms with [PERSON TYPE 01 \(Driver of a Motor Vehicle In-Transport\)](#), zero-fill all three fields. The related factors for drivers are captured in the [Related Factors-Driver Level](#).

Coding Hierarchy:

When more than three attributes apply, select the attributes that have not been previously captured under other related elements.

00 (None) is used when no applicable related factors are noted in the case materials. Zero-fill all fields. Also, use **00 (None)** to complete the remaining fields when you will be recording less than three related factors. DO NOT leave any remaining fields blank.

05 (Interfering with Driver) is used when the case materials identify that the occupant of a motor vehicle in-transport was interfering with the driver.

Examples include:

- Obstructing the driver's view.
- Striking the driver with their body or other object.
- Rambunctious individuals who cause the driver to be inattentive, even without touching the driver or controls in the vehicle.
- A motorcycle passenger (or other cyclist) shifting their weight or affecting the driver's control.

***08 (Mentally Challenged)** is used when the case materials identify the occupant of the motor vehicle has a documented mental illness or intellectual disorder noted by the officer.

09 (Construction/Maintenance/Utility Worker) is used if the case materials identify this person was an occupant of a working motor vehicle. This includes highway department, contractor, or utility company personnel.

10 (Alcohol and/or Drug Test Refused) is used when the officer notes that this person refused to take an alcohol and/or a drug test. Refusing a test does not necessarily mean that a test was not given. It is possible that after a refusal, the officer may have obtained a warrant or some other authorization to administer a test post-refusal.

This includes when the person initially refuses and later consents. Because of this, it is possible to code 10 (Alcohol and/or Drug Test Refused) and also code an actual test with results for the same person.

18 (Mother of Dead Fetus/Mother of Infant Born Post-Crash) is used when the case materials identify that this occupant is the mother of a fetus that died in or as a result of this crash or it is identified that this occupant gave birth after the crash whether the child survives or not. Note that for crash classification purposes, a fetus is considered to be part of a pregnant woman rather than a separate individual and, thus, is not counted as a separate occupant in the crash.

21 (Overloading or Improper Loading of Vehicle with Passengers or Cargo) is used when the case materials identify this occupant improperly loaded the vehicle occupants or cargo into or on the vehicle. This may only be used on the PERSON TYPE **03 (Occupant of a Motor Vehicle Not In-Transport)** and in SEATING POSITION **11 (Front Seat, Left Side)**.

Examples include:

- The vehicle had more than 3 passengers in the front seat.
- There were persons riding on the exterior of the vehicle.
- The vehicle was carrying occupants that were sitting or standing on the rails, tailgate of a pickup or improperly sitting in the bed of a pickup.
- More than one person secured in a belt restraint.
- An unsecured or uncovered load violation.
- The vehicle's trunk was open with extra-large cargo protruding.
- The case materials state the vehicle was overweight, over length or illegally or improperly oversize.

***26 (Following Improperly)** is used when the case materials identify this occupant followed too closely. This may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle.

Examples include:

- Following a fire truck too closely.
- Failure to maintain a safe passing distance between trucks.
- Following another vehicle in a caravan too closely to allow entry by a merging vehicle.
- Following too close, generally. Also code for cases where the case materials document the vehicle was following too closely for weather conditions.

89 (Parked Motor Vehicle with Equipment Extending into the Travel Lane) is used when the case materials identify this occupant parked a vehicle but extended equipment (e.g., extended mirrors) attached to the vehicle was still in the travel lane. This may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#).

NOTE: This should not be used for loads of vehicles extending into the travel lane such as attached trailers or oversized cargo. In these cases, the vehicle is in-transport and not parked.

***28 (Improper Lane Usage)** is used when the case materials identify this occupant failed to properly keep their vehicle in the appropriate lane of travel. This attribute does not apply to vehicles that run off the roadway or that cross the median. Also do not use this value for a vehicle that leaves its lane because of a previous impact or at the direction of a flagman or police officer. This may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle.

Examples include:

- A vehicle that “drove left of center” striking an oncoming vehicle (includes both crossing a painted centerline and failing to maintain the proper side of a two-lane roadway with no painted centerline).
- A vehicle that goes straight in a turn lane.
- A vehicle that was using more than one lane on its side of a multi-lane highway.
- Trucks, buses, or slow vehicles failing to keep right for faster moving traffic.

For situations where the vehicle is on the wrong side as a result of a passing maneuver, see [33 \(Passing Where Prohibited by Posted Signs, Pavement Markings, or School Bus Displaying Warning Not to Pass\)](#).

***29 (Intentional Illegal Driving on Road Shoulder, n Ditch, on Sidewalk or on Median)** is used when the case materials identify this occupant was **intentionally** illegally driving in a location off of the roadway (e.g., shoulder, median, roadside, etc.) This attribute should not be used when the vehicle enters one of these locations as part of an avoidance maneuver or as a result of a critical or harmful event. Also do not use this value for a vehicle that leaves its lane at the direction of a flagman or police officer. This may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle.

32 (Opening Vehicle Closure into Moving Traffic or While Vehicle is in Motion) is used when the case materials identify this occupant improperly opened their door into moving traffic.

Examples include:

- An occupant opens a side door into moving traffic.
- An occupant opening the door at a stop light.
- An occupant of a parked motor vehicle opening a door into the travel lane.

***33 (Passing Where Prohibited by Posted Signs, Pavement Markings, or School Bus Displaying Warning Not to Pass)** is used when the case materials identify this occupant passed improperly by executing a passing maneuver where prohibited as designated by traffic controls or rules of the road. This may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle.

Examples include:

- A vehicle passing stopped a school bus.
- A vehicle crossing over the solid line to pass another vehicle.
- Passing a vehicle stopped to allow a pedestrian movement.

***37 (Traveling on Prohibited Trafficways)** is used when the case materials identify this occupant was driving on an open trafficway that prohibited travel for the kind of vehicle they were operating. For example, driving a truck where prohibited, or operating a vehicle with hazardous materials cargo where prohibited. For trucks or slower vehicles using the left lane when prohibited, use [28 \(Improper Lane Usage\)](#). This may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle.

***40 (Passing Through or Around Barrier)** is used when the case materials identify this occupant drove out of or around a “demarcated” area. This may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle. For example, a working vehicle backing out of the closed portion of the work zone into an open travel lane.

***41 (Failure to Observe Warnings or Instructions on Vehicles Displaying Them)** is used when the case materials identify this occupant failed to heed warnings or follow instructions displayed on other vehicles. This may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle.

Examples include:

- Construction instructions such as arrows directing traffic mounted on a vehicle
- Instructions on or warnings by emergency vehicles (ambulances, fire trucks, police cars)
- Failure to observe a wide right-turn warning on trucks or buses
- Failure to heed hazard lights on a disabled vehicle or a school bus arm

***42 (Failure to Signal Intentions)** is used when the case materials identify this occupant failed to signal their intentions. This attribute includes a failure to signal by either lamp turn signal or hand. This may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle.

***44 (Driving Too Fast for Conditions or In Excess of Posted Maximum)** is used when the case materials identify this occupant was operating the vehicle too fast for certain road conditions or exceeding the posted speed limit. This may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle.

***45 (Driving Less Than Posted Minimum)** is used when the case materials identify this occupant was driving too slowly, or so as to impede traffic. This may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle.

***47 (Making Right Turn from Left-Turn Lane, Left Turn from Right-Turn Lane)** is used when the case materials identify this occupant was making an improper turn from a turn lane. To distinguish from [28 \(Improper Lane Usage\)](#), police officer must indicate the occupant's intention to turn to use this attribute. This may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle.

***51 (Operator Inexperience)** is used when the case materials identify this occupant lacks experience operating the vehicle they were in at the time of the crash. Should be expressed by officer, driver, or passenger and not presumed based on age, rental status, or State of residence. This may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle.

Examples include:

- A new/young recently licensed driver
- A driver inexperienced in the operation of a large truck or bus (based on the judgment of the police officer)
- A person driving a rental car where they are unfamiliar with the vehicle
- The driver parks the vehicle where parking is illegal because they are inexperienced.

***52 (Unfamiliar with Roadway)** is used when the case materials identify this occupant is unfamiliar with the area/location where they were when the crash occurred. Should be expressed by officer, driver, or passenger and not presumed based on age, rental status, or State of residence. This may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle.

Examples include:

- A driver from out-of-state is unfamiliar with area.
- A driver operating on a new stretch of road or section of road altered because of construction and/or detour.
- The driver parks the vehicle where parking is illegal because they are unfamiliar with the location.

56 (Non-Driver Flees Scene) is used when the case materials identify that this non-driver left the scene of a Hit-and-Run crash.

Examples include:

- A passenger of motor vehicle in-transport fled scene on foot.
- Occupant of an involved parked vehicle leaves by driving their vehicle from the scene.
- An involved motor vehicle in-transport is driven away by a passenger in that vehicle.

***57 (Improper Tire Pressure)** is used when the case materials identify that improper tire pressure was present in one or more tires of this vehicle. Improper tire pressure is not a defect, but rather the irresponsibility of the person. This may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle.

***59 (Overcorrecting)** is used when the case materials identify this occupant “overcorrected” based on the judgment of the police officer. This must be stated by the officer in the narrative or police crash report field to be coded. Overcorrecting and Oversteering are technically different but this attribute may be selected for a reported combination of the two (e.g., overcorrecting/ oversteering) on the police crash report. This may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle.

Vision Obscured By:

The following set of attributes identifies visual obstructions noted in the case materials. These attributes may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle.

***60 (Rain, Snow, Fog, Smoke, Sand, Dust)**

***61 (Reflected Glare, Bright Sunlight, or Headlights)**

***62 (Curve, Hill or Other Design Features [including traffic signs, embankment])**

***63 (Building, Billboard or Other Structures)**

***64 (Trees, Crops or Vegetation)**

***65 (Motor Vehicle [including load])**

Examples include:

- A car stopped on the roadway.
- A tractor-trailer in-transport on the road.
- A school bus stopped for the purpose of loading or unloading children.

***66 (Parked Vehicle)**

***67 (Splash or Spray of a Passing Vehicle)**

***68 (Inadequate Lighting System)**

***69 (Obstructing Angles on the Vehicle)** is used when the case materials identify obstructing angles on this person's vehicle. This attribute should not to be confused with visual obstructions from other vehicles. (See [65 \(Motor Vehicle \[including load\]\)](#) and [66 \(Parked Vehicle\)](#)).

***70 (Mirrors)** is used when the case materials identify that vision was obscured by any mirrors attached to or within a motor vehicle (e.g., rear view mirror, side mirror, etc.).

***72 (Other Visual Obstruction)** is used when the case materials identify that vision was obscured something other than previously listed. For example, a trailer that has been left parked on the side of the road by a truck or vehicle.

Skidding, Swerving, Sliding Due To:

This set of attributes is applicable to the occupant that attempted to avoid one of the following or whose ability to control the vehicle was affected by one of the following. These attributes may only be used on the Person Form for the occupant that is PERSON TYPE [03 \(Occupant of a Motor Vehicle Not In-Transport\)](#) and in SEATING POSITION [11 \(Front Seat, Left Side\)](#) in a working motor vehicle.

***73 (Severe Crosswind)** is used when the case materials identify this occupant's ability to control the vehicle was affected by severe crosswinds.

***74 (Wind from Passing Truck)** is used when the case materials identify this occupant's ability to control the vehicle was affected by winds produced by a passing truck.

***75 (Slippery or Loose Surface)** is used when the case materials identify this occupant's ability to control the vehicle was affected by the surface composition of the roadway and/or the condition of that composition. Not to be used when the surface is slippery due to environment conditions such as rain, ice, or snow (see [83 \(Ice, Snow, Slush, Water, Sand, Dirt, Oil or Wet Leaves on Road\)](#)).

Examples include:

- A slippery surface that is old or worn resulting in loose gravel on the roadway.
- Blacktop that is slick as a newly paved surface.

***76 (Tire Blowout or Flat)** is used when the case materials identify this occupant's ability to control the vehicle was affected by a tire blowout or flat.

***77 (Debris or Objects in Road)** is used when the case materials identify this driver attempted to avoid or lost control as a result of debris in the road. Examples would include nails, glass, trash cans, tire retread, trash, dead animals, pile of sand, barricades, etc.

***78 (Ruts, Holes, Bumps in Road)** is used when the case materials identify this driver attempted to avoid or lost control as a result of a road surface anomalies such as ruts, holes, dips, or bumps.

***80 (Vehicle in Road)** is used when the case materials identify this driver attempted to avoid or lost control as a result of another vehicle in the road. This includes both contact and non-contact vehicles that remain at the scene.

***81 (Phantom Vehicle)** is used when the case materials identify this driver attempted to avoid or lost control as a result of a non-contact vehicle that left the scene as described by the police officer.

***82 (Pedestrian, Pedal Cyclist, or Other Non-Motorist)** is used when the case materials identify this driver attempted to avoid or lost control as a result of a pedestrian, a pedal cyclist (bicyclist) or other type of non-motorist.

***83 (Ice, Snow, Slush, Water, Sand, Dirt, Oil or Wet Leaves on Road)** is used when the case materials identify this occupant's ability to control the vehicle was affected by a substance on the roadway that caused the roadway to be slick, which may interfere with the traction of the vehicle. This attribute does not include part of the roadway composition. For cases involving roadway composition issues, see [75 \(Slippery or Loose Surface\)](#).

Other Factors:

86 (Emergency Services Personnel) is used when the case materials identify that this person was a fire fighter, wrecker service worker, or emergency medical service (EMS) personnel. This includes personnel located in the cab and in the treatment compartment of an ambulance.

Note: For persons identifiable as EMS personnel located in the ambulance treatment compartment, also use RELATED FACTORS - PERSON (MV OCCUPANT) attribute [92 \(Person in Ambulance Treatment Compartment\)](#).

87 (Police or Law Enforcement Officer) is used when the case materials identify that this person was a police or law enforcement officer working at the time of the crash. The officer may be affiliated at the Federal, State, or local law enforcement level. This would also include military and park police, border patrol, and all other sworn law enforcement officers.

***88 (Seat Back Not in Normal Upright Position, Seat Back Reclined)** is used when the case materials identify that this occupant's seat back was not in a normal, safe driving/seating position prior to the crash.

91 (Portable Electronic Devices) is used when the case materials identify that this occupant had an electronic device (cell phone, MP3 player, PDA, etc.) in the vehicle that was somehow related to the crash occurrence.

92 (Person in Ambulance Treatment Compartment) is used when the case materials identify that this occupant was located in the ambulance treatment compartment. For example: patients, EMS personnel, and other person accompanying patient.

Note: For persons identifiable as EMS personnel also use RELATED FACTORS - PERSON (MV OCCUPANT) attribute [86 \(Emergency Services Personnel\)](#).

99 (Reported as Unknown) is used when the circumstances surrounding the crash are unknown and reported as "unknown" by the investigating officer. In these circumstances, nine-fill all fields. If **99 (Reported as Unknown)** is used for any field, ALL fields must be **99 (Reported as Unknown)**. DO NOT leave any remaining fields blank.

*FARS ONLY ATTRIBUTES

Consistency Checks:

Check	IF	THEN
(1WOP)	any RELATED FACTORS-PERSON LEVEL equals 99,	all factors must equal 99.
(2WOP)	any RELATED FACTORS-PERSON LEVEL equals blanks,	all factors must equal blanks.
(3WOP)	any RELATED FACTORS-PERSON LEVEL equals 00,	all subsequent factors must equal 00.
(4WOP)	A RELATED FACTORS-PERSON LEVEL (MV Occupant) between 05 and 92 can be used only once per person form.	--
(5N0F)	PERSON TYPE equals 02,	RELATED FACTORS-PERSON LEVEL (MV Occupant) must not equal 21, 26, 28, 29, 33, 37, 40-42, 44, 45, 47, 51-53, 57-70, 72-78, 80-83, 91.
(580F)	FIRST HARMFUL EVENT equals 14, and RELATED FACTORS- PERSON (MV OCCUPANT) LEVEL does not equal 32, 89 for at least one occupant in the not in-transport motor vehicle involved in the FIRST HARMFUL EVENT,	RELATION TO TRAFFICWAY should not equal 01.
(5M0G)	SPECIAL USE equals 06, and PERSON TYPE equals 02 or 09,	RELATED FACTORS-PERSON (MV OCCUPANT) LEVEL should equal 86 or 92.
(5MOH)	PERSON TYPE equals 1,	RELATED FACTORS – PERSON (MV OCCUPANT) LEVEL must equal 0.
(7M0F)	PERSON TYPE equals 03,	RELATED FACTORS-PERSON LEVEL (MV Occupant) must not equal 21, 26, 28, 29, 33, 37, 40-42, 44, 45, 47, 51, 52, 57-70, 72-78, 80-83, 91.

Check	IF	THEN
(A65F)	FIRST HARMFUL EVENT equals 14, and RELATED FACTORS - PERSON (MV OCCUPANT) LEVEL equals 32 or 89 for an occupant of the parked vehicle involved in the first harmful event,	CRASH TYPE should equal 15, 92 or 98 for the in-transport vehicle involved in the First Harmful Event.
(A66F)	FIRST HARMFUL EVENT equals 14, and CRASH TYPE equals 01-10 or 14,	RELATED FACTORS - PERSON (MV OCCUPANT) LEVEL must not equal 32 or 89 for any occupant of the parked vehicle involved in the FIRST HARMFUL EVENT.
(CLOP)	PERSON TYPE equals 09,	RELATED FACTORS-PERSON LEVEL (MV Occupant) must not equal 21, 26, 28, 29, 33, 37, 40-42, 44, 45, 47, 51, 52, 56-70, 72-78, 80-83, 91.

Consistency Check (FARS Only):

Check	IF	THEN
(5WOP)	RELATED FACTORS-PERSON LEVEL equals 18,	SEX must equal 2, and AGE must be greater than 012.

NM3/P4 - Person Number

FORMAT: 3 numeric

SAS NAME: Person.PER_NO

ELEMENT VALUES:

Codes	Attributes
001-999	Assigned Number

Definition: This element identifies a number for persons that are not in a motor vehicle in consecutive order.

Remarks: This element's values and remarks are identical to the Person Level (MV Occupant) Level element P4. Please see [P4 Person Number](#) for remarks.

Consistency Checks:

Check	Language
(CSI6)	For each VEHICLE NUMBER, PERSON NUMBERS must be consecutive, beginning with 001 and with no gaps.
(CSI7)	PERSON NUMBERS for persons not in motor vehicles must be consecutive, beginning with 001 and with no gaps.

Vehicle Number of Motor Vehicle Striking Non-Motorist**NM4****NM4 – Vehicle Number of Motor Vehicle Striking Non-Motorist****FORMAT:** 3 numeric**SAS NAME:** Person.STR_VEH**ELEMENT VALUES:**

Codes	Attributes
001-998	Assigned Vehicle Number

Definition: This data element captures the in-transport vehicle that made contact with this non-motorist.

Remarks: This only applies to those non-motorists who are not occupants of a motor vehicle. If a non-motorist is contacted by a parked or working motor vehicle that was propelled by an in-transport vehicle, record the vehicle number of the in-transport vehicle.

In cases where more than one vehicle makes contact with a non-occupant, code the number of the vehicle that caused the most significant injury. If uncertain, code the number of the vehicle that made contact first.

If a non-motorist is hit as a result of a vehicle-to-vehicle collision and you cannot reasonably determine which vehicle struck the non-motorist, use the lowest vehicle number of the MVIT(s) involved in the vehicle-to-vehicle event that resulted in the pedestrian or pedalcyclist collision. In the element [NM25 RELATED FACTORS – PERSON \(NOT A MOTOR VEHICLE OCCUPANT\) LEVEL](#) code [31 Default Code Used for Vehicle Numbering](#).

Check	IF	THEN
(5W0P)	RELATED FACTORS-PERSON LEVEL equals 18,	SEX must equal 2, and AGE must be greater than 012.

NM7 - Person Type

FORMAT: 2 numeric

SAS NAME: Person.PER_TYP

ELEMENT VALUES:

Codes	Attributes
04	Occupant of a Non-Motor Vehicle Transport Device
05	Pedestrian
06	Bicyclist
07	Other Cyclist
08	Person on Personal Conveyances
10	Persons In/On Buildings
19	Unknown Type of Non-Motorist

Definition: This element describes the role of this person involved in the crash.

Remarks:

04 (Occupant of a Non-Motor Vehicle Transport Device) refers to persons riding in an animal-drawn conveyance, on an animal, or injured occupants of railway trains, etc.

05 (Pedestrian) is used for all pedestrians except for those in/on personal conveyances (See [08 \(Persons on Personal Conveyances\)](#) below) and in buildings (See [10 \(Persons In/On Buildings\)](#) below). A person pushing a vehicle or being carried by a pedestrian should be coded **Pedestrian**.

06 (Bicyclist) is used for a 2-wheel, non-motorized cycle. This includes all persons (operator and passengers) on a bicycle and a person being pulled by a bicycle (e.g., in a wagon or bike trailer).

07 (Other Cyclist) is used for unicycles and tricycles.

08 (Person on Personal Conveyances): This attribute should be used for pedestrians using personal conveyances. A personal conveyance is a device, other than a transport device, used by a pedestrian for personal mobility assistance or recreation. These devices can be motorized or human powered, but not propelled by pedaling.

Inclusions:

1. Rideable toys
 - a. Roller skates, in-line skates
 - b. Skateboards
 - c. Skates
 - d. Baby carriage
 - e. Scooters
 - f. Toy wagons
2. Motorized rideable toys
 - a. Motorized skateboard
 - b. Motorized toy car
 - c.
3. Devices for personal mobility assistance
 - a. Segway-style devices

- b. Motorized and non-motorized [wheelchairs](#)
- c. Handicapped scooters

Exclusions:

1. Golf cart
2. Low speed vehicles (LSVs)
3. Go-carts
4. Minibike
5. "Pocket" motorcycles
6. Motor scooters
7. Moped

Wheelchair: Use the term, "wheelchair" as follows:

"Wheelchair - A mobility aid, usable indoors, and designed for and used by individuals with mobility impairments, whether operated manually or powered." Therefore, all wheelchair users, motorized or not, are **08 (Persons on Personal Conveyances)**.

RATIONALE:

Some States have passed legislation to classify operators of motorized wheelchairs as "pedestrians" and others as "motor vehicles." Also, there seems to be an increase in the variety of forms these devices take (if not in the actual number in use). Some resemble 3-wheeled scooters; others small 4-wheel carts; still others look like the typical human-powered wheelchair. They are in use by individuals who are unable to walk, who have limited walking ability, or who need to avoid walking for reasons of health or stamina. Since these devices simply supply a form of assisted "walking" for such persons, their legitimate users may be seen as "other persons on personal conveyances" just as other non-motorists moving along a sidewalk, walking with or against traffic on the edge of a road, crossing the roadway, or turning into a driveway.

10 (Persons In/On Buildings) is used for a person inside of or on a building who is struck by a motor vehicle directly or by way of an object set in motion (e.g., crash debris as a vehicle penetrates a wall). **10 (Persons In/On Buildings)** takes precedence over attributes "05-08."

19 (Unknown Type of Non-Motorist) is used only when it cannot be determined which attribute is applicable for persons not in motor vehicles.

Consistency Checks:

Check	IF	THEN
(050P)	PERSON TYPE equals 04-08, 19, and NUMBER OF VEHICLE FORMS SUBMITTED equals 001,	VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST must equal 001.

(PB29)	NON-MOTORIST ACTION/CIRCUMSTANCES equals 04, and PERSON TYPE equals 05 or 08,	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN should equal 410, 420, 430, 440 or 459.
(PB36)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 250,	PERSON TYPE must equal 08.
(PB49)	PERSON TYPE equals 05 or 08, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 13 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST,	at least one PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN should equal 211-214 or 219.
(PB50)	PERSON TYPE equals 05 or 08, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 10-12 or 16 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.	at least one PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN should equal 461, 465, 469, 510, 781, 782, 791, 792, 794, 795, or 799.
(PB52)	PERSON TYPE equals 06 or 07, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 13 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST,	at least one PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLIST should equal 610.

Check	IF	THEN
(PB59)	NON-MOTORIST ACTION/CIRCUMSTANCES equals 16, and PERSON TYPE equals 05 or 08,	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN should equal 459.
(PB60)	PERSON TYPE equals 05 or 08, and DRIVER PRESENCE equals 0 for the motor vehicle that strikes the non-motorist,	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN should equal 220.

Consistency Checks (FARS Only):

Check	IF	THEN
(9POF)	PERSON TYPE equals 04-08, 10, 19,	EXTRICATION must not equal 1, 9.
(P073)	PERSON TYPE equals 02, 04-08, 10, and INJURY SEVERITY does not equal 4,	DRUG TEST STATUS should not equal 9 and any DRUG SPECIMEN should not equal 99, and any DRUG TEST RESULTS should not equal 9999.
(P075)	PERSON TYPE equals 02, 04-08, 10 or 19, and INJURY SEVERITY does not equal 4,	DRUG TEST STATUS must not equal 8, any DRUG SPECIMEN must not equal 96, and any DRUG TEST RESULTS must not equal 9995.

NM8/P8 - Injury Severity

FORMAT: 1 numeric

SAS NAME: Person.Inj_Sev

ELEMENT VALUES:

Codes	Attributes
0	No Apparent Injury (O)
1	Possible Injury (C)
2	Suspected Minor Injury (B)
3	Suspected Serious Injury (A)
4	Fatal Injury (K)
5	Injured, Severity Unknown
6	Died Prior to Crash*
9	Unknown/Not Reported

Definition: This element describes the severity of the injury to this person in the crash.

Remarks: This element's values and remarks are identical to the Person Level (MV Occupant) element P8. Please see [P8 Injury Severity](#) for remarks.

Consistency Checks:

Check	IF	THEN
(2U3F)	INJURY SEVERITY equals 3,	TRANSPORTED TO FIRST MEDICAL FACILITY BY should not equal 0.
(3P0F)	PERSON TYPE equals 03-08, 10, 19,	INJURY SEVERITY should not equal 6.
(FP8F)	INJURY SEVERITY is blank, case status is flawed.	--
(P071)	PERSON TYPE equals 02, 04-08, 10, and INJURY SEVERITY does not equal 4,	ALCOHOL TEST STATUS should not equal 9, ALCOHOL TEST TYPE should not equal 99, and ALCOHOL TEST RESULT should not equal 999.
(P090)	INJURY SEVERITY equals 0,	TRANSPORTED TO FIRST MEDICAL FACILITY BY must equal 0.
(P300)	POLICE REPORTED ALCOHOL INVOLVEMENT equals 1, and INJURY SEVERITY equals 4,	ALCOHOL TEST STATUS should not equal 0.
(U160)	UNLIKELY: INJURY SEVERITY equals 6.	--
(U350)	UNLIKELY: INJURY SEVERITY equals 1-6, and SEATING POSITION equals 98.	--

Consistency Check (FARS Only):

Check	IF	THEN
(1R1P)	If DIED AT SCENE/EN ROUTE equals 7, 8,	INJURY SEVERITY must equal 4.
(1U1F)	INJURY SEVERITY equals 4,	DEATH DATE must not equal 88888888.
(1U2F)	INJURY SEVERITY equals 4,	DEATH TIME must not equal 8888.
(2U1F)	INJURY SEVERITY is not equal to 4,	DEATH DATE must equal 88888888.
(2U2F)	INJURY SEVERITY is not equal to 4,	DEATH TIME must equal 8888.

Check	IF	THEN
(4V1F)	INJURY SEVERITY equals 4,	DEATH DATE and DEATH TIME for this person must be within 720 hours of the CRASH DATE and CRASH TIME.
(4U0F)	Each original submission must have at least one Person Level form with INJURY SEVERITY coded 4.	--
(7EOP)	INJURY SEVERITY equals 4,	DEATH CERTIFICATE NUMBER must NOT equal 0000-00-000000.
(7E1P)	INJURY SEVERITY equals 4,	RACE must not equal 00.
(7E2P)	INJURY SEVERITY equals 4,	HISPANIC ORIGIN must not equal 00.
(7E3P)	INJURY SEVERITY is not equal to 4,	RACE must equal 00 AND HISPANIC ORIGIN must equal 00.
(7F0P)	DEATH CERTIFICATE NUMBER is not blank or 0000-00-000000,	INJURY SEVERITY must equal 4.
(7F1P)	RACE equals 00,	INJURY SEVERITY must not equal 4.
(7F2P)	HISPANIC ORIGIN equals 00,	INJURY SEVERITY must not equal 4.
(7F3P)	RACE is not equal to 00, and HISPANIC ORIGIN is not equal to 00,	INJURY SEVERITY must equal 4.
(7ROP)	FATAL INJURY AT WORK equals 0, 1, 9,	INJURY SEVERITY must equal 4.
(7WOP)	FATAL INJURY AT WORK equals 8	INJURY SEVERITY must not equal 4.
(P073)	PERSON TYPE equals 02, 04-08, 10, and INJURY SEVERITY does not equal 4,	DRUG TEST STATUS should not equal 9 and any DRUG SPECIMEN should not equal 99, and any DRUG TEST RESULTS should not equal 9999.
(P1A0)	AGE is less than 012, and INJURY SEVERITY equals 4,	FATAL INJURY AT WORK should equal 0.
(P53P)	INJURY SEVERITY equals 0-3, 5, 6,	DIED AT SCENE/EN ROUTE must equal 0.

NM9 - Pedestrian/Bike Typing

FORMAT: Elements Completed in MDE

SAS NAME: Various

Definition: This element describes the precrash actions leading to crashes between motor vehicles and pedestrians or bicyclists.

Remarks: Pedestrian and Bicycle Crash Type describes the precrash actions of the involved parties to better define the sequence of events and precipitating actions leading to crashes between motor vehicles and pedestrians or bicyclists.

During the 1970s, NHTSA developed methodologies for typing pedestrian and bicycle crashes. In the 1990s the methodologies were applied to more than 8,000 pedestrian and bicycle crashes in six States. The results provided a representative summary of the distribution of crash types experienced by pedestrians and bicyclists and, over time, this method has evolved and was refined. Pedestrian/Bike typing is offered as a tool to help overcome hindrances to the development of effective countermeasures to prevent bicyclist and pedestrian crashes

In FARS and CRSS, Pedestrian and Bicycle Crash Typing is accomplished through a software application referred to as the **Ped/Bike Wizard**. By clicking on choices in the wizard, the analyst/coder enters data into the file without typing each specific data element's attribute (numeric code).

The elements, attributes, and remarks are not presented here in the main Coding and Validation manual, but rather in the detailed companion **FARS/CRSS Pedestrian Bicyclist Manual**.

The Pedestrian/Bike Typing application is presented for the following [person types](#):

- [Pedestrian](#),
- [Persons on Personal Conveyances](#),
- [Bicyclist](#),
- [Other Cyclist](#).

Consistency Checks:

Check	IF	THEN
(1PK2)	NON-MOTORIST LOCATION AT TIME OF CRASH equals 21,	SIDEWALK PRESENT must equal 1.
(1PK3)	NON-MOTORIST LOCATION AT TIME OF CRASH equals 01 or 10,	MARKED CROSSWALK PRESENT must equal 1.
(FP9F)	PERSON TYPE equals 05, 06, 07, 08 and the PEDESTRIAN/ CRASH TYPE equals blank, case status is flawed.	--
(PB00)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 110-910,	at least one SEQUENCE OF EVENTS for the striking vehicle must equal 08 or 15.
(PB02)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 111-980,	at least one SEQUENCE OF EVENTS for the striking vehicle must equal 09.
(PB04)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN for a person involved in the first harmful event equals 211, 212, 461, 465, 680, 830, 890, 900 or 910,	RELATION TO JUNCTION (b) must not equal 02. Note: This edit is restricted to vehicles that are involved in only one event with pedestrian(s).

Check	IF	THEN
(PB05)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN for a person involved in the first harmful event equals 311, 312 or 313,	RELATION TO TRAFFICWAY must equal 01 or 11. Note: This edit is restricted to vehicles that are involved in only one event with pedestrian(s).
(PB06)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 730,	TRAFFIC CONTROL DEVICE for the striking vehicle must equal 01-03.
(PB07)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE for a person involved in the first harmful event equals 311, 312, 313, 321, 322 or 323,	RELATION TO JUNCTION (b) must equal 04 or 08. Note: This edit is restricted to vehicles that are involved in only one event with bicyclist(s).
(PB08)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE for a person involved in the first harmful event equals 141-144, 147, 151-157 or 159,	RELATION TO JUNCTION (b) must equal 02 or 03. Note: This edit is restricted to vehicles that are involved in only one event with bicyclist(s).
(PB09)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 141, 143, 151-158, 217 or 218,	TRAFFIC CONTROL DEVICE for the striking vehicle must not equal 00.
(PB10)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 151, 156, 157, 217 or 218,	TRAFFIC CONTROL DEVICE for the striking vehicle must equal 01-04.
(PB11)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 143 or 154,	TRAFFIC CONTROL DEVICE for the striking vehicle must equal 01-04, 08, 20, 21, 28 or 29.
(PB12)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN for a person involved in the first harmful event equals 510, 520 or 590,	RELATION TO TRAFFICWAY must not equal 01 or 11. Note: This edit is restricted to vehicles that are involved in only one event with pedestrian(s).
(PB15)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 910,	at least one NON-MOTORIST ACTION/CIRCUMSTANCES must equal 03.
(PB16)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 142, 144, 147, 153, 155, 156, 157, 159, 311, 312, 313, 318, 319, or 357,	at least one NON-MOTORIST CONTRIBUTING CIRCUMSTANCES must equal 02.
(PB17)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN for a person involved in the first harmful event equals 211-214 or 219,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 08, 09, 13 or 98. Note: This edit is restricted to vehicles that are involved in only one event with pedestrian(s).
(PB18)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 742,	at least one NON-MOTORIST CONTRIBUTING CIRCUMSTANCES must equal 01.
(PB19)	NON-MOTORIST ACTION/CIRCUMSTANCES equals 08,	PEDESTRIAN/BIKE TYPING – CRASH TYPE - PEDESTRIAN must not equal 510, 520, 590, 830 or 890.
(PB20)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 510, 520 or 590,	at least one NON-MOTORIST ACTION/CIRCUMSTANCES must equal 02.
(PB21)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 160,	TRAFFIC CONTROL DEVICE for the striking vehicle should equal 00.

Check	IF	THEN
(PB22)	SCHOOL BUS RELATED equals 1, and PERSON TYPE equals 05 or 08,	PEDESTRIAN/BIKE TYPING – CRASH TYPE - PEDESTRIAN should equal 342.
(PB23)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 342, and PERSON TYPE equals 05 or 08,	SCHOOL BUS RELATED should equal 1.
(PB24)	PERSON TYPE equals 05 or 08, and NON-MOTORIST LOCATION AT TIME OF CRASH equals 14, 16, 20, 21, 22, 24 or 25,	PEDESTRIAN/BIKE TYPING – CRASH TYPE - PEDESTRIAN should equal 230, 320, 410, 420, 430, 440, 459, 510, 520, 590, 830 or 890.
(PB25)	PERSON TYPE equals 05 or 08, and NON-MOTORIST LOCATION AT TIME OF CRASH equals 01-03 or 09,	PEDESTRIAN/BIKE TYPING – CRASH TYPE - PEDESTRIAN should equal 690, 710, 730, 741, 742, 760, 770, 781, 782, 791, 792, 794, 795 or 799.
(PB26)	NON-MOTORIST CONTRIBUTING CIRCUMSTANCES equals 02, and PERSON TYPE equals 06 or 07,	PEDESTRIAN/BIKE TYPING – CRASH TYPE - BICYCLIST should equal 142, 144, 147, 153, 155, 156, 157, 159, 311, 312, 313, 318, 319 or 357.
(PB27)	NON-MOTORIST ACTION/CIRCUMSTANCES equals 05, and PERSON TYPE equals 05 or 08,	PEDESTRIAN/BIKE TYPING – CRASH TYPE - PEDESTRIAN should equal 410 or 420.
(PB28)	NON-MOTORIST ACTION/CIRCUMSTANCES equals 06, and PERSON TYPE equals 05 or 08,	PEDESTRIAN/BIKE TYPING – CRASH TYPE - PEDESTRIAN should equal 430 or 440.
(PB29)	NON-MOTORIST ACTION/CIRCUMSTANCES equals 04, and PERSON TYPE equals 05 or 08,	PEDESTRIAN/BIKE TYPING – CRASH TYPE - PEDESTRIAN should equal 410, 420, 430, 440 or 459.
(PB30)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 220,	at least one DRIVER PRESENCE must equal 0 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PB31)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLIST equals 147, 157 or 357,	at least one DRIVER'S VISION OBSCURED BY must equal 06 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PB32)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 742,	at least one DRIVER'S VISION OBSCURED BY must not equal 00 or 95 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PB33)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLIST equals 156,	DRIVER'S VISION OBSCURED BY for the striking vehicle must not equal 06.
(PB34)	NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES equals 01, and FIRST HARMFUL EVENT equals 08, and RELATION TO JUNCTION (b) equals 02,	PEDESTRIAN/ BIKE TYPING – CRASH TYPE - PEDESTRIAN must not equal 320, 330, 360, 680, 830, 890, 900, or 910.

Check	IF	THEN
(PB35)	NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES equals 01, and FIRST HARMFUL EVENT equals 08, and RELATION TO JUNCTION (b) equals 02,	PEDESTRIAN/ BIKE TYPING – CRASH LOCATION - PEDESTRIAN must equal 1.
(PB36)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 250,	PERSON TYPE must equal 08.
(PB37)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 311, 312 or 313,	at least one NON-MOTORIST ACTION/ CIRCUMSTANCES must equal 08 or 10.
(PB38)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 410 or 420,	at least one NON-MOTORIST ACTION/CIRCUMSTANCES must equal 05.
(PB39)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 430 or 440,	at least one NON-MOTORIST ACTION/CIRCUMSTANCES must equal 06.
(PB40)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLE equals 610,	at least one PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 08, 09 or 13 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PB41)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLIST equals 215,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 08 or 09 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PB42)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLIST equals 111, 211 or 212,	at least one PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 11, 16, or 17 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PB43)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLIST equals 112, 151, 213, 214, 217 or 218,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 10, 16, or 17 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PB44)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 240,	EMERGENCY MOTOR VEHICLE USE should equal 2-6 for at least one vehicle.
(PB45)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 781 or 782,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 11 or 17 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PB46)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLIST equals 221-225,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 01 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.

Check	IF	THEN
(PB49)	PERSON TYPE equals 05 or 08, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 13 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST,	at least one PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN should equal 211-214 or 219.
(PB50)	PERSON TYPE equals 05 or 08, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 10-12 or 16 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST,	at least one PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN should equal 461, 465, 469, 510, 781, 782, 791, 792, 794, 795, or 799.
(PB52)	PERSON TYPE equals 06 or 07, and PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) equals 13 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST,	at least one PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLIST should equal 610.
(PB56)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - BICYCLIST equals 791, 792, 794, 795,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 10 or 17 for the vehicle number identified in this person's VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST.
(PB59)	NON-MOTORIST ACTION/CIRCUMSTANCES equals 16, and PERSON TYPE equals 05 or 08,	PEDESTRIAN/BIKE TYPING – CRASH TYPE - PEDESTRIAN should equal 459.
(PB60)	PERSON TYPE equals 05 or 08, and DRIVER PRESENCE equals 0 for the motor vehicle that strikes the non-motorist,	PEDESTRIAN/BIKE TYPING – CRASH TYPE - PEDESTRIAN should equal 220.
(PB61)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 220,	DRIVER PRESENCE should equal 0 for the motor vehicle striking the non-motorist.
(PB62)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 230,	at least one NON-MOTORIST ACTION/ CIRCUMSTANCES must equal 12.
(PB63)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 230,	at least one RELATED FACTORS - CRASH LEVEL should equal 19 or 23.
(PB66)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION – PEDESTRIAN equals 1,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 01, 02, 03, 09, or 22.
(PB67)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION – PEDESTRIAN equals 2,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 10, 11, 13, 14, 16, 20-25, 28, 98, 99.
(PB68)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION – PEDESTRIAN equals 3,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 10, 11, 13, 14, 16, 20-24, 28, 98, 99.
(PB69)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION – PEDESTRIAN equals 4,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 24, 25, 98, 99.

Check	IF	THEN
(PB70)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION – PEDESTRIAN equals 9,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 16, 22, 24, 98 or 99.
(PB71)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION - BICYCLE equals 1,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 01, 02, 03, 09, 16 or 22.
(PB72)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION - BICYCLE equals 2,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 10, 11, 13, 14, 16, 20, 21, 22, 23, 24, 25, 28, 98, 99.
(PB73)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION - BICYCLE equals 3,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 10, 11, 13, 14, 16, 20, 21, 22, 23, 24, 28, 98, 99.
(PB74)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION - BICYCLE equals 4,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 24, 25, 98, 99.
(PB75)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION - BICYCLE equals 9,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 16, 22, 24, 98 or 99.
(PB76)	PEDESTRIAN/ BIKE TYPING - PEDESTRIAN POSITION equals 01,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 03.
(PB77)	PEDESTRIAN/ BIKE TYPING - PEDESTRIAN POSITION equals 02,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 01, 02 or 10.
(PB78)	PEDESTRIAN/ BIKE TYPING - PEDESTRIAN POSITION equals 03,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 11, 13.
(PB79)	PEDESTRIAN/ BIKE TYPING - PEDESTRIAN POSITION equals 04,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 14, 16, 20, 98 or 99.
(PB80)	PEDESTRIAN/ BIKE TYPING - PEDESTRIAN POSITION equals 05,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 21, 23, 24, 98 or 99.
(PB81)	PEDESTRIAN/ BIKE TYPING - PEDESTRIAN POSITION equals 06,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 20, 22, 28, 98 or 99.
(PB82)	PEDESTRIAN/ BIKE TYPING - PEDESTRIAN POSITION equals 07 or 08,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 25.
(PB83)	PEDESTRIAN/ BIKE TYPING - PEDESTRIAN POSITION equals 09,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 09, 20, 22, 28, 98 or 99.
(PB84)	PEDESTRIAN/ BIKE TYPING - BICYCLIST POSITION equals 1,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 03, 09, 11 or 13.
(PB85)	PEDESTRIAN/ BIKE TYPING - BICYCLIST POSITION equals 2,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 14, 16 or 20.
(PB86)	PEDESTRIAN/ BIKE TYPING - BICYCLIST POSITION equals 3,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 01, 02, 10, 21, 23, 98 or 99.
(PB87)	PEDESTRIAN/ BIKE TYPING - BICYCLIST POSITION equals 4,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 24.
(PB88)	PEDESTRIAN/ BIKE TYPING - BICYCLIST POSITION equals 5 or 6,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 25.
(PB89)	PEDESTRIAN/ BIKE TYPING - BICYCLIST POSITION equals 8,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 20, 22, 28, 98 or 99.
(PB90)	PEDESTRIAN/ BIKE TYPING - BICYCLIST POSITION equals 9,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 22, 98 or 99.
(PB91)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION – PEDESTRIAN equals 1,	PEDESTRIAN/ BIKE TYPING - PEDESTRIAN POSITION must equal 01, 02 or 09.

Check	IF	THEN
(PB92)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION – PEDESTRIAN equals 2,	PEDESTRIAN/ BIKE TYPING - PEDESTRIAN POSITION must equal 03, 04, 05, 06, 07, 08 or 09.
(PB93)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION – PEDESTRIAN equals 3,	PEDESTRIAN/ BIKE TYPING - PEDESTRIAN POSITION must equal 02, 03, 04, 05, 06 or 09.
(PB94)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION – PEDESTRIAN equals 4,	PEDESTRIAN/ BIKE TYPING - PEDESTRIAN POSITION must equal 07, 08 or 09.
(PB95)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION – PEDESTRIAN equals 9,	PEDESTRIAN/ BIKE TYPING - PEDESTRIAN POSITION must equal 02, 05 or 09.
(PB96)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION - BICYCLE equals 1,	PEDESTRIAN/ BIKE TYPING - BICYCLIST POSITION must equal 1, 2, 3, 8 or 9.
(PB97)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION - BICYCLE equals 3,	PEDESTRIAN/ BIKE TYPING - BICYCLIST POSITION must equal 1, 2, 3, 4, 8 or 9.
(PB98)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION - BICYCLE equals 4,	PEDESTRIAN/ BIKE TYPING - BICYCLIST POSITION must equal 4, 5, 6 or 9.
(PB99)	PEDESTRIAN/ BIKE TYPING - CRASH LOCATION-BICYCLE equals 9,	PEDESTRIAN/ BIKE TYPING - BICYCLIST POSITION must equal 9.
(PBA0)	PEDESTRIAN/ BIKE TYPING - CRASH TYPE - BICYCLE equals 111, 211, 212, and VEHICLE NUMBER - VEHICLE LEVEL equals VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 11.
(PBA1)	PEDESTRIAN/ BIKE TYPING - CRASH TYPE - BICYCLE equals 112, 151, 213, 214, 217 or 218, and VEHICLE NUMBER – VEHICLE LEVEL equals VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 10.
(PBA2)	PEDESTRIAN SCENARIO equals 1a, 1b, 1c, 1d, 3a, 3b, 3c, 3d, 5a, 5b, 5c, 5d, 7a, 7b, 7c, 7d, 9a, 9b, 9c, 9d, or 11a, 11b, 11c, 11d,	PEDESTRIAN POSITION must equal 2.
(PBA3)	CRASH LOCATION equals 1 (At Intersection) and PEDESTRIAN SCENARIO equals 2a, 2b, 2c, 2d, 4a, 4b, 4c, 4d, 6a, 6b, 6c, 6d, 8a, 8b, 8c, 8d, 10a, 10b, 10c, 10d, or 12a, 12b, 12c, 12d,	PEDESTRIAN POSITION must equal 1, 9.
(PBA4)	CRASH LOCATION equals 2 (Intersection-Related) and PEDESTRIAN SCENARIO equals 2a, 2b, 2c, 2d, 4a, 4b, 4c, 4d, 6a, 6b, 6c, 6d, 8a, 8b, 8c, 8d, 10a, 10b, 10c, 10d, or 12a, 12b, 12c, 12d,	PEDESTRIAN POSITION must equal 3-9.
(PBA5)	PEDESTRIAN SCENARIO equals 1a, 1b, 1c, 1d, 2a, 2b, 2c, 2d, 3a, 3b, 3c, 3d, 4a, 4b, 4c, 4d,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 01, 02, 03, 04, 06, 08, 09, 12, 13, 14, 15, 16, or 17 for the vehicle number that struck this non-motorist.

Check	IF	THEN
(PBA6)	PEDESTRIAN SCENARIO equals 5a, 5b, 5c, 5d, 6a, 6b, 6c, 6d, 7a, 7b, 7c, 7d, 8a, 8b, 8c, 8d,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 10 for the vehicle number that struck this non-motorist.
(PBA7)	PEDESTRIAN SCENARIO equals 9a, 9b, 9c, 9d, 10a, 10b, 10c, 10d, 11a, 11b, 11c, 11d, 12a, 12b, 12c, 12d,	PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) should equal 11 for the vehicle number that struck this non-motorist.

NM10 - Non-Motorist Location at Time of Crash

FORMAT: 2 numeric

SAS NAME: Person.LOCATION

ELEMENT VALUES:

Codes	Attributes
01	At Intersection-In Marked Crosswalk
02	At Intersection-Unmarked/Unknown if Marked Crosswalk

09	At Intersection-Unknown Location
10	Not At Intersection-In Marked Crosswalk
11	Not At Intersection-On Roadway, Not in Marked Crosswalk
13	Not At Intersection-On Roadway, Crosswalk Availability Unknown
14	Parking Lane/Zone
16	Bicycle Lane
20	Shoulder/Roadside
21	Sidewalk
22	Median/Crossing Island
23	Driveway Access
24	Shared-Use Path
25	Non-Trafficway Area
28	Other
98	Not Reported
99	Reported as Unknown Location

Definition: This element identifies the location of the non-motorist with respect to the roadway at the time of the crash.

Remarks: "At intersection" means: The person is **on a roadway** (travel lane) either (1) in the intersection, (2) in an area between a crosswalk and the perimeter of the intersection, or (3) in a crosswalk (whether marked or unmarked) adjacent to an intersection. If there are no crosswalks, "at intersection" means only the intersection, which is the area embraced within the prolongation of the lateral curb lines or, if none, the lateral boundary lines of the roadways.

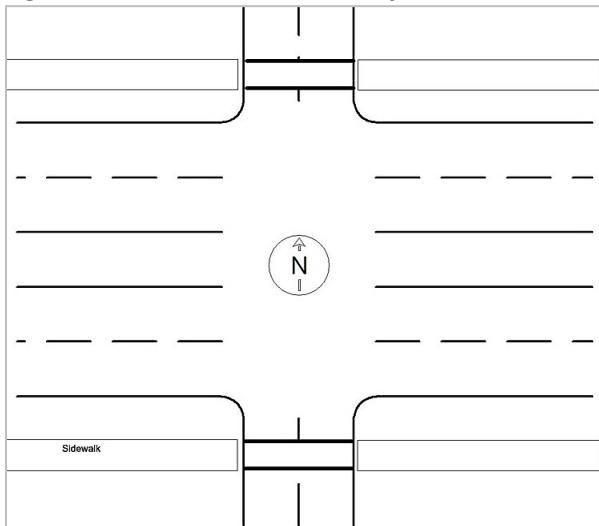

Crosswalk is (1) that part of a roadway at an intersection included within the connections of the lateral lines of the sidewalks on opposite sides of the highway measured from the curbs or, in the absence of curbs, from the edges of the traversable roadway, and in the absence of a sidewalk on one side of the highway, that part of the highway included within the extension of the lateral line of the existing sidewalk to the side of the highway without the sidewalk, with such extension forming a right angle to the centerline of the highway; or (2) Any portion of a roadway at an intersection or elsewhere distinctly indicated for pedestrian crossing by lines or other markings on the surface of the roadway placed in accordance with the provisions in the [Manual of Uniform Traffic Control Devices](#).

Intersection is an area that (1) contains a crossing or connection of two or more roadways not classified as driveway access (2) is embraced within the prolongation of the lateral curb lines, or, if none, the lateral boundary lines of the roadways.

01 (At Intersection-In Marked Crosswalk) is used when a person is in that portion of a roadway at an intersection that is distinctly indicated for pedestrian crossing by lines or other markings on the surface of the roadway. This attribute includes shared-use path crossings. This does not include crosswalks located in mid-blocks.

02 (At Intersection-In Unmarked/Unknown if Marked Crosswalk) is used when the person is “at intersection” **within the prolongations of the sidewalk edges** but there are no lines or other markings on the surface of the roadway (unmarked crosswalk). There must be a sidewalk or improved path present on one side of the leg of the trafficway that this person is crossing for there to be an unmarked crosswalk. If there are no sidewalks, there are no crosswalks. If it is unknown if the crosswalk is marked or unmarked, default to unmarked.

Figure 26: Intersection with Only Two Crosswalks

In a four-way intersection with sidewalks running along the East/West trafficway and no sidewalks on the North/South trafficway, the intersection area would only have two crosswalks. The two that allow crossing of the North/South trafficway. (See [Figure 26](#) above)

03 (At Intersection-Not in Crosswalk) refers to a person in a travel lane that is not using an available crosswalk or there is not a crosswalk at this location.

- *For persons other than pedalcyclists in a marked bicycle lane or an unmarked prolongation of the bicycle lane in an intersection, use 03 (At Intersection-Not in Crosswalk).*
- *For pedalcyclists in a marked bicycle lane or an unmarked prolongation of the bicycle lane in an intersection, use [16 \(Bicycle Lane\)](#).*
- *If you do not know if there is a bike lane through the intersection, then default to 03 (At Intersection-Not in Crosswalk).*

09 (At Intersection-Unknown Location) is used when a person is known to be at an intersection, but it cannot be determined whether the person was in a crosswalk area (marked or unmarked) or the intersection.

10 (Not at Intersection-In Marked Crosswalk) is used when a person is in the portion of the roadway, not at an intersection, that is distinctly indicated for pedestrian crossing by lines or other markings on the surface of the roadway (i.e., the case identifies a mid-block crosswalk exists and the person is using it.). This attribute includes shared-use path crossings.

11 (Not at Intersection-On Roadway, Not in Marked Crosswalk) is used when a person is in the portion of the roadway, not at an intersection, and either:

1. the case identifies a mid-block crosswalk exists and the person is not using it (e.g., the person is jaywalking when a mid-block crosswalk is available), or
2. there is not a crosswalk at this location, or
3. the person is crossing at a location where a mid-block crosswalk would not be expected to exist (e.g., a rural roadway or interstate).

13 (Not at Intersection - On Roadway, Crosswalk Availability Unknown) is used when it cannot be determined if a crosswalk was available (e.g., there is some information (possibly conflicting) that leads you to believe that there may be a mid-block crosswalk at this location, but there is not sufficient information about the location to be able to make a determination).

14 (Parking Lane/Zone) refers to a person in an area on the roadway, or next to the roadway, on which parking is permitted in marked or unmarked spaces. This includes curbside and edge of roadway parking (for example, legal residential parking, city-street parking, etc.). Sometimes a strip of roadway can be designated for parking at certain hours of the day (parking lane) and for regular travel at other hours (travel lane). This code should NOT be used during hours when parking is NOT permitted (see [11 \(Not at Intersection-On Roadway, Not in Marked Crosswalk\)](#)).

16 (Bicycle Lane) is used when a person is adjacent to travel lanes in a bikeway that has been designated for preferential or exclusive use by pedalcyclists through striping, signage, or pavement **markings**.

- *For persons other than pedalcyclists in a marked bicycle lane or an unmarked prolongation of the bicycle lane in an intersection, use [03 \(At Intersection-Not in Crosswalk\)](#).*
- *For pedalcyclists in a marked bicycle lane or an unmarked prolongation of the bicycle lane in an intersection use 16 (Bicycle Lane).*
- *When at an intersection, if you do not know if there is a bike lane through the intersection, then default to [03 \(At Intersection-Not in Crosswalk\)](#).*

20 (Shoulder/Roadside) - Shoulder is that part of a trafficway contiguous with the roadway for emergency use, for accommodation of stopped motor vehicles, and lateral support of the roadway structure. Roadside is the outermost part of the trafficway from the property line or other boundary in to the edge of the first road. For persons on a sidewalk on the roadside select **21 (Sidewalk)**.

21 (Sidewalk) is any improved surface primarily constructed for use by pedestrians. Do not select this attribute for sidewalks within a [23 \(Driveway Access\)](#), [22 \(Median/Crossing Island\)](#), [25 \(Non-Trafficway Area\)](#).

22 (Median/Crossing Island) is used when a person is in a median or crossing island. Median is an area of trafficway between parallel roads separating travel in opposite directions. A median should be four or more feet wide. Crossing Island is a cement or grassy area in the middle of a trafficway. This attribute excludes crosswalk areas that pass through a median, crossing or traffic island (i.e., select [01 \(At Intersection-In Marked Crosswalk\)](#), [02 \(At Intersection-In Unmarked/Unknown if Marked Crosswalk\)](#), or [10 \(Not at Intersection-In Marked Crosswalk\)](#).)

23 (Driveway Access) is a portion of the trafficway at the end of a driveway providing access to property adjacent to a trafficway. This includes the driveway crossing that is the portion of the driveway access where a sidewalk or shared-use path crosses over the driveway access.

24 (Shared-Use Path) is used when a person on a bikeway physically separated from motorized vehicular traffic by an open space or barrier and either within the highway right-of-way or an independent right-of-way. Shared-Use Paths will also be used by pedestrians, skaters, wheelchairs, joggers, and other non-motorized users. Shared-use path **crossings** are coded under [01 \(At Intersection-In Marked Crosswalk\)](#) or [10 \(Not At Intersection-In Marked Crosswalk\)](#).

25 (Non-Trafficway Area) is not physically located on any land way open to the public as a matter of right or custom for moving persons or property from one place to another. For example: a person in a parking lot, a yard, a person in a closed portion of a work zone, or in a house.

28 (Other) is used when a person is at a location stated in the case materials that is not reflected in the listed attributes for this data element. These would be persons within the trafficway (i.e., not element value **25 (Non-Trafficway Area)**). Examples include central islands of rotary intersections, gores, separators, or directional/channelizing islands.

If a police crash report data element is coded with the attribute “Other” but the officer does not specify what this refers to:

1. Code **28 (Other)** if the police crash report attribute choices can be matched to or include all the attributes in FARS/CRSS.
2. Code **98 (Not Reported)** if the police crash report choices cannot be matched to or include all the attributes in FARS/CRSS.

98 (Not Reported)

If a State’s crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks is NOT considered “**Not Reported**.”

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State’s crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials)
2. A field or coding block exists on the State’s crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State’s crash report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown Location) is used when the case materials state that the location of the non-motorist was unknown at the time of the crash.

Consistency Checks:

Check	IF	THEN
(1P2F)	PERSON TYPE equals 10,	NON-MOTORIST LOCATION AT TIME OF CRASH must equal 25.
(1P9G)	NON-MOTORIST LOCATION AT THE TIME OF CRASH equals 20,	NON-MOTORIST CONTRIBUTING CIRCUMSTANCES must not equal 02-04, 15.
(1P0H)	NON-MOTORIST LOCATION AT THE TIME OF CRASH equals 21,	NON-MOTORIST CONTRIBUTING CIRCUMSTANCES must not equal 02-04, 07-10, 15, 16, 20.
(1P1H)	NON-MOTORIST LOCATION AT THE TIME OF CRASH equals 22,	NON-MOTORIST CONTRIBUTING CIRCUMSTANCES must not equal 01, 02, 04, 07, 08, 11, 15, 20.

Check	IF	THEN
(1P2H)	NON-MOTORIST LOCATION AT THE TIME OF CRASH equals 23,	NON-MOTORIST CONTRIBUTING CIRCUMSTANCES must not equal 12, 15.
(1P3H)	NON-MOTORIST LOCATION AT THE TIME OF CRASH equals 24,	NON-MOTORIST CONTRIBUTING CIRCUMSTANCES must not equal 01, 03, 04, 10, 11.
(1P4H)	NON-MOTORIST LOCATION AT THE TIME OF CRASH equals 25,	NON-MOTORIST CONTRIBUTING CIRCUMSTANCES must not equal 01-04, 10, 11, 12, 15-17, 20.

Definition: This element describes the action(s) of the non-motorist at the time of their involvement in the crash.

Remarks: As a select-all-that-apply element, attributes can be used in combination.

01 (Going to or from School [K-12]) includes person 5 to 18 years old or an adult supervising persons 5 to 18 going to or from a school for any reason. Examples are going to a school dance, sports practice, or extracurricular activities.

02 (Waiting to Cross Roadway) is used when the non-motorist is near the curb or the roadway edge waiting to cross a roadway anywhere along the roadway. If the pedestrian **began to cross the roadway**, stopped, and then was struck select **03 (Crossing the Roadway)**. For persons adjacent to the roadway where their **intent to cross is not identified**, use **09 (Stationary and Adjacent to Roadway [e.g., Shoulder, Median, Sidewalk])**.

03 (Crossing Roadway) is used when the non-motorist was moving across or in the travel lanes with the goal of crossing the roadway.

04 (Jogging/Running) is used when the pedestrian was running or jogging.

05 (Movement Along Roadway with Traffic [In or Adjacent to Travel Lane]) is used when the non-motorist was moving in the same direction as the flow of traffic, either in the travel lane or adjacent to it (e.g. e.g., jogging or walking on shoulder or roadside). This also includes situations where the person's action/intent was traveling along the roadway. For example, a person stopped momentarily when they were struck (e.g., to tie shoes, talk on cell phone) or someone that moved out into the path of a vehicle to avoid an obstacle along the roadside. This may include the roadway edge, shoulder (paved or unpaved), sidewalk, roadside, median or driveway access, etc.

06 (Movement Along Roadway Against Traffic [In or Adjacent to Travel Lane]) is used when the non-motorist was moving in the opposite direction of the flow of traffic (facing oncoming vehicles), either in the travel lane or adjacent to it (e.g., jogging or walking on shoulder or roadside). This also includes situations where the person's action/intent was traveling along the roadway. For example, a person stopped momentarily when they were struck (e.g., to tie shoes, talk on cell phone) or someone that moved out into the path of a vehicle to avoid an obstacle along the roadside. This may include the roadway edge, shoulder (paved or unpaved), sidewalk, roadside, median, or driveway access, etc.

16 (Movement Along Roadway - Direction Unknown) is used when the non-motorist was moving in or adjacent to a travel lane but their direction with respect to the flow of traffic is unknown (e.g., jogging or walking on shoulder or roadside). This may include the roadway edge, shoulder (paved or unpaved), sidewalk, roadside, median, or driveway access, etc.

08 (In Roadway - Other [Working, Playing, etc.]) is used when the non-motorist was in the roadway but not crossing it. Examples include conducting maintenance, playing in the roadway, operating a snow blower or lawn care equipment, or lying in the roadway. For cases involving a non-motorist working within a closed portion of a work zone area, use attribute [**14 \(Other\)**](#).

09 (Stationary and Adjacent to Roadway [e.g., Shoulder, Median, Sidewalk]) is used when the non-motorist was not moving and not in the roadway but in an area immediately adjacent to the roadway, such as a median, shoulder, sidewalk, *pedestrian refuge, traffic island, etc.*

10 (Working in Trafficway [Incident Response]) is used when the non-motorist was in the roadway as part of an official response to an incident, such as a firefighter moving between an emergency vehicle and a crash involved vehicle.

11 (Entering/Exiting Parked/Stopped Vehicle) is used when a pedestrian was adjacent to a stopped or parked vehicle and in the process of getting into or had just exited that stopped or parked vehicle. This does not include crashes involving pedestrians performing other actions such as crossing the roadway to/from a parked vehicle or other movements that occurred after the pedestrian exited the vehicle.

12 (Disabled Vehicle-related [Working on, Pushing, Leaving/Approaching]) is used when the pedestrian was outside of a disabled vehicle for any of a number of reasons, including working on it, pushing it, leaving it, or approaching it.

14 (Other [Specify:]) is used when the actions or circumstances stated in the case materials do not reflect the listed attributes for this data element. This includes non-motorists working within a closed portion of a work zone area.

Note: For attributes with a "Specify:" designation, a fill-in text box will open in MDE. This text box should be used to provide additional detail about the attribute selection. Please include a specific reason for this selection.

98 (Not Reported) If a State's crash report manual instructs to leave blank data blocks that are not applicable, then a blank in those data blocks are NOT considered "**Not Reported**."

Code **98 (Not Reported)** in these two situations:

1. No field or coding block exists on the State's crash report to provide the information to code this element AND no other information is available to code the element (e.g., narrative, diagram, case materials)
2. A field or coding block exists on the State's crash report that would provide the information needed to code this element, but it has been left blank, OR a code has been selected on the State's crash

report that does not map to any FARS/CRSS attribute, AND no other information is available to code the element (e.g., narrative, diagram, case materials).

99 (Reported as Unknown) is used when the case materials state that the action or circumstances of the non-motorist prior to the crash was unknown.

Consistency Checks:

Check	IF	THEN
(1P3F)	PERSON TYPE (NM7) equals 10,	NON-MOTORIST ACTION/CIRCUMSTANCES (NM11) must not equal 01-12, 16, and NON-MOTORIST CONTRIBUTING CIRCUMSTANCES (NM12) must not equal 01-20.
(1P4F)	PERSON TYPE equals 04,	NON-MOTORIST ACTION/CIRCUMSTANCES must not equal 04, 12.
(1P5F)	PERSON TYPE equals 06-08, 19,	NON-MOTORIST ACTION/CIRCUMSTANCES must not equal 04.
(1P7F)	PERSON TYPE equals 04,	NON-MOTORIST ACTION/CIRCUMSTANCES should not equal 10, 11.
(1P8F)	PERSON TYPE equals 06, 07,	NON-MOTORIST ACTION/CIRCUMSTANCES should not equal 10-12.
(1P9F)	PERSON TYPE equals 08,	NON-MOTORIST ACTION/CIRCUMSTANCES should not equal 11.
(1P1G)	PERSON TYPE equals 19,	NON-MOTORIST ACTION/CIRCUMSTANCES should not equal 11, 12.
(4X2G)	any NON-MOTORIST ACTION/CIRCUMSTANCES equals 08,	the NON-MOTORIST ACTION/CIRCUMSTANCES must not also equal 03 for this person.
(4X5F)	NON-MOTORIST ACTION/CIRCUMSTANCES is selected 04,	NON-MOTORIST ACTION/CIRCUMSTANCES attributes 05, 06, or 16 should also be selected.
(4X7F)	any NON-MOTORIST ACTION/CIRCUMSTANCES equals 98 or 99,	only that one code and no other must be coded for this person.
(PB15)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 910,	at least one NON-MOTORIST ACTION/CIRCUMSTANCES must equal 03.
(PB19)	NON-MOTORIST ACTION/CIRCUMSTANCES equals 08,	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN must not equal 510, 520, 590, 830 or 890.
(PB20)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 510, 520 or 590,	at least one NON-MOTORIST ACTION/CIRCUMSTANCES must equal 02.
(PB27)	NON-MOTORIST ACTION/CIRCUMSTANCES equals 05, and PERSON TYPE equals 05 or 08,	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN should equal 410 or 420.
(PB28)	NON-MOTORIST ACTION/CIRCUMSTANCES equals 06, and PERSON TYPE equals 05 or 08,	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN should equal 430 or 440.
(PB29)	NON-MOTORIST ACTION/CIRCUMSTANCES equals 04, and PERSON TYPE equals 05 or 08,	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN should equal 410, 420, 430, 440, or 459.
(PB37)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 311, 312 or 313,	at least one NON-MOTORIST ACTION/CIRCUMSTANCES must equal 08 or 10.

Check	IF	THEN
(PB38)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 410 or 420,	at least one NON-MOTORIST ACTION/ CIRCUMSTANCES must equal 05.
(PB39)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 430 or 440,	at least one NON-MOTORIST ACTION/ CIRCUMSTANCES must equal 06.
(PB58)	NON-MOTORIST ACTION/CIRCUMSTANCES must not equal 05, 06, or 16 in combination.	--
(PB59)	NON-MOTORIST ACTION/ CIRCUMSTANCES equals 16, and PERSON TYPE equals 05 or 08,	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN should equal 459.
(PB62)	PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 230,	at least one NON-MOTORIST ACTION/ CIRCUMSTANCES must equal 12.
(PB64)	any NON-MOTORIST ACTION/ CIRCUMSTANCES equals 03 or 09,	the NON-MOTORIST ACTION/ CIRCUMSTANCES must not also equal 05, 06, or 16 for this person.

15	Improper or Erratic Lane Changing
16	Failure to Keep in Proper Lane or Running Off Road
17	Making Improper Entry to or Exit from Trafficway
18	Operating in Other Erratic, Reckless, Careless or Negligent Manner
19	Not Visible (Dark Clothing, No Lighting, etc.)
20	Passing with Insufficient Distance or Inadequate Visibility or Failing to Yield to Overtaking Vehicle
21	Other (Specify:)
99	Reported as Unknown

Definition: This element describes the action(s) and/or circumstances of the non-motorist that law enforcement indicated may have contributed to the crash.

Remarks: As a select all that apply element, attributes can be used in combination.

00 (None Noted) is used when no contributing circumstances or improper actions are noted by the officer for this non-motorist. "Not Reported" is coded here. If this attribute is used no other attribute may be selected.

01 (Dart-Out) is used when a person entered the roadway and was involved in a collision with a vehicle where the driver's view of the person was blocked until an instant before impact. A dart-out can only occur if there is some documented visual obstruction (e.g., parked vehicle, building, or vegetation).

11 (Dash) is used when a person ran into the roadway and was involved in a collision with a vehicle. There is no mention in the case materials that the driver's view of the person was obstructed. The case materials should state that the person ran.

Examples of proper use include:

- A person's activity prior to the crash is jogging or running, but just prior to the impact the non-motorist darted into the roadway.
- Children seen playing in a front yard, who suddenly run into the road to retrieve an object associated with their play (e.g., a ball).

02 (Failure to Yield Right-of-Way) is used when a person fails to yield the right-of-way as indicated in the case materials. A citation need not be issued, only that a failure to yield by the person was represented on the police crash report through the crash description, diagram, and or coded boxes.

Examples include:

- Failure to yield when exiting a driveway.
- Mid-block crossings not at a crosswalk.
- Not clearing an intersection before the light turns green for crossing traffic.
- Failure to yield at an intersection not controlled by a stop sign or flashing red lights.
- A bicyclist that stopped at the stop sign, but did not realize it was a two way stop rather than a 4-way stop control and proceeded into the intersection without yielding to traffic on the through traffic way.

Failure to obey a traffic control device is coded as **03 (Failure to Obey Traffic Signs, Signals or Officer)**.

03 (Failure to Obey Traffic Signs, Signals or Officer) is used when a person fails to obey a traffic control device as indicated in the case materials. Examples include person does not obey traffic signs, traffic control devices (including pedestrian signals), traffic officers, or safety zones; or passes around railroad gates.

04 (In Roadway Improperly [Standing, Lying, Working, Playing, etc.]) is used when a person was indicated to have been in the roadway improperly other than making an improper crossing as in code [**12 \(Improper Crossing of Roadway or Intersection \[Jaywalking\]\)**](#).

Examples include:

- Playing in the road before the vehicle arrived. The person must not have just run into the roadway after a ball, which would be coded [**01 \(Dart-Out\)**](#) or [**11 \(Dash\)**](#).
- Working in the road other than because of the requirement of his/her job, (e.g., someone walking backwards into the roadway with a snow blower or lawn care equipment).
- In the street voluntarily, such as a civilian directing traffic at the scene of a crash.
- Attempting to hail a cab, flag down assistance, or flag down a transit bus between designated stops.
- Sitting, getting up, asleep/unconscious, kneeling, etc.

05 (Entering/Exiting Parked or Stopped Vehicle) is used when a pedestrian was adjacent to a stopped or parked vehicle and in the process of getting into or had just exited that stopped or parked vehicle. This does not include crashes involving pedestrians performing other actions such as crossing the roadway to/from a parked vehicle or other movements that occurred after the pedestrian exited the vehicle.

06 (Inattentive [Talking, Eating, etc.]) is used when the case materials specifically state a person is inattentive, lost in thought or distracted. Examples include using any electronic devices (cell phone, video game, e-reader), using earbuds on a music player while jogging, chatting with a neighbor, caring for a baby in a stroller, admiring a garden, etc.

07 (Improper Turn/Merge) is used when the case materials indicate the bicyclist/operator made an improper turn or merge. Examples of an improper turn include too wide right or left turns, making a right turn from the left lane, a left turn from the right lane or unsafe U-turns. An example of an improper merge is when the bicycle lane ends and the bicyclist merges into the path of a vehicle without leaving sufficient space.

08 (Improper Passing) is used when the case materials indicate the bicyclist/operator made an improper passing maneuver. The bicyclist/operator may be passing a motor vehicle or another bicyclist. Actions include passing on the right, and where prohibited by signs, pavement markings, or a stopped school bus, (i.e., mainly violations as designated by traffic controls). Improper passing that is based on faulty judgment errors such as insufficient distance, or inadequate visibility are captured by [**20 \(Passing with Insufficient Distance or Inadequate Visibility or Failing to Yield to Overtaking Vehicle\)**](#).

09 (Wrong-Way Riding or Walking) is used when a person was identified in the case materials to have been traveling the wrong way.

10 (Riding on Wrong Side of Road) is used when a bicyclist was identified in the case materials to have been traveling on the wrong side of the road.

12 (Improper Crossing of Roadway or Intersection [Jaywalking]) is used when a person is engaged in crossing a road but is not doing so properly. This includes mid-block crossings outside a crosswalk and crossing at an intersection by cutting on a diagonal through it. The officer's representation of either circumstance on the diagram or in the narrative substantiates the use of this attribute. The person may be engaged in other activities such as the continuation of jogging/running or a "sudden or impulsive" dart, run, etc. This attribute should not be used in conjunction with [**04 \(In Roadway Improperly \[Standing, Lying, Working, Playing, etc.\]\)**](#).

13 (Failing to Have Lights on When Required) is used when the case materials indicate the operator of a bicycle, animal-drawn conveyance or personal conveyance failed to have lights on when required. This also includes not having lights available to turn on, and may be used with [**14 \(Operating Without Required Equipment\)**](#).

14 (Operating Without Required Equipment) is used when the case materials indicate that the bicycle, animal-drawn conveyance or person conveyance, was being operated without the proper equipment such as headlights, taillights, etc. Helmet use is captured under [**NM13 Non-Motorist Safety Equipment**](#).

15 (Improper or Erratic Lane Changing) is used when a bicyclist, operator of horse-drawn vehicle, roller blader, or skateboard rider was weaving in and out of traffic. This includes maneuvering between vehicles and in-and-out of a bike lane.

16 (Failure to Keep in Proper Lane or Running Off Road) is used when a bicyclist/operator fails to stay in the proper lane or runs off the road. For example, a bicyclist fails to keep in bicycle lane or operator of horse-drawn vehicle goes straight in a turn lane. This includes running into a median or drifting into a parking lane.

17 (Making Improper Entry to or Exit from Trafficway) is used when a person is engaged in entering or exiting the trafficway but is not doing so properly, or in a manner that would be anticipated by others. This includes entering or exiting the trafficway midblock between driveway accesses, improper use of ramps and turn-bays to enter or exit, and/or cutting on a diagonal across a lawn or parking lot to enter a trafficway. This may be used in conjunction with [**02 \(Failure to Yield Right-of-Way\)**](#), [**03 \(Failure to Obey Traffic Signs, Signals or Officer\)**](#), [**07 \(Improper Turn/Merge\)**](#), and/or [**09 \(Wrong-Way Riding or Walking\)**](#) if they apply. This code does not apply to Person Types [**05 \(Pedestrian\)**](#) or [**10 \(Persons In/On Buildings\)**](#).

18 (Operating in Other Erratic, Reckless, Careless or Negligent Manner) is used when explicitly stated in the case materials. Examples include bicyclists doing wheelies, attempting to grab on to a vehicle for motion (“skitching”), or skateboard racing.

19 (Not Visible [Dark Clothing, No Lighting, etc.]) is used when the non-motorist was not visible to the motorist because of blocked views, insufficient lighting, or other reasons such as clothing that blends in with the surroundings at any time of the day (camouflage) or dark clothing in the rain at night. The officer must indicate that the non-motorist was not visible.

20 (Passing with Insufficient Distance or Inadequate Visibility or Failing to Yield to Overtaking Vehicle) is used when an improper passing maneuver is indicated in the case materials for the non-motorist. This indicates passing violations based on faulty judgment. This may be used in conjunction with [08 \(Improper Passing\)](#) if both apply.

21 (Other, Specify:) is used when the case materials state that an action(s)/circumstances(s) by the non-motorist may have contributed to the crash, but are not listed in these attributes. Examples include being pushed into the roadway, falling from a bicycle, traveling on a prohibited roadway.

***Note:** For attributes with a “Specify:” designation, a fill-in text box will open in MDE. This text box should be used to provide additional detail about the attribute selection. Please include a specific reason for this selection.

99 (Reported as Unknown) is used when the officer indicated unknown in the case material’s contributing circumstances field or the narrative and no other information is available. If this attribute is used no other attribute may be selected.

9	<u>Reported as Unknown</u>

Subfield 6-Non-Motorist Use of Other Preventive Safety Equipment

Codes	Attributes
1	No
2	Yes
8	Not Reported
9	Reported as Unknown

Definition: This element identifies the safety equipment that was used and not used by this non-motorist as reflected in the case materials.

Remarks: The applicable attribute may be determined using various items in the case materials such as a crash report field, the officer narrative, a fatal crash supplement, etc. Each subfield is recorded separately using the same attribute choices ([No](#), [Yes](#), [Not Reported](#), and [Reported as Unknown](#)).

PROTECTIVE Non-Motorist Safety Equipment

Subfield 1- Non-Motorist Helmet Use is used to identify if the case materials indicate the non-motorist was wearing a safety helmet. The non-motorist does not have to be riding a bicycle at the time of the crash to code this subfield as [2 \(Yes\)](#).

[2 \(Yes\)](#) includes all helmets (e.g., bicycle helmet, motorcycle helmet, racing helmets, etc.). If the non-motorist was wearing a motorcycle helmet, see [Related Factors - Person \(Not a Motor Vehicle Occupant\) Level](#) attribute [93 \(Non-Motorist Wearing Motorcycle Helmet\)](#). For example, a pedestrian that previously was riding a motorcycle gets struck while still wearing their helmet.

Subfield 2- Non-Motorist Use of Protective Pads is used to identify if the case materials indicate the non-motorist was wearing padded, shaped attachments to protect specific areas of the body (elbows, knees, shins, etc.) from injury.

Subfield 3- Non-Motorist Use of Other Protective Safety Equipment is used to identify if the case materials indicate the non-motorist was using protective safety equipment other than a helmet or pads (e.g., eye wear/face shields, gloves, wrist guards, etc.). If other safety equipment is noted in the case materials and it cannot be determined if it is preventive or protective, use code [8 \(Not Reported\)](#).

PREVENTIVE Non-Motorist Safety Equipment

Subfield 4-Non-Motorist Use of Reflective Clothing/Carried Item is used to identify if the case materials indicate the non-motorist was wearing or carrying some type of reflective item (e.g., jacket, backpack, vest, etc.). The emphasis is on the reflective property of the clothing or carried item and does not include devices that give off light under their own power (e.g., flashlights). For lighting, use [Subfield 5- Non-Motorist Use of Lighting](#). The reflective item can be reflective tape affixed to regular clothing, special reflective clothing, a reflective device that is worn or a reflective device that is carried. It can be made by the non-motorist and does not have to be specially designed as a safety device.

Do not code bicycle reflectors or clothing that is non-reflective but considered to be safety equipment (hi-glo orange clothing) here, use [Subfield 6- Non-Motorist Use of Other Preventive Safety Equipment](#) instead. Subfield 4 is used only for clothing or equipment that is both reflective and worn or carried.

Subfield 5- Non-Motorist Use of Lighting is used to identify if the case materials indicate the non-motorist was using a light on his/her person or on a pedalcycle or personal conveyance for safety purposes, to include flashlights.

Subfield 6- Non-Motorist Use of Other Preventive Safety Equipment is used to identify if the case materials indicate the non-motorist was using preventive safety equipment other than a reflective clothing/carried item or light (e.g., bicycle reflectors and flags, reflectors and triangles on a buggy, hi-glo orange clothing, rollerblade stoppers, etc.). If other safety equipment is noted in the case materials and it cannot be determined if it is preventive or protective, use code **8 (Not Reported)**.

The following attributes apply to all 6 subfields:

- 1 (No)** is used when the case materials identify this non-motorist did not use this type of safety equipment.
- 2 (Yes)** is used when the case materials identify this non-motorist used this type of safety equipment.
- 8 (Not Reported)** is used when the case materials do not provide sufficient information to identify if this non-motorist did 2(Yes) or did not 1 (No) use this type of safety equipment.
- 9 (Reported as Unknown)** is used when the case materials identify it is unknown if this non-motorist used this type of safety equipment.

Consistency Checks:

Check	IF	THEN
(1N4F)	NON-MOTORIST SAFETY EQUIPMENT Subfield 5- Non-Motorist Use of Lighting equals 2,	NON-MOTORIST CONTRIBUTING CIRCUMSTANCES should not equal 13.
(4X2A)	NON-MOTORIST CONTRIBUTING CIRCUMSTANCES equals 19	NON-MOTORIST SAFETY EQUIPMENT Subfield 4- Non-Motorist Use of Reflective Clothing/Carried Item should not equal 2.
(4X2B)	NON-MOTORIST CONTRIBUTING CIRCUMSTANCES equals 19	NON-MOTORIST SAFETY EQUIPMENT Subfield 5- Non-Motorist Use of Lighting should not equal 2.
(4W2P)	RELATED FACTORS – PERSON (NOT A MV OCCUPANT) LEVEL equals 93,	NON-MOTORIST SAFETY EQUIPMENT Subfield 1 Non-Motorist Helmet Use must equal 2.
(8TOF)	NON-MOTORIST SAFETY EQUIPMENT Subfield 1 Non-Motorist Helmet Use equals 2	PERSON TYPE should equal 06-08.

NM14/D23 - Condition (Impairment) at Time of Crash

FORMAT: 2 numeric. Select all that apply.

SAS NAME: Nmimpair.NMIMPAIR

ELEMENT VALUES:

Codes	Attributes
00	None/Apparently Normal
01	III, Blackout
02	Asleep or Fatigued
03	Walking with a Cane or Crutches, etc.
04	Paraplegic or in a Wheelchair
05	Impaired Due to Previous Injury
06	Deaf
07	Blind
08	Emotional (Depressed, Angry, Disturbed, etc.)
09	Under the Influence of Alcohol, Drugs or Medication
10	Physical Impairment – No Details
96	Other Physical Impairment
98	Not Reported
99	Reported as Unknown If Impaired

Definition: This element attempts to identify any physical impairment to this non-motorist that may have contributed to the cause of the crash.

Remarks: Select all that apply.

This element's values and remarks are identical to the Driver Level element D23. Please see [D23 Condition \(Impairment\) at Time of Crash](#) for remarks.

Consistency Checks:

Check	IF	THEN
(1P6G)	PERSON TYPE equals 04, 06-08, 19,	CONDITION (IMPAIRMENT) AT TIME OF CRASH must not equal 03.
(1P7G)	PERSON TYPE equals 05-07, 19,	CONDITION (IMPAIRMENT) AT TIME OF CRASH should not equal 04.
(1P8G)	PERSON TYPE equals 10,	CONDITION (IMPAIRMENT) AT TIME OF CRASH should not equal 01-10, 96.
(4X3F)	any CONDITION (IMPAIRMENT) AT TIME OF CRASH (NM14) equals 00 or 98 or 99,	only that one code and no other must be coded for this person.
(4X6F)	any CONDITION (IMPAIRMENT) AT TIME OF CRASH (NM14) equals 09,	POLICE REPORTED ALCOHOL INVOLVEMENT (NM15) or POLICE REPORTED DRUG INVOLVEMENT (NM18) must equal 1 for this person.
(U590)	UNLIKELY: any CONDITION (IMPAIRMENT) AT TIME OF CRASH (NM14) equals 05 or 07.	--

NM15/P16 - Police Reported Alcohol Involvement

FORMAT: 1 numeric

SAS NAME: Person.DRINKING

ELEMENT VALUES:

Codes	Attributes
0	No (Alcohol Not Involved)
1	Yes (Alcohol Involved)
8	Not Reported
9	Reported as Unknown

Definition: This data element reflects only the **judgment of law enforcement** as to whether alcohol was involved or not for this person.

Remarks: This element's values and remarks are identical to the Person Level (MV Occupant) element P16. Please see [P16 Police Reported Alcohol Involvement](#) for remarks.

Consistency Checks:

Check	IF	THEN
(4X6F)	any CONDITION (IMPAIRMENT) AT TIME OF CRASH (NM14) equals 09,	POLICE REPORTED ALCOHOL INVOLVEMENT (NM15) or POLICE REPORTED DRUG INVOLVEMENT (NM18) must equal 1 for this person.
(D090)	VIOLATIONS CHARGED equals 11-19, and PERSON TYPE equals 01, 03,	POLICE REPORTED ALCOHOL INVOLVEMENT should equal 1, or POLICE REPORTED DRUG INVOLVEMENT should equal 1.
(P072)	PERSON TYPE equals 02, 03, and INJURY SEVERITY equals 0, and ALCOHOL TEST RESULT equals 996,	POLICE REPORTED ALCOHOL INVOLVEMENT should equal 0, 8.
(P300)	POLICE REPORTED ALCOHOL INVOLVEMENT equals 1, and INJURY SEVERITY equals 4,	ALCOHOL TEST STATUS should not equal 0.

Consistency Checks (FARS Only)

Check	IF	THEN
(P110)	METHOD OF ALCOHOL DETERMINATION BY POLICE equals 1-5, 8,	POLICE REPORTED ALCOHOL INVOLVEMENT should equal 0, 1.
(P200)	POLICE REPORTED ALCOHOL INVOLVEMENT equals 8, 9,	METHOD OF ALCOHOL DETERMINATION BY POLICE should equal 9.

NM16/P17 - Method of Alcohol Determination by Police - FARS Only

FORMAT: 1 numeric

SAS NAME: Person.ALC_DET

ELEMENT VALUES:

Codes	Attributes
1	Evidential Test (breath, blood, urine)
2	Preliminary Breath Test (PBT)
3	Behavioral
4	Passive Alcohol Sensor (PAS)
5	Observed
8	Other (e.g., Saliva test)
9	Not Reported

Definition: This element describes the method by which the police made the determination as to whether alcohol was involved or not for this person.

Remarks: This element's values and remarks are identical to the Person Level (MV Occupant) element P17. Please see [P17 Method of Alcohol Determination by Police](#) for remarks.

Consistency Checks:

Check	IF	THEN
(P110)	METHOD OF ALCOHOL DETERMINATION BY POLICE equals 1-5, 8,	POLICE REPORTED ALCOHOL INVOLVEMENT should equal 0, 1.
(P200)	POLICE REPORTED ALCOHOL INVOLVEMENT equals 8, 9,	METHOD OF ALCOHOL DETERMINATION BY POLICE should equal 9.
(U681)	UNLIKELY: METHOD OF ALCOHOL DETERMINATION BY POLICE equals 8.	--

NM17/P18 - Alcohol Test

FORMAT: 3 sets, 1 set, 1 numeric, 1 set, 2 numeric, 1 set, 3 numeric

SAS NAME: Person.ALC_STATUS, Person.ATST_TYP, Person.ALC_RES

ELEMENT VALUES:

Subfield 1 – Test Status

CRSS Codes	FARS Codes	Attributes
0	0	Test Not Given
2	2	Test Given
8	8	Not Reported
9	9	Reported as Unknown if Tested

998	998	Positive Reading with No Actual Value
995	995	Not Reported
999	999	Reported as Unknown if Tested

Definition for Alcohol Test Status: This element identifies if an alcohol (ethanol) test was given to this person.

Definition for Alcohol Test Type: This element identifies the type of the alcohol (ethanol) test that was used for this person.

Definition for Alcohol Test Result: This element identifies the alcohol (ethanol) test result for this person.

Remarks: This element's values and remarks are identical to the Person Level (MV Occupant) element P18. Please see [P18 Alcohol Test](#) for remarks.

Consistency Checks:

Check	IF	THEN
(5T7P)	ALCOHOL TEST STATUS equals 0,	ALCOHOL TEST TYPE must equal 00, and ALCOHOL TEST RESULT must equal 996.
(5T8P)	ALCOHOL TEST STATUS equals 9,	ALCOHOL TEST TYPE must equal 99, and ALCOHOL TEST RESULT must equal 999.
(5T9P)	ALCOHOL TEST STATUS equals 2,	ALCOHOL TEST TYPE must equal 01-11 , 95, 98, and ALCOHOL TEST RESULT must equal 000-940, 997, 998.
(5TCP)	ALCOHOL TEST STATUS equals 8,	ALCOHOL TEST TYPE must equal 95, and ALCOHOL TEST RESULT must equal 995.
(P071)	PERSON TYPE equals 02, 04-08, 10, and INJURY SEVERITY does not equal 4,	ALCOHOL TEST STATUS should not equal 9, ALCOHOL TEST TYPE should not equal 99, and ALCOHOL TEST RESULT should not equal 999.
(P074)	PERSON TYPE equals 02, 04-08, 10, and INJURY SEVERITY does not equal 4,	ALCOHOL TEST TYPE must equal 00, and ALCOHOL TEST RESULT must not equal 995.
(P080)	ALCOHOL TEST RESULTS should not equal 340-940.	--
(P300)	POLICE REPORTED ALCOHOL INVOLVEMENT equals 1, and INJURY SEVERITY equals 4,	ALCOHOL TEST STATUS should not equal 0.
(U689)	UNLIKELY: ALCOHOL TEST Subfield 3-Test Result equals 001-009.	--

NM18/P19 - Police Reported Drug Involvement

FORMAT: 1 numeric

SAS NAME: Person.DRUGS

ELEMENT VALUES:

Codes	Attributes
0	No (Drugs Not Involved)
1	Yes (Drugs Involved)
8	Not Reported
9	Reported as Unknown

Definition: This data element reflects only the **judgment of law enforcement** as to whether drugs were involved or not for this person.

Remarks: This element's values and remarks are identical to the Person Level (MV Occupant) element P19. Please see [P19 Police Reported Drug Involvement](#) for remarks.

Consistency Checks:

Check	IF	THEN
(4X6F)	any CONDITION (IMPAIRMENT) AT TIME OF CRASH (NM14) equals 09,	POLICE REPORTED ALCOHOL INVOLVEMENT (NM15), or POLICE REPORTED DRUG INVOLVEMENT (NM18) must equal 1 for this person.
(D090)	VIOLATIONS CHARGED equals 11-19, and PERSON TYPE equals 01, 03,	POLICE REPORTED ALCOHOL INVOLVEMENT should equal 1, or POLICE REPORTED DRUG INVOLVEMENT should equal 1.

Consistency Checks (FARS Only):

Check	IF	THEN
(BQOP)	METHOD OF DRUG DETERMINATION BY POLICE equals 8,	POLICE REPORTED DRUG INVOLVEMENT must equal 0, 1, 8, 9.
(BROP)	METHOD OF DRUG DETERMINATION BY POLICE equals 1-7,	POLICE REPORTED DRUG INVOLVEMENT must equal 0, 1, 8.
(P140)	POLICE REPORTED DRUG INVOLVEMENT equals 8, 9,	METHOD OF DRUG DETERMINATION BY POLICE should equal 8.
(P150)	POLICE REPORTED DRUG INVOLVEMENT equals 1, and METHOD OF DRUG DETERMINATION BY POLICE equals 2,	DRUG TEST STATUS should not equal 0.
(P160)	POLICE REPORTED DRUG INVOLVEMENT equals 1, and METHOD OF DRUG DETERMINATION BY POLICE equals 2,	not all DRUG TEST RESULTS should equal 0001.
(P170)	METHOD OF DRUG DETERMINATION BY POLICE equals 1-7,	POLICE REPORTED DRUG INVOLVEMENT should equal 0, 1.

NM19/P20 - Method of Drug Determination by Police - FARS Only

FORMAT: 1 numeric

SAS NAME: Person.DRUG_DET

ELEMENT VALUES

Codes	Attributes
1	Evidential Test (Blood, Urine)
2	Drug Recognition Expert (or Evaluator) (DRE) determination
3	Behavioral
7	Other
8	Not Reported

Definition: This element identifies the method by which the police made the determination as to whether drugs were involved or not for this person.

Remarks: This element's values and remarks are identical to the Person Level (MV Occupant) element P20. Please see [P20 Method of Drug Determination by Police](#) for remarks.

Consistency Checks:

Check	IF	THEN
(BQOP)	METHOD OF DRUG DETERMINATION BY POLICE equals 8,	POLICE REPORTED DRUG INVOLVEMENT must equal 0, 1, 8, 9.
(BROP)	METHOD OF DRUG DETERMINATION BY POLICE equals 1-7,	POLICE REPORTED DRUG INVOLVEMENT must equal 0, 1, 8.
(P140)	POLICE REPORTED DRUG INVOLVEMENT equals 8, 9,	METHOD OF DRUG DETERMINATION BY POLICE should equal 8.
(P160)	POLICE REPORTED DRUG INVOLVEMENT equals 1, and METHOD OF DRUG DETERMINATION BY POLICE equals 2,	not all DRUG TEST RESULTS should equal 0001.
(P170)	METHOD OF DRUG DETERMINATION BY POLICE equals 1-7,	POLICE REPORTED DRUG INVOLVEMENT should equal 0, 1.

*52	Unfamiliar With Roadway
56	Non-Driver Flees Scene
*57	Improper Tire Pressure

Vision Obscured By:

Codes	Attributes
*60	Rain, Snow, Fog, Smoke, Sand, Dust
*61	Reflected Glare, Bright Sunlight, Headlights
*62	Curve, Hill, or Other Design Features (including traffic signs, embankment)
*63	Building, Billboard, Other Structures
*64	Trees, Crops, Vegetation
*65	Motor Vehicle (including load)
*66	Parked Vehicle
*67	Splash or Spray of Passing Vehicle
*68	Inadequate Lighting System
*69	Obstructing Angles on Vehicle
*70	Mirrors
*72	Other Visual Obstruction

Skidding, Swerving, Sliding Due To:

Codes	Attributes
*73	Severe Crosswind
*74	Wind from Passing Truck
*75	Slippery or Loose Surface
*76	Tire Blowout or Flat

Codes	Attributes
*77	Debris or Objects in Road
*78	Ruts, Holes, Bumps in Road
*80	Vehicle in Road
*81	Phantom Vehicle
*82	Pedestrian, Pedal Cyclists, or Other Non-Motorist
*83	Ice, Snow, Slush, Water, Sand, Dirt, Oil, Wet Leaves on Road

Other Non-Motorist Factors:

Codes	Attributes
86	Emergency Services Personnel
87	Police or Law Enforcement Officer
90	Non-Motorist Pushing a Vehicle
91	Portable Electronic Devices
93	Non-Motorist Wearing Motorcycle Helmet
31	Default Code Used for Vehicle Numbering
99	Reported as Unknown

***FARS ONLY ATTRIBUTES**

Definition: This element identifies factors related to persons not in a motor vehicle expressed by the investigating officer.

Remarks: Code information provided by the investigating officer associated with this person from the narrative, contributing factors/circumstances field, or citations/violations section of the case materials.

This is a nominal list only and does NOT imply a hierarchy. However, if more than three factors apply to this non-motorist, capture those that cannot be collected elsewhere in the data.

The following lists those related factors that may be used for each [person type \(NM7\)](#):

Person Type	Valid Related Factors
04 (Occupant of a Non-Motor Vehicle Transport Device)	00, 08, 09, 10, 18, 21, 26, 31 , 37, 40-42, 51, 52, 56, 57, 60-70, 72-78, 80-83, 87, 91, 93, 99
05 (Pedestrian)	00, 08, 09, 10, 18, 31 , 37, 41, 56, 60-67, 72, 86-87, 90, 91, 93, 99
06 (Bicyclist)	00, 08, 10, 18, 21, 26, 31 , 37, 40-42, 51, 52, 56, 57, 60-68, 72-78, 80-83, 87, 91, 93, 99
07 (Other Cyclist)	00, 08, 10, 18, 21, 26, 31 , 37, 40-42, 51, 52, 56, 57, 60-68, 72-78, 80-83, 91, 93, 99
08 (Person on Personal Conveyances)	00, 08, 10, 13, 18, 21, 26, 31 , 37, 40-42, 51, 52, 56, 57, 60-70, 72-78, 80-83, 87, 91, 93, 99
10 (Persons In/On Buildings)	00, 08, 10, 13, 18, 26, 31 , 86, 87, 93, 99
09 (Unknown Type of Non-Motorist)	00, 08, 09, 10, 18, 21, 26, 31 , 37, 40-42, 51, 52, 56, 57, 60-68, 72-78, 80-83, 86, 87, 91, 93, 99

00 (None) is used when no applicable related factors are noted in the crash report. Zero-fill all fields. Also, use **00 (None)** to complete the remaining fields when you will be recording less than three non-motorist-related factors. DO NOT leave any remaining fields blank.

***08 (Mentally Challenged)** is used when the case materials identify that the non-motorist has a documented mental illness or intellectual disorder noted by the officer.

09 (Construction/Maintenance/Utility Worker) is used when the case materials identify that this was a non-motorist working with the highway department, a contractor, or a utility company at the time of the crash.

10 (Alcohol and/or Drug Test Refused) is used when the officer notes that this person refused to take an alcohol and/or a drug test. Refusing a test does not necessarily mean that a test was not given. It is possible that after a refusal, the officer may have obtained a warrant or some other authorization to administer a test post-refusal.

This includes when the person initially refuses and later consents. Because of this, it is possible to code **10 (Alcohol and/or Drug Test Refused)** and also code an actual test with results for the same person.

13 (Motorized Wheelchair Rider) is used when the case materials identify the non-motorist is in a motorized wheelchair (personal conveyance).

***18 (Mother of Dead Fetus/Mother of Infant Born Post-Crash)** is used when the case materials identify that this non-motorist is the mother of a fetus that died in or as a result of this crash or it is identified that this non-motorist gave birth after the crash whether the child survives or not. Note that for crash classification purposes, a fetus is considered to be part of a pregnant woman rather than a separate individual and, thus, is not counted as a separate person in the crash.

***21 (Overloading or Improper Loading of Vehicle with Passengers or Cargo)** is used when the case materials describe more than one non-motorist is occupying one seating position at the time of the crash. For example, overloading a bicycle with a passenger riding on the handlebars.

***26 (Following Improperly)** is used when the case materials identify that this non-motorist was following a bicyclist, motor vehicle, non-motor vehicle transport device, or person on a personal conveyance too closely as to create a dangerous situation.

Examples include:

- A non-motorist (bicyclist, skateboard rider, roller blader, etc.) that attempts to grab on to a motor vehicle that is in-transport.
- A bicyclist is following a vehicle so closely that as it passes or takes an avoidance maneuver around one vehicle going in the same direction as the bicyclist, the bicyclist strikes the rear of the vehicle it was attempting to pass or the rear of another vehicle in the adjacent lane also going the same direction.

***37 (Traveling on Prohibited Trafficways)** is used when the case materials identify that this non-motorist was traveling on an open trafficway that prohibited travel for their mode of transportation. This applies to all forms of pedestrian travel (skateboard riders, roller bladers, etc.), as well as horseback riders, carriages, bicyclists, etc.

***40 (Passing Through or Around Barrier)** is used when the case materials identify this non-motorist was traveling through or around a “demarcated” area to be in a prohibited area (street closed for a parade, construction, sidewalk closed, etc.).

***41 (Failure to Observe Warnings or Instructions on Vehicles Displaying Them)** is used when the case materials identify this non-motorist failed to heed warnings or follow instructions displayed on other vehicles.

Examples include:

- A non-motorist failed to follow construction instructions (e.g., arrows directing traffic mounted on a vehicle) or instructions on emergency vehicles (ambulances, fire trucks, police cars).
- A non-motorist failed to observe right-turn warning on a truck or buses.

- A bicyclist failed to heed hazard lights on a disabled vehicle.
- A child failed to walk around the school bus arm that was extended into the travel lane that permitted the bus driver to see the child in the roadway.

***42 (Failure to Signal Intentions)** is used when the case materials identify this non-motorist failed to signal their intentions as required. This attribute includes a failure to signal by either lamp turn signal or hand.

***51 (Operator Inexperience)** is used when the case materials identify this non-motorist's (horseback rider, skate boarder, bicyclist without training wheels, etc.) lack of experience contributed to their involvement. Should be expressed by officer and not presumed based on age.

***52 (Unfamiliar with Roadway)** is used when the case materials identify this non-motorist's (horseback rider, skate boarder, bicyclist without training wheels, etc.) lack of familiarity with the area/location where the crash occurred contributed to their involvement. Should be expressed by officer and not presumed based on age.

56 (Non-Driver Flees Scene) is used when the case materials identify this non-motorist left the scene of a Hit-and-Run crash.

Examples Include:

- A bicyclist clipped by a vehicle that runs off the road and overturns, leaves the scene on their bike.
- A pedestrian is pushing an occupied wheelchair, which is struck by a motor vehicle. The pedestrian panics and flees the scene.

***57 (Improper Tire Pressure)** is used when the case materials identify that improper tire pressure was present on one or more tires of a bicycle, non-motor vehicle transport device or personal conveyance in use by this non-motorist. It signifies that improper tire pressure is not a defect, but rather the irresponsibility of this person.

Vision Obscured By:

The following set of attributes identifies visual obstructions noted in the case materials applicable to this non-motorist.

***60 (Rain, Snow, Fog, Smoke, Sand, Dust)**

***61 (Reflected Glare, Bright Sunlight or Headlights)**

***62 (Curve, Hill or Other Design Features [including traffic signs, embankment])**

***63 (Building, Billboard or Other Structures)**

***64 (Trees, Crops or Vegetation)**

***65 (Motor Vehicle [including load])**

Examples include:

- A car stopped on the roadway.
- A tractor-trailer in-transport on the road.
- A school bus stopped for the purpose of loading and/or unloading children.

***66 (Parked Vehicle)**

***67 (Splash or Spray of a Passing Vehicle)**

***68 (Inadequate Lighting System)**

***69 (Obstructing Angles on the Vehicle)** is used when the case materials identify obstructing angles on this person's vehicle. This attribute should not to be confused with visual obstructions from other vehicles. (See **65 (Motor Vehicle [including load])** and **66 (Parked Vehicle)**).

***70 (Mirrors)** is used when the case materials identify that this non-motorist's vision was obscured by any type of mirror.

***72 (Other Visual Obstruction)** is used when the case materials identify that this non-motorist's vision was obscured by something other than previously listed. For example, a trailer that has been left parked on the side of the road by a truck or vehicle.

Skidding, Swerving, Sliding Due To:

This set of attributes is applicable to the non-motorist that attempted to avoid one of the following or whose control loss was related to one of the following.

***73 (Severe Crosswind)** is used when the case materials identify this non-motorist's control loss was related to severe crosswinds.

***74 (Wind from Passing Truck)** is used when the case materials identify this non-motorist's control loss was related to winds produced by a passing truck.

***75 (Slippery or Loose Surface)** is used when the case materials identify this non-motorist's control loss was related to the surface composition of the roadway and/or the condition of that composition. Not to be used when the surface is slippery due to environment conditions such as rain, ice or snow (see [83 \(Ice, Snow, Slush, Water, Sand, Dirt, Oil or Wet Leaves on Road\)](#)).

Examples include:

- A slippery surface that is old or worn resulting in loose gravel on the roadway.
- Blacktop that is slick as a newly paved surface.

***76 (Tire Blowout or Flat)** is used when the case materials identify this non-motorist's control loss was related to a tire blowout or flat.

***77 (Debris or Objects in Road)** is used when the case materials identify this non-motorist attempted to avoid or lost control as a result of debris in the road. Examples would include nails, glass, trash cans, tire retread, trash, dead animals, pile of sand, barricades, etc.

***78 (Ruts, Holes, Bumps in Road)** is used when the case materials identify this non-motorist attempted to avoid or lost control as a result of a road surface anomalies such as ruts, holes, dips or bumps.

***80 (Vehicle in Road)** is used when the case materials identify this non-motorist attempted to avoid or lost control as a result of another vehicle in the road. This includes both contact and non-contact vehicles that remain at the scene.

***81 (Phantom Vehicle)** is used when the case materials identify this non-motorist attempted to avoid or lost control as a result of a non-contact vehicle that left the scene as described by the police officer.

***82 (Pedestrian, Pedal Cyclist, or Other Non-Motorist)** is used when the case materials identify this non-motorist attempted to avoid or lost control as a result of a pedestrian, a pedal cyclist (bicyclist) or other type of non-motorist.

***83 (Ice, Snow, Slush, Water, Sand, Dirt, Oil or Wet Leaves on Road)** is used when the case materials identify this non-motorist's control loss was related to a substance on the roadway that caused the roadway to be slick, which may interfere with the traction of the vehicle. This attribute does not include part of the roadway composition. For cases involving roadway composition issues, see [75 \(Slippery or Loose Surface\)](#).

Other Non-Motorist Factors:

86 (Emergency Services Personnel) is used when the case materials identify that this non-motorist was a fire fighter, wrecker service worker, or emergency medical service (EMS) personnel.

87 (Police or Law Enforcement Officer) is used when the case materials identify that this non-motorist was a police or law enforcement officer **working** at the time of the crash. The officer may be affiliated at the Federal, State or local law enforcement level. This would also include military and park police, border patrol officers and all other sworn law enforcement officers.

90 (Non-Motorist Pushing a Vehicle) is used when the case materials identify the non-motorist was pushing a vehicle.

91 (Portable Electronic Devices) is used when the case materials identify that this non-motorist was using an electronic device (cell phone, MP3 Player, PDA, etc.) that was somehow related to the crash occurrence.

93 (Non-Motorist Wearing Motorcycle Helmet) is used when the materials identify that this non-motorist was wearing a motorcycle helmet. This can apply to a pedestrian, bicyclist, or other non-motorist. For example, a pedestrian that previously was riding a motorcycle gets struck while still wearing their helmet.

31 (Default Code Used for Vehicle Numbering) is used when it cannot be determined from the case materials which vehicle hit the non-motorist. See guidance under [Vehicle Number of Motor Vehicle Striking Non-Motorist](#).

99 (Reported as Unknown) is used when the circumstances surrounding the crash are unknown and reported as "unknown" by the investigating officer. In these circumstances, nine-fill all fields. If **99 (Reported as Unknown)** is used for any field, ALL fields must be **99 (Reported as Unknown)**. DO NOT leave any remaining fields blank.

Consistency Checks:

Check	IF	THEN
(1M1F)	RELATED FACTORS-PERSON LEVEL (Not a MV Occupant) equals 13,	PERSON TYPE should equal 08.
(1N0F)	PERSON TYPE equals 06,	RELATED FACTORS-PERSON LEVEL (Not a MV Occupant) must not equal 09, 13, 69, 70, 86, 90.
(1N1F)	PERSON TYPE equals 10,	RELATED FACTORS-PERSON LEVEL (Not a MV Occupant) must not equal 09, 21, 37, 40-42, 51, 52, 56, 57, 60-70, 72-78, 80-83, 90, 91.
(1W0P)	any RELATED FACTORS-PERSON LEVEL equals 99,	all factors must equal 99.
(2W0P)	any RELATED FACTORS-PERSON LEVEL equals blanks,	all factors must equal blanks.
(3W0P)	any RELATED FACTORS-PERSON LEVEL equals 00,	all subsequent factors must equal 00.
(4W1P)	A RELATED FACTORS-PERSON LEVEL (Not a MV Occupant) between 08 and 91 can be used only once per person form.	--

Check	IF	THEN
(4W2P)	RELATED FACTORS – PERSON (NOT A MV OCCUPANT) LEVEL equals 93,	NON-MOTORIST SAFETY EQUIPMENT Subfield 1 Non-Motorist Helmet Use must equal 2.
(8M0F)	PERSON TYPE equals 04,	RELATED FACTORS-PERSON LEVEL (Not a MV Occupant) must not equal 13, 86, 90.
(8Q0F)	PERSON TYPE equals 08,	RELATED FACTORS-PERSON LEVEL must not equal 09, 86, 90.
(9M0F)	PERSON TYPE equals 05,	RELATED FACTORS-PERSON LEVEL (Not a MV Occupant) must not equal 13, 21, 26, 40, 42, 51, 52, 57, 68-70, 73-83.
(CK0P)	PERSON TYPE equals 07,	RELATED FACTORS-PERSON LEVEL (Not a MV Occupant) must not equal 09, 13, 69, 70, 86, 87, 90.
(CM0P)	PERSON TYPE equals 19,	RELATED FACTORS-PERSON LEVEL (Not a MV Occupant) must not equal 13, 69, 70, 90.

Consistency Check (FARS Only):

Check	IF	THEN
(5W0P)	RELATED FACTORS-PERSON LEVEL equals 18,	SEX must equal 2, and AGE must be greater than 012.

Supplemental Data Elements – FARS Only

Person Level Elements – Including Coding Instructions.

- [**SP1 – Death Certificate Number**](#)
- [**SP2 – Fatal Injury at Work**](#)
- [**SP3 – Race/Hispanic Origin**](#)

SP1 - Death Certificate Number - FARS Only

FORMAT: Element Completed in MDE

SAS NAME: Person.CERT_NO

ELEMENT VALUES:

Codes	Attributes
0s	Not Applicable (not a fatality)
--	Any Numeric Characters
9s	Unknown

Definition: This element identifies the four-digit GSA code for the city where the death occurred, the two-digit State number, and the six-digit sequence number from the death certificate as assigned by the State vital statistics or vital records department.

Remarks: Code the sequence number from the death certificate as assigned by your State vital statistics department. The sequence number is six digits and is part of the State File Number.

The format for coding the numbers is as follows:

- First four digits _____ City where death occurred
- Next two digits __ State where death occurred
- Last six digits _____ Sequence Number as assigned by State vital statistics department

If this person is not a fatality, zero-fill this element.

Use GSA codes for the city and State where the death occurred according to the death certificate. These are the same GSA codes used for the [City variables in the Crash Level Form](#):

- 0000 - Not a fatality or death not within city limits and no location code is available
- 0001-9996 - GSA Geographical Location Codes
- 9997 - Other (death within city limits, but no GSA code available for this city)
- 9999 - Unknown (city where death occurred cannot be found on death certificate).

The State codes are the same as those used for variables [C1, V1, D1, PC1, P1, and NM1 State Number](#).

If the fatal crash occurred in your State, but the death occurred in a hospital of another State, please attempt to obtain the death certificate from that State and code the city and State where the death occurred.

If a person dies at the crash scene, code the appropriate city code or location code for the crash location. Code "0000" if the location is not within a city, and no geographical location code is available.

If the location is not within a city, but a geographical location code is available, use the location code.

If a person is transported by EMS and dies en route or at the hospital, use the city code for the hospital's location.

Code the exact sequence number as indicated on the death certificate. If the sequence number is less than six-digits long (e.g., the sequence number is "12345") right-justify your coded number and zero-fill the first and/or second digit, e.g., 012345.

Note that if you receive a copy of the death certificate from the Medical Examiner or Coroner, it may not contain the sequence number. The sequence number needed is the one assigned by your State vital statistics or vital records department, which is subsequently sent to the National Center for Health Statistics. In those instances, leave the sequence number blank until you are able to obtain it in a follow-up effort with your vital statistics department.

If the sequence number contains a letter in it (e.g., N12345), simply ignore the letter and code the numbers only (right-justified), (e.g., 012345).

If the death certificate number cannot be obtained, 9-fill this element.

If the death certificate number can be obtained, but is not yet received, leave this element blank until the number is available.

Consistency Checks:

Check	IF	THEN
(7EOP)	INJURY SEVERITY equals 4,	DEATH CERTIFICATE NUMBER must NOT equal 0000-00-000000.
(7FOP)	DEATH CERTIFICATE NUMBER is not blank or 0000-00-000000,	INJURY SEVERITY must equal 4.

SP2 - Fatal Injury at Work - FARS Only

FORMAT: 1 numeric

SAS NAME: Person.WORK_INJ

ELEMENT VALUES:

Codes	Attributes
0	No
1	Yes
8	Not Applicable (not a fatality)
9	Unknown

Definition: This element indicates if the death certificate identified this person as being “at work” at the time of the crash.

Remarks: THE DEATH CERTIFICATE INDICATES WHETHER THE VICTIM WAS ON-THE-JOB AT THE TIME OF FATAL INJURY.

0 (No) is used if the injury **was not** at work.

1 (Yes) is used if the injury **was** on the job.

8 (Not Applicable [not a fatality]) is used if the victim was not a fatality.

9 (Unknown) is used if the death certificate does not indicate whether the injury was at work or if you do not have access to death certificate information.

FATAL INJURY AT WORK SHOULD ONLY BE DETERMINED FROM THE DEATH CERTIFICATE, NOT FROM ANY OTHER SOURCE. HOWEVER, IT IS NOT NECESSARY TO HAVE A COPY OF THE DEATH CERTIFICATE.

Consistency Checks:

Check	IF	THEN
(7ROP)	FATAL INJURY AT WORK equals 0, 1, 9,	INJURY SEVERITY must equal 4.
(7WOP)	FATAL INJURY AT WORK equals 8,	INJURY SEVERITY must not equal 4.
(P1A0)	AGE is less than 012, and INJURY SEVERITY equals 4,	FATAL INJURY AT WORK should equal 0.
(P130)	BODY TYPE equals 60-67, 71, 72, 78, 79, and PERSON TYPE equals 01, 03, and INJURY SEVERITY equals 4,	FATAL INJURY AT WORK should equal 1.

SP3 - Race/Hispanic Origin - FARS Only

FORMAT: 2 numeric

SAS NAME: Person.RACE, Person.HISPANIC

ELEMENT VALUES:

Race:

Codes	Attributes
00	Not a Fatality (not applicable)
01	White
02	Black
03	American Indian (includes Alaska Native)
04	Chinese
05	Japanese
06	Hawaiian (includes part-Hawaiian)
07	Filipino
18	Asian Indian
19	Other Indian (includes South and Central America, any others, except American or Asian Indians)
28	Korean
38	Samoan
48	Vietnamese
58	Guamanian
68	Other Asian or Pacific Islander
78	Asian or Pacific Islander, No Specific (individual) Race
97	Multiple Races (Individual races not specified; e.g., "mixed")
98	All Other Races
99	Unknown

Hispanic Origin:

Codes	Attributes
00	Not a Fatality (not applicable)
01	Mexican
02	Puerto Rican
03	Cuban
04	Central or South American
05	European Spanish
06	Hispanic, Origin not Specified or Other Origin
07	Non-Hispanic
99	Unknown

Definition: This element indicates the race and Hispanic origin of this person from the death certificate.

Remarks: Race and Hispanic Origin should be obtained from **the death certificate only**.

Both RACE and HISPANIC ORIGIN are coded for fatal victims only ([INJURY SEVERITY](#) on this person must be [Fatal Injury](#)). If INJURY SEVERITY is coded other than **Fatal Injury** on the Person Level, the MDE System will automatically enter "00s" in both the RACE and HISPANIC ORIGIN fields.

For translating the entries on the death certificate, refer to the **tables below for guidance for mapping Race and Hispanic Origin using the CDC's Standard Death Certificate selections**. The only exception is Hawaiian. Any race with Hawaiian is coded Hawaiian (See [06 Hawaiian](#) below).

Race

01 (White) should be coded for persons listed as White, Mexican, Puerto Rican, Cuban, and Caucasian for race.

06 (Hawaiian [includes part Hawaiian]) should be coded for any person listed as Hawaiian, even if another race is listed as well.

19 (Other Indian) includes South and Central America and any other Indians, except American or Asian Indians.

68 (Other Asian or Pacific Islander) is used when an “Other Asian” or “Pacific Island” race is specified, and it is other than **04 (Chinese)**, **05 (Japanese)**, **06 (Hawaiian)**, **07 (Filipino)**, **18 (Asian Indian)**, **28 (Korean)**, **38 (Samoan)**, **48 (Vietnamese)**, or **58 (Guamanian)**.

78 (Asian or Pacific Islander, No Specific [individual] Race) is used when the death certificate or report lists “Asian” for race.

97 (Multiple Races) is used when the death certificate indicates more than one race **without** specifying the individual races (e.g., “mixed,” “multiple races,” “multi-racial,” etc.)

98 (All Other Races) is used if an individual race listed on the death certificate or report is not found on the translation table.

If more than one race is listed on the death certificate or report, code the race entry listed **first**. An example is “American Indian/White,” which should be coded **03 (American Indian)**. Again, [06 \(Hawaiian\)](#) is the exception. (See [06 \(Hawaiian\)](#) above.)

Below is guidance for mapping Race using the CDC's Standard Death Certificate Race selections to FARS attributes.

CDC Death Certificate RACE	Map to FARS RACE
White	01 White
Black or African American	02 Black
American Indian or Alaska Native	03 American Indian (includes Alaska Native)
Asian Indian	18 Asian Indian
Chinese	04 Chinese
Filipino	07 Filipino
Japanese	05 Japanese
Korean	28 Korean
Vietnamese	48 Vietnamese
Other Asian	68 Other Asian or Pacific Islander
Native Hawaiian	06 Hawaiian (includes part Hawaiian)
Guamanian or Chamorro	58 Guamanian
Samoan	38 Samoan
Other Pacific Islander	68 Other Asian or Pacific Islander
Other	98 All Other Races

Hispanic Origin

06 (Hispanic Origin Not Specified, or Other Origin) This includes when you know they are Hispanic, but the specific origin is not specified (e.g., Hispanic, Latino, Latin American, South American).

99 (Unknown) This person could be Hispanic, or not. You don't have enough information to determine whether or not they are Hispanic. (e.g., all you know is that Race is "White," "Black," "European," or "Indian," and no other information is provided.)

If you receive a listing from the Vital Statistics Department, be sure you request a translation table for the code structure.

Below is guidance for mapping Hispanic Origin using the CDC's Standard Death Certificate Hispanic Origin selections to FARS attributes.

CDC Death Certificate HISPANIC ORIGIN	Map to FARS HISPANIC ORIGIN
No, not Spanish/Hispanic/Latino	07 Non-Hispanic
Yes, Mexican, Mexican American, Chicano	01 Mexican
Yes, Puerto Rican	02 Puerto Rican
Yes, Cuban	03 Cuban
Yes, Other Spanish/Hispanic/Latino	06 Hispanic, Origin not Specified, or Other Origin

Consistency Checks:

Check	IF	THEN
(7E1P)	INJURY SEVERITY equals 4,	RACE must not equal 00.
(7E2P)	INJURY SEVERITY equals 4,	HISPANIC ORIGIN must not equal 00.
(7E3P)	INJURY SEVERITY is not equal to 4,	RACE must equal 00 AND HISPANIC ORIGIN must equal 00.
(7F1P)	RACE equals 00,	INJURY SEVERITY must not equal 4.
(7F2P)	HISPANIC ORIGIN equals 00,	INJURY SEVERITY must not equal 4.
(7F3P)	RACE is not equal to 00, and HISPANIC ORIGIN is not equal to 00,	INJURY SEVERITY must equal 4.

2018 Consistency Checks

The following pages contain Consistency Checks, Intra-consistency Checks and Special Processing Rules. It is arranged in alpha/numeric order.

All questions concerning the FARS/CRSS Coding Manual and coding issues should be directed through the CDAN Helpdesk, to Coding Questions.

0 Series

Error Code	Error Test
050P	If PERSON TYPE equals 04-08, 19, and NUMBER OF VEHICLE FORMS SUBMITTED equals 001, then VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST must equal 001.
060P	If VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST is not equal to 000, then the VEHICLE NUMBER OF MOTOR VEHICLE STRIKING NON-MOTORIST must equal some VEHICLE NUMBER in the case, and the UNIT TYPE must equal 1.
OPB1	If PEDESTRIAN/BIKE TYPING - CRASH TYPE - PEDESTRIAN equals 741, then at least one NON-MOTORIST CONTRIBUTING CIRCUMSTANCES must equal 11.

1 Series

Error Code	Error Test
170F	If ACCIDENT MONTH equals current month, then ACCIDENT DAY must be at least 2 days prior to current day or 99.
1A0P	If RELATED FACTORS-CRASH LEVEL equals 14, then NUMBER OF VEHICLE FORMS SUBMITTED must be greater than 001.
1A1P	If RELATED FACTORS-CRASH LEVEL equals 05, then ROADWAY SURFACE CONDITIONS must equal 06 for at least one vehicle.
1COP	If the VEHICLE MODEL YEAR is not equal to 9998 or 9999, then the VEHICLE MODEL YEAR must not be greater than CRASH YEAR plus ONE.
1D0P	If SPECIAL USE equals 01, then BODY TYPE must equal 02-09, 12, 14-21, 28, 29, 49, 99.

3POF	If PERSON TYPE equals 03-08, 10, 19, then INJURY SEVERITY should not equal 6.
3Q0F	If PERSON TYPE equals 02, 03, 09, and BODY TYPE equals 01-17, 19, 20, 22, 28-34, 39, 41, 42, 50-52, 55, 58, 59, 65, 80-97, then SEATING POSITION must not equal 50.
3ROP	If AIR BAG DEPLOYED does not equal 20, 98, or 99, then SEATING POSITION should not equal 12, 22, 32, 41-55.
3SOP	If SEATING POSITION equals 55, then EJECTION must equal 8.
3UOP	If DEATH DATE equals CRASH DATE, and CRASH TIME is not equal to 9999, then DEATH TIME must not be less than CRASH TIME.
3WOP	If any RELATED FACTORS-PERSON LEVEL equals 00, then all subsequent factors must equal 00.

4 Series

Error Code	Error Test
420P	If MANNER OF COLLISION equals 07, 08, then there must be at least two vehicle forms with AREAS OF IMPACT-INITIAL CONTACT POINT equal to 01-05, 07-11, 61-63, 81-83, 98, 99.
421P	If MANNER OF COLLISION equals 01, then AREAS OF IMPACT-INITIAL CONTACT POINT for one vehicle in the first harmful event must equal 12, and AREAS OF IMPACT- INITIAL CONTACT POINT for the other vehicle in the first harmful event must equal 06.
422P	If MANNER OF COLLISION equals 02, then AREAS OF IMPACT-INITIAL CONTACT POINT for one vehicle in the first harmful event must equal 12, and AREAS OF IMPACT- INITIAL CONTACT POINT for the other vehicle in the first harmful event must equal 12.
423P	If MANNER OF COLLISION equals 06, then AREAS OF IMPACT-INITIAL CONTACT POINT for one vehicle in the first harmful event must equal 01, 11, 12, 98, 99, and AREAS OF IMPACT- INITIAL CONTACT POINT for the other vehicle in the first harmful event must equal 01-05, 07-11, 61-63, 81-83, 98, 99.
424P	If MANNER OF COLLISION equals 09, then AREAS OF IMPACT- CONTACT POINT for one vehicle in the first harmful event must equal 06, and AREAS OF IMPACT- INITIAL CONTACT POINT for the other vehicle in the first harmful event must equal 01-05, 07- 11, 61-63, 98, 99.
425P	If MANNER OF COLLISION equals 10, then AREAS OF IMPACT-INITIAL CONTACT POINT for one vehicle in the first harmful event must equal 06, and AREAS OF IMPACT- INITIAL CONTACT POINT for the other vehicle in the first harmful event must equal 06, 98, 99.
426P	If MANNER OF COLLISION equals 02, then CRASH TYPE must not equal 64-67 for the vehicles involved in the FIRST HARMFUL EVENT.
427P	If MANNER OF COLLISION equals 06, then CRASH TYPE must not equal 20-43 or 50-53 for the vehicles involved in the FIRST HARMFUL EVENT.
428P	If CRASH TYPE equals 20-91, then NUMBER OF VEHICLE FORMS SUBMITTED must be greater than 001.
429P	If NUMBER OF VEHICLE FORMS SUBMITTED equals 001, then CRASH TYPE must equal 00, 01-16, 92, 98, 99.
42AP	If NUMBER OF MOTOR VEHICLES FORMS SUBMITTED equals 001, and RELATION TO TRAFFICWAY equals 02, 04, 06-08, 12, and ATTEMPTED AVOIDANCE MANEUVER equals 00 or 01, then CRITICAL EVENT - PRECRASH (EVENT) should equal 01-06, 08-14 or 19.

2018 Consistency Checks

Error Code	Error Test
42BP	If there is only one vehicle involved in the First Harmful Event where UNIT TYPE equals 1, then the number of vehicles where CRASH TYPE is coded 00, 1-16, 92, 93 or 99 (excluding from the vehicles being counted, those where CRASH TYPE equals 98) must not equal 0 or be greater than 1.
42CP	If there are two vehicles involved in the FIRST HARMFUL EVENT, then those two vehicles' CRASH TYPES must belong to the same CRASH TYPE Configuration.
431P	If NUMBER OF VEHICLE FORMS SUBMITTED equals 002 and UNDERRIDE/OVERRIDE equals 1-8, 9 for one vehicle, then UNDERRIDE/OVERRIDE for the other vehicle must equal 0.
432P	If NUMBER OF VEHICLE FORMS SUBMITTED equals 001, UNDERRIDE/OVERRIDE must equal 0.
440F	If FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 01, then there must be at least one Person Level (Not an MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 01-03, 09-11, 13, 16, 23, 98 or 99.
450F	If FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 07, then there must be at least one Person Level (Not an MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 14.
460F	If FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 02, then there must be at least one Person Level (Not an MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 02, 20.
470F	If FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 03, 08, 10, 12 , then there must be at least one Person Level (Not an MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 20, 22, 28, 98, 99.
480F	If FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 04, 06, then there must be at least one Person Level (Not an MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 09, 16, 20, 21, 24, 25, 28, 98, 99.
490F	If FIRST HARMFUL EVENT equals 08, 09, 15, and RELATION TO TRAFFICWAY equals 05, then there must be at least one Person Level (Not an MV Occupant) form with NON-MOTORIST LOCATION AT TIME OF CRASH equal to 24, 25.
4A0F	If RELATION TO TRAFFICWAY is 12, then NON-MOTORIST LOCATION AT TIME OF CRASH must equal 22 or 28.
4A0P	If BODY TYPE equals 80-93, 95, 96, then SPECIAL USE must not equal 01-03, 06, 07.
4C1P	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 01-05, 07-09, 14, 15, 17, 19, 94, 95, 96, 97, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS must not be greater than 20.
4C2P	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 06, 11, 16, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS must not be greater than 22.
4C3P	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 12, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS must not be greater than 25.
4C4P	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 80-89, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS must not be greater than 15.
4C5P	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 42, 73, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS must not be greater than 30.

2018 Consistency Checks

Error Code	Error Test
4C6P	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 60-65, 71, 72, 79, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS must not be greater than 55.
4C7P	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 66, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS must not be greater than 77.
4C8P	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 91, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS must not be greater than 10.
4C9P	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 90, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS must not be greater than 20.
4COP	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 99, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS must not be greater than 10.
4DOP	If SPECIAL USE equals 03, then BODY TYPE must equal 21, 28, 29, 50-52, 55, 58, 59.
4EOP	If VEHICLE TRAILING equals 1or 2 or 3, then TRAILER VEHICLE IDENTIFICATION NUMBER must not equal 7s or blanks for all three sets.
4E1P	If VEHICLE TRAILING equals 4, then TRAILER VEHICLE IDENTIFICATION NUMBER must not equal 7s for any of the three sets.
4F1P	If NUMBER OF OCCUPANTS is less than 99, and BODY TYPE equals 01-05, 07-10, 13, 17, 90-97, and VEHICLE TRAILING equals 0, then NUMBER OF OCCUPANTS must not be greater than 15.
4F2P	If NUMBER OF OCCUPANTS is less than 99, and BODY TYPE equals 06, 11, and VEHICLE TRAILING equals 0, then NUMBER OF OCCUPANTS must not be greater than 22.
4F3P	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 12, and VEHICLE TRAILING equals 0, then NUMBER OF OCCUPANTS must not be greater than 25.
4F4P	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 80-89, and VEHICLE TRAILING equals 0, then NUMBER OF OCCUPANTS must not be greater than 5.
4F5P	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 15, 16, 42, 73, and VEHICLE TRAILING equals 0, then NUMBER OF OCCUPANTS must not be greater than 30.

B10P	If PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) does not equal 17, and ATTEMPTED AVOIDANCE MANEUVER equals 01, then DRIVER MANEUVERED TO AVOID should equal 00.
B13P	If CRASH TYPE equals 20-49, and ATTEMPTED AVOIDANCE MANEUVER equals 00-01, then CRITICAL EVENT-PRECRASH (EVENT) should not equal 12-14, 54, 66-68, 71-73 or 80-85.
B15P	If CRITICAL EVENT-PRECRASH (EVENT) equals 91, and ATTEMPTED AVOIDANCE MANEUVER equals 00, 01, and the vehicle is involved in the FIRST HARMFUL EVENT, then CRASH TYPE should equal 15.
B16P	If CRITICAL EVENT-PRECRASH (EVENT) equals 90, and ATTEMPTED AVOIDANCE MANEUVER equals 01, and the vehicle is involved in the FIRST HARMFUL EVENT, then CRASH TYPE should equal 12 or 15.
B17P	If CONDITION (IMPAIRMENT) AT TIME OF CRASH (D23) equals 09 for this driver, then CRITICAL EVENT: PRECRASH (EVENT) should not equal 08 for this driver's vehicle.
BAOP	If EJECTION equals 0, 7, 8, or 9, then EJECTION PATH must equal 0.
BBOP	If EJECTION equals 1-3, then EJECTION PATH must equal 1-9.
BFOF	If PERSON TYPE equals 04-08, 10, 19, then EJECTION must equal 8.
BIOP	If DRIVER'S LICENSE STATE equals 99, then COMPLIANCE WITH CDL ENDORSEMENTS must not equal 1, 2.
BJ0P	If DRIVER PRESENCE equals 0, 9, then COMPLIANCE WITH CDL ENDORSEMENTS must be blank.
BJ1P	If UNIT TYPE equals 1, and DRIVER PRESENCE equals 0 or 9, then DRIVER DISTRACTED BY must equal 16.
BJ2P	If UNIT TYPE equals 1, and DRIVER PRESENCE equals 1, then DRIVER DISTRACTED BY must not equal 16 or blank.
BJ3P	If UNIT TYPE equals 1, and DRIVER DISTRACTED BY equals 16, then DRIVER PRESENCE must equal 0 or 9.
BJ4P	If any DRIVER DISTRACTED BY equals 03, then NUMBER OF OCCUPANTS must be greater than 01.
BJ5P	If UNIT TYPE equals 1 and HIT AND RUN equals 1, then DRIVER PRESENCE should not equal 0.
BJ7P	If any DRIVER DISTRACTED BY equals 00 or 16 or 17 or 18 or 19 or 92 or 93 or 96 or 99, then only that one code and no other must be used.
BK0P	If LICENSE COMPLIANCE WITH CLASS OF VEHICLE equals 1, then COMPLIANCE WITH CDL ENDORSEMENTS must not equal 1-3, 9.

2018 Consistency Checks

Error Code	Error Test
BLOP	If COMPLIANCE WITH CDL ENDORSEMENTS equals 1, and any RELATED FACTORS-DRIVER LEVEL equals 19, then LICENSE COMPLIANCE WITH CLASS OF VEHICLE must equal 3.
BNOP	If DRIVER PRESENCE equals 0, 9, then COMMERCIAL MOTOR VEHICLE LICENSE STATUS must be blank.
BQOP	If METHOD OF DRUG DETERMINATION BY POLICE equals 8, then POLICE-REPORTED DRUG INVOLVEMENT must equal 0, 1, 8, 9.
BROP	If METHOD OF DRUG DETERMINATION BY POLICE equals 1-7, then POLICE-REPORTED DRUG INVOLVEMENT must equal 0, 1, 8.
BTOP	<i>If DRUG TEST STATUS equals 2, then any DRUG SPECIMEN must not equal 00 or 99 and any DRUG TEST RESULT must not equal 0000 or 9999.</i>
BT1P	If DRUG TEST STATUS equals 0, then <i>there must exist only one DRUG SPECIMEN equal to 00 and one DRUG TEST RESULT equal to 0000</i> for this person.
BT2P	If DRUG TEST STATUS equals 8, then <i>there must exist only one DRUG SPECIMEN equal to 96 and one DRUG TEST RESULT equal to 9995</i> for this person.
BT3P	If DRUG TEST STATUS equals 2, then at least one DRUG SPECIMEN must equal 01, 02, 11-16, 97, 98 , and one corresponding DRUG TEST RESULT must equal 0001-7000, 9996-9998 .
BT6P	If DRUG TEST STATUS equals 9, then <i>there must exist only one DRUG SPECIMEN equal to 99 and one DRUG TEST RESULT equal to 9999</i> for this person.
BT8P	<i>Only one record with the same DRUG SPECIMEN and DRUG TEST RESULT must exist.</i>
BYOP	DRIVER'S ZIP CODE must be a valid code, blanks, 00000 or 99999.
BZ10	If CRITICAL EVENT- PRECRASH (EVENT) equals 53, then AREAS OF IMPACT-INITIAL CONTACT POINT should not equal 12 for this vehicle.
BZ20	If CRITICAL EVENT-PRECRASH (EVENT) equals 51, 52, then AREAS OF IMPACT-INITIAL CONTACT POINT should not equal 06 for this vehicle.
BZ40	If CRITICAL EVENT - PRECRASH (EVENT) equals 01, then at least one SEQUENCE OF EVENTS must equal 61 for this vehicle.
BZ50	If CRITICAL EVENT - PRECRASH (EVENT) equals 12, and PRE-IMPACT LOCATION is not equal to 5, then at least one SEQUENCE OF EVENTS must equal 64 for this vehicle.
BZ51	If CRITICAL PRECRASH EVENT equals 80 and PRE-IMPACT LOCATION does not equal 4, then at least one PERSON TYPE should equal 5.
BZ60	If CRITICAL EVENT - PRECRASH (EVENT) equals 13, and PRE-IMPACT LOCATION is not equal to 5, then at least one SEQUENCE OF EVENTS must equal 63 for this vehicle.
BZ70	If CRITICAL EVENT - PRECRASH (EVENT) equals 14, then at least one SEQUENCE OF EVENTS must equal 71 for this vehicle.
BZ80	If MANNER OF COLLISION equals 00, then PRECRASH – CRASH TYPE must equal 00, 01-16, 92, 98, 99 for the vehicle in the FIRST HARMFUL EVENT.
BZ90	If CRASH TYPE equals 01-05, and PRE-IMPACT LOCATION is not equal to 0 or 5, then at least one SEQUENCE OF EVENTS prior to the FIRST HARMFUL EVENT must equal 63.
BZ91	If CRASH TYPE equals 06-10, and PRE-IMPACT LOCATION is not equal to 0 or 5, then at least one SEQUENCE OF EVENTS prior to the FIRST HARMFUL EVENT must equal 64.

Error Code	Error Test
CBOP	If REGISTERED VEHICLE OWNER equals 6, then DRIVER PRESENCE must equal 0.

2018 Consistency Checks

Error Code	Error Test
CCOP	If COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 00, 99, then COMPLIANCE WITH CDL ENDORSEMENTS must not equal 1.
CGOP	If LICENSE COMPLIANCE WITH CLASS OF VEHICLE equals 0, then COMPLIANCE WITH CDL ENDORSEMENTS must not equal 1, 3.
CIOP	If VEHICLE TRAILING equals 1-4, then JACKKNIFE must not equal 0.
CJ00	If PREVIOUS RECORDED CRASHES equals 98, then DRIVER'S LICENSE STATE should equal 09, 13, 28, 30, 35, 49.
CJ01	<i>If any driver history counter is not equal to 99, then DRIVER'S LICENSE STATE must not be 96, 97, 98, or 99.</i>
CKOP	If PERSON TYPE equals 07, then RELATED FACTORS-PERSON LEVEL (Not an MV Occupant) must not equal 09, 13, 69, 70, 86-87, 90.
CL0P	If PERSON TYPE equals 09, then RELATED FACTORS-PERSON LEVEL (MV Occupant) must not equal 21, 26, 28, 29, 33, 37, 40-42, 44, 45, 47, 51, 52, 56-70, 72-78, 80-83, 91.
CM0P	If PERSON TYPE equals 19, then RELATED FACTORS-PERSON LEVEL (Not an MV Occupant) must not equal 13, 69, 70, 90.
CSI1	NUMBER OF VEHICLE FORMS must equal the actual number of Vehicle Level forms for this case.
CSI2	There must be exactly one Driver Level form corresponding to each Vehicle Level form.
CSI3	NUMBER OF MOTOR VEHICLE OCCUPANT FORMS SUBMITTED must equal the actual number of Person Level (Motor Vehicle Occupant) forms for this case.
CSI4	NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES must equal the actual number of persons not in motor vehicles in this case.
CSI5	If VEHICLE NUMBER at the Person Level is greater than 000, then VEHICLE NUMBER at the Person Level must equal a VEHICLE NUMBER at the Vehicle Level.
CSI6	For each VEHICLE NUMBER, PERSON NUMBERS must be consecutive, beginning with 001 and with no gaps.
CSI7	PERSON NUMBERS for persons not in motor vehicles must be consecutive, beginning with 001 and with no gaps.

D Series

Error Code	Error Test
D010	If DRIVER'S LICENSE STATE equals 96, 97, then PREVIOUS RECORDED CRASHES should equal 99.
D020	If DRIVER'S LICENSE STATE equals 96, 97, then <i>all three Subfields of</i> PREVIOUS RECORDED SUSPENSIONS AND REVOCATIONS should equal 99.
D030	If DRIVER'S LICENSE STATE equals 96, 97, then PREVIOUS DWI CONVICTIONS should equal 99.
D040	If DRIVER'S LICENSE STATE equals 96, 97, then PREVIOUS SPEEDING CONVICTIONS should equal 99.
D050	If DRIVER'S LICENSE STATE equals 96, 97, then PREVIOUS OTHER MOVING VIOLATION CONVICTIONS should equal 99.
D060	If NON-CDL LICENSE STATUS equals 1-4, 6, or COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 1-8, and PERSON TYPE equals 01, then AGE should not be less than 015.
D080	If VIOLATION CHARGED equals 01-06, 09, 31-69, 81-91, 98, then RELATED FACTORS-DRIVER LEVEL should not all equal 00, 99.

2018 Consistency Checks

Error Code	Error Test
D090	If VIOLATIONS CHARGED equals 11-19, and PERSON TYPE equals 01, 03, then POLICE-REPORTED ALCOHOL INVOLVEMENT should equal 1, or POLICE-REPORTED DRUG INVOLVEMENT should equal 1.
D093	IF Any VEHICLE LICENSE PLATE NUMBER that does not equal 0000000000, 9999999999, or 9999999998, then VEHICLE LICENSE PLATE NUMBER must be unique within a crash.
D100	If NON-CDL LICENSE STATUS equals 9, then all driver history counters PREVIOUS RECORDED CRASHES should equal 99.
D110	If NON-CDL LICENSE STATUS equals 9, then all driver history counters should equal 99.
D120	If NON-CDL LICENSE STATUS equals 9, then all driver history counters PREVIOUS DWI CONVICTIONS should equal 99.
D130	If NON-CDL LICENSE STATUS equals 9, then all driver history counters PREVIOUS SPEEDING CONVICTIONS should equal 99.
D140	If NON-CDL LICENSE STATUS equals 9, then all driver history counters PREVIOUS OTHER MOVING VIOLATION CONVICTIONS should equal 99.
D150	If the sum of all counters less than 98 is greater than five but less than fifteen, then DATE OF LAST CRASH, SUSPENSION, CONVICTION should not equal DATE OF FIRST CRASH, SUSPENSION, CONVICTION.
D160	If NON-CDL LICENSE STATUS does not equal 9, or COMMERCIAL MOTOR VEHICLE LICENSE STATUS does not equal 99, then DRIVER'S ZIP CODE should not equal 99999.
D170	If DRIVER'S LICENSE STATE does not equal 93-99, Then DRIVER'S ZIP CODE should not equal 99999.
D180	If DRIVER LICENSE STATE equals 95-97, then DRIVER ZIP CODE should not equal 99999.
D260	If NON-CDL LICENSE STATUS equals 9, or COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 99, then COMPLIANCE WITH LICENSE RESTRICTIONS should not equal 0.
D270	If BODY TYPE equals 50-52, 55, 63, 66, 72, or HM1 equals 2, then COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 00.
D280	If VEHICLE CONFIGURATION equals 05-08, 21, or HM1 equals 2, then COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 00.
D300	If HM2 equals 2, then COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 00 or 99.
D310	If HM2 equals 2, then COMPLIANCE WITH CDL ENDORSE-MENTS should equal 1-3.
D320	If DRIVER'S LICENSE STATE does not equal 93-99, then DRIVER'S ZIP CODE should equal 99999 or be a valid ZIP Code for DRIVER'S LICENSE STATE.
D330	If DRIVER PRESENCE equals 0, and REGISTRATION STATE is not equal to 00, 92, 99, then REGISTERED VEHICLE OWNER should equal 3-6.
D340	If NON-CDL LICENSE STATUS equals 1-4, 6, 9, or COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 01-08, 99, then LICENSE COMPLIANCE WITH CLASS OF VEHICLE should not equal 0.
D350	If VIOLATIONS CHARGED equals 71, then NON-CDL LICENSE STATUS should not equal 0, 3, 6, 9.
D380	If NON-CDL LICENSE STATUS equals 9, then LICENSE COMPLIANCE WITH CLASS OF VEHICLE should equal 1, 9.
D390	If NON-CDL LICENSE STATUS equals 0, then LICENSE COMPLIANCE WITH CLASS OF VEHICLE should not equal 2, 3, 8, 9.
D400	If NON-CDL LICENSE STATUS equals 0-4, then LICENSE COMPLIANCE WITH CLASS OF VEHICLE should not equal 3, 8, 9.

2018 Consistency Checks

Error Code	Error Test
D410	If LICENSE COMPLIANCE WITH CLASS OF VEHICLE equals 0, then COMPLIANCE WITH CDL ENDORSEMENTS should not equal 1-3, 9.
D420	If COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 00, then COMPLIANCE WITH CDL ENDORSEMENTS should not equal 1-3.
D430	If COMPLIANCE WITH CDL ENDORSEMENTS equals 1-3, then COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 00.
D440	If COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 00, then BODY TYPE should not equal 50-52, 55, 63, 66, 72, and HM2 should not equal 2.
D450	If COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 00, then VEHICLE CONFIGURATION should not equal 05-08, 21, and HM2 should not equal 2.
D460	If COMMERCIAL MOTOR VEHICLE LICENSE STATUS equals 99, then COMPLIANCE WITH CDL ENDORSEMENTS should equal 0, 3, 9.
D470	If any RELATED FACTORS-DRIVER LEVEL equals 37, then at least one RELATED FACTORS-CRASH LEVEL should equal 20.
D480	If DRIVER'S LICENSE STATE equals 09, 13, 28, 30, 35, 49, then PREVIOUS RECORDED CRASHES should equal 98.
D500	If VIOLATIONS CHARGED equals 05, then at least one RELATED FACTORS-CRASH LEVEL should equal 20.
D530	If any VIOLATIONS CHARGED equals 36 for a vehicle involved in the FIRST HARMFUL EVENT, then RELATION TO JUNCTION (b) should equal 06.
D560	If VIOLATIONS CHARGED equals 66, then BODY TYPE should equal 80-83, 88, 89.
D570	If any VIOLATIONS CHARGED equal 83, then not all occupants of this vehicle should have RESTRAINT SYSTEM/HELMET USE equal 01-05, 08, 10-12, 16, 19.
D580	If VIOLATIONS CHARGED equals 85, then HM1 should equal 2.
D5A0	If VIOLATIONS CHARGED equals 21-25, 29, then SPEEDING RELATED must equal 2-5.
D5B0	If any VIOLATIONS CHARGED equals 11-13, 18, 19, then at least one CONDITION (IMPAIRMENT) AT TIME OF CRASH (D23) should equal 09.
D5E0	If any VIOLATIONS CHARGED equals 00 or 97, then only that one code and no other must be coded for this driver.
D600	If DRIVER HEIGHT/INCHES is greater than 11, then DRIVER HEIGHT/INCHES should not be less than 48.
D610	If DRIVER HEIGHT/FEET is not blank and not equal to 0, then DRIVER HEIGHT/FEET should not be less than 3.
D620	If NON-CDL LICENSE TYPE equals 7, then AGE (for the driver) should equal 014-016.
D630	If NON-CDL LICENSE TYPE equals 2, then AGE (for the driver) should equal 015-017.
D640	If AGE equals 014-017, and PERSON TYPE equals 01, then NON-CDL LICENSE TYPE should equal 2, 7.
D650	If AGE equals 018-120, and PERSON TYPE equals 01, then NON-CDL LICENSE TYPE should equal 1.
D680	If NON-CDL LICENSE TYPE does not equal 0, 9, then NON-CDL LICENSE STATUS should not equal 0, 9.
D690	If NON-CDL LICENSE TYPE equals 2, 7, and COMPLIANCE WITH LICENSE RESTRICTIONS equals 2, then RELATED FACTORS-DRIVER LEVEL should equal 73, 74.
D700	If NON-CDL LICENSE TYPE equals 1, and COMPLIANCE WITH LICENSE RESTRICTIONS equals 2, then RELATED FACTORS-DRIVER LEVEL should equal 74.

2018 Consistency Checks

Error Code	Error Test
D710	If DRIVER'S LICENSE STATE equals 02, 04, 09, 15, 20, 30, 38, 40, then NON-CDL LICENSE TYPE should not equal 2.
D730	If RELATED FACTORS-DRIVER LEVEL equals 73, then COMPLIANCE WITH LICENSE RESTRICTIONS should equal 2, and NON-CDL LICENSE TYPE should equal 2, 7.

E Series

Error Code	Error Test
E01P	If NOTIFICATION TIME EMS equals 9998, then ARRIVAL TIME EMS must equal 9998, and EMS TIME AT HOSPITAL must equal 8888 or 9998.
E02P	If ARRIVAL TIME EMS equals 9998, then EMS TIME AT HOSPITAL must equal 8888 or 9998.
E03P	If ARRIVAL TIME EMS equals 8888, then NOTIFICATION TIME EMS and EMS TIME AT HOSPITAL must equal 8888.
E04P	If NOTIFICATION TIME EMS equals 8888, then ARRIVAL TIME EMS and EMS TIME AT HOSPITAL must equal 8888.
E05P	If EMS TIME AT HOSPITAL equals 9997, then ARRIVAL TIME EMS must equal 9997.
E06P	If ARRIVAL TIME EMS equals 9997, then EMS TIME AT HOSPITAL must equal 9997.
E07P	If ARRIVAL TIME EMS equals 9997, then NOTIFICATION TIME EMS must not equal 8888, 9998.
E08P	If NOTIFICATION TIME EMS is not 8888, 9998, and EMS TIME AT HOSPITAL is not 8888, 9996, 9997, 9998, then ARRIVAL TIME EMS must not equal 9997 or 9998.

F Series

Error Code	Error Test
FA0F	If FIRST HARMFUL EVENT equals blank, then case status is flawed.
FA1F	CRASH TYPE for all in-transport vehicles not involved in the FIRST HARMFUL EVENT must equal 98.
FD0F	If DRIVER PRESENCE is blank, then case status is flawed.
FP0F	If PERSON TYPE is blank, then case status is flawed.
FP1F	If AREAS OF IMPACT - INITIAL CONTACT POINT equals blank, then case status is flawed.
FP2F	If UNIT TYPE equals 1, and CRASH TYPE equals blank, then case status is flawed.
FP3F	If UNIT TYPE is blank, then case status is flawed.
FP4F	If CRASH DATE is blank, then case status is flawed.
FP5F	If CRASH TIME is blank, then case status is flawed.
FP6F	If UNIT TYPE equals 1, and CRITICAL EVENT – PRECRASH (CATEGORY) equals blank, then case status is flawed.
FP7F	If UNIT TYPE equals 1, and CRITICAL EVENT – PRECRASH (EVENT) equals blank, then case status is flawed.
FP8F	If INJURY SEVERITY is blank, then case status is flawed.
FP9F	If PERSON TYPE equals 05, 06, 07, 08 and the PEDESTRIAN/ BIKE - CRASH TYPE equals blank, then case status is flawed.

U390	UNLIKELY: LIGHT CONDITION equals 8.
U410	UNLIKELY: DRIVER'S LICENSE STATE equals 98 if HIT AND RUN does not equal 1.
U420	UNLIKELY: SPECIAL USE equals 98.
U430	UNLIKELY: VEHICLE REMOVAL equals 8.
U440	UNLIKELY: VIOLATIONS CHARGED equals 97.
U450	UNLIKELY: REGISTRATON STATE equals 91 if HIT AND RUN does not equal 1.
U460	UNLIKELY: VEHICLE MODEL equals 997 if HIT AND RUN does not equal 1.
U470	UNLIKELY: BODY TYPE equals 98 if HIT AND RUN does not equal 1.
U480	UNLIKELY: VEHICLE MAKE equals 97 if HIT AND RUN does not equal 1.
U490	UNLIKELY: GVWR/GVCR equals 8 or 9 and VEHICLE MODEL YEAR is greater than 1980 and not equal to 9998 or 9999, and VIN is not equal to 0000000000000000, 8888888888888888, or 9999999999999999, and VIN passes the check digit check (i.e., VIN is a Valid VIN).
U510	UNLIKELY: VEHICLE MODEL YEAR equals 9998 if HIT AND RUN does not equal 1.
U520	UNLIKELY: RESTRAINT SYSTEM/HELMET USE equals 98 if HIT AND RUN does not equal 1.
U530	UNLIKELY: any CONDITION (IMPAIRMENT) AT TIME OF CRASH (D23) equals 03, 05 or 07.
U590	UNLIKELY: CONDITION (IMPAIRMENT) AT TIME OF CRASH (NM14) equals 05 or 07.
U640	UNLIKELY: FIRST HARMFUL EVENT equals 99.
U651	UNLIKELY: SEQUENCE OF EVENTS equals 62, 60 consecutively.
U652	UNLIKELY: SEQUENCE OF EVENTS equals 01, 58 or 58, 01 consecutively.
U653	UNLIKELY: SEQUENCE OF EVENTS equals 65, 69 consecutively.
U680	UNLIKELY: MOTOR CARRIER IDENTIFICATION NUMBER (Identification Number) equals 999999997.
U681	UNLIKELY: METHOD OF ALCOHOL DETERMINATION BY POLICE equals 8.
U682	UNLIKELY: CRITICAL EVENT: PRECRASH (EVENT) equals 08 for this vehicle and CONDITION (IMPAIRMENT) AT TIME OF CRASH (D23) does not equal 01 for this vehicle's driver.
U683	UNLIKELY: OWNERSHIP equals 98 or 99.
U684	UNLIKELY: LAND USE (a) equals 8.
U685	UNLIKELY: FUNCTIONAL SYSTEM (b) equals 98.
U686	UNLIKELY: LAND USE and FUNCTIONAL SYSTEM (a/b) equals 9, 99.
U687	UNLIKELY: TRAILER VEHICLE IDENTIFICATION NUMBER equal 0s for any of the three sets.
U688	UNLIKELY: VEHICLE MODEL equals 707 and VEHICLE MAKE does not equal 77, 98, or 99.
U689	UNLIKELY: ALCOHOL TEST Subfield 3-Test Result equals 001-009.
U690	UNLIKELY: UNIT TYPE equals 2-4 and HIT and RUN equals 1.

U693	UNLIKELY: ALCOHOL TEST Subfield 3-Test Result equals 030-039.

V Series

Error Codes	Error Test
V010	MODEL YEAR should not be less than 1940.
V011	If VEHICLE MODEL YEAR is less than 1950, then VEHICLE IDENTIFICATION NUMBER must equal 0s.
V020	If VEHICLE TRAILING equals 1, then BODY TYPE should not equal 50-52, 55, 80-83, 88-91.
V031	If RELATED FACTORS-VEHICLE LEVEL equals 39, then BODY TYPE should not equal 01, 12, 13, 33, 42, 50-52, 55, 58, 59, 65, 73, 80-83, 88-92.
V032	If RELATED FACTORS-VEHICLE LEVEL equals 40, then BODY TYPE should not equal 01, 12, 13, 33, 42, 50-52, 55, 58, 59, 60-67, 71-73, 78, 80-83, 88-93.
V033	<i>If RELATED FACTORS-VEHICLE LEVEL equals 45, then BODY TYPE must equal 33-39, 67.</i>
V050	If RESTRAINT SYSTEM/ HELMET USE equals 05, 16, 17, 19, 29, then BODY TYPE must equal 80-91.
V051	If BUS USE equals 01, then BODY TYPE should equal 21 or 50 or 55.
V052	If BUS USE equals 04, then BODY TYPE should equal 51.
V053	If BUS USE equals 05, then BODY TYPE should equal 12, 16, 21, 51, 55 or 58.
V054	If BUS USE equals 07, then BODY TYPE should equal 21, 22, 29, 50-59.
V055	If BUS USE equals 00, then BODY TYPE must not equal 50-59.
V056	If SPECIAL USE equals 02, then BUS USE should equal 01.
V057	If SPECIAL USE equals 03, then BUS USE should equal 04-07, 99.
V058	If EMERGENCY MOTOR VEHICLE USE equals 2-6, then SPECIAL USE should equal 04-08, 13.
V059	If BUS USE equals 01, then SPECIAL USE must equal 02.
V060	If SPECIAL USE equals 04, then REGISTRATION STATE should equal 94.
V061	If BUS USE equals 04-07, then SPECIAL USE must equal 03.
V070	If HM1 equals 2, then REGISTRATION STATE should not equal 92.
V090	If HM1 equals 2, then COMMERCIAL MOTOR VEHICLE LICENSE STATUS should equal 06, 99.
V100	If HM1 equals 2, and RELATED FACTORS-DRIVER LEVEL does not equal 19, then COMMERCIAL MOTOR VEHICLE LICENSE STATUS should not equal 01, 02, 05.
V16P	If RELATED FACTORS-DRIVER LEVEL equals 88, then VEHICLE TRAILING must not equal 0, 9.
V170	If NUMBER OF OCCUPANTS is less than 99, and VEHICLE TRAILING equals 0, and BODY TYPE equals 01-05, 07-09, 14, 15, 17, 19, 94, 95, 96, 97, then NUMBER OF OCCUPANTS should not be greater than 8.
V180	If NUMBER OF OCCUPANTS is less than 99, and VEHICLE TRAILING equals 0, and BODY TYPE equals 06, 11, then NUMBER OF OCCUPANTS should not be greater than 12.
V190	If NUMBER OF OCCUPANTS is 01-98, and VEHICLE TRAILING equals 0, and BODY TYPE equals 12, then NUMBER OF OCCUPANTS should not be greater than 15.
V200	If NUMBER OF OCCUPANTS is 01-98, and VEHICLE TRAILING equals 0, and BODY TYPE equals 80-83, 88, 89, then NUMBER OF OCCUPANTS should not be greater than 2.

2018 Consistency Checks

Error Codes	Error Test
V210	If NUMBER OF OCCUPANTS is 01-98, and VEHICLE TRAILING equals 0, and BODY TYPE equals 15, 16, 42, 73, then NUMBER OF OCCUPANTS should not be greater than 12.
V220	If NUMBER OF OCCUPANTS is 01-98, and VEHICLE TRAILING equals 0, and BODY TYPE equals 60-65, 71, 72, 79, then NUMBER OF OCCUPANTS should not be greater than 12.
V230	If NUMBER OF OCCUPANTS is 01-98, and VEHICLE TRAILING equals 0, and BODY TYPE equals 66, then NUMBER OF OCCUPANTS should not be greater than 5.
V240	If NUMBER OF OCCUPANTS is 01-98, and VEHICLE TRAILING equals 0, and BODY TYPE equals 91, then NUMBER OF OCCUPANTS should not be greater than 2.
V250	If NUMBER OF OCCUPANTS is 01-98, and VEHICLE TRAILING equals 0, and BODY TYPE equals 90, then NUMBER OF OCCUPANTS should not be greater than 8.
V260	If NUMBER OF OCCUPANTS is, 01-98, and VEHICLE TRAILING equals 0, and BODY TYPE equals 99, then NUMBER OF OCCUPANTS should not be greater than 5.
V270	Possible error in VIN character types or number of characters.
V280	Possible error in VIN check digit.
V290	If BODY TYPE equals 90, then NUMBER OF OCCUPANTS should equal 01.
V300	Possible error in VIN Production Number.
V310	If SEATING POSITION equals 54 and VEHICLE TRAILING equals 1-4, then AIR BAG DEPLOYED must equal 20.
V320	If BODY TYPE equals 42, 50-79, and SEATING POSITION does not equal 11,13, 98, then AIR BAG DEPLOYED should equal 20, 98.
V330	If SCHOOL BUS RELATED equals 1, then BODY TYPE of at least one of the involved vehicles should equal 50 (School Bus) or SPECIAL USE for at least one involved vehicle should equal 02 - Vehicle Used as School Bus, or BUS USE for at least one vehicle should equal 01.
V340	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 01-05, 07-09, 14, 15, 17, 19, 94, 95, 96, 97, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS should not be greater than 15.
V350	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 06, 11, 16, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS should not be greater than 12.
V360	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 12, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS should not be greater than 15.
V370	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 80-83, 88, 89, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS should not be greater than 02.
V380	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 42, 73, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS should not be greater than 12.
V390	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 60-65, 71, 72, 79, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS should not be greater than 12.
V400	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 66, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS should not be greater than 5.
V410	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 91, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS should not be greater than 2.

2018 Consistency Checks

Error Codes	Error Test
V420	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 90, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS should not be greater than 8.
V430	If NUMBER OF OCCUPANTS is 01-98, and BODY TYPE equals 98, 99, and VEHICLE TRAILING does NOT equal 0, then NUMBER OF OCCUPANTS should not be greater than 5.
V440	If BODY TYPE equals 50, then SCHOOL BUS RELATED should equal 1.
V46P	If VEHICLE CONFIGURATION equals 21, then BODY TYPE must equal 21, 50-52, 55, 58, 59.
V470	If VEHICLE CONFIGURATION equals 01, then CARGO BODY TYPE should be 01-05, 07, 12, 96-98.
V47P	If VEHICLE CONFIGURATION equals 21, then CARGO BODY TYPE must equal 22.
V502	If GVWR/GCWR equals 0, and HM1 equals 1, then VEHICLE CONFIGURATION and CARGO BODY TYPE must equal 00.
V503	If GVWR/GCWR equals 1, then HM2 should equal 2, or VEHICLE CONFIGURATION should equal 20.
V504	If GVWR/GCWR equals 1, then BODY TYPE should equal 01-22, 28-39, 41-49.
V505	If GVWR/GCWR equals 9, then BODY TYPE should not equal 61-63, 66, 67.
V506	If BODY TYPE equals 60, then GVWR/GCWR should equal 2.
V507	If BODY TYPE equals 01-21, 28-30, 33-39, 45-49, then GVWR/GCWR should equal 0, 1.
V50P	If BODY TYPE equals 61, 62, 67, 71, and VEHICLE CONFIGURATION does not equal 04, then GVWR/GCWR must equal 2, 9. (See GVWR/GCWR Remarks on how to use the VIN to determine GVWR.)
V51P	If BODY TYPE equals 63, 66, 72, then GVWR/GCWR must equal 3. (See GVWR/GCWR Remarks on how to use the VIN to determine GVWR.)
V531	If BUS USE equals 01, 04-07, 98, then VEHICLE CONFIGURATION should equal 20, 21, and CARGO BODY TYPE should equal 22.
V532	If VEHICLE CONFIGURATION equals 01, 02, 04-08, 19, 21, then GVWR/GCWR should not equal 0 or 1.
V533	If CRASH TYPE equals 03, 08, 38, 40, 58 or 60, then ATTEMPTED AVOIDANCE MANEUVER must not equal 00 or 01.
V535	If ATTEMPTED AVOIDANCE MANEUVER equals 00, then PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must equal 00.
V538	If JACKKNIFE equals 2, then PRE-EVENT MOVEMENT (PRIOR TO RECOGNITION OF CRITICAL EVENT) must not equal 04, 05, 07-09 or 13 for this vehicle.
V540	If BODY TYPE equals 42, 73, and HM1 equals 1, then GVWR/GCWR should equal 0, 9.
V550	If REGISTRATION STATE equals 93, 94, then REGISTERED VEHICLE OWNER should equal 3, 4.
V560	If SPECIAL USE equals 04, then REGISTERED VEHICLE OWNER should equal 3, and REGISTRATION STATE should equal 94.
V56P	If VEHICLE CONFIGURATION equals 10, then BODY TYPE must equal 01-22, 28-49.
V570	If HM1 equals 2, then REGISTERED VEHICLE OWNER should not equal 0, 1, 2, 4.
V57P	If VEHICLE CONFIGURATION equals 05, then CARGO BODY TYPE must equal 12, 96, and BODY TYPE must equal 66.
V580	If HM1 equals 2, then REGISTERED VEHICLE OWNER should equal 3.
V58P	If VEHICLE CONFIGURATION equals 04, then BODY TYPE must not equal 66.

2018 Consistency Checks

Error Codes	Error Test
V590	If RELATED FACTORS-VEHICLE LEVEL equals 32, then REGISTERED VEHICLE OWNER should equal 1-3.
V59Q	If ATTEMPTED AVOIDANCE MANEUVER equals 99, then DRIVER MANEUVERED TO AVOID should equal 00, 98 or 99.
V592	If RELATED FACTORS-VEHICLE LEVEL equals 37, then REGISTRATION STATE should not equal 00, 92.
V593	If RELATED FACTORS-VEHICLE LEVEL equals 37, then REGISTERED VEHICLE OWNER should not equal 0.
V59P	If VEHICLE CONFIGURATION equals 06, then BODY TYPE must equal 66, and VEHICLE TRAILING must equal 1.
V600	If REGISTERED VEHICLE OWNER equals 9, then REGISTRATION STATE should equal 99.
V60P	If VEHICLE CONFIGURATION equals 07, then BODY TYPE must equal 66, and VEHICLE TRAILING must equal 2.
V61P	If VEHICLE CONFIGURATION equals 08, then BODY TYPE must equal 66, and VEHICLE TRAILING must equal 3.
V620	If CRASH MONTH is between January and March, then the VEHICLE MODEL YEAR should NOT be greater than the CRASH YEAR unless it equals 9998 or 9999 (contact Coding Assistance).
V62P	If CARGO BODY TYPE equals 01-12, 97, 98, and VEHICLE IDENTIFICATION NUMBER does not equal 8s or 9s , then GVWR/GCWR must equal 2, 3.
V630	If REGISTRATION STATE equals 00, 92, then REGISTERED VEHICLE OWNER should NOT equal 5.
V640	If VEHICLE CONFIGURATION does not equal 00, 99, then BODY TYPE should not equal 28, 34, 42, 45, 48, 49.
V64P	If BODY TYPE equals 50-59, 60-72, 78, then GVWR/GCWR must not equal 0-1.
V65P	If GVWR/GCWR equals 2, 3, then VEHICLE CONFIGURATION must not equal 00 and CARGO BODY TYPE must not equal 00.
V660	If CARGO BODY TYPE does not equal 00, 99, then BODY TYPE should not equal 28, 34, 42, 45, 48, 49.
V670	If REGISTERED VEHICLE OWNER equals 1, 2, then REGISTRATION STATE should NOT equal 99.
V68P	If CARGO BODY TYPE equals 12, then VEHICLE TRAILING must equal 5.
V700	If ROLLOVER equals 2, then CRASH TYPE should equal 01-10, 14, 98 or 99 for this vehicle.
V74P	If UNIT TYPE equals 1, and ROLLOVER equals 1, 2, 9, or LOCATION OF ROLLOVER equals 1-7, 9, then at least one SEQUENCE OF EVENTS must equal 01 for this vehicle.
V750	If UNDERRIDE/OVERRIDE equals 1-3, then FIRST HARMFUL EVENT or at least one SEQUENCE OF EVENTS (for this vehicle) should equal 12, 55.
V75P	If ROLLOVER is not blank, then LOCATION OF ROLLOVER must not be blank.
V760	If UNDERRIDE/OVERRIDE equals 4-6, then FIRST HARMFUL EVENT or at least one SEQUENCE OF EVENTS (for this vehicle) should equal 14, 45.
V76P	If ROLLOVER is blank, then LOCATION OF ROLLOVER must be blank.
V770	If UNDERRIDE/OVERRIDE equals 7, then at least one SEQUENCE OF EVENTS (for this vehicle) must equal 12, 55.
V77P	If ROLLOVER equals 1, 2, 9, then LOCATION OF ROLLOVER must equal 1-7, 9.

2018 Consistency Checks

Error Codes	Error Test
V780	If UNDERRIDE/OVERRIDE equals 8, then at least one SEQUENCE OF EVENTS (for this vehicle) must equal 14, 45.
V78P	If ROLLOVER equals 0, then LOCATION OF ROLLOVER must equal 0.
V790	If BODY TYPE equals 20, then VEHICLE CONFIGURATION should equal 00, and CARGO BODY TYPE should equal 00.
V79P	If ROLLOVER equals 2, and FIRST HARMFUL EVENT equals 01, then CRASH TYPE must equal 01-10, 14, 15 or 98 for the vehicle involved in the FIRST HARMFUL EVENT.
V800	If BODY TYPE equals 21, 22, 28, 29, then VEHICLE CONFIGURATION should equal 00, 04, 10, 20, 21, 99, and CARGO BODY TYPE should equal 00, 01, 22, 99.
V810	If BODY TYPE equals 67, and VEHICLE TRAILING equals 1-4, then VEHICLE CONFIGURATION should equal 04, and CARGO BODY TYPE should equal 01, 03, 04, 09.
V840	If BODY TYPE equals 50-59, then VEHICLE CONFIGURATION should equal 21, and CARGO BODY TYPE should equal 22.
V850	If BODY TYPE equals 60, then VEHICLE CONFIGURATION should equal 01, 03, 04, and CARGO BODY TYPE should equal 01.
V860	If HIT-AND-RUN equals 0, and BODY TYPE equals 61-64, then VEHICLE CONFIGURATION should equal 01, 02, 04, and CARGO BODY TYPE should equal 01-10, 12, 96-98.
V870	If BODY TYPE equals 65, then VEHICLE CONFIGURATION should equal 19, and CARGO BODY TYPE should equal 97.
V880	If HIT-AND-RUN equals 0, and BODY TYPE equals 66, then VEHICLE CONFIGURATION should equal 05-08, 19, and CARGO BODY TYPE should equal 01-04, 06-12, 96-98.
V890	If BODY TYPE equals 71, 72, then VEHICLE CONFIGURATION should equal 19, and CARGO BODY TYPE should equal 01-04, 08, 10, 96-98.
V900	If BODY TYPE equals 73, then VEHICLE CONFIGURATION should equal 99, and CARGO BODY TYPE should equal 99.
V910	If BODY TYPE equals 78, then VEHICLE CONFIGURATION should equal 19, and CARGO BODY TYPE should equal 98.
V915	If BODY TYPE equals 67, and VEHICLE TRAILING equals 0, then VEHICLE CONFIGURATION should equal 01, and CARGO BODY TYPE should equal 97.
V920	If BODY TYPE equals 79, then VEHICLE CONFIGURATION should equal 99, and CARGO BODY TYPE should equal 99.
V922	If MAKE equals 98, 99, and MODEL equals ___, then MODEL YEAR should equal ___ (MODEL and MODEL YEAR should be valid according to Vehicle Tables).
V930	If VEHICLE CONFIGURATION equals 00, or CARGO BODY TYPE equals 00, then BODY TYPE should not equal 50-64, 66-72, 78, 79.
V940	If HM1 equals 2, then VEHICLE CONFIGURATION should not equal 00, 99 and CARGO BODY TYPE should not equal 00, 99.
V941	If BODY TYPE equals 90 or 91, then VEHICLE LICENSE PLATE NUMBER should equal 0000000000.
V950	If vehicle MODEL YEAR is less than 1994, and SEATING POSITION equals 31, 33, 39, then RESTRAINT SYSTEM/HELMET USE should not equal 01, 03, and BODY TYPE should equal 12, 15, 16, 19-21.
V960	If REGISTRATION STATE equals 99, then REGISTERED VEHICLE OWNER should equal 5, 6, 9.
V961	If MAKE equals 98, 99, and MODEL equals ___, then BODY TYPE should equal ___ (MODEL and BODY TYPE should be valid according to the Vehicle Tables).

2018 Consistency Checks

Error Codes	Error Test
V980	If BODY TYPE equals 50-52, 55, 58-67, 71, 72, 78, 93, or HM1 equals 2, then MOTOR CARRIER IDENTIFICATION NUMBER must not equal 00-000000000.
V981	If VEHICLE CONFIGURATION equals 00, then MOTOR CARRIER IDENTIFICATION NUMBER should equal 00-000000000.
V982	If MOTOR CARRIER IDENTIFICATION NUMBER does not equal 00-000000000, then VEHICLE CONFIGURATION should not equal 00.
V983	If VEHICLE TRAILING equals 3, then STATE should equal 04, 08, 16, 18, 20, 30-32, 38-41, 46, 49.
V984	If STATE does not equal 04, 08, 16, 18, 20, 30-32, 38-41, 46, 49, then VEHICLE TRAILING should not equal 3.
V985	If VEHICLE TRAILING equals 5, then VEHICLE CONFIGURATION should not equal 00, 10, 19-21.
V986	If VEHICLE TRAILING equals 3, then PSU should equal OH, OK, SD, UT.
V990	If any SEQUENCE OF EVENTS equals 61, then CONTRIBUTING CIRCUMSTANCES, MOTOR VEHICLE should not equal 00.
V991	If VEHICLE TRAILING equals 0, then VEHICLE CONFIGURATION must not equal 04, 06-08.
V992	If VEHICLE TRAILING equals 1, then VEHICLE CONFIGURATION must not equal 01, 02, 05, 07 or 08.
V993	If VEHICLE TRAILING equals 2, then VEHICLE CONFIGURATION must not equal 01, 02, 05, 06 or 08.
V994	If VEHICLE TRAILING equals 3, then VEHICLE CONFIGURATION must not equal 01, 02, 05-07.
V995	If VEHICLE TRAILING equals 4, then VEHICLE CONFIGURATION must not equal 01, 02, 05-08.
V997	If VEHICLE TRAILING equals 6, then VEHICLE CONFIGURATION must not equal 04, 06-08.
V998	If VEHICLE TRAILING equals 9, then VEHICLE CONFIGURATION must not equal 04-07 or 08.
VA00	If HM1 equals 1, then HM2, HM5 must equal 0, HM4 must equal 00 and HM3 must equal 0000.
